15 “(12) DISTRIBUTION PIPELINES.—

16 “(A) STUDY.—The Secretary shall conduct
17 a study of methods that may be used under
18 paragraph (3), other than direct assessment, to
19 assess distribution pipelines to determine
20 whether any such method—

21 “(i) would provide a greater level of
22 safety than direct assessment of the pipe-
23 lines; and

24 “(ii) is feasible.

1 “(B) REPORT.—Not later than 2 years
2 after the date of enactment of this paragraph,
3 the Secretary shall submit to the Committee on
4 Commerce, Science, and Transportation of the
5 Senate and the Committees on Energy and

8 United States Code, is amended by adding at the end the
9 following:

10 “(7) EVALUATION OF RISK.—

11 “(A) IN GENERAL.—Not later than 2 years
12 after the date of enactment of this paragraph,
13 the Secretary shall promulgate regulations to
14 ensure that each distribution integrity manage-
15 ment plan developed by an operator of a dis-
16 tribution system includes an evaluation of—

17 “(i) the risks resulting from the pres-
18 ence of cast iron pipes and mains in the
19 distribution system; and

20 “(ii) the risks that could lead to or re-
21 sult from the operation of a low-pressure
22 distribution system at a pressure that
23 makes the operation of any connected and
24 properly adjusted low-pressure gas burning

1 equipment unsafe, as determined by the
2 Secretary.

3 “(B) CONSIDERATION.—In carrying out
4 subparagraph (A)(ii), the Secretary shall ensure
5 that an operator of a distribution system—

6 “(i) considers factors other than past
7 observed abnormal operating conditions (as
8 defined in section 192.803 of title 49, Code
9 of Federal Regulations (or a successor reg-
10 ulation)) in ranking risks and identifying
11 measures to mitigate those risks; and

12 “(ii) may not determine that there are
13 no potential consequences associated with
14 low probability events unless that deter-
15 mination is otherwise supported by engi-
16 neering analysis or operational knowledge.

17 “(C) DEADLINES.—

18 “(i) IN GENERAL.—Not later than 2
19 years after the date of enactment of this
20 paragraph, each operator of a distribution

11 tion to the relevant State authority de-
12 scribed in clause (i), if applicable, an up-
13 dated plan or manual described in that
14 clause by not later than 60 days after the
15 date of a significant update, as determined
16 by the Secretary.

17 “(iii) APPLICABILITY OF FOIA.—Noth-

6 the Secretary or relevant State au-
7 thority with a certification in effect
8 under section 60105 shall review the
9 distribution integrity management
10 plan, the emergency response plan,
11 and the procedural manual for oper-
12 ations, maintenance, and emergencies
13 of each operator of a distribution sys-
14 tem and record the results of that re-
15 view for use in the next review of the
16 program of that operator.

17 “(II) GRACE PERIOD.—For the
18 third, fourth, and fifth years after the
19 date of promulgation of the regula-
20 tions under subparagraph (A), the
21 Secretary—

22 “(aa) shall not use subclause
23 (I) as justification to reduce
24 funding, decertify, or penalize in
25 any way under section 60105,

242

1 60106, or 60107 a State author-
2 ity that has in effect a certifi-
3 cation under section 60105 or an

10 “(III) not less frequently than
11 once every 5 years.

12 “(iii) CONTEXT OF REVIEW.—The
13 Secretary may conduct a review under
14 clause (i) or (ii) as an element of the in-
15 spection of the operator carried out by the
16 Secretary.

17 “(iv) INADEQUATE PROGRAMS.—If the
18 Secretary determines that the documents
19 reviewed under clause (i) or (ii) do not
20 comply with the requirements of this chap-
21 ter (including regulations to implement
22 this chapter), have not been adequately im-
23 plemented, or are inadequate for the safe
24 operation of a pipeline facility, the Sec-

18 tors such as flawed procedures, honest mis-
19 takes, or lack of understanding; and

20 (B) the operators and regulators use the
21 most appropriate tools to fix the deviation, re-
22 turn to compliance, and prevent the recurrence
23 of the deviation, including—

24 (i) root cause analysis; and

1 (ii) training, education, or other ap-
2 propriate improvements to procedures or
3 training programs.

