**\*Based on the Timeliness™ ranks of the stocks in the industry**

**Noteworthy Rank Changes**

Listed below are some of the stocks whose Timeliness ranks have changed this week. We include mostly rank changes caused by fundamentals such as new earnings reports. Even when a significant change in earnings momentum has been forecast, the stock's rank will not be affected until the actual results, confirming that forecast, are reported. In most cases, we omit stocks that have been bumped up or down in rank by the dynamism of the ranking system.

**STOCKS MOVING UP IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
IDT Corp.	3	2	Surprise factor, earnings turnaround. July quarter 70¢ vs. year ago 67¢. Our estimate was 47¢.	Under Review
Vertiv Holdings	2	1	Dynamism of the ranking system.	

**STOCKS MOVING DOWN IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
Lowe's Cos.	1	2	Dynamism of the ranking system.	

October 21, 2022

Officers, directors, or employees of Value Line, Inc. and its affiliates and subsidiaries ("VLI"), and EULAV Asset Management ("EULAV"), may hold stocks that are reviewed or recommended in this publication. EULAV also manages investment companies and other accounts that use the rankings and recommendations in this publication as part of their investment strategies. These accounts, as well as the officers, directors, employees of VLI, may dispose of a security notwithstanding the fact that The Value Line Investment Survey (the "Survey") ranks the issuer favorably; conversely, such accounts or persons may purchase or hold a security that is poorly ranked by the Survey. Some of the investment companies managed by EULAV only hold securities with a specified minimum Timeliness Rank by the Survey and dispose of those positions when the Timeliness Rank declines or is suspended. Subscribers to the Survey and its related publications as well as some institutional customers of VLI will have access to all updated Ranks in the Survey by 8:00 AM each Monday. At the same time, portfolio managers for EULAV will receive reports providing Timeliness Ranking information. EULAV's portfolio managers also may have access to publicly available information that may ultimately result in or influence a change in rankings or recommendations, such as earnings releases, changes in market value or disclosure of corporate transactions. The investment companies or accounts may trade upon such information prior to a change in ranking. While the rankings in the Survey are intended to be predictive of future relative performance of an issuer's securities, the Survey is not intended to constitute a recommendation of any specific security. Any investment decision with respect to any issuer covered by the Survey should be made as part of a diversified portfolio of equity securities and in light of an investor's particular investment objectives and circumstances. ★ ★ Supplementary Report in this week's issue. For Timeliness, 3-5 year Target Price Range, or Estimated Earnings 12 months to 3-31-23, the word indicates a change since the preceding week. When a diamond ◆ (indicating a new figure) appears alongside the latest quarterly earnings results, the rank change probably was primarily caused by the earnings report. In other cases, the change is due to the dynamics of the ranking system and could simply be the result of the improvement or weakening of other stocks.

Volume LXXVIII, Number 10, Issue 10. The Value Line Investment Survey (ISSN 0042-2401) is published weekly by Value Line Publishing LLC, 551 Fifth Avenue New York, NY 10176 and is accorded expeditious treatment prescribed for newspapers. Subscription rate for one year in the United States and US possessions is \$598. Foreign rates upon request. Periodical Postage Paid at New York, NY and additional mailing offices.

**\*Based on the Timeliness™ ranks of the stocks in the industry**

**Noteworthy Rank Changes**

Listed below are some of the stocks whose Timeliness ranks have changed this week. We include mostly rank changes caused by fundamentals such as new earnings reports. Even when a significant change in earnings momentum has been forecast, the stock's rank will not be affected until the actual results, confirming that forecast, are reported. In most cases, we omit stocks that have been bumped up or down in rank by the dynamism of the ranking system.

**STOCKS MOVING UP IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
CSW Industrials	2	1	Dynamism of the ranking system.	

**STOCKS MOVING DOWN IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
STMicroelectronics	1	2	Dynamism of the ranking system.	

October 14, 2022

THE PUBLISHER IS NOT RESPONSIBLE FOR ANY ERRORS OR OMISSIONS HEREIN. This publication is strictly for subscriber's own, non-commercial, internal use. No part of it may be reproduced, resold, stored or transmitted in any printed, electronic or other form, or used for generating or marketing any printed or electronic publication, service or product.

Officers, directors, or employees of Value Line, Inc. and its affiliates and subsidiaries ("VLI"), and EULAV Asset Management ("EULAV"), may hold stocks that are reviewed or recommended in this publication. EULAV also manages investment companies and other accounts that use the rankings and recommendations in this publication as part of their investment strategies. These accounts, as well as the officers, directors, employees of VLI, may dispose of a security notwithstanding the fact that The Value Line Investment Survey (the "Survey") ranks the issuer favorably; conversely, such accounts or persons may purchase or hold a security that is poorly ranked by the Survey. Some of the investment companies managed by EULAV only hold securities with a specified minimum Timeliness Rank by the Survey and dispose of those positions when the Timeliness Rank declines or is suspended. Subscribers to the Survey and its related publications as well as some institutional customers of VLI will have access to all updated Ranks in the Survey by 8:00 AM each Monday. At the same time, portfolio managers for EULAV will receive reports providing Timeliness Ranking information. EULAV's portfolio managers also may have access to publicly available information that may ultimately result in or influence a change in rankings or recommendations, such as earnings releases, changes in market value or disclosure of corporate transactions. The investment companies or accounts may trade upon such information prior to a change in ranking. While the rankings in the Survey are intended to be predictive of future relative performance of an issuer's securities, the Survey is not intended to constitute a recommendation of any specific security. Any investment decision with respect to any issuer covered by the Survey should be made as part of a diversified portfolio of equity securities and in light of an investor's particular investment objectives and circumstances. ★★ Supplementary Report in this week's issue. For Timeliness, 3-5 year Target Price Range, or Estimated Earnings 12 months to 3-31-23, the row indicates a change since the preceding week. When a diamond ◆ (indicating a new figure) appears alongside the latest quarterly earnings results, the rank change probably was primarily caused by the earnings report. In other cases, the change is due to the dynamics of the ranking system and could simply be the result of the improvement or weakening of other stocks.

Volume LXXVIII, Number 9, Issue 9. The Value Line Investment Survey (ISSN 0042-2401) is published weekly by Value Line Publishing LLC, 551 Fifth Avenue New York, NY 10176 and is accorded expeditious treatment prescribed for newspapers. Subscription rate for one year in the United States and US possessions is \$598. Foreign rates upon request. Periodical Postage Paid at New York, NY and additional mailing offices.

The contents are protected by copyright 2022. Factual material is not guaranteed, but is obtained from sources believed to be reliable. Rights of reproduction and distribution are reserved to the publisher VALUE LINE PUBLISHING LLC.

**The Value Line INFORMATION YOU SHOULD KNOW — Wealth Newsletter** - No matter where you are in life, you can successfully plan and save for the retirement you want. We can help. Each month, you will learn the answers you need to know to basic planning questions.

**Special Situations** - *The Value Line Special Situations Service* is designed for those seeking investment ideas in the small-cap arena that span the range from aggressive to income oriented.

**Select** - Once a month, subscribers receive a detailed report by *Value Line* senior analysts, recommending one stock that has the best upside and risk/reward ratio.

**Value Line Select: Dividend Income & Growth** - A monthly, in-depth report recommending one dividend-paying stock, providing extensive information about the company's finances, prospects, and projected earnings. One alternative selection is also evaluated.

**Value Line Select: ETFs** - Once a month, subscribers receive a thorough report by Value Line senior analysts, recommending one ETF that is expected to outperform the broader market.

**Fund Advisor Plus** - An essential, one-of-a-kind investment guide that recommends a model portfolio of mutual funds based on risk tolerance and time horizon. The service also includes data and analysis on 20,000 mutual funds.

**Options Survey** - Interactive daily analysis and rankings of more than 200,000 Stock and Stock Index Options—now with Bid and Ask Prices and Evaluations.

**The Value Line Climate Change Investing Service** – Subscribers receive an insightful monthly report by *Value Line* analysts that is designed for the climate-conscious, profit-oriented investor. It also includes a managed portfolio of twenty stocks that stand to benefit from business opportunities related to Climate Change.

**The Value Line Mergers & Acquisitions Service** - This service is designed for investors who are interested in mergers & acquisitions. The objective of the publication is to identify companies (one per month) that offer characteristics that would interest larger corporations or private equity firms.

**\*Based on the Timeliness™ ranks of the stocks in the industry**

**Noteworthy Rank Changes**

Listed below are some of the stocks whose Timeliness ranks have changed this week. We include mostly rank changes caused by fundamentals such as new earnings reports. Even when a significant change in earnings momentum has been forecast, the stock's rank will not be affected until the actual results, confirming that forecast, are reported. In most cases, we omit stocks that have been bumped up or down in rank by the dynamism of the ranking system.

**STOCKS MOVING UP IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
Stride, Inc.	2	1	Dynamism of the ranking system.	

**STOCKS MOVING DOWN IN TIMELINESS RANK**

Stock Name	Old Rank	New Rank	Reason for Change	Earnings Est. 12 months to 3-31-23
Qualcomm Inc.	1	2	Dynamism of the ranking system.	

**TIMELY STOCKS IN TIMELY INDUSTRIES**

**BARGAIN BASEMENT STOCKS**

Stocks with current price-earnings multiples and price-to-"net" working capital ratios that are in the bottom quartile of the Value Line universe  
("Net" working capital equals current assets less all liabilities including long-term debt and preferred)

Officers, directors, or employees of Value Line, Inc. and its affiliates and subsidiaries ("VLI"), and EULAV Asset Management ("EULAV"), may hold stocks that are reviewed or recommended in this publication. EULAV also manages investment companies and other accounts that use the rankings and recommendations in this publication as part of their investment strategies. These accounts, as well as the officers, directors, employees of VLI, may dispose of a security notwithstanding the fact that The Value Line Investment Survey (the "Survey") ranks the issuer favorably; conversely, such accounts or persons may purchase or hold a security that is poorly ranked by the Survey. Some of the investment companies managed by EULAV only hold securities with a specified minimum Timeliness Rank by the Survey and dispose of those positions when the Timeliness Rank declines or is suspended. Subscribers to the Survey and its related publications as well as some institutional customers of VLI will have access to all updated Ranks in the Survey by 8:00 AM each Monday. At the same time, portfolio managers for EULAV will receive reports providing Timeliness Ranking information. EULAV's portfolio managers also may have access to publicly available information that may ultimately result in or influence a change in rankings or recommendations, such as earnings releases, changes in market value or disclosure of corporate transactions. The investment companies or accounts may trade upon such information prior to a change in ranking. While the rankings in the Survey are intended to be predictive of future relative performance of an issuer's securities, the Survey is not intended to constitute a recommendation of any specific security. Any investment decision with respect to any issuer covered by the Survey should be made as part of a diversified portfolio of equity securities and in light of an investor's particular investment objectives and circumstances. Value Line, the Value Line logo, The Value Line Investment Survey, Timeliness, and Safety are trademarks of Value Line, Inc. in the United States and other countries. All other trademarks are the property of their respective owners. \*Value Line Arithmetic & Geometric Indices calculated by Thomson Reuters. Information supplied by Thomson Reuters.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Rank stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +24.48% per year. These returns cover a period from January 1, 1988 through December 5, 2022. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations.

<b>CURRENT POSITION (\$MILL)</b>										<b>BUSINESS:</b> Abbott Laboratories discovers, develops, manufactures, and sells health care products worldwide. The company has four reportable segments: Diagnostic Products (37% of 2021 sales); Medical Devices (33%); Nutritional Products (19%); and Established Pharmaceutical products (11%). Completed separation of branded pharmaceuticals business AbbVie (1/13). Completed sale of Abbott Medical Optics (2/17). Acquired St. Jude (1/17) and Alere (10/17). Has about 113,000 employees. Officers and directors own less than 1% of common stock; Vanguard Group, 8.4%; BlackRock, 7.8% (3/22 proxy). Chairman, President & Chief Executive Officer: Robert B. Ford, Inc.: IL. Addr.: 100 Abbott Park Road, Abbott Park, IL 60064. Tel.: 847-937-6100. Internet: www.abbott.com.																																																																																																																																																																																																																																					
<b>ANNUAL RATES</b> Past 10 Yrs. Past 5 Yrs. Est'd '19-'21 of change (per sh) 10 Yrs. 5 Yrs. to '25-'27										<b>Abbott Laboratories delivered better-than-expected third-quarter results.</b> The healthcare giant reported adjusted earnings of \$1.15 a share on total sales of \$10.41 billion, versus \$1.40 on \$10.93 billion in the comparable year-ago period. The declines were largely reflective of weakness in the Nutrition (-15% year over year) and Diagnostics segments (-6%), where performance was hurt by the well-documented manufacturing stoppage initiated in February of certain infant formulas and softening demand of COVID-19-related testing products. On a positive note, the impact of the latter was a bit lighter than anticipated (more below), enabling Abbott to surpass our expectations on both the top and bottom lines. We had been targeting adjusted earnings of \$0.92 a share on total sales of \$9.6 billion. <b>We have increased our full-year estimates.</b> COVID-19-related sales were widely expected to cool in 2022, but with new variants emerging and vaccine effectiveness waning, this revenue stream has proven increasingly sticky for Abbott in recent quarters. Through the first nine months of the year, the company's testing solutions have generated a better-than-anticipated \$7.3 billion in sales, led by strong demand for rapid test offerings including <i>BinaxNOW</i> , <i>Panbio</i> , and <i>ID NOW</i> . Management is now targeting \$7.8 billion in COVID-19-related testing sales in 2022 (previously \$6.1 billion), and upped its adjusted earnings guidance to \$5.17-\$5.23 a share (from at least \$4.90), largely reflecting the increased contribution. Our 2022 share-net call jumps to \$5.25 (previously \$5.05) on the third-quarter beat and improved COVID-19 testing outlook. <b>Earnings and sales are likely to decline in 2023.</b> We look for the COVID-19 tailwind to abate some next year, which should lead to difficult comparisons in the Diagnostics business. There is also some concern that Medical Device sales overseas will continue to be pressured by a stronger dollar and supply challenges in China. All in all, we estimate earnings will pull back to \$4.50 a share in 2023. <b>The stock holds an Above Average (2) rank for Timeliness.</b> Our projections also suggest attractive risk-adjusted total return potential over the next 18 months. <i>Michael Ratty</i> November 11, 2022

