February 19, 2009

Beth Salak, Director Competitive Markets and Enforcement Florida Public Service Commission Attn: Tariff Section 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

Dear Ms. Salak:

Pursuant to Florida Statute 364.051, attached for filing with the Commission are the following pages of the Private Line Services Tariff:

Private Line Services Tariff

Section B3 - Tenth Revised Page 12

- Thirteenth Revised Page 13

- Twelfth Revised Page 14

- Seventh Revised Page 15

- Sixth Revised Page 16

- Fourth Revised Page 17

The purpose of this filing is to increase the monthly rates for Analog Private Line Month to Month service. The effective date of this tariff is February 20, 2009.

Acknowledgement, date of receipt and authority number of this filing is requested.

Your consideration and approval will be appreciated.

Yours very truly,

Jerry D. Hendrix (slg)

Regulatory Vice President Attachments

EXECUTIVE SUMMARY

Description of Proposed Tariff

This Private Line Services Tariff filing increases the rates for Month to Month Analog Private Line service rate elements.

Revenue Information

This filing results in an increase in the Competitive Non-Basic Services basket in the amount of .78%, which is within the allowed change for this basket.

B3. CHANNELS

B3.3 Rate Regulations (Cont'd)

B3.3.3 Mileage Measurements (Cont'd)

A. (Cont'd)

6. Obtain the square root of the result obtained in 5 preceding. This is the rate distance in miles. (Fractional miles being considered as full miles.) (Cont'd)

Difference 104 218 Squared 10,816+47,524 = 58,340

58,340 divided by 10 = 5834

Square root of 5834 = 76.38 = 77 Airline miles

- **B.** When a private line is furnished over facilities which the Company elects to provide on a direct basis and is not routed through a central office, one two-point channel charge will apply. The arrangement is limited to channels not more than one airline mile in length.
- C. On a multipoint circuit, each channel connecting a hubbing wire center with a serving wire center or a hubbing wire center with another hubbing wire center or a serving wire center with another serving wire center is considered a separate channel for which a mileage charge is independently computed. The total charge for a multipoint channel is the combination of individual legs that connect all points and results in the lowest charge. Bridging charges apply when three or more channels connect at the same location.
- **D.** For Series 1000 and 2000 channels the customer may specify the sequence in which the service points are to be connected in which case the rate mileage is the shortest airline mileage determined in accordance with paragraph C preceding which will connect the wire centers of the service points in the specified sequence.

C. Conditioning (Voice Grade Services)

Conditioning provides more specific transmission characteristics for data services. There are two types of C-conditioning and one type of D-conditioning, each with different technical specifications. C-Type conditioning controls attenuation distortion and envelope delay distortion. D-Type conditioning controls the signal to C-notched noise ratio and intermodulation distortion.

Conditioning is charged for on a per Local Channel basis for two-point and multi-point service. For two-point services the parameters apply to each service. For multipoint services the parameters apply to any path between any two service points.

The types and description of the available conditioning options are as follows:

Type Conditioning	Frequency Response Specifications	Envelope Delay Distortion Specification
C1 (two-point or multipoint)	300-2700 Hz,	1000-2400 Hz, less
	-2dB to $+6dB$.	than 1000 microseconds
	1000-2400 Hz,	
	-1dB to $+3$ dB.	
	300-3000 Hz,	
	-3dB to $+12$ dB.	

Note 1: Nonrecurring charges are described in B3.3.1.A. preceding.

Note 2: For use with Type 2230 and 2435 services. Note 3: For use with Type 2432 and 2434 services.

Note 4: For use with Type 2231 service.