4 **SEC. 206. PIPELINE SAFETY PRACTICES.**

10 the date of enactment of this subsection, the Sec-
11 retary shall promulgate regulations to require an op-
12 erator of a distribution system—

13 “(A) to identify and manage traceable, re-
14 liable, and complete records, including maps
15 and other drawings, critical to ensuring proper
16 pressure controls for a gas distribution system,
17 and updating these records as needed, while col-
18 lecting and identifying other records necessary
19 for risk analysis on an opportunistic basis; and

20 “(B) to ensure that the records required
21 under subparagraph (A) are—

22 “(i) accessible to all personnel respon-
23 sible for performing or overseeing relevant
24 construction or engineering work; and

1 “(ii) submitted to, or made available
2 for inspection by, the Secretary or the rel-
3 evant State authority with a certification
4 in effect under section 60105.

5 “(2) PRESENCE OF QUALIFIED EMPLOYEES.—

6 “(A) IN GENERAL.—Not later than 180
7 days after the date of enactment of this sub-
8 section, the Secretary shall promulgate regula-
9 tions to require that not less than 1 agent of
10 an operator of a distribution system who is
11 qualified to perform relevant covered tasks, as
12 determined by the Secretary, shall monitor gas
13 pressure at the district regulator station or at
14 an alternative site with equipment capable of
15 ensuring proper pressure controls and have the
16 capability to promptly shut down the flow of
17 gas or control over pressurization at a district
18 regulator station during any construction
19 project that has the potential to cause a haz-
20 ardous overpressurization at that station, in-
21 cluding tie-ins and abandonment of distribution
22 lines and mains, based on an evaluation, con-
23 ducted by the operator, of threats that could re-
24 sult in unsafe operation.

1 “(B) EXCLUSION.—In promulgating regu-
2 lations under subparagraph (A), the Secretary
3 shall ensure that those regulations do not apply
4 to a district regulating station that has a moni-
5 toring system and the capability for remote or
6 automatic shutoff.

7 “(3) DISTRICT REGULATOR STATIONS.—

8 “(A) IN GENERAL.—Not later than 1 year
9 after the date of enactment of this subsection,
10 the Secretary shall promulgate regulations to
11 require that each operator of a distribution sys-
12 tem assesses and upgrades, as appropriate,
13 each district regulator station of the operator to
14 ensure that—

15 “(i) the risk of the gas pressure in the
16 distribution system exceeding, by a com-
17 mon mode of failure, the maximum allow-
18 able operating pressure (as described in
19 section 192.623 of title 49, Code of Fed-
20 eral Regulations (or a successor regula-
21 tion)) allowed under Federal law (including
22 regulations) is minimized;

23 “(ii) the gas pressure of a low-pres-
24 sure distribution system is monitored, par-

1 ticularly at or near the location of critical
2 pressure-control equipment;

3 “(iii) the regulator station has sec-
4 ondary or backup pressure-relieving or
5 overpressure-protection safety technology,
6 such as a relief valve or automatic shutoff
7 valve, or other pressure-limiting devices ap-
8 propriate for the configuration and siting
9 of the station and, in the case of a regu-
10 lator station that employs the primary and
11 monitor regulator design, the operator
12 shall eliminate the common mode of failure
13 or provide backup protection capable of ei-
14 ther shutting the flow of gas, relieving gas
15 to the atmosphere to fully protect the dis-
16 tribution system from overpressurization
17 events, or there must be technology in
18 place to eliminate a common mode of fail-
19 ure; and

20 “(iv) if the Secretary determines that
21 it is not operationally possible for an oper-
22 ator to implement the requirements under
23 clause (iii), the Secretary shall require
24 such operator to identify actions in their

1 plan that minimize the risk of an over-
2 pressurization event.”.