Sold to OEMs (original equipment manufacturers) for incorporation into equipment and systems for computer, communications, industrial, instrumentation, military/aerospace, and consumer electronics applications. Foreign business: 67% of sales in '21.										R&D: 18% of sales. '21 depr. rate: 4.7%. Employed 24,700 (2021 10-K). Stockowners: Off. & dirs., less than 1% of common shares outstanding; Vanguard Group, 8.7%; BlackRock, 8.3% (1/22 proxy). Chairman: Ray Stata. President & CEO: Vincent Rocca, Inc.: MA. Address: One Analog Way, Wilmington, MA 01887. Telephone: 781-935-5565. Internet: www.analog.com.			
Current Liab. 1365.0 2770.3 2442.7										<b>ANALOG DEVICES FINISHED A STRONG FISCAL 2022 WITH STELLAR FOURTH-QUARTER RESULTS.</b> (The fiscal year ended October 29th.) The company achieved its seventh consecutive quarter of record sales, which helped to boost the bottom line. All-time highs were achieved in the Industrial, Automotive, and Communications segments, while the Consumer business also posted healthy results. This was no small feat, given economic headwinds that are beginning to manifest, while COVID-related restrictions in China certainly didn't help. The strong growth at the top line helped to lift the operating margin, as fixed costs were spread across a higher sales base.										<b>Earnings per share will probably advance at a mid-teens annual rate, on average, over the pull to 2025-2027.</b> Analog's pristine balance sheet is another plus, and provides for financial flexibility over the long haul. We wouldn't be surprised to see a bolt-on acquisition or two down the road, given the company's sizable cash hoard.			
<b>ANNUAL RATES</b> Past 10 Yrs. Past 5 Yrs. Est'd '20-'22 to '25-'27 of change (per sh) Sales 6.5% 8.0% 8.5% "Cash Flow" 11.5% 15.5% 8.5% Earnings 11.5% 14.0% 11.5% Dividends 10.5% 10.5% 6.0% Book Value 17.0% 24.0% 11.0%										<b>We look for earnings per share to trend modestly higher this year against a very tough comparison.</b> Company-specific fundamentals ought to remain healthy in fiscal 2023, thanks to Analog's focus on higher growth segments of the chip market. However, as noted earlier, economic headwinds have begun to kick up, and many pundits wouldn't be surprised if there was a recession next year. Inflationary concerns have prompted										<b>These shares currently carry our Highest (1) rank for Timeliness.</b> They also offer worthwhile risk-adjusted total return potential over the 18-month and 3- to 5-year time frames. Conservative investors seeking a technology holding to round out their otherwise diversified portfolios would do well to consider these shares at recent valuations.

<b>Business Description:</b> Bristol-Myers Squibb was incorporated in Delaware in August 1933 as successor to a New York business started in 1887. The company was formed by a merger between Bristol-Myers Company and Squibb Corporation on October 4, 1989. The combination was effected through an exchange of 2.4 shares of Bristol-Myers for each share of Squibb. The merger was effected utilizing the pooling-of-interests accounting method.				2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	© VALUE LINE PUB. LLC 25-27

<b>Business Description:</b> Bristol-Myers Squibb manufactures proprietary medical products, ethical pharmaceuticals, diagnostics, infant formula, orthopedic implants, health and beauty aids. Major brand names include: Revlimid, Eliquis, Opdivo, Orencia, Pomalyst, Sprycel, Yervoy, Abiraterone, Empliciti, Rebzoq, Inrebic, Plavix, Avapro, Revyaz, Sustiva, Baraclude, Eribix, and Taxol. Foreign sales represent 64% of '21 total, (45% of op. profit); R&D, 24.8%. '21 depreciation rate: 10.4%. Estimated plant age: 19 years. Has about 27,110 employees. Off. & dir. own less than 1% of stock; Vanguard, 9.0%; BlackRock, 7.6% (4/22 proxy). Chairman and CEO: Giovanni Caforio MD, Incorp.: DE. Address: 430 East 29th street, 14th floor, New York, NY 10016. Tel.: 212-546-4000. Internet: www.bms.com.				1630.4	1641.3	1662.1	1661.0	1664.0	1625.0	1624.0	2251.0	2244.0	2176.0	2120.0	2100.0	1985.0	Common Shs Outst'g D	
<b>For a drug company, Bristol-Myers Squibb has a pretty reliable operating strategy.</b> This is partly due to its huge size. The company sells so many products in so many countries that the deleterious operating effects of misfires are easily smoothed over by diversified operating strength in many other markets. It's also because the company has consistently insisted on maintaining a very strong balance sheet (see Financial Strength rating of A++, and Safety rank of 1). In addition, Bristol has made many acquisitions, some of which may not have been as profitable as anticipated, but they at least have compensated for drops in sales of drugs going off patent. These operating factors have allowed Bristol-Myers to pay out a consistent dividend with a yield that has outlegged the market averages. This is an unusual occurrence for a drug firm, and one that has attracted a number of admirers.				28.7	28.6	43.6	NMF	23.9	24.8	19.1	24.9	--	20.0	25.3	38.0%	47880	Sales (\$mill)	
<b>The one problem has been a stagnating stock price.</b> After reaching a high of \$77.10 a share in 2016, it is only recently that the equity's price has surpassed that level. This was due to higher-than-expected third-quarter results, thanks to				1.83	1.61	2.30	NMF	1.25	1.25	1.03	1.33	--	1.07	1.44	1.44	38.0%	47600	Operating Margin
<b>Eliquis and Opdivo, and increased investor enthusiasm regarding new approvals.</b> However, we doubt this level of enthusiasm will continue (see our 2025-2027 Target Price Range). That's due to the following factors. Revenue from drugs inherited via acquisitions will likely become smaller as acquisitions become scarcer. Also, major drugs are going off patent, specifically Revlimid, Eliquis, and Opdivo. Generic competition in low-tax countries, along with peer competition, is only likely to increase. Lastly, public and private resistance to growing health care costs is rising. This is crimping selling price hikes of all the major drug companies. As a result of these factors, we don't look for the issue's price to match the stock market averages over the pull to 2025-2027.				4.1%	3.2%	2.8%	2.3%	2.4%	2.7%	2.8%	3.3%	3.0%	3.1%	3.0%	3.0%	3.0%	3.0%	Income Tax Rate
<b>This stock is a mainstay of many a portfolio, and will probably remain so.</b> That's because of its reliable operating model, above-average dividend yield and consistently superior financial strength. We don't advise new investors to buy it but there's no reason why existing investors shouldn't retain it.				17621	16385	15879	16560	19427	20776	22561	26145	42518	46385	46525	47600	38.0%	47600	Net Profit Margin

<b>BROADRIDGE FINANCIAL SOLUTIONS IS MEETING EXPECTATIONS.</b> Recurring revenue rose 9% year over year on a constant-currency basis during the September quarter. Adjusted earnings per share of \$0.84 were down 21%, but were just below Wall Street's consensus estimate of \$0.88. Investor communication solutions had another strong quarter, with the biggest driver being new sales, especially in the Fund Solutions and Customer Communications businesses. The latter saw revenue rise 11%, driven by both print and digital products. Position growth remains robust, despite market headwinds, rising 9% for equities and 11% for funds. This was enabled by continued activity in managed accounts on the equity side and strong demand for passive investments on the fund side. Indeed, the segment continued to benefit from increasing investor participation, which is fueling healthy stock record growth. Meanwhile, Capital Markets revenue rose 14% in constant currency. Trading and connectivity solutions continues to perform well owing to greater need for simplifying global trading. <b>Management's expectations remain intact.</b> Given forward testing, Broadridge has good visibility for the next six months, and sees continued growth in investor positions over that period. Thus, management reaffirmed its outlook for this fiscal year (ends June 30, 2023), including 6%-9% constant currency recurring revenue growth, continued margin expansion, and 7%-11% adjusted earnings growth. The current backlog of \$430 million gives us confidence in the outlook for the remainder of the year. <b>These shares are an all around average choice.</b> Providing mission critical services that power investing and governance insulates the company's results through the ups and downs of the financial cycle. As clients seek to reduce costs in response to macroeconomic trends, their need for Broadridge's low cost platform solutions increases. Long term, fintech innovation is forcing banks to digitize, and innovations like managed accounts, zero commission trading, direct indexing, and passive voting ought to continue driving investor participation. Still, the shares seem appropriately valued. <i>Kevin Downing November 18, 2022</i>																												
<b>Business:</b> Broadridge Financial Solutions, Inc. is a leading provider of investor communication services, as well as technology-related solutions for the financial services industry. The bulk of its customers are in the United States, Canada, and the United Kingdom. <b>"Cash Flow" 13.0% 17.5% 7.0%</b>																<b>BUSINESS:</b> CACI International Inc is a provider of expertise and technology to government enterprise and mission customers, supporting national security missions and government modernization/transformation in the intelligence, defense, and federal civilian sectors. Fiscal 2022 revenue by customer type: Department of Defense (70%), Federal Civilian Agencies (25%) and Commercial and other (5%). Has about 22,000 employees. The Vanguard Group, Inc. owns 9.5% of common stock; BlackRock, Inc., 9.5%; Morgan Stanley, 5.9%; FMR LLC, 5.6%; officers and directors, 1.2% (9/22 proxy). President & CEO: John S. Mengucci. Incorporated: Delaware. Address: 12021 Sunset Hills Road, Reston, VA 20190. Tel.: 703-841-7800. Internet: www.caci.com.																																		
<b>Earnings 14.0% 20.5% 7.0%</b>																<b>Shares of CACI International have trended lower in price since our August review.</b> In fact, these shares lost nearly 10% of their market value. Over the same three-month period, the S&P 500 experienced a similar 5%-10% decline. <b>The professional services and information technology company finished the year with lower-than-expected June-period results.</b> (Fiscal years end June 30th.) CACI posted revenue of \$1.64 billion on earnings of \$3.93 per share. The poor showing wasn't too surprising, however, as the company had trouble throughout most of fiscal 2022. In fact, earnings retracted approximately 15% year over year. Management pointed to short-term headwinds alongside the additional expenses related to recent acquisitions in the IT sector as the primary causes. <b>Meanwhile, we have adjusted our top-and bottom-line estimates for fiscal 2023.</b> We now anticipate revenue to come in around \$6.6 billion, previously \$6.7 billion. This change reflects management's lowered guidance and our anticipation of the company struggling with further short-term dynamics. Our forecast also accounts for the favorable fiscal 2023 government budget that is currently moving through congress. The budget includes higher spending in Digital Solutions related to U.S. Defense which would benefit CACI. Too, we now expect the company's earnings to recover towards 2021 levels. Our bottom-line estimate stands at \$18.00 per share, increased from \$17.45, despite rising interest expenses that will be incurred due to the Federal Reserve's fight against inflation. <b>Long-term projections are narrow.</b> There is reason to believe growth will slow in the coming years and there has been a sizeable amount of insider trading sales from officers and directors over the past 12 months. Nonetheless, the stock is trading at a relatively low P/E ratio. <b>We recommend investors look elsewhere.</b> This issue is ranked 3 (Average) for Timeliness. The stock's upside prospects over the 3- to 5-year pull are below average and it lacks a dividend. For these reasons, we do not recommend this stock for most investors at this time.

