Good Afternoon, Penny Birch-Williams

We will be placing your comments below in consumer correspondence in Docket Numbers 20190015 to 20190021, and forwarding them to the Office of Consumer Assistance and Outreach.

Have a great day,

Public Service Commission

Subject: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Dear Florida Public Service Commission,

Hi my name is Penny Birch-Williams and I live in Clearwater.

Florida could be a leader in energy efficiency and clean energy, but the profits of people who own the utilities are the priority to those who run them. As a lifelong Florida resident I resent the profiteering at the expense of customers who have no say in how it is run or what we pay. State politicians keep the status quo for their donor buddies in the industry. How about...for a change...do something right for the people and the environment, and say NO to the utilities who only protect their profits.

I am writing to urge you to reject the request by Florida utilities to have a goal of zero (or nearly zero) on energy efficiency for the next ten years.

I am concerned that if the energy efficiency goals are abandoned, the utilities will stop providing the kinds of services that help people lower their power bills. People shouldn't have to choose between paying for food, medicine, or rent and being comfortable in their own homes.

Florida is ranked near the bottom of the nation in terms of energy efficiency — we should be increasing energy

efficiency measures, not abandoning them. We know that increasing energy efficiency is one of the cheapest and easiest ways to fight the global warming that's causing neighborhood flooding and other serious problems in Florida.

When this issue comes back before you, I ask you please to vote to strengthen our energy efficiency goals.

Regards,
Penny Birch-Williams
