By way of background, KMC Data currently has authority to provide alternative local exchange telecommunications services within the State of Florida pursuant to service authority granted by the Commission on October 29, 2001 in Docket No. 010826-TX. MGC and MG equipment will interconnect with ILEC networks using Inter Machine Trunks (IMT's) at a Point of Presence (POP). At present, KMC Data has no switches or other facilities installed in the State of Florida. KMC Data notes, however, that its network configuration may change as it continues to install and maintain a technically advanced network, which will allow it to
