RE: **TL727**

Dear Ms. Salak:

Attached for filing, please find the following revised pages for the Embarq Florida, Inc. General Exchange Tariff. This filing is submitted with a proposed effective date of July 30, 2008. The Company's tariffs are available on its website at www2.embarq.com/tariffs.

Index	Ninth Revised Sheet 7	Section A29 Cont'd	Fourth Revised Sheet 31
	Thirteenth Revised Sheet 9		Third Revised Sheet 32
Section A29	Seventh Revised Contents Sheet 1		Second Revised Sheet 32.1
	Fifth Revised Sheet 25		Fifth Revised Sheet 33
	Third Revised Sheet 26		Third Revised Sheet 33.1
	Fourth Revised Sheet 27		Third Revised Sheet 34
	Fourth Revised Sheet 28		Seventh Revised Sheet 35
	Third Revised Sheet 29	Section A129	Second Revised Contents Sheet 1
	Third Revised Sheet 30		Original Sheet 16

This filing grandfathers the residential portion of ISDN-BRI due to the lack of demand.

Commission consideration and timely approval of these pages are respectfully requested. If you have questions or need additional information regarding this filing, please call me at the number below or Tamela Kelly at 850-599-1029.

Sincerely,

Mary L. Matthews

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾

(C)

1. General

- a. Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line.

ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

b. Service Capabilities

- 1) ISDN-BRI consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI is not available in other channel configurations of 1B+D or 0B+D.
- 2) The B-channel carries voice and/or data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- 3) The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B- channel call on the ISDN-BRI line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- 4) Customers subscribing to ISDN-BRI must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

(M)

(M)

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd) (C)

1. General (Cont'd) (D)

c. Standard Features (D)

- 1) Closed User Group - allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the follow modes:
 - a) Outgoing Access - The data terminal originates outgoing calls only. These calls may terminate within or out of the Closed User Group.
 - b) Incoming Access - The data terminal receives incoming calls only. These calls may terminate within or out of the Closed User Group.
 - c) Incoming Calls Barred - The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - d) Outgoing Calls Barred - The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - e) Unrestricted Access - The data terminal receives and originates both incoming and outgoing calls.
- 2) **Configuration Group - Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.** (M1)

1. General (Cont'd) (D)

d. Service Capability Packages*

1) Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

a) Standard ISDN-BRI (equivalent to Package S without features)
1-B Alternate voice/data
1-B Alternate voice/data

Key Telephone Systems

ISDN may be purchased for a key system from this tariff in the place of a key trunk (for ISDN-capable key systems). If terminating an ISDN-BRI line into key system, the customer shall order one of the following Service Capability Packages:

b) **Package H:**
1-B Voice Only
1-B data only
(Includes Additional Call Offering) (M1)

c) **Package L:**
1-B data only
1-B Alternate voice/data
(Includes Additional Call Offering) (M1)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

⁽¹⁾ **Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.** (N)

e. Optional Services and Features*

- 1) The ISDN-BRI offering provides the customer with the following features, where available.
 - a) Call Pickup - Originating and Terminating - This feature allows a station user to answer any call within an associated predesignated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.
 - b) Flexible Calling - This feature includes:
 - Hold/Retrieve*
 - B-Channel Reservation
 - Three-Way Conference Calling
 - Add-on (previously held conference call)
 - Drop Last Call
 - Transfer
 - No Transfer Restriction
 - Consultation Hold

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

1. General (Cont'd)

e. Optional Services and Features* (Cont'd)

1) (Cont'd)

- c) Six-Way Conference Calling, Drop, Hold, Transfer - This feature allows the customer to add up to five parties to an existing call. This feature is for voice calls only.
- d) Automatic Callback (Repeat Dial) - This feature provides automatic callback to the last dialed number.
- e) Additional Call Offering (ACO) - This feature allows multiple call appearances per telephone number (B-channel) per telephone set. Example: A customer can put up to 3 calls on hold and receive another call on the phone, with all calling parties dialing the telephone number associated with voice on B-channel.
- f) Call Forwarding - This feature provides the customer with Call Forwarding Variable, Call Forwarding Busy and Call Forwarding No Answer with message waiting indicator, either visual or audible.
- g) Calling Number Identification - This feature permits the customer to receive and display the calling party telephone number for calls placed to the customer.
- h) Calling Name Identification - This feature permits the customer to receive and display the calling party name for calls placed to the customer.
- i) Additional Directory Numbers - Additional directory numbers are available on each B-channel in addition to the primary directory number assigned to the B-channel. Additional Directory Numbers are purchased separately.

