Re: Request for Approval of Modified Water Tariff Sheets  
(First Revised Sheet No. 12.1 and First Revised Sheet No. 13.1)  
Water Tariff of Zellwood Station Co-Op, Inc.

Dear Ms. Bayó:

Enclosed please find the original and three (3) copies of the above-referenced Revised Water Tariff Sheets No. 12.1 and 13.1 of the Water Tariff of Zellwood Station Co-Op, Inc. I am requesting that these Revised Tariff Sheets be accepted, and that one stamped copy of the sheets be returned to the utility in care of our offices, as contemplated in Florida Administrative Code Rule 25-9.004(1). These revised sheets are being filed pursuant to discussions with commission staff to clarify the application of an excessive consumption rule in the water tariff. If the commission staff requires any additional information, please let me know.

Sincerely yours,

Thomas A. Cloud, Esquire

WATER TARIFF

GENERAL SERVICE

RATE SCHEDULE GS

RESTRICTIONS ON USE -    After a minimum of 24 months of operating meters to measure system consumption, the utility reserves the right to audit ERCs. In other words, on or after February 1, 2001, any customer that exceeds 25,000 gallons per month usage shall be charged for that month's water usage based upon an enlarged ERC factor as set forth below:

<u>Meter Size</u>	<u>Monthly Use</u>	<u>ERC Factor</u>
5/8" x 3/4"	25,000 gal.	2
5/8" x 3/4"	36,000 gal.	3
5/8" x 3/4"	48,000 gal.	4
5/8" x 3/4"	60,000 gal.	5

For each additional 10,000 gallons of usage above 60,000 gallons in a month, the customer's ERC factor shall be increased by one (1). The factor will then be multiplied by the flat rate and the surcharge, and the customer shall be charged that amount for that month of excessive usage. By way of illustration, if a customer's monthly usage exceeds 25,000 gallons, but is less than 36,000 gallons, the customer shall pay twice the then current flat rate (now set at \$15.24) and twice the surcharge (now set at \$5.32), which would now equal \$41.12. This section shall be replaced when the utility converts to a consumption-based rate in the next rate case.
