(M)

#### A13.9.4 Per Use Three-Way Calling Service

##### A. General

1. Per Use Three-Way Calling Service is available to all residence and business customers where facilities permit. This service permits use of the three-way calling feature on an as-needed basis, with the subscriber paying the rate shown in A13.9.4.B, for each occasion it is successfully used. Three-way calling permits the subscriber activating the feature to hold an in-progress call and originate a second call while maintaining privacy from the first call, or to add another party for a three-way conference arrangement.
2. Switch-specific technology determines how a subscriber "activates" the feature. In certain switch technology, the feature is activated by "flashing" the serving switch from the subscriber's terminating equipment. ("Flashing" is accomplished via a receiver button, switchhook, hook flash key, flash key, etc.) This technology provides the subscriber with spontaneous control of the feature. Other switch technology requires that the feature be dial-activated by the subscriber prior to establishing the first leg of a three-way call, using a Company-provided code.
3. The per use charge is applied only when a second call is completed and bridged to the first call. Completed calls include, but are not limited to, those calls terminated to telephones, voice messaging systems, answering machines, facsimile machines, modems, etc.
4. The per use charge is in addition to any tariffed switched network usage charge appropriate for the line with which the Per Use Three-Way Calling feature is associated. Such usage may include, but is not limited to, toll charges, local measured service charges, exception calling plan rates, etc. Terms and conditions of these charges are as covered in tariff sections specific to that particular call type, and are not impacted by the application of the per use charge.
5. Access to the per use capability can be restricted at the customer's request at no charge.