Much like the other member of the lab duopoly, LabCorp, DGX saw its testing tied to COVID-19 fall off sharply. However, its base business was well ahead of the competition. Base business receipts were slightly above 5% higher year over year (versus around 1% at LabCorp). Investing in advanced diagnostics and consumer-initiated testing has been beneficial, and contributions here should rise as time goes on. All the while, management has been prudent with costs. This has helped combat inflationary pressures, as well as the dropoff at the top line related to the pandemic drifting into the rearview mirror. This expense cutting, coupled with share repurchases, propped up share net during the third quarter. <b>We have ratcheted up our full-year earnings-per-share calls for this year and 2023.</b> On the strength of the September-quarter showing, leadership									
<b>QUARTERLY REVENUES (\$ mill.)<sup>A</sup></b> Cal-ender Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 1891 1953 1956 1926 7726 2020 1822 1827 2786 3002 9437 2021 2720 2550 2774 2744 10788 2022 2611 2453 2486 2260 9810 2023 2190 2250 2350 2310 9100										<b>upped the expected bracket for earnings on an adjusted diluted basis to between \$9.75 and \$9.95. Our new estimate is at the midpoint of this spread. For 2023, we are tacking on a dime, which leaves our call standing at \$8.55 a share. The year-over-year dip is mostly tied to an expected decline in revenues of about \$700 million. A succession plan has come to fruition.</b> Effective in November, Jim Davis succeeded Steve Ruscowski as CEO. Mr. Ruscowski had held that position since 2012 and will remain as chairman through March, 2023. Mr. Davis has been with Quest since 2013, after being the chief executive of a medical device concern and a two-decade career at GE. He has also been elected to the board of directors, expanding that body from 9 to 10. <b>These good-quality shares are not an appealing investment at recent price points.</b> DGX has an untimely (5: Lowest) designation, and does not stand out for appreciation potential in either the 18-month or 3- to 5-year time frame. The yield is several ticks below the average of the stocks in our coverage universe. <i>Erik M. Manning December 2, 2022</i>

<b>CURRENT POSITION (\$MILL)</b>		2020	2021	9/30/22	<b>BUSINESS:</b> Exponent, Inc. is a science and engineering consulting company that provides solutions to complex problems. Its team of scientists, engineers, and business and regulatory consultants bring together more than 90 different technical disciplines to solve complicated issues facing industry and government. The company's services include: analysis of product development, product recall, regulatory compliance, and the discovery of potential problems related to products, people, property, and impending litigation. Has 1,168 employees. Officers & directors own 2.0% of common stock; BlackRock, 15.1%; Vanguard, 10.9% (4/22 Proxy). CEO: Paul R. Johnston Address: 149 Commonwealth Dr., Menlo Park, CA 94025. Tel.: (650) 326-9400. Internet: www.exponent.com.														
Cash Assets	242.5	297.7	148.4	<b>Exponent delivered revenues that were in line with our estimate for the third quarter.</b> The company witnessed strong demand for its consulting services. Practices dealing in the automotive, consumer products, and life sciences sectors were pivotal performers, specifically. The Engineering and Other Scientific segment, which made up about 84% of net revenues, generated a near-7% revenue increase. Litigation, product safety, and recall work (mostly related to pharmaceutical and life science companies) supported the top line, as well. Meanwhile, stock repurchases helped offset margin pressures, and sent earnings higher for the period, as net income came in slightly weaker.															
Receivables	111.6	139.9	166.0	<b>Interest from a diversified client roster should keep revenues on the rise in the year ahead.</b> It ought to help offset potential spending limitations brought about by market-related volatility and a possible recession. Trends surrounding virtual and augmented reality, electric vehicles, and more-precise pharmaceutical and medical devices should support demand for Exponent's analytical data. The company is also making strong efforts															
Inventory	--	--	--	<b>to attract new talent to aid in client acquisition and retention, and is projecting 2% sequential full-time employee growth in the fourth quarter.</b>															
Other	12.7	15.2	18.1	<b>The company maintains a solid financial position.</b> To wit, we are not concerned with Exponent's spending efforts to broaden its headcount. The company may experience some softer utilization owing to foreign currency exchange pressures and inflation. However, it should have no problem maintaining strong operating cash flow. In the third quarter, the figure more than doubled net income. We look for this cash flow generation to support the expansion of the company's various practices moving forward.															
Current Assets	366.8	452.8	332.5	<b>The Timeliness rank of Exponent stock has been lowered a notch, to 4 (Below Average).</b> Shares of the company continue to trade at a premium relative to its peers, and weakening sales momentum should keep them from gaining much ground in the near term. It offers a meager dividend distribution and possesses rather paltry earnings prospects for the 3- to 5-year term, as well.

<b>ANNUAL RATES</b> Past 10 Yrs. Past 5 Yrs. Est'd '19-'21 of change (per sh) 10 Yrs. 5 Yrs. to '25-'27 Sales 4.0% 4.0% 8.5% "Cash Flow" 5.5% 2.0% 7.5% Earnings 7.0% 1.5% 8.0% Dividends 16.0% 7.5% 4.5% Book Value 5.5% 6.5% 7.0%										<b>Ingredion's profits are running a bit ahead of last year's.</b> Indeed, through the first half, share net of \$4.04 was about 4% higher than the 2021 tally of \$3.89. This stemmed partially from a nearly 17% jump in total sales, reflecting a strong price mix. Leadership adds that progress was made in improving the resilience of the supply chain, despite continued global logistics constraints, which enabled the company to better meet customers' changing needs. But cost of sales surged 19% in the period, caused mainly by heightened net corn costs. Inflationary headwinds persisted, too. Nonetheless, it appears that full-year earnings will increase 12%, to \$7.35 a share, relative to 2021's \$6.57 figure. Regarding 2023, share net might advance another 7% or so, to \$7.85, aided to a certain extent by incremental benefits from prior acquisitions.												
<b>QUARTERLY SALES (\$ mill.)</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 1536 1550 1574 1549 6209 2020 1543 1349 1502 1593 5987 2021 1614 1762 1763 1755 6894 2022 1892 2044 2055 2064 8055 2023 2060 2075 2085 2100 8320										<b>Corporate finances remain in sound condition.</b> When the second quarter ended, cash and equivalents were \$322 million. Furthermore, long-term debt sat at a reasonable 36% of total capital, and short-term obligations of \$652 million did not seem to be a big hurdle. Also, there's \$1 billion available via a revolving credit facility maturing in 2026. All things considered, Ingredion should be able to meet its various commitments, which include capital expenditures and dividend payments, for some time.												
<b>EARNINGS PER SHARE A</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 1.53 1.66 1.82 1.60 6.61 2020 1.59 1.10 1.59 1.66 5.94 2021 1.86 2.03 1.61 1.08 6.57 2022 1.92 2.12 1.85 1.46 7.35 2023 2.00 2.01 1.98 1.86 7.85										<b>Good things appear to be in store over the 2025-2027 span.</b> The company is a leading provider of ingredients to some industries with promising demand potential, such as food, beverage, and animal nutrition, with a presence in more than 120 countries. Too, additional innovations are possible, assuming adequate spending on research and development programs. Another positive is ongoing improvements in operating efficiency. Finally, acquisitions are plausible, brought about by the healthy balance sheet.												
<b>QUARTERLY DIVIDENDS PAID B</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2018 .60 .60 .60 .625 2.43 2019 .625 .625 .625 .63 2.51 2020 .63 .63 .63 .64 2.53 2021 .64 .64 .64 .65 2.57 2022 .65 .65 .65 .71										<b>These shares' main attraction is the dividend yield.</b> What's more, we anticipate steady hikes in the distribution over the 3- to 5-year horizon. The payout ratio during that period ought to be around 35%, which is reasonable. But, for now, the equity holds a 4 (Below Average) rank for Timeliness.												

(A) Diluted shares. <b>Business Description:</b> J&J Snack Foods Corp. manufactures nutritional snack foods and distributes frozen carbonated and juice beverages mainly in the United States, Mexico and Canada. It sells to snack bars, food stands, fast food operators, stadiums, sports arenas, warehouse club stores, schools, colleges, movie theaters, and others. In addition, it sells various food products through a chain of specialty snack food retail outlets. Has 4,300 employees. Officers/directors own 20% of company; BlackRock Fund Advisors, 13%; The Vanguard Group, 9%; (12/21 proxy). Incorporated: New Jersey. Pres. & CEO: Dan Fachner. Chairman: Gerald B. Schreiber. Address: 6000 Central Highway, Pennsauken, New Jersey 08109. Telephone: 856-665-9533. Internet: www.jjsnack.com.										129.97	39.4	51.2	2.68	2.2%	VALUE LINE
<b>Management is taking necessary steps to boost profitability.</b> A key objective is to improve manufacturing efficiencies and reduce R&D spending. Elsewhere, J&J is working to expand its pipeline of new business across the Food Service segment, with the recent launch of its churro line at Sonic stores, ICEE expansion, and the introduction of new products during the back-to-school season. A greater marketing emphasis on its pet food category, along with the launch of its new churros brand in the fiscal fourth quarter, should support incremental sales across the Retail unit next year. Too, easing inflationary pressures, M&A synergies, and an overall pickup in consumer confidence, should support healthier bottom-line results next year.										129.97	39.4	51.2	2.68	2.2%	VALUE LINE
<b>The stock is untimely.</b> True, the top notch (1) Safety rank and steady annual dividend growth helps to sweeten the pot. However, the equity's price-to-earnings multiple is overpriced when compared to historical averages and the pull to 2025-2027. Furthermore, 3- to 5-year appreciation potential is subpar.										129.97	39.4	51.2	2.68	2.2%	VALUE LINE

<b>Business Description:</b> Jack Henry & Associates Inc. provides integrated computer systems and services to banks and other financial institutions. It has developed several banking application software systems that it markets, along with computer hardware, to financial institutions. In addition, it performs data conversion, software installation, and software customization for the implementation of its systems. Acquired										106.2	7.4	3.7	50.1	--	50.0	--	--	2	100.1	115.0	75.0	75.0	75.0	75.0	75.0	75.0	Long-Term Debt (\$mill)	Nil

<b>Jack Henry probably started the fiscal year off on a good note (began July 1, 2022).</b> We suspect that the provider of technology services to the banking and financial services arenas likely posted revenues of \$505 million and earnings of \$1.40 per share in the September period. Indeed, these projected figures represent modest annual advances. Likewise, for the full fiscal year, we look for low single-digit top- and bottom-line improvements. Our relatively optimistic outlook is supported by the further global adoption of cloud-based banking and transaction processing services, as well as a healthier margin profile.										11.9%	12.0%	12.5%	13.6%	16.5%	14.9%	14.1%	10.7%	10.9%	13.5%	16.2%	13.5%	13.5%	16.2%	13.5%	13.5%	13.5%	Return on Shr. <b>Jack Henry stock has fallen one notch on our Timeliness Ranking Scale, to 3, and is now pegged as a year-ahead market performer.</b> The equity lacks appeal over the medium and long term, too. At the recent quotation, capital appreciation potential over the 18-month and 3- to 5-year windows is unenticing. All things considered, high-quality Jack Henry shares do not warrant a capital commitment at this juncture.										25%	27%	35%	36%	34%	37%	37%	44%	43%	43%	38%	40%	40%	40%	40%	40%	40%	Retained to Com Eq	14.5%	
<b>Meanwhile, the company ought to remain laser-focused on product development and enhancing service offerings through strategic partnerships.</b> Most recently, Jack Henry bolstered its collaboration efforts with credit card giant Mastercard by providing an all-encompassing view of customer's various financial accounts under one portal. Elsewhere, the company has teamed up with Google Cloud to improve its cloud technology services to financial institutions. In addition, Jack Henry announced plans to develop an advanced financial crimes platform (projected to roll out in 2023) to help banks and financial services providers track and identify fraud.										<b>ANNUAL RATES</b> Past 10 Yrs. <b>QUARTERLY DIVIDENDS PAID B=C</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year										<b>Business</b> : Merck & Co., Inc. is a global health care company that delivers innovative health solutions through its prescription medicines, vaccines, biologic therapies, and animal health products.														
<b>Merck delivered solid third-quarter results.</b> The drugmaker reported adjusted earnings of \$1.85 a share on total sales of \$14.96 billion, versus \$1.75 on \$13.15 billion in the comparable year-ago period.										<b>Capital allocation plans appear to be focused on M&amp;A.</b> Merck recently announced intentions to acquire Imago BioSciences for \$1.35 billion, a move geared toward bolstering its oncology portfolio.														
<b>We have added a nickel to our 2022 earnings call, now \$7.40 a share.</b> Third-quarter results came in ahead of our expectations, fueled in part by stronger growth in Keytruda sales.										<b>The stock holds an Average (3) rank for Timeliness.</b> MRK was one of the top performers in the large pharma space in 2022, as a series of positive earnings reports and pipeline developments helped outweigh broader macroeconomic concerns.														
<b>Merck delivered solid third-quarter results.</b> The drugmaker reported adjusted earnings of \$1.85 a share on total sales of \$14.96 billion, versus \$1.75 on \$13.15 billion in the comparable year-ago period.										<b>Michael Ratty</b> December 30, 2022

<b>ANNUAL RATES</b> Past 10 Yrs. Past 5 Yrs. Est'd '19-'21 of change (per sh) 6.5% 7.5% 7.0% Revenues 12.5% 16.5% 8.0% "Cash Flow" 14.0% 18.0% 10.5% Earnings 37.5% 12.0% 10.5% Dividends -- -- NMF Book Value -- -- NMF				<b>Motorola Solutions is executing well.</b> Its decision to pay premiums for semiconductors to ensure adequate supply enabled it to capitalize on strong demand resulting from a robust funding environment. Price increases also helped the radio and surveillance camera businesses grow 9% and 33% respectively in the September quarter, offsetting headwinds from a stronger U.S. dollar. The Software and Services division also performed well, with its top line rising 8%. Total revenue grew 13%, causing the operating margin to rise 220 basis points year over year, while adjusted earnings per share were up 28%. <b>The lucrative Airwave contract is in jeopardy.</b> The competition regulator in the United Kingdom, The Competition and Markets Authority (CMA), concluded that the company acted as a monopoly and for years has been overcharging the U.K. government for operating the Motorola-owned emergency services network called Airwave. The service accounts for around 20% of pre-tax profit and was supposed to already have been replaced by the new Emergency Services Network (ESN) in 2019. Motorola is also a vendor for ESN,						
<b>QUARTERLY REVENUES (\$ mill.)</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 1657 1860 1994 2377 7887 2020 1655 1618 1868 2273 7414 2021 1773 1971 2107 2320 8171 2022 1892 2140 2373 2528 8950 2023 2080 2285 2540 2745 9650				<b>but, leadership believes that it's likely to exit the \$65 million per year annual contract earlier than the 2024 expiration.</b> Further, the CMA proposed restricting the amount Motorola is allowed to charge for Airwave to around \$200 million per year, or roughly half what it is currently getting. Motorola is scheduled to start renegotiating its Airwave contract extension in early January. We think the most likely outcome in this scenario is a cap on the deal, but less than what the U.K. government currently seeks. <b>These shares do not stand out at recent price levels.</b> Solid supply chain execution and higher inventory is helping Motorola navigate a continually challenging environment to meet record demand. The current record backlog positions MSI well for another year of strong revenue and earnings growth in 2023. The outlook still assumes \$150 million of higher costs related to the procurement of semiconductors from secondary markets at a premium. Nonetheless, the potential headwind from Airwave and the relatively high price to earnings ratio leave us sidelined. <i>Kevin Downing December 9, 2022</i>