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129. (N)

1. General (Cont'd)

e. Optional Services and Features* (Cont'd)

1) (Cont'd)

j) Multi-line Hunt Group - This feature is limited to hunting within ISDN-BRI lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.

k) Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering

l) Loop Extension - ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Loop Extension and will extend the ISDN-capability to approximately 36,000 feet.

DIGITAL NETWORK SERVICES

- C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd) (C)
2. **Regulations** (T)
- a. **This service is offered only where facilities and appropriate technology exist.** (M)
- b. Local voice and data calls will be billed on a flat-rate basis, as shown in Section A29.C.3 of this tariff. Toll charges shall apply when data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.
- c. In exchanges where IntraLATA presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI Service. Access via 101XXXX to other Interexchange Carriers is available.
- d. A minimum service period of three months is required.
- e. The Company shall terminate ISDN-BRI Services at the Company Network Interface Device (NID) located at the customer's premises.
- f. Two Primary Directory Numbers will be included with an ISDN-BRI Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section A29.C.4 of this tariff, will apply for each additional number.
- g. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
- h. The provisions for temporary suspension of service, as defined in Section A2 of this tariff, do not apply to ISDN-BRI service.

⁽¹⁾ **Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.** (N)

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd)

(C)

2. Regulations (Cont'd)

- i. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When service is provided from an alternative Central Office, the appropriate Foreign Central Office or Foreign Exchange Service charges for usage and mileage as specified in Section A9, will apply in addition to the rates and charges shown in this section.

Emergency 911 calls, both enhanced and basic, placed over ISDN-BRI lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-BRI lines provisioned via an alternative serving central office.

- j. One directory listing will be provided with ISDN-BRI. Additional listings are available as specified in the Company's General Exchange Tariff.
- k. ISDN-BRI Service will be assessed the appropriate inter-state charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Access Tariff.
- l. ISDN-BRI does not provide for the transmission of packet data on either the D-channel or one of the B-channels.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd) (C)

2. Regulations (Cont'd)

m. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well-being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.

(D)

n. ISDN-BRI lines may be purchased out of this tariff to be associated with Centrex Service, as defined in Sections A11, A12 and A23 of this tariff. Terms and conditions for Centrex Service will apply to these ISDN-BRI lines except as otherwise stated in this section. Optional features compatible with ISDN-BRI may be purchased from the Centrex Optional Features Section of the tariff as well as features unique to ISDN lines from the Optional Features in this section.

(T)

ISDN-BRI lines associated with Centrex Service may be purchased only for those features from the Centrex section of the tariff. ISDN-BRI can be provisioned in the same Centrex customer group if, and only if, the customer group is resident in an ISDN equipped host or remote office. All other Centrex customers can subscribe to ISDN-BRI; however, the service will be provisioned as a stand-alone service and will not be included in the customer group.

o. ISDN-BRI Service may be terminated in key telephone systems in lieu of a key trunk. However, the key telephone system must be ISDN compatible.

(T)

p. ISDN-BRI Service for customers subscribing to Rotary Hunt Service, as defined in Section A3 of this tariff will be provisioned outside the existing hunt group.

(T)

q. **Verification and Emergency Interrupt service is not available for ISDN-BRI Service.**

(M)

(Business Only) ⁽¹⁾ (Cont'd) (C)

(D)

(M)

3. Application of Rates

- a. ISDN-BRI Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the General Exchange Tariff apply per ISDN-BRI B-channel. Toll charges apply when data or voice calls are completed outside the customer's designated local calling area or EAS territory.
- b. The monthly rates for Service Capability Packages are applied on a per package basis.
- c. The ISDN-BRI monthly rates are in addition to the **applicable B-1** (Business One Party) or Centrex access line rate. These rates vary by service area and can be found in Sections **A3 and A11**. (C)
(T)
- d. The Non-Recurring Charge for ISDN Service Capability Package will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the charges initially waived.

However, this termination requirement will not apply when the customer converts to a Next Generation Service Offering of a separately tariffed service, provided that:

- 1) The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater; and
- 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and
- 3) The service orders are for the same customer at the same location.

Integrated Services Digital Network-Basic Rate Interface (ISDN-BRI) to: Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI), Frame Relay Service (FRS) or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering.

⁽¹⁾ **Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.** (N)

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Residence Only)

(O)

Not offered for new installations on and after the obsoleted date. ISDN-BRI will be continued for all residence customers subscribed to the service as of July 30, 2008. Existing lines will be continued for the same subscriber at the same location or until the subscriber discontinues the service. All regulations specified in Section A29 for ISDN-BRI (Business Only) apply to residence customers subscribed to this service, unless specified otherwise within this section. Rates applicable to residence customers are specified herein.

