SECTION 5- SWITCHED ACCESS RATES

5.1 General

This section contains the specific regulations governing the rates and charges that apply for Switched Access Services.

The Company offers Tandem Switching Access Service, Local Switching Access Service – Direct Connection, and Local Switching Access Service – Indirect Connection.

There are three types of rates and charges that apply to Switched Access Service:

- Non-Recurring Charges: One-time charges that apply for a specific work activity.
- Recurring Charges: Fixed charges apply each month and depend on the number and type of facilities in place.
- Usage Charges: Charges that are applied on a per-message or per-access minute basis. Usage rates are accumulated over a monthly period.
- 5.2 Rate Categories
 - 5.2.1 Tandem Switching Access Service (Originating and Terminating)

Tandem Switching is an access service providing transmission and tandem switching between the Customer designated premises and the Company switch(es) where the Customer's traffic is switched from or to an entity other than an End User for purposes of originating or terminating the Customer's communications. The Tandem Switching Access Service composite rate is comprised of the following rate elements: tandem switching charges, tandem termination charges, common multiplexing and tandem facility mileage charges.

(C)

5.2.2 Local Switching Access Service - Direct Connection (Originating and Terminating)

Local Switching Access Service - Direct Connection is an access service providing the Customer connections to and use of end office switching equipment for the origination or termination of the Customer's communications to the Company's End Users. The Local Switching Access Service - Direct Connection rate consists of end office switching charges and may also include a DS3 trunk port charge. With Direct Connection, Customer is responsible for ordering or providing the DS3 facility to the Company's point of presence in the access tandem serving area. The DS3 trunk port charge applies on an Individual Case Basis when the Customer is not collocated with the Company's switch. The rate will not exceed that of the competing ILEC rate for the same function.

SECTION 5- SWITCHED ACCESS RATES, (Cont'd.)

5.2 Rate Categories, (Cont'd.)

5.2.3 Local Switching Access Service - Indirect Connection (Originating and Terminating)

Local Switching Access Service - Indirect Connection is an access service providing the Customer use of end office switching equipment for the origination or termination of the Customer's communications to the Company's End Users as well as transport to or from the Customer's tandem provider. The Local Switching Access Service - Indirect Connection composite rate is comprised of the following rate elements: end office switching charges, common trunk port, tandem termination charges, common multiplexing and tandem facility mileage charges.

5.2.4 Toll-Free 8YY Data Base Query

The Toll-Free Data Base Query Charge, will apply for each Toll-Free 8YY call query received at the Company's (or its provider's) toll-Free 8YY data base.

5.2.5 Toll-Free 8YY Switched Access Service

The Toll-Free 8YY Switched Access Service is an originating access service in which the Company delivers Toll Free calls to Customers. Rate elements apply as set forth in Section 5.4.5.

5.2.6 Optional Features

Other optional features may be available on an Individual Case Basis.

5.3 Billing of Access Minutes

When recording originating calls over FG Access with multi-frequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over FG Access ends when the originating FG Access entry switch receives disconnect supervision from either the originating End User's or other user's Local Switching Center – indicating the originating End User or other user has disconnected), or the Customer's facilities, whichever is recognized first by the entry switch.