Has two segments: Petroleum Additives (99% of '21 revenues) provides lubricant, engine oil, driveline, industrial, and fuel additives under the HITEC, GREENBURN, TecGARD, BioTEC, and MMT brands and TEL name. Other (1%) sells high-octane fuel.												
<b>QUARTERLY REVENUES (\$ mill.)</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 536.6 563.4 555.8 534.4 2190.2 2020 559.4 410.8 512.9 527.8 2010.9 2021 566.6 590.7 622.2 576.6 2356.1 2022 662.6 723.6 696.0 597.8 2680 2023 580 570 550 530 2230										<b>Higher selling prices enabled New Market to post good third-quarter results.</b> Sales rose 11.9%, and share net was up 31.7%. The price hikes were partially offset by higher raw material costs, specifically oil, and greater supply-chain expenses. NewMarket tends to rely on only a few vendors. It mitigates this risk by accumulating large supplies of critical items in inventory. All NewMarket's largest competitors in the petroleum additive industry also raised their selling prices. These companies include Dow Chemical, Oronite, Clariant, Lubrizol, and BASF. They were able to do this because demand was strong, and barriers to entry are very high.												
<b>EARNINGS PER SHARE A</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 5.56 6.63 6.06 4.48 22.73 2020 7.67 2.08 8.77 6.12 24.64 2021 6.38 4.75 4.80 1.65 17.71 2022 5.75 6.54 6.32 5.39 24.00 2023 5.20 5.00 5.00 4.50 19.70										<b>NewMarket basically relies on the creation of an increasing number of internal combustion engines.</b> Over the years, these engines have become highly efficient and more environmentally friendly. As a result, the amount of fuel additives and lubricants they use has declined. In order for NewMarket and its petroleum additive peers to make money, more engines need to be built. We think the global growth rate of such engines is likely to decline. Over the next few years, the rise of battery-driven electric engines is expected to grow, as should the push to eradicate greenhouse gas emissions, many of which emanate from internal combustion engines.												
<b>QUARTERLY DIVIDENDS PAID B</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2018 1.75 1.75 1.75 1.75 7.00 2019 1.75 1.75 1.75 1.90 7.15 2020 1.90 1.90 1.90 1.90 7.60 2021 1.90 1.90 1.90 2.10 7.80 2022 2.10 2.10 2.10 2.10										<b>Investors appear to have taken note of this long-term trend.</b> The stock price peaked at \$505.20 a share in November, 2019. That year, net profit was \$254.3 million. This year, we are looking for a net profit of \$235 million, which isn't far below the 2019 tally. Still, since 2019, the share price has dropped about 200 points, indicating that investors don't have much faith in the future of the company. Management has been trying to keep investors interested by continuing to hike the dividend and buying back shares, but the writing is on the wall.												
<b>QUARTERLY DIVIDENDS PAID B</b> Cal-endar Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2018 1.75 1.75 1.75 1.75 7.00 2019 1.75 1.75 1.75 1.90 7.15 2020 1.90 1.90 1.90 1.90 7.60 2021 1.90 1.90 1.90 2.10 7.80 2022 2.10 2.10 2.10 2.10										<b>We don't advise a new investment here.</b> Given the increasing number of higher interest-paying investment vehicles (due to rising interest rates), this stock isn't worth buying for the dividend yield. And the stock itself is already trading within our Target Price Range.

<b>CURRENT POSITION (SMILL)</b>										2020					2021					9/30/22					BUSINESS:					Old Dominion Freight Line, Inc. is one of the largest North American less-than-truckload (LTL) motor carriers. Provides regional, inter-regional, and national LTL service and value-added logistics services from a single integrated organization. Revenue is generated primarily from customers throughout the U.S. and North America. In 2021, the company's largest customer accounted for 5.4% of revenues. Owned 10,403 tractors, 41,220 trailers and 251 service centers as of 12/31/21. Has about 23,665 employees. Off/dir. own 10.3% of common stock; The Vanguard Group, 9.4% (4/22 Proxy). Chairman: David S. Congdon. CEO & Pres.: Greg C. Ganit. Inc.: VA. Address: 500 Old Dominion Way, Thomasville, NC 27360. Tel.: (336) 889-5000. Internet: www.odfl.com.																																																																										
Cash Assets										731.7					717.0					375.6					In fact, LTL shipments and LTL shipments per day each fell more than 4% during the September quarter, and with the economy possibly heading into recession, we would not be surprised if these metrics worsen over the next six to 12 months. The Global Port Tracker report, issued by the National Retail Federation, projects that imports into major U.S. seaports will be down 4% in the second half after expanding 5.5% year to year, during the first six months of 2022.																																																																															
Receivables										444.7					567.5					This cyclical stock does not stand out. It is ranked 4 (Below Average) for Timeliness and offers below average appreciation potential for both the 18-month and 3- to 5-year time horizons. We don't see a near-term reason to jump aboard here, given how closely the company's performance is tied to the health of the U.S. economy. As noted above, if the economy was to fall into a recession, it would likely reduce the need for freight shipping services. That said, those investors who are risk averse may like Old Dominion stock's below-market Beta, high Price Stability score, and Safety rank of 1 (Highest).

<b>CURRENT POSITION (SMILL.)</b> 2021 2022 8/31/22																			
<b>BUSINESS:</b> Oracle Corporation provides products and services that address all aspects of corporate information technology environments. Oracle's products are delivered via a range of deployment models, including on-premise, cloud-based, and hybrid. 2022 revenue breakdown: cloud services and license support, 70.9%; cloud license and on-premise license, 13.9%; hardware systems, 7.5%; Services, 7.6%. Foreign sales, 44.1%. R&D, 17.0% of 2022 sales. Employed 143,000 at 5/31/22. Stock owners: Lawrence J. Ellison, 42.9%; other officers & directors, 0.8%; one fin'l inst.: 5.3% (9/22 proxy). Chairman & CTO: Lawrence J. Ellison; CEO: Safra A. Catz. Inc.: DE. Address: 2300 Oracle Way, Austin, TX 78741. Telephone: 737-867-1000. Internet: www.oracle.com.																			
<b>Shares of Oracle have been mostly rangebound since our August review.</b> But year to date, they have lost roughly a quarter of their value. The stock has matched the general activity of the S&P 500 over the same three-month period. <b>The cloud computer software products and services company posted solid August-period results.</b> Starting its fiscal year off well, quarterly revenue increased to roughly \$11.5 billion, marking a year-over-year growth rate of nearly 18%. The top line was weighed down slightly by Oracle's decision to discontinue its service for Russian customers. Also, currency headwinds continue to hurt its financial results. In line with this, earnings came in at \$1.03 a share. The bottom line was impacted negatively by higher-than-normal operating expenses related to the integration of Cerner, a recent acquisition. Cerner is a cloud-based electronic medical records (EHR) software used by healthcare businesses. Oracle also repurchased 7.5 million shares in the quarter, totaling \$559 million. <b>Meanwhile, Oracle's continued innovation in the multi-cloud era</b> should benefit the company's future growth. Multi-cloud services lower barriers of entry and will enable businesses more freedom in choosing the best platform option for the situation, resulting in a broader range of potential clients. We expect to see a significant increase in the company's top line for 2023 to \$49.7 billion, which suggests a 15%-20% growth rate. This reflects continued double digit growth in the cloud service industry in the coming year. We anticipate the bottom-line contribution from Cerner will advance as it will likely benefit from economies of scale related to Oracle's large customer base. In line with this, we expect earnings of \$5.25 per share. <b>This issue has some investment appeal.</b> Shares of ORCL are currently ranked 3 (Average) for Timeliness. And the dividend yield is below the Value Line median. Nonetheless, the stock has a Safety of 1 (Highest) and has appealing appreciation potential over the 3- to 5-year time frame. However, note that the company holds a level of debt that is larger than the value of its capital. <i>Josh Gribben November 4, 2022</i>

<p><b>BUSINESS:</b> The Progressive Corporation is an insurance holding company that writes standard and nonstandard (i.e., high risk) private passenger automobile coverage. Also writes recreational vehicle, mobile home, nonstandard commercial vehicle, and credit-related insurance. Progressive has a significant presence in Florida, Texas, California, New York, Georgia, and Michigan, among other states. Has 43,326 employees. Officers and directors control less than 1% of common stock outstanding; The Vanguard Group, 8.1%; BlackRock, 7.8% (3/22 Proxy). President and Chief Executive Officer: Tricia Griffith, Incorporated. OH. Address: 6300 Wilson Mills Road, Mayfield Village, Ohio 44143. Telephone: 440-461-5000. Internet: www.progressive.com.</p>																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																					
<p><b>Progressive is on pace for a solid 2022.</b> On point, earnings per share clocked in at \$0.49 on an operating basis during the September quarter, which compares favorably to the previous year's tally. Net premiums earned increased 9% on a year-over-year basis to just under \$12.4 billion, thanks to new business wins and price increases on existing accounts. The combined ratio increased slightly from 100.4% to 99.2%. This implies that Progressive inked \$0.80 in pretax profits for every \$100 in policies insured. This wasn't a bad showing, considering the third quarter generally has the highest number of accidents due to a greater number of drivers on the road (due to schools being out on summer vacation). The auto insurer has also had to deal with significant cost inflation, which has put a damper on margins. While the company has been able to pass along some of the higher expenses to consumers, there is generally a lag with such actions.</p>																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																					
<p><b>Progressive's earnings are likely to advance at a mid-single-digit clip, on average, over the pull to 2025-2027.</b> A healthy balance sheet gives us increased confidence in our long-term projections. <b>These shares are a solid choice for momentum-based investors, based on their favorable Timeliness rank.</b> However, when looking at things through a 3- to 5-year lens, the situation isn't as compelling. Long-term appreciation prospects are limited at the recent valuation.</p>																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																					
<p><b>We look for an even more pronounced uptick at the bottom line next year, assuming a normal level of catastrophes.</b> Progressive announced</p>

<p><b>BUSINESS:</b> Post Holdings is a consumer packaged goods holding company, operating in the center-of-the-store, refrigerated, foodservice, food ingredient, and convenience nutrition categories. It has four operating units: Post Consumer Brands, Weetabix, Foodservice, and Refrigerated Retail. Brands include: <i>Honey Bunches of Oats</i>, <i>Shredded Wheat</i>, <i>Post Raisin Bran</i>, <i>Malt-O-Meal</i>, and <i>Bob Evans</i>. Spun off from Ralcorp Holdings, 2/12; acquired Michael Foods, 6/14; MOM Brands, 5/15. Spun off BellRing, 3/22. Off./dir. own 9.6% of common stock; Route One Investment Co., 11.1% (12/21 Proxy). Has 10,735 employees. CEO &amp; Pres.: Robert V. Vitale, Inc.: MO, Addr.: 2503 S. Hanley Road, St. Louis, MO 63144. Telephone: (314) 644-7600. Internet: www.postholdings.com.</p>																																																				
<p><b>Fiscal 2022 (ended September 30th) was a transitional year for Post Holdings.</b> During the 12-month period, the company was working on the integration of five businesses acquired since early calendar 2021, including the operations of Peter Pan nut butter and Egg Beaters. Post Holdings also spun off its BellRing Brands (active nutrition) operations to its shareholders and sold its Willamette Farms business. The transactions, which resulted in a gain of \$9.99 a share during the first nine months of this fiscal year, have rendered the recent year-to-year comparisons unreliable.</p>																																																				
<p><b>The June-quarter performance had some bright spots.</b> The most notable figure was a more-than-20% jump in the top line, to \$1.5 billion. In general, the results reflected pricing actions across the business and the ongoing demand recovery from the foodservice sector. The Post Consumer Brands business, which is the company's largest segment, recorded a 22.6% top-line advance, fueled by pricing actions and a nearly 14% increase in volume (+7.4% excluding the aforementioned acquisitions and sales). Management noted strong showings from the <i>Peter Pan</i> nut butters, <i>Malt-O-Meal</i> bag cereals, and <i>Honey Bunches of Oats</i> and <i>Pebbles</i> cereal lines. However, higher raw material, freight, fuel, and labor costs, much of which was driven by supply-chain disruptions and labor shortages, continued to weigh on the bottom line. Still, for the three-month period, Post Holdings posted adjusted share earnings of \$0.69, which exceeded our estimate of \$0.60. <b>We expect share-net growth to resume in fiscal 2023.</b> Our assumption is based on more continuity developing between the old and new businesses, which should result in more targeted spending on product innovation and advertising. Too, we expect some moderation in input ingredient costs. Based on these factors, we expect earnings to rebound by more than 70%, to \$2.75. <b>This unranked stock has below average 3- to 5-year appreciation potential.</b> We think there are better options in the consumer staples space for conservative investors looking for a holding that will exhibit safety qualities in a turbulent broader market.</p>

