7. AT&T LOCAL EXCHANGE SERVICES

7.3 Non-Recurring Charges (Cont'd)

D. Feature Change Charge

Feature change charges are applied to an existing Local Service line when the customer requests to add or change a standard feature. This charge is assessed per-line and for each occurrence. In addition, a Service Order Charge will apply on a per-order basis with any feature change charges.

E. Record Order Charge

A Record Order Charge is applied to existing Local Service Customers who initiated a change to their billing records, including but not limited to a suspension of services, change in mailing address of billing party, change in name of billing party, or an addition or change of calling card or intraLATA calling plan services. A Service Order Charge is not charged with a Record Order Charge. For changes applied to directory listings, see non-recurring directory listing charges in the Rate Schedule.

F. Pre-Installation Cancellation Charge

Pre-Installation Cancellation Charge is assessed when a Customer, after accepting a customer-concurred due (CCD) date from the service provider, cancels the entire Local Service order prior to completed installation. This charge also applies when the Customer accepts only partial installation of the Local Service order at the accepted CCD date and further installation must be scheduled for a later date.

G. 25 Pair Termination Block Charge

A 25 Pair Termination Block Charge is assessed if the Customer requires an RJ21X hand-off device to be installed in order to obtain AT&T Local Exchange Services from the Company.

H. Expedite Charges

Notwithstanding any other provision of this tariff, rates and charges may be increased by the Company to an amount equal to the rate charged by the incumbent LEC for expediting service. The rates and charges are applicable to each AT&T local customer per service expedite

I. PIC Change Charge

A PIC Change Charge applies to existing Local Exchange Service Customers who request a change in their PIC designation for pre-subscription of intraLATA services. The charge is applied on a per-line or per trunk basis. When a change in both the intraLATA and interLATA designation is made, the interLATA PIC Change Charge applies.