1. Application of Rates

- a. The ISDN-BRI monthly rates are in addition to the applicable R-1 (Residential One Party) access line rate. These rates can be found in Section A3.

2. Rates and Charges

a. Service Capability Packages	S&E Code	Monthly Rate	NRC

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Business Only) ⁽¹⁾

1. General

- a. Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line.

ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

b. Service Capabilities

- 1) ISDN-BRI consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI is not available in other channel configurations of 1B+D or 0B+D.
- 2) The B-channel carries voice and/or data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- 3) The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B- channel call on the ISDN-BRI line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- 4) Customers subscribing to ISDN-BRI must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

~~4) (Cont'd)~~

~~A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.~~

c. Standard Features

- 1) Closed User Group - allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the follow modes:
 - a) Outgoing Access - The data terminal originates outgoing calls only. These calls may terminate within or out of the Closed User Group.
 - b) Incoming Access - The data terminal receives incoming calls only. These calls may terminate within or out of the Closed User Group.
 - c) Incoming Calls Barred - The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - d) Outgoing Calls Barred - The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - e) Unrestricted Access - The data terminal receives and originates both incoming and outgoing calls.
- 2) Configuration Group - Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

~~c. Standard Features (Cont'd)~~

~~2) Configuration Group - Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.~~

d. Service Capability Packages*

1) Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

- a) Standard ISDN-BRI (equivalent to Package S without features)
1-B Alternate voice/data
1-B Alternate voice/data

Key Telephone Systems

ISDN may be purchased for a key system from this tariff in the place of a key trunk (for ISDN-capable key systems). If terminating an ISDN-BRI line into key system, the customer shall order one of the following Service Capability Packages:

b) Package H:
1-B Voice Only
1-B data only
(Includes Additional Call Offering)

c) Package L:
1-B data only
1-B Alternate voice/data
(Includes Additional Call Offering)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

e. Optional Services and Features*

1) The ISDN-BRI offering provides the customer with the following features, where available.

a) Call Pickup - Originating and Terminating - This feature allows a station user to answer any call within an associated predesignated pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the central office switching system.

b) Flexible Calling - This feature includes:
Hold/Retrieve*
B-Channel Reservation
Three-Way Conference Calling
Add-on (previously held conference call)
Drop Last Call
Transfer
No Transfer Restriction

Consultation Hold

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

1. General (Cont'd)

e. Optional Services and Features* (Cont'd)

1) (Cont'd)

- c) Six-Way Conference Calling, Drop, Hold, Transfer - This feature allows the customer to add up to five parties to an existing call. This feature is for voice calls only.
- d) Automatic Callback (Repeat Dial) - This feature provides automatic callback to the last dialed number.
- e) Additional Call Offering (ACO) - This feature allows multiple call appearances per telephone number (B-channel) per telephone set. Example: A customer can put up to 3 calls on hold and receive another call on the phone, with all calling parties dialing the telephone number associated with voice on B-channel.
- f) Call Forwarding - This feature provides the customer with Call Forwarding Variable, Call Forwarding Busy and Call Forwarding No Answer with message waiting indicator, either visual or audible.
- g) Calling Number Identification - This feature permits the customer to receive and display the calling party telephone number for calls placed to the customer.
- h) Calling Name Identification - This feature permits the customer to receive and display the calling party name for calls placed to the customer.
- i) Additional Directory Numbers - Additional directory numbers are available on each B-channel in addition to the primary directory number assigned to the B-channel. Additional Directory Numbers are purchased separately.

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

(Business Only) ⁽¹⁾ (Cont'd)

1. General (Cont'd)

e. Optional Services and Features* (Cont'd)

1) (Cont'd)

j) Multi-line Hunt Group - This feature is limited to hunting within ISDN-BRI lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.

k) Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering

l) Loop Extension - ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Loop Extension and will extend the ISDN-capability to approximately 36,000 feet.