<b>BUSINESS:</b> RLI Corp., through its subsidiaries RLI Insurance and Mt. Hawley, writes multiple lines of insurance on an admitted basis in all 50 states. Also underwrites specialty property and casualty insurance on an admitted basis and excess and surplus business on a non-admitted basis. Underwrites earthquake risks (in California). Other companies in the group include: Replacement Lens, Inc.; Li-				<p>ense Express Services, Inc. Has 913 employees. State Street owns 10.0% of common stock; BlackRock 7.9%; Neuberger Berman 7.9%; officers &amp; directors, 5.7% (3/22 proxy). President and Chief Executive Officer: Craig Kliever, Incorporated: Illinois. Address: 9025 North Lindbergh Drive, Peoria, Illinois 61615. Telephone: 309-692-1000. Internet: www.rlicorp.com.</p>																																																																																																																																																																																																																																																		
<b>RLI is on pace for a pretty good year in 2022, despite a hiccup during the third quarter.</b> Looking at it with more granularity, operating earnings per share during the third quarter dialed in at \$0.50, which was a sharp decline from the previous year's \$0.65. This doesn't come as much of a surprise to us, given that Hurricane Ian wreaked havoc across the southeastern United States, particularly Florida. In fact, losses from third-quarter hurricanes reduced underwriting profits nearly \$35 million on a year-over-year basis. This resulted in a notable uptick in the combined ratio (from 94.6% to 97%) relative to last year. This still implies underwriting profitability, however, and is based on external factors (hurricane activity) rather than company-specific fundamentals. Overall, the company is heading toward a solid year-over-year earnings improvement in 2022. We believe this reflects the company's stringent underwriting standards and a rising interest-rate environment, which has propped up bond yields.				<p><b>year. Up until the third quarter, RLI, as has been the case with many insurers, had been firing on all cylinders. Hence, we believe this will make for a difficult comparison next year. Though we believe fundamentals will remain healthy in 2023, it might be tough for significant profit improvement. One potential bright spot for ample improvement is investment income. With interest rates likely to remain at relatively high levels over the next year or so, this should result in healthy bond yields over that span.</b></p> <p><b>Earnings per share are poised to advance at a low double-digit clip, on average, over the pull to 2025-2027.</b> Our optimism is based on a decent economy over that period.</p> <p><b>Though we like the RLI story, these shares don't stand out from the pack at the recent price.</b> Indeed, capital gains potential is unexciting for both the 18-month and 3- to 5-year pulls. Also, these shares are ranked to be market laggards, based on our Timeliness Ranking System. We suggest new accounts wait for a better entry point before committing funds.</p> <p><b>We look for a solid, though less impressive, bottom-line showing next</b></p> <p>Alan G. House December 2, 2022</p>

Has over 500 locations (including franchises) in the U.S., Canada, Europe, Latin America, the Caribbean, the Middle East, and Asia. Commercial and residential pest control account for 81% of revenues, and the balance is mainly from the termite business.         </td> </tr> <tr> <td colspan="21"> <b>Rollins posted better-than-anticipated third-quarter results.</b> The top line grew 12% year over year, to \$729.7 million, thanks to double-digit growth across all major service lines. Moreover, the bottom line rose 16% over the previous-year tally, to \$0.22 per share. Looking at revenues, Residential Pest Control gained 9.8%, Commercial Pest Control advanced 11.4%, and the Termite line increased 18.9%. The company benefited from ongoing investments in technology and current labor retention plans. Nonetheless, material and supply costs remained slightly elevated during the quarter due to prevalent supply-chain issues in the termite business. Rollins also experienced higher fuel costs in the September period.         </td> </tr> <tr> <td colspan="21"> <b>The company has to keep navigating operating challenges in the near term.</b> The pest controller has been facing inflationary cost pressures due to prevalent supply chain issues. To address this problem, the company is actively revising pricing within all brands and is seeking alternate suppliers. All told, we estimate 2022 and 2023 share earnings to clock in at \$0.75 and \$0.85, respectively.         </td> </tr> <tr> <td colspan="21"> <b>Acquisitions are a key part of Rollins' growth strategy.</b> The company is seeking opportunities to strengthen its business domestically and internationally. Over the past nine months, Rollins purchased 27 businesses. During the third quarter, the company invested about \$61 million in acquisitions. In all, the pest controller is expected to remain active on the acquisition front in the foreseeable future, as it is a quick way to grow assets and expand its foothold in new markets.         </td> </tr> <tr> <td colspan="21"> <b>The long-term story here is encouraging.</b> The company is investing in training technicians, which should boost efficiency. Management is also increasing the number of hybrid and electric vehicles in its fleet to optimize cost savings.         </td> </tr> <tr> <td colspan="21"> <b>The company will have a new chief executive officer next year.</b> Jerry Gahlhoff, the current chief operating officer and president, will succeed Gary Rollins on January 1, 2023. Mr. Gary Rollins will remain as the chairman.         </td> </tr> <tr> <td colspan="21"> <b>Neutrally ranked shares of Rollins have limited long-term capital appreciation potential, at present.</b> </td> </tr> <tr> <td colspan="21"> <i>Emma Jalees November 18, 2022</i> </td> </tr> <tr> <td colspan="21"> <table border="1"> <tr> <th>Cal-endar</th> <th>Mar.31</th> <th>Jun.30</th> <th>Sep.30</th> Has over 500 locations (including franchises) in the U.S., Canada, Europe, Latin America, the Caribbean, the Middle East, and Asia. Commercial and residential pest control account for 81% of revenues, and the balance is mainly from the termite business.																					<b>Rollins posted better-than-anticipated third-quarter results.</b> The top line grew 12% year over year, to \$729.7 million, thanks to double-digit growth across all major service lines. Moreover, the bottom line rose 16% over the previous-year tally, to \$0.22 per share. Looking at revenues, Residential Pest Control gained 9.8%, Commercial Pest Control advanced 11.4%, and the Termite line increased 18.9%. The company benefited from ongoing investments in technology and current labor retention plans. Nonetheless, material and supply costs remained slightly elevated during the quarter due to prevalent supply-chain issues in the termite business. Rollins also experienced higher fuel costs in the September period.																					<b>The company has to keep navigating operating challenges in the near term.</b> The pest controller has been facing inflationary cost pressures due to prevalent supply chain issues. To address this problem, the company is actively revising pricing within all brands and is seeking alternate suppliers. All told, we estimate 2022 and 2023 share earnings to clock in at \$0.75 and \$0.85, respectively.																					<b>Acquisitions are a key part of Rollins' growth strategy.</b> The company is seeking opportunities to strengthen its business domestically and internationally. Over the past nine months, Rollins purchased 27 businesses. During the third quarter, the company invested about \$61 million in acquisitions. In all, the pest controller is expected to remain active on the acquisition front in the foreseeable future, as it is a quick way to grow assets and expand its foothold in new markets.																					<b>The long-term story here is encouraging.</b> The company is investing in training technicians, which should boost efficiency. Management is also increasing the number of hybrid and electric vehicles in its fleet to optimize cost savings.																					<b>The company will have a new chief executive officer next year.</b> Jerry Gahlhoff, the current chief operating officer and president, will succeed Gary Rollins on January 1, 2023. Mr. Gary Rollins will remain as the chairman.																					<b>Neutrally ranked shares of Rollins have limited long-term capital appreciation potential, at present.</b>																					<i>Emma Jalees November 18, 2022</i>																					<table border="1"> <tr> <th>Cal-endar</th> <th>Mar.31</th> <th>Jun.30</th> <th>Sep.30</th> <th>Dec.31</th> <b>Business:</b> Rollins, Inc. owns and operates Orkin LLC exterminating, one of the world's largest pest- and termite-control service providers. Has over 500 locations (including franchises) in the U.S., Canada, Europe, Latin America, the Caribbean, the Middle East, and Asia. Commercial and residential pest control account for 81% of revenues, and the balance is mainly from the termite business.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>Rollins posted better-than-anticipated third-quarter results.</b> The top line grew 12% year over year, to \$729.7 million, thanks to double-digit growth across all major service lines. Moreover, the bottom line rose 16% over the previous-year tally, to \$0.22 per share. Looking at revenues, Residential Pest Control gained 9.8%, Commercial Pest Control advanced 11.4%, and the Termite line increased 18.9%. The company benefited from ongoing investments in technology and current labor retention plans. Nonetheless, material and supply costs remained slightly elevated during the quarter due to prevalent supply-chain issues in the termite business. Rollins also experienced higher fuel costs in the September period.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>The company has to keep navigating operating challenges in the near term.</b> The pest controller has been facing inflationary cost pressures due to prevalent supply chain issues. To address this problem, the company is actively revising pricing within all brands and is seeking alternate suppliers. All told, we estimate 2022 and 2023 share earnings to clock in at \$0.75 and \$0.85, respectively.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>Acquisitions are a key part of Rollins' growth strategy.</b> The company is seeking opportunities to strengthen its business domestically and internationally. Over the past nine months, Rollins purchased 27 businesses. During the third quarter, the company invested about \$61 million in acquisitions. In all, the pest controller is expected to remain active on the acquisition front in the foreseeable future, as it is a quick way to grow assets and expand its foothold in new markets.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>The long-term story here is encouraging.</b> The company is investing in training technicians, which should boost efficiency. Management is also increasing the number of hybrid and electric vehicles in its fleet to optimize cost savings.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>The company will have a new chief executive officer next year.</b> Jerry Gahlhoff, the current chief operating officer and president, will succeed Gary Rollins on January 1, 2023. Mr. Gary Rollins will remain as the chairman.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<b>Neutrally ranked shares of Rollins have limited long-term capital appreciation potential, at present.</b>

<b>ANNUAL RATES</b> Past Past Est'd '19-'21 of change (per sh) 10 Yrs. 5 Yrs. to '25-'27 Sales 11.0% 11.5% 9.5% "Cash Flow" 16.5% 15.5% 11.0% Earnings 19.0% 17.0% 11.5% Dividends 14.5% 15.0% 11.5% Book Value 10.0% 23.0% 5.5%										<b>After four consecutive quarters of year-over-year earnings declines, Sherwin-Williams delivered a reassuring third-quarter report.</b> The top line jumped nearly 18% from a year prior, when growth was anemic due to supply-chain issues and limited raw material availability. We were looking for 13% growth. Price increases certainly helped, but so too did strong professional demand in the Americas Group. The Consumer Brands Group, which caters more to do-it-yourself (DIY) shoppers, saw volumes dip, largely due to some softness in international markets. In fact, Europe, which is contending with sky high inflation and a potential energy crisis this winter, was the weak link, as sales there fell by a mid-single-digit rate. Profitability also improved, aided by the aforementioned price hikes, as well as higher volumes in the Americas Group. However, these positives were partially offset by raw material and supply-chain costs that continued to move higher. All told, adjusted earnings rebounded 35% from the depressed year-earlier figure, to \$2.83 a share, nicely ahead of our \$2.60 forecast.									
<b>QUARTERLY SALES (\$ mill.)<sup>A</sup></b> Cal-ender Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 4041 4878 4868 4114 17901 2020 4147 4604 5122 4489 18362 2021 4656 5380 5147 4762 19945 2022 4999 5872 6047 5257 22175 2023 5300 6125 6175 5400 23000										<b>The road ahead is still lined with potential stumbling blocks.</b> The aforementioned weakness in Europe is likely to get worse before it gets better as we get deeper into winter, while demand in Asia is apt to be pressured from slowing growth in China, partially due to that nation's strict COVID-19 regulations. And on our shores, rising interest rates are hurting the housing market, while inflation is keeping discretionary spending in check for those lower on the income spectrum. On the bright side, management noted that raw material inflation is starting to ease some, and it looks for the momentum from the third quarter to continue through the rest of the year, with ongoing strength in the Americas Group and industrial end markets in North America. Easy comparisons over the next several quarters and tight cost controls are also tailwinds. <b>These shares have climbed over the past three months.</b> Long-term recovery potential remains decent on a risk-adjusted basis, and the shares are ranked to keep pace with the broader market averages in the near term (Timeliness: 3). Matthew Spencer, CFA December 16, 2022

Bonds (SMILL)						6472.7	6738.8	6505.1	<b>BUSINESS:</b> Selective Insurance Group, Inc. is a holding company for five property/casualty insurance companies. (Main subsidiary: Selective Insurance Company of America.) Markets products primarily in the East and Midwest. New Jersey accounted for 18% of premiums written in '21. Mix of 2021 premiums written: personal lines, 27%; commercial lines, 73%. Commercial premiums by industry (as percentage of total): automobile, 29%; general liability, 33%; workers' compensation, 12%; other, 26%. Has about 2,440 employees. Officers/directors own 2.0% of common stock; Black Rock, 11.4% (4/22 Proxy). Chairman, Pres. & CEO: John J. Marchioni, Inc.: NJ Address: 40 Wantage Ave., Branchville, NJ 07890. Telephone: 973-948-3000. Internet: www.selective.com.														
Stocks						310.4	335.5	145.2	claims. Selective's underwriting expense ratio has withstood elevated labor costs, commissions, and travel outlays, thanks to the growth in premiums written. Difficulties in the stock and bond markets have led to lower investment income and unrealized losses on holdings. Thus, the company's reported return on equity (ROE) was 7.0% at September 30th, versus 15.1% a year earlier. Adjusting for the mark-to-market losses, the nine-month ROE figure was a solid 11.6%, though still down from the 2021 level of 14.5%. Reported share earnings look to come in at \$5.00 this year, a 23% decrease. A rebound may come in 2023, as long as the securities markets cooperate.														
Mortgages						--	--	--	<b>While the stock has traded in a fairly narrow range since March of 2021, it has outperformed the broader market averages for much of 2022.</b> Price momentum has gradually increased as the year has progressed, but the shares are still ranked 3 (Average) for Timeliness. A recent dividend hike was a plus with investors. Solid, albeit unspectacular, total returns are likely through 2025-2027.

Cash Assets						71	191	126	<b>BUSINESS:</b> Sirius XM Holdings, Inc. broadcasts a wide variety of connected devices. Revenues are supported by subscriptions and ad revenues. It has 5,590 employees. Off/dir. own less than 1% of stock, Liberty Media Corp., 81.0% (4/22 proxy), Inc.; DE. Chairman: Gregory B. Maffei. CEO: Jennifer C. Witz. President: Scott A. Greenstein. Addr.: 1221 Avenue of the Americas, 35th Floor New York, NY 10020. Tel.: 212-584-5100. Internet: www.siriusxm.com.														
Receivables						559	722	660	<b>Sirius XM Holding's second-quarter results were somewhat of a mixed bag.</b> On the bright side, total revenues climbed 4% during the interim and churn held steady at 1.5%. SiriusXM closed the quarter with 34 million subscribers, adding 23,000 self-pay and 54,000 paid promotional accounts, which helped the segment's revenues grow 5%. Meanwhile, Pandora's subscribership lagged over the interim, and the division had 50.5 million monthly active users (down from 55.1 million in the year-ago period). On the other hand, ad revenues advanced 5%, bolstering the Pandora unit. All in all, the company was hard hit by difficult operating conditions and a rising cost environment. As a result, profits slipped roughly 35% year over year.														
Inventory (FIFO)						10	--	--	<b>The company should make some progress in the near term.</b> We are maintaining our full-year estimates, and continue to look for revenues to increase 3%, to \$9 billion. Share earnings will likely gain \$0.03 in 2022. Looking out to 2023, we anticipate the top and bottom lines will advance another 3% and 10%-15%, respectively.														
Other						327	267	347	<b>Management has been strengthening operations.</b> Sirius will probably continue to ramp up investments, particularly in subscriber acquisition, content, and talent in order to widen its audiences. In the meantime, technological innovation and improvements to the digital platforms ought to remain key priorities.														
Current Assets						967	1180	1133	<b>Sirius earns an unfavorable mark for Financial Strength (C++).</b> The company has a hefty debt load. Sirius has been investing heavily in the aforementioned growth efforts. It has been using cash to buy back stocks and fund its dividend program. Still, we believe it would behoove management to get its balance sheet in better shape.														
Accts Payable						1223	1299	1219	<b>This issue offers substantial capital gains potential over the 2025-2027 period.</b> However, these shares are ranked to perform in tandem with the broader market averages for year-ahead relative price performance, and hold lackluster capital appreciation over the coming 18 months. The stock has been trading in a relatively narrow band of late and is ranked 3 (Average) for Safety.

<b>BUSINESS:</b> Sensient Technologies supplies colors, flavors, and fragrances to makers of packaged foods, beverages, and cosmetics. Sales breakdown (2021): Flavors & Extracts, 52%; Color, 38%; Asia Pacific, 10%. One of the largest U.S. producers of dehydrated onion and garlic products. Operates from 75 locations in 35 countries; 43% of sales generated outside of North America.																																																																																																																																																																																																																																																							
<b>Sensient Technologies' businesses are displaying strong momentum.</b> The company registered stronger-than-expected double-digit gains across the top and bottom-lines in the second quarter. Sensient's strong showing is underpinned by favorable pricing and volume growth, particularly for natural ingredients. Despite lower volumes caused by the limited supply of onions, the core Flavors and Extract business grew sales 6%, year to year. Consumer interest in natural colors is being supported by large conversion projects to natural food and beverages. Also, recovering sales in the personal arm supported a double-digit advance across the Color division.																																																																																																																																																																																																																																																							
<b>Year-to-year earnings comparisons will likely decelerate in the second half of the year.</b> The company will lap certain pricing measures that were implemented in the back half of 2021. Too, supply-chain and cost headwinds should hurt the bottom line despite mitigating efforts. Still, we expect improvement in onion supply as the year progresses.																																																																																																																																																																																																																																																							
<b>Capital deployment will likely be used to enhance business.</b> Capital expenditures this year are expected to be higher than usual, nearing \$90 million compared to the typical range of \$50 million to \$60 million. The spending is expected to be used for expanding capacity, diversifying product offerings in the Color segment, and adding adjacent product lines. Small M&A moves are on the company's radar in order to strengthen its technology-driven offerings. Expenses ought to be lower next year, but Sensient will probably continue to make business investments, suggesting that dividend hikes and stock buybacks will take a back seat.																																																																																																																																																																																																																																																							
<b>Most investors should look elsewhere, for now.</b> The stock is ranked to perform in line with the broader market averages in the year ahead. The majority of color ingredients continue to be synthetic outside of Europe, as only 30% of the market is using natural colors. While natural food and beverage color demand should grow, we believe Sensient has a long way to go before this conversion takes hold, as customer trends are slow to develop. Overall, 3- to 5-year total return potential is lackluster even at the current low price.

Founded more than 25 years ago by researchers at the University of Birmingham, Binding Site is now a leading provider of tests for multiple myeloma, a cancer of the white blood cell with which more than 30,000 people are diagnosed annually in the United States alone. The new addition boasts a direct presence in over 23 different countries and has more than 1,100 employees around the globe. Annual revenues were said to be growing at a roughly 10% clip and were targeted to reach approximately \$220 million in 2022.												
<b>QUARTERLY SALES (\$ mill.)<sup>A</sup></b> Cal-endar Mar.Per Jun.Per Sep.Per Dec.Per Full Year 2019 6125 6316 6272 6829 25542 2020 6230 6917 8521 10550 32218 2021 9906 9273 9330 10702 39211 2022 11818 10970 10677 10335 43800 2023 11875 11025 10730 10370 44000										<b>projected 2022 revenues, Binding Site is not coming cheap.</b> Thermo is more upbeat these days. With the October release of strong top-line results for the September quarter, management increased its (pre-Binding Site) 2022 target for the company. Notably, if leadership has it right, Thermo will generate sales of \$43.8 billion this year, up nearly 12% from 2021's \$39.2 billion tally and some \$650 million above its previous guidance. It cited strength in the core business and additional COVID-19 testing. Still, earnings are likely to decline due to one-time costs related to the December, 2021 acquisition of PPD.												
<b>EARNINGS PER SHARE<sup>AB</sup></b> Cal-endar Mar.Per Jun.Per Sep.Per Dec.Per Full Year 2019 2.02 2.03 1.88 2.49 8.43 2020 1.97 2.90 4.84 6.24 15.96 2021 5.88 4.61 4.79 4.17 19.46 2022 5.61 4.22 3.79 4.13 17.75 2023 6.00 4.50 4.10 4.40 19.00										<b>Our model has EPS reaching \$26.50 by 2025-2027, more than triple 2019's \$8.43 tally.</b> Thermo should benefit, as countries like China look to further establish life-science research capabilities and as labs seek to improve work flows.

<b>Despite a strong third-quarter performance, we have cut our expectations for Texas Instruments in 2023.</b> Both revenue and earnings per share came in ahead year-over-year for the quarter, the former by almost 13% and the latter by nearly 20%, setting records for the company's performance. The results surpassed our own projections as well, albeit by a somewhat smaller margin, and we have accordingly raised our full-year estimates for both the top and bottom lines for 2022. <b>All good things, however, must come to an end, and in this case, what's coming to an end is the elevated, COVID-era demand for semiconductor chips.</b> Early in the pandemic, lockdown measures restricted both the manufacturing and shipping of silicon chips, leading to widespread shortages and skyrocketing prices as demand outstripped supply. In response, many companies began stockpiling whatever chips they could get their hands on in order to ensure their ability to operate and manufacture their own products, as well as to shield themselves from the ever-increasing cost of chips. Now, however, with lockdowns easing in even										10961	10807	10390	9946.0	10473	10337	8994.0	8907.0	9187.0	13333	17915	22495	Shr. Equity (\$mill)	35000
<b>Business:</b> Texas Instruments Incorporated is a global manufacturer of semiconductors and electronic products. The company is the leading supplier of digital signal processors and analog devices. Markets electrical controls, educational and productivity solutions, and metallurgical materials. Royalty income from licensing proprietary technology is significant. Research & Development, 8.5% of 2021 revenues. Has 31,000 employees. Still, operating performance has been relatively healthy in recent quarters, and the June interim was no exception. The top line increased roughly 7%, on a year-over-year basis. Expenses remained in check, and earnings per share rose 18% to \$1.54, compared with the prior-year tally of \$1.31. The company finished the second quarter with 174.3 million .com and .net registrations in the domain name base. During the period, VeriSign processed 10.1 million domain name registrations for .com and .net, compared with 11.7 million in the year-earlier period.					<b>2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023</b>
<b>QUARTERLY SALES (\$ mill.)</b> Cal-ender Mar.31 Jun.30 Sep.30 Dec.31 Full Year 2019 306.4 306.3 308.4 310.6 1231.7 2020 312.5 314.4 317.9 320.3 1265.1 2021 323.6 329.4 334.2 340.4 1327.6 2022 346.9 351.9 355 371.2 1425 2023 375 375 395 405 1550		<b>actively favorable for the long haul.</b> VeriSign remains well positioned in the markets that it serves, and should be able to capitalize on healthy business fundamentals in the coming years. The company will likely further benefit from rising Internet usage going forward. Price hikes should support the top line, as well. To this end, the company has announced that it will increase the annual registry-level wholesale fee for each .net domain name registration from \$9.02 to \$9.92, effective February 1, 2023.					<b>2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023</b>

The equity's 18-month appreciation potential also appears to be fairly solid here. Looking further out, we anticipate healthy growth in sales and earnings per share for the company over the pull to mid-decade. But this seems to be partly discounted by the recent quotation. Appreciation potential for the 3- to 5-year stretch is nothing to write home about. Subscribers with a long time horizon may prefer to look elsewhere.					<b>2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023</b>

<b>Waters Corp. reported stronger-than-expected third-quarter results as we went to press.</b> Net sales increased 7% as reported and 15% on a constant currency basis. Net income was \$156.0 million, or \$2.60 per diluted share. (Subsequent rates are on a constant currency basis.) Sales increased 9% in the Pharmaceutical market (the company's largest with 61% of the total) to \$406.0 million, while they were up 22% in the Industrial market to \$224.0 million (10% of the total). Academic and Government customers, contributing about 11%, increased sales 29% to \$78.6 million. Instruments sales again led the growth, up 21% on the strength of recently introduced tools. Chemistry and Service sales, both consumables, rose 9% and 10%, respectively, to \$244 million and \$240 million. Both segments did well, again on the strength of new tools. Waters increased the top line 14% to \$623 million (89% of the business), while TA was up 18% to \$85 million. By region, Asia grew the fastest, up 18% to \$280 million, while the Americas and Europe increased by 11% and 14%.		31.4%	25.5%	22.8%	22.8%	22.7%	27.0%	39.9%	--	NMF	NMF	NMF	45.0%	Return on Shr. Equity	29.0%
<b>Waters has clearly benefited from the tenure of Dr. Udit Batra.</b> He joined the company as CEO in 2019, having used Waters' analytic instruments since graduate school. He continues to indicate that Waters' support and engineering were top flight and held in high regard. However, he shared a view held by many that the company had lost some focus and failed to fully embrace recent changes in the industry. He thus designed a tool replacement program to focus customers on updating older systems. He has also moved chemistry sales (recurring revenues) on-line to lower cost. On-line now accounts for 31% of orders. Another key change has been to focus on overlooked contract manufacturers, which has enabled them to gain market share. He has focused on service sales attachments, which has been successful as well. Waters introduced the Xevo G3 high resolution mass spec tool and developed an app to transition workflows from it to the BioAccord platform.		--	--	--	--	--	--	--	--	--	--	Nil	Nil	All Div's to Net Prof	Nil
<b>Waters shares are ranked 3 (Average) for Timeliness but offer subpar appreciation potential over the 3- to 5-year horizon.</b> Glenn Pierr Johnson November 11, 2022		<b>BUSINESS:</b> Waters Corp. manufactures, distributes, and services high-performance and ultra-performance liquid chromatography (HPLC and UPLC) and mass spectrometry systems, chemistry consumables, and related products through its Waters division (89% of '21 sales) and thermal analysis, rheometry, and calorimetry instruments through its TA division (10%). HPLC and UPLC are used to identify and analyze the components of a variety of chemicals and materials. Cash Assets				146.1	118.3	130.2	<b>BUSINESS:</b> WatSCO, Inc. distributes heating, ventilation, and air conditioning (HVAC) equipment, as well as related parts and supplies, in the United States and overseas. Its HVAC equipment includes residential central A/Cs; light commercial A/Cs; gas, electric, and oil furnaces; commercial AC and heating equipment and systems; and other specialized equipment. Officers and directors own										0.9%	of Class A stock; BlackRock, Inc., 11.1%; The Vanguard Group, 10.0%; Albert H. Nahmad owns 76.9% of Class B shares (4/22 proxy). Has about 6,900 employees. Chairman & Chief Executive Officer: Albert H. Nahmad. Incorporated: Florida. Address: 2665 South Bayshore Drive, Suite 901, Miami, Florida 33133. Telephone: 305-714-4100. Internet: www.watSCO.com.	
Receivables				535.3	698.5	859.6	<b>WatSCO is coming off of a strong third quarter, albeit not quite as strong as we envisioned.</b> Sales nearly matched our \$2.045 billion forecast, but share earnings were \$0.37 short of our estimate. Hurricane Ian was a drag on results in Florida, but presents a longer-term opportunity with rebuilding efforts. Margins were flat year to year, as higher freight, labor, and other costs largely offset price hikes and a favorable product mix.										other nations, is working to combat climate change by issuing mandates and offering incentives to move to less carbon intensive heating and cooling systems. New minimum efficiency standards will start in 2023, and a transition to new refrigerants is set to begin in 2025. Increased efficiency typically coincides with increased prices and wider margins, which ought to benefit WatSCO. The new rules should also spur more replacements, as they generally make service and repair costs of older systems more expensive. In addition to mandates, the Inflation Reduction Act includes \$21 billion in rebates and tax deductions for energy-saving upgrades over the next 10 years.		
Inventory (FIFO)				781.3	1115.5	1385.2	<b>Results are likely to continue normalizing in the coming quarters.</b> Indeed, recent sales and earnings gains have been driven more by higher average selling prices rather than increased volumes, as the post-COVID-19 building boom moderates. For instance, in 2021, WatSCO's U.S. residential equipment business saw a 9% increase in unit volume and an 8% uptick in average selling price. Thus far in 2022, those figures have risen 2% and 15%, respectively. The growth in average selling prices is likely to slow as inflation eases, moderating a key tailwind for the company. That said, <b>We see a number of long-term growth catalysts.</b> The United States, along with										<b>WatSCO stock is down modestly in value since our last full-page report went to press in September.</b> The shares are untimely, but not without investment merit, as total return potential is worthwhile on a risk-adjusted basis. Indeed, the shares are ranked 1 (Highest) for Safety and the yield is impressive. Note that the quarterly distribution is being raised to \$2.45 a share in the new year. <i>Matthew Spencer, CFA December 16, 2022</i>