~~2. Regulations~~

~~a. This service is offered only where facilities and appropriate technology exist.~~

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

Effective: July 30, 2008 ~~August 7, 2002~~

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd)

2. Regulations (~~Cont'd~~)

- a. This service is offered only where facilities and appropriate technology exist.
- b. Local voice and data calls will be billed on a flat-rate basis, as shown in Section A29.C.3 of this tariff. Toll charges shall apply when data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.
- c. In exchanges where IntraLATA presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI Service. Access via 101XXXX to other Interexchange Carriers is available.
- d. A minimum service period of three months is required.
- e. The Company shall terminate ISDN-BRI Services at the Company Network Interface Device (NID) located at the customer's premises.
- f. Two Primary Directory Numbers will be included with an ISDN-BRI Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section A29.C.4 of this tariff, will apply for each additional number.
- g. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
- h. The provisions for temporary suspension of service, as defined in Section A2 of this tariff, do not apply to ISDN-BRI service.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

Effective: July 30, 2008 ~~January 22, 1999~~

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd)

2. Regulations (Cont'd)

- i. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When service is provided from an alternative Central Office, the appropriate Foreign Central Office or Foreign Exchange Service charges for usage and mileage as specified in Section A9, will apply in addition to the rates and charges shown in this section.

Emergency 911 calls, both enhanced and basic, placed over ISDN-BRI lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-BRI lines provisioned via an alternative serving central office.

- j. One directory listing will be provided with ISDN-BRI. Additional listings are available as specified in the Company's General Exchange Tariff.
- k. ISDN-BRI Service will be assessed the appropriate inter-state charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Access Tariff.
- l. ISDN-BRI does not provide for the transmission of packet data on either the D-channel or one of the B-channels.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd)

2. Regulations (Cont'd)

m. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well-being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.

~~n. ISDN-BRI Service is available for residence and business service~~

~~n.~~ n. ISDN-BRI lines may be purchased out of this tariff to be associated with Centrex Service, as defined in Sections A11, A12 and A23 of this tariff. Terms and conditions for Centrex Service will apply to these ISDN-BRI lines except as otherwise stated in this section. Optional features compatible with ISDN-BRI may be purchased from the Centrex Optional Features Section of the tariff as well as features unique to ISDN lines from the Optional Features in this section.

ISDN-BRI lines associated with Centrex Service may be purchased only for those features from the Centrex section of the tariff. ISDN-BRI can be provisioned in the same Centrex customer group if, and only if, the customer group is resident in an ISDN equipped host or remote office. All other Centrex customers can subscribe to ISDN-BRI; however, the service will be provisioned as a stand-alone service and will not be included in the customer group.

~~p o.~~ p o. ISDN-BRI Service may be terminated in key telephone systems in lieu of a key trunk. However, the key telephone system must be ISDN compatible.

~~q p.~~ q p. ISDN-BRI Service for customers subscribing to Rotary Hunt Service, as defined in Section A3 of this tariff will be provisioned outside the existing hunt group.

~~r q.~~ r q. Verification and Emergency Interrupt service is not available for ISDN-BRI Service.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Business Only) ⁽¹⁾ (Cont'd)

~~2. Regulations (Cont'd)~~

~~r. Verification and Emergency Interrupt service is not available for ISDN-BRI Service.~~

3. Application of Rates

- a. ISDN-BRI Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the General Exchange Tariff apply per ISDN-BRI B-channel. Toll charges apply when data or voice calls are completed outside the customer's designated local calling area or EAS territory.
- b. The monthly rates for Service Capability Packages are applied on a per package basis.
- c. The ISDN-BRI monthly rates are in addition to the applicable ~~R-1 (Residential One Party)~~, B-1 (Business One Party) or Centrex access line rate. These rates vary by service area and can be found in Sections A3 and A11, ~~A12 and A13~~.
- d. The Non-Recurring Charge for ISDN Service Capability Package will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the charges initially waived.

However, this termination requirement will not apply when the customer converts to a Next Generation Service Offering of a separately tariffed service, provided that:

- 1) The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater; and
- 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and
- 3) The service orders are for the same customer at the same location.

Integrated Services Digital Network-Basic Rate Interface (ISDN-BRI) to: Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI), Frame Relay Service (FRS) or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering.

⁽¹⁾ Effective July 30, 2008, ISDN-BRI is grandfathered for residential subscribers. See Section A129.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)
(Residence Only)

Not offered for new installations on and after the obsoleted date. ISDN-BRI will be continued for all residence customers subscribed to the service as of July 30, 2008. Existing lines will be continued for the same subscriber at the same location or until the subscriber discontinues the service. All regulations specified in Section A29 for ISDN-BRI (Business Only) apply to residence customers subscribed to this service, unless specified otherwise within this section. Rates applicable to residence customers are specified herein.

1. Application of Rates

- a. The ISDN-BRI monthly rates are in addition to the applicable R-1 (Residential One Party) access line rate. These rates can be found in Section A3.

2. Rates and Charges