Services are available through a global network of roughly 510,000 agent locations in more than 200 countries. About 90% of locations are outside of the United States. Spunoff from First Data Corp. on 9/29/06. Consumer segment accounted for about 87% of '21 revenues; Business Solutions, 8%; other, 5%. International consisted of 65% of revenues. Employs 11,000. President & CEO: Devin McGranahan. Chrm: Jack Greenberg. BlackRock owns 15.1% of common stock; Vanguard, 10.4%; Cap'l Research, 5.5% (4/22 proxy). Inc.: DE. Address: 7001 East Bellevue Avenue, Denver, Colorado 80237. Telephone: 866-405-5012. Internet: www.westernunion.com.		<b>Shares of Western Union recently slipped to a new 52-week low.</b> WU stock has lost roughly 34% in value over the course of the past year as some caution is in order. Moreover, the suspension of operations in Russia and Belarus in March and the impact of foreign currency headwinds are constraining revenues. The departure of two retail agent relationships is expected to take effect in the fourth quarter, reflecting reduced demand for cash-oriented remittances. What's more, the second and final closing of the Business Solutions unit divestiture is expected to be completed in the December quarter, at which time a gain of sale of roughly \$120 million should be recognized. Further, the company noted plans to accelerate investments in new digital projects in the back half of the year and early 2023 that will impact the bottom line.		<b>cast by \$135 million, to roughly \$4.47 billion. Our 2023 revenue and share-net forecast now stand at \$4.4 billion and \$1.85, respectively. Moreover, the company is looking to rebrand its digital offerings and transform over the next two years, as more companies and technologies around remittances and cash transfers emerge. The Digital Money Transfer (represents 25% of the core Consumer-to-Consumer unit) and westernunion.com sectors have been slowing down. Thus, management is implementing next-generation digital platforms and an updated point-of-sale system in the first half of next year. Although it is ranked Lowest (5) for Timeliness, there is a lot to like here. The issue is a good choice for income-oriented investors with a long-term horizon. The dividend is generous and well covered. At current, the stock is trading below historical price-to-earnings norm, making this an attractive entry point for patient accounts with moderate risk tolerances. Given the macro uncertainty, though, the road to recovery may be bumpy.</b>

## Market Intelligence News

HEADLINE	DATE
<b>Analysts see stable utility sector stocks poised to ride out potential recession</b> The U.S. utility industry could even see stock prices rise during a potential economic downturn, despite the downside risk to holding companies facing climate, regulatory, earnings and load growth issues, analysts said.	7/5/2022 6:02:00 AM ET
<b>Atmos Energy downgraded by S&amp;P Global Ratings on winter storm gas costs</b> The rating agency expects the company's financial measures to "materially weaken" after the eight-state gas utility operator spent up to \$3.5 billion to procure natural gas at elevated prices.	2/22/2021 5:37:00 PM ET

## Market Intelligence News

HEADLINE	DATE
<b>Utility executives assess value, risk of ownership stake sales</b> Not all U.S. utility executives are sold on the value and strategy of selling off slices of prized businesses to address equity needs or unlock new value.	11/22/2022 9:00:00 AM ET
"One of the main things driving the outlook is our expectation for a recession," Fitch Ratings analyst Manish Consul said Nov. 14 at the Edison Electric Institute Financial Conference in Hollywood, Fla. <b>Fitch sees various cost pressures behind 'deteriorating' US utilities outlook</b>	11/14/2022 5:34:00 PM ET
<b>NiSource executives defend utility stake sale over full divestiture</b> NiSource said Nov. 7 that it will look to sell a minority stake in its Indiana multi-utility while Wall Street expected a strategic review of certain gas distribution businesses.	11/7/2022 5:32:00 PM ET
<b>US utility Q2 results should appease investors seeking safety</b> U.S. investor-owned utilities and power providers are expected to report stronger year-over-year second-quarter results, an S&P Global Market Intelligence analysis shows, as the sector remains a safe haven for investors.	7/26/2022 6:33:00 AM ET
<b>Supreme Court ruling, high gas prices not enough to save coal power</b> U.S. power generators shuttered more than one-quarter of the nation's coal fleet in just seven years, and companies have already laid out plans for retiring all but one-third of the coal fleet as it existed in 2015.	7/21/2022 6:02:00 AM ET

## Market Intelligence News

HEADLINE	DATE
<b>Spire clarifies outlook that reset the table after 'complicating events'</b> The gas utility's EPS guidance initially confused Wall Street and sparked a sudden stock price downturn. Executives explained their path forward after anomalies in recent years made it difficult to forecast the company's profit outlook.	12/12/2022 3:13:00 PM ET
<b>Spire's sudden earnings presentation greeted with stock drop</b> The Missouri gas utility's shares continued to drop Dec. 5 after the company posted updated guidance last week. The company promised growth of 5% to 7% in 2023, but analysts expected that it will be more like 3% to 4%.	12/6/2022 6:01:00 AM ET
<b>Spire pipeline setback slams stock price, but analysts see path forward</b> While a court decision to vacate a Federal Energy Regulatory Commission certificate for the STL pipeline creates a new headache for Spire, some analysts expect Spire to prevail in showing the infrastructure provides valuable supply diversification.	6/23/2021 4:41:00 PM ET

FERC FORM NO. 1 (REV. 02-04)

## INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

### GENERAL INFORMATION

#### Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q) is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

#### Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities, Licensees, and Others Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

- one million megawatt hours of total annual sales,
- 100 megawatt hours of annual sales for resale,
- 500 megawatt hours of annual power exchanges delivered, or
- 500 megawatt hours of annual wheeling for others (deliveries plus losses).

#### What and Where to Submit

Submit FERC Form Nos. 1 and 3-Q electronically through the eCollection portal at <https://eCollection.ferc.gov>, and according to the specifications in the Form 1 and 3-Q taxonomies.

The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:  
Secretary  
Federal Energy Regulatory Commission 888 First Street, NE  
Washington, DC 20426

For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

<u>Schedules</u>	<u>Pages</u>
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of [COMPANY NAME] for the year ended on which we have reported separately under date of [DATE], we have also reviewed schedules [NAME OF SCHEDULES] of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases." The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. Further instructions are found on the Commission's website at <https://www.ferc.gov/ferc-online/ferc-online/frequently-asked-questions-faqs-efilingferc-online>.

Federal, State, and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from <https://www.ferc.gov/general-information-/electric-industry-forms>.

#### When to Submit

FERC Forms 1 and 3-Q must be filed by the following schedule:

FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

#### Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

### GENERAL INSTRUCTIONS

Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying

The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions,

reporting period, and use for statement of income accounts the current year's year to date amounts.

Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (see VII. below).

Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

For any resubmissions, please explain the reason for the resubmission in a footnote to the data field.

Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Schedule specific instructions are found in the applicable taxonomy and on the applicable blank rendered form.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true ups" for service provided in prior reporting periods.

thresholds and statements indicating support when applying to balance sheet accounts the balances at the end of the current

Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

## EXCERPTS FROM THE LAW

### Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

'Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

'Person' means an individual or a corporation;

'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, utilizing, or distributing power; .....

"project" means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

"To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304.

Every Licensee and every public utility shall file with the Commission such annual and other periodic or special" reports as the Commission may by rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies\*.10

"Sec. 309

adjustments or "true-ups" for service provided in prior reporting periods.  
Provide an explanation in a footnote for each adjustment.

Sec. 309.

The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations

**DEFINITIONS**

as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed..."

**GENERAL PENALTIES**

The Commission may assess up to \$1 million per day per violation of its rules and regulations. See FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

**FERC FORM NO. 1 (ED. 03-07)**

<b>FERC FORM NO. 1 REPORT OF MAJOR ELECTRIC UTILITIES, LICENSEES AND OTHER</b>		
<b>IDENTIFICATION</b>		
01 Exact Legal Name of Respondent Northern Indiana Public Service Company LLC	02 Year/ Period of Report End of: 2021/ Q4	
03 Previous Name and Date of Change (If name changed during year) /		
04 Address of Principal Office at End of Period (Street, City, State, Zip Code) 801 E. 86th Avenue, Merrillville, IN 46410		
05 Name of Contact Person Christopher Cubenas	06 Title of Contact Person Controller	
07 Address of Contact Person (Street, City, State, Zip Code) 801 E. 86th Avenue, Merrillville, IN 46410		
08 Telephone of Contact Person, Including Area Code 219-647-5531	09 This Report is An Original / A Resubmission (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	10 Date of Report (Mo, Da, Yr) 04/18/2022
<b>Annual Corporate Officer Certification</b>		
The undersigned officer certifies that:  I have examined this report and to the best of my knowledge, information, and belief all statements of fact contained in this report are correct statements of the business affairs of the respondent and the financial statements, and other financial information contained in this report, conform in all material respects to the Uniform System of Accounts.		
01 Name Gunnar J. Gode	03 Signature /s/ Gunnar J. Gode	04 Date Signed (Mo, Da, Yr) 04/18/2022
02 Title VP, Chief Accounting Officer & Controller		
Title 18, U.S.C. 1001 makes it a crime for any person to knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

<b>CONTROL OVER RESPONDENT</b>			
1. If any corporation, business trust, or similar organization or a combination of such organizations jointly held control over the respondent at the end of the year, state name of controlling corporation or organization, manner in which control was held, and extent of control. If control was in a holding company organization, show the chain of ownership or control to the main parent company or organization. If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiaries for whom trust was maintained, and purpose of the trust.			
Northern Indiana Public Service Company LLC is a wholly-owned subsidiary of NiSource Inc.			

FERC FORM No. 1 (ED. 12-96)

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**CORPORATIONS CONTROLLED BY RESPONDENT**

1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote.
2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.
3. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

Definitions

1. See the Uniform System of Accounts for a definition of control.
2. Direct control is that which is exercised without interposition of an intermediary.
3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

**INFORMATION ON FORMULA RATES - Formula Rate Variances**

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

**IMPORTANT CHANGES DURING THE QUARTER/YEAR**

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Pages 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

None

NIPSCO entered into a joint venture agreement with JPM Capital Corporation (TEP) and EDPR (developer) to form Indiana Crossroads Wind Generation, LLC. The formation was approved by the IURC in Order 45310 dated February 19, 2020. The order approved NIPSCO treating its investments in the Joint Venture as a Regulatory Asset. This regulatory treatment was applied within for FERC reporting.

Page 112-113

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**STATEMENT OF INCOME**

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)

Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.

Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

Use page 122 for important notes regarding the statement of income for any account thereof.

Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenue: contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or respect to power or gas purchases.

Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeds received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.

If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.

Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.

Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.

If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to the

**STATEMENT OF RETAINED EARNINGS**

1. Do not report Lines 49-53 on the quarterly report.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436-439 inclusive). Show the contra primary account affected in column (b).
4. State the purpose and amount for each reservation or appropriation of retained earnings.
5. List first Account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items, in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown for Account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, attach them at page 122.

**STATEMENT OF CASH FLOWS**

- Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
- Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
- Operating Activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
- Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

## 1. Nature of Operations and Summary of Significant Accounting Policies

**A. Company Structure and Basis of Accounting Presentation.** NIPSCO, a single member limited liability company with NiSource as its sole member, is a public utility operating company that supplies natural gas and electric energy to the public. It operates in 31 counties in the northern part of Indiana, serving an area of about 12,000 square miles with a population of approximately 2.2 million.

NiSource, a Delaware corporation, is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving approximately 3.9 million customers in seven states.

Our primary business segments are: Gas Distribution Operations and Electric Operations. Our natural gas distribution operations serve approximately 853,000 customers in the northern part of Indiana. Our electric operations generate, transmit and distribute electricity to approximately 483,000 customers in 20 counties in the northern part of Indiana and engage in wholesale and transmission transactions. The consolidated financial statements include the accounts of NIPSCO, its subsidiary, NARC, and its variable interest entities, Rosewater and Indiana Crossroads Wind joint ventures, after the elimination of all intercompany items.

Our accompanying Consolidated Financial Statements reflect all normal recurring adjustments that are necessary, in the opinion of management, to present fairly the results of our operations in accordance with GAAP in the United States of America.

Our management has performed an evaluation of subsequent events through March 29, 2022, which is the date that our consolidated financial statements were available to be issued.

**B. Use of Estimates.** The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**C. Cash, Cash Equivalents and Restricted Cash.** We consider all highly liquid investments with original maturities of three months or less to be cash equivalents. We report amounts deposited in brokerage accounts for margin requirements as restricted cash.

**D. Accounts receivable and Unbilled Revenue.** Accounts receivable on the Consolidated Balance Sheets includes both billed and unbilled amounts. Unbilled amounts of accounts receivable relate to a portion of a customer's consumption of gas or electricity from the last cycle billing date through the last day of the month (balance sheet date). Factors taken into consideration when estimating unbilled revenue include historical usage, customer rates, weather and reasonable and supportable forecasts. Accounts receivable fluctuates from year to year depending in large part on weather impacts and price volatility. The reserve for uncollectible receivables is our best estimate of the amount of probable credit losses in the existing accounts receivable. We determined the reserve based on historical experience and in consideration of current market conditions. Account balances are charged against the allowance when it is anticipated the receivable will not be recovered. Refer to Note 3, "Revenue Recognition," for additional information on customer-related accounts receivable.

**E. Basis of Accounting for Rate-Regulated Operations.** Rate-regulated operations account for and report assets and liabilities consistent with the economic effect of the way in which regulators establish rates, if the rates established are designed to recover the costs of providing the regulated service and it is probable that such rates can be charged and collected. Certain expenses and credits subject to utility regulation or rate determination normally reflected in income are deferred on the Consolidated Balance Sheets and later recognized in income as the related amounts are included in customer rates and recovered from or refunded to customers.

We continually evaluate whether or not our operations are within the scope of ASC 980 and rate regulations. As part of that analysis, we evaluate probability of recovery for our regulatory assets. In management's opinion, we will be subject to regulatory accounting for the foreseeable future. Refer to Note 8, "Regulatory Matters," for additional information.

**F. Plant and Other Property and Related Depreciation and Maintenance.** Property, plant and equipment (principally utility plant) is stated at cost. We record depreciation using composite rates on a straight-line basis over the remaining service lives of the electric, gas and common properties as approved by the IURC.

Non-utility property includes renewable generation assets owned by joint ventures of which we are the primary beneficiary and is generally depreciated on a straight-line basis over the life of the associated asset. Refer to Note 5, "Property, Plant and Equipment," for additional information related to depreciation expense.

We capitalized AFUDC on all classes of property except organization costs, land, autos, office equipment, tools and other general property purchases. The allowance is applied to construction costs for that period of time between the date of the expenditure and the date on which such project is placed in service. Our pre-tax rate for AFUDC was 5.8% in 2021, 5.5% in 2020 and 6.3% in 2019.

Generally, we follow the practice of charging maintenance and repairs, including the cost of removal of minor items of property, to expense as incurred. When we retire regulated property, plant and equipment, original cost plus the cost of retirement, less salvage value, is charged to accumulated depreciation. However, when it becomes probable a regulated asset will be retired substantially in advance of its original expected useful life or is abandoned, the cost of the asset and the corresponding accumulated depreciation is recognized as a separate asset. If the asset is still in operation, the net amount is classified as "Other property, at cost, less accumulated depreciation" on the Consolidated Balance Sheets. If the asset is no longer operating, the net amount is classified in "Regulatory assets" on the Consolidated Balance Sheets. If we are able to recover a full return of and on investment, the carrying value of the asset is based on historical cost. If we are not able to recover the full

return on investment, a loss on impairment is recognized to the extent the net book value of the asset exceeds the present value of future revenues discounted at the incremental borrowing rate.

When we sell entire regulated operation units, or retire or sell nonregulated properties, the original cost and accumulated depreciation and amortization balances are removed from "Property, Plant and Equipment" on the Consolidated Balance Sheets. Any gain or loss is recorded in earnings, unless otherwise required by the IURC. Refer to Note 5, "Property, Plant and Equipment," for further information.

External and internal costs associated with on-premise computer software developed for internal use are capitalized. Capitalization of such costs commences upon the completion of the preliminary stage of each project. Once the installed software is ready for its intended use, such capitalized costs are amortized on a straight-line basis generally over a period of five years. External and internal up-front implementation costs associated with cloud computing arrangements that are service contracts are deferred on the Consolidated Balance Sheets. Once the installed software is ready for its intended use, such deferred costs are amortized on a straight-line basis to "Operation and maintenance," generally over the minimum term of the contract plus contractually-provided renewal periods that are reasonable and expected to be exercised.

**G. Goodwill.** Substantially all of our goodwill relates to the excess of cost over the fair value of the net assets related to the acquisition of Northern Indiana Fuel and Light and Kokomo Gas. We test our goodwill for impairment annually as of May 1<sup>st</sup> or more frequently if events and circumstances indicate that goodwill might be impaired. Our fair value is determined using a combination of income and market approaches. Refer to Note 6, "Goodwill," for additional information.

**H. Accounts Receivable Transfer Program.** We have an agreement with a third party to sell certain accounts receivable without recourse. These transfers of accounts receivable are accounted for as secure borrowings. The entire gross receivables balance remains on the December 31, 2021 and 2020 Consolidated Balance Sheets and short-term debt is recorded in the amount of proceeds received from the purchasers involved in the transactions. Refer to Note 14, "Short-Term Borrowings," for further information.

**I. Gas Cost and Fuel Adjustment Clause.** We defer most differences between gas and fuel purchase costs and the recovery of such costs in revenue, and adjust future billings for such deferrals on a basis consistent with applicable IURC tariff provisions. These deferred balances are recorded as "Regulatory assets" or "Regulatory liabilities", as appropriate, on the Consolidated Balance Sheets. Refer to Note 8, "Regulatory Matters," for additional information.

**J. Inventory.** Our natural gas in storage, electric production fuel and materials and supplies are valued using the weighted average cost inventory methodology as approved by the IURC.

**K. Affiliated Company Transactions.** We receive executive, financial, information technology and administrative and general services from an affiliate, NiSource Corporate Services, a wholly-owned subsidiary of NiSource. The costs of these services are charged to us based on various approved allocations and consist primarily of employee compensation and benefits and outside services. Operation and maintenance costs totaled \$171.0 million, \$148.0 million and \$144.0 million for 2021, 2020 and 2019, respectively. Additionally, capitalized costs, which are included in "Utility plant" on the Consolidated Balance Sheets, totaled \$59.4 million and \$39.3 million for 2021 and 2020, respectively. Additionally, prepaid and other miscellaneous costs, which are included in "Prepayments and other" on the Consolidated Balance Sheets, totaled zero and (\$7.7) million for 2021 and 2020, respectively.

The amount of federal and state taxes payable to NiSource included in "Taxes accrued" on our Consolidated Balance Sheets was \$29.4 million and zero as of December 31, 2021 and 2020, respectively. The amount of federal and state taxes receivable from NiSource included in "Income tax receivable" on our Consolidated Balance Sheets was \$6.3 million and \$18.4 million as of December 31, 2021 and 2020, respectively.

**L. Accounting for Exchange and Balancing Arrangements of Natural Gas.** Our Gas Distribution Operations segment enters into balancing and exchange arrangements of natural gas as part of its operations and off-system sales programs. We record a receivable or payable for any of our respective cumulative gas imbalances, as well as for any gas inventory borrowed or lent under a Gas Distribution Operations exchange agreement. Exchange gas is valued based on our regulatory jurisdiction requirements (for example, historical spot rate, spot at the beginning of the month). These receivables and payables are recorded as "Exchange gas receivable" or "Other accruals" on our Consolidated Balance Sheets, as appropriate.

**M. Accounting for Risk Management Activities.** We account for our derivatives and hedging activities in accordance with ASC 815. We recognize all derivatives as either assets or liabilities on our Consolidated Balance Sheets at fair value, unless such contracts are exempted as a normal purchase normal sale under the provisions of the standard. The accounting for changes in the fair value of the derivative depends on the intended use of the derivative and resulting designation.

We have elected not to net fair value amounts for any of our derivative instruments or the fair value amounts recognized for our right to receive cash collateral or obligation to pay cash collateral arising from those derivative instruments recognized at fair value, which are executed with the same counterparty under a master netting agreement. See Note 9, "Risk Management Activities" for further information.

**N. Income Taxes and Investment Tax Credits.** We record income taxes to recognize full interperiod tax allocations. Under the asset and liability method, deferred income taxes are provided for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amount and the tax basis of existing assets and liabilities. Our previously recorded investment tax credits were deferred on the Consolidated Balance Sheets and are being amortized to book income over the regulatory life of the related properties to conform to regulatory policy.

To the extent certain of our deferred income taxes are recoverable or payable through future rates, regulatory assets and liabilities have been established. Regulatory assets for income taxes are primarily attributable to property-related tax timing differences for which deferred taxes had not been provided in the past, when regulators did not recognize such taxes as costs in the rate-making process. Regulatory liabilities for income taxes are primarily attributable to our obligation to refund to ratepayers deferred income taxes provided at rates higher than the current Federal income tax rate. Such property-related amounts are credited to ratepayers consistent with the IURC's direction.

Pursuant to the Internal Revenue Code and the Indiana Department of Revenue, we join in the filing of consolidated federal and state income tax returns with our parent company, NiSource. We are party to an agreement, the "Intercompany Income Tax Allocation Agreement," that provides for the allocation of consolidated tax liabilities. The Intercompany Tax Allocation Agreement generally provides that each party is allocated an amount of tax similar to that which would be owed had the party been separately subject to tax.

**O. Pension Remeasurement.** We utilize a third-party actuary for the purpose of performing actuarial valuations of our defined benefit plans. Annually, as of December 31, we perform a remeasurement for our pension plans. Quarterly, we monitor for significant events, and if a significant event is identified, we perform a qualitative and quantitative assessment to determine if the resulting remeasurement would materially impact the financial statements. If material, an interim remeasurement is performed. We had one such interim remeasurement in the first quarter of 2021. See Note 11, "Pension and Other Postretirement Benefits," for additional information.

**P. Environmental Expenditures.** We accrue for costs associated with environmental remediation obligations, including expenditures related to asset retirement obligations and cost of removal, when the incurrence of such costs is probable and the amounts can be reasonably estimated, regardless of when expenditures are actually made. The undiscounted estimated future expenditures are based on currently enacted laws and regulations, existing technology and estimated site-specific costs where assumptions may be made about the nature and extent of site contaminations, the extent of cleanup efforts, costs of alternative cleanup methods and other variables. The liability is adjusted as further information is discovered or circumstances change. The accruals for estimated environmental expenditures are recorded on the Consolidated Balance Sheets in "Legal and environmental" for short-term portions of these liabilities and "Other noncurrent liabilities" for the respective long-term portion of these liabilities. Refer to Note 7, "Asset Retirement Obligations," and Note 17, "Other Commitments and Contingencies," for further information.

**Q. Excise Taxes.** As an agent for some state and local governments, we invoice and collect certain excise taxes levied by state and local governments on customers and record these amounts as liabilities payable to applicable taxing jurisdiction. Such balances are presented within "Other accruals" on the Consolidated Balance Sheets. These types of taxes collected from customers, comprised largely of sales taxes, are presented on a net basis affecting neither revenues nor cost of sales. We account for excise taxes for which we are liable by recording a liability for the expected tax with a corresponding charge to "Other taxes" expense on the Statements of Consolidated Operations.

**R. Accrued Insurance Liabilities.** We accrue for insurance costs related to workers compensation, automobile, property, general and employment practices liabilities based on the most probable value of each claim. In general, claim values are determined by professional, licensed loss adjusters who consider the facts of the claim, anticipated indemnification and legal expenses and respective state rules. Claims are reviewed at least quarterly and an adjustment is made to the accrual based on the most current information. Our actual exposure to liability is minimal due to coverage from NiSource's wholly-owned captive insurer who transfers risk to third party insurance providers for the majority of costs paid to claimants above our deductible.

**S. VIEs and Allocation of Earnings.** We fund a significant portion of our renewable generation assets through joint ventures with tax equity partners. We consolidate these joint ventures in accordance with ASC 810 as they are VIEs in which we hold a variable interest, and we control decisions that are significant to the joint ventures' ongoing operations and economic results (i.e., we are the primary beneficiary).

These joint ventures are subject to profit sharing arrangements in which the allocation of the joint ventures' cash distributions and tax benefits to members is based on factors other than member's relative ownership percentages. As such, we utilize the HLBV method to allocate proceeds to each partner at the balance sheet date based on the liquidation provisions of the related joint venture's operating agreement and adjusts the amount of the VIE's net income attributable to us and the noncontrolling tax equity member during that period.

In each reporting period, the application of HLBV to our consolidated VIEs results in a difference between the amount of profit from the consolidated joint ventures and the amount included in regulated rates. As discussed above in "E. Basis of Accounting for Rate-Regulated Subsidiaries," we are subject to the accounting and reporting requirements of ASC 980. In accordance with these principles, we have recognize a regulatory liability or asset for amounts representing timing difference between the profit earned from the joint ventures and the amount included in regulated rates to recover our approved investments in consolidated joint ventures. The amounts recorded in income will ultimately reflect the amount allowed in regulated rates to recover our investments over the useful life of the projects. The offset to the regulatory liability or asset associated with our renewable investments included in regulated rates is recorded in "Depreciation expense" on the Statements of Consolidated Operations.

## 2. Recent Accounting Pronouncements

### Recently Issued Accounting Pronouncements

We are currently evaluating the impact of certain ASUs on our Consolidated Financial Statements and Notes to Consolidated Financial Statements, which are described below.

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting* and in January 2021, the FASB issued ASU 2021-01, *Reference Rate Reform (Topic 848): Scope*. These pronouncements provide temporary optional expedients and exceptions for applying GAAP principles to contract modifications and hedging relationships to ease the financial reporting burdens of the expected market transition from LIBOR and other interbank offered rates to alternative reference rates. These pronouncements are effective upon issuance on March 12, 2020, and will apply through December 31, 2022. We have evaluated the temporary expedients and options available under this guidance and identified the financial instruments to which the expedients could be applied, if deemed necessary. As of December 31, 2021, we have not applied any expedients and options available under this ASU.

In November 2021, the FASB issued ASU 2021-10, *Government Assistance (Topic 832): Disclosures by Business Entities about Government Assistance*. This pronouncement requires business entities to provide certain disclosures when they have received government assistance and use a grant or contribution accounting model by analogy to other accounting guidance. This pronouncement is applicable for financial statements issued for annual periods beginning after December 15, 2021. We are currently evaluating the impact of adoption, if any, on the Notes to Consolidated Financial Statements.

## 3. Revenue Recognition

**Customer Revenues.** Substantially all of our revenues are tariff-based. Under ASC 606, the recipients of our utility service meet the definition of a customer, while the operating company tariffs represent an agreement that meets the definition of a contract, which creates enforceable rights and obligations. Our customers may participate in a program that allows for a fixed payment each month regardless of usage. Payments received that exceed the value of gas or electricity actually delivered are recorded as a liability and presented in "Customer Deposits and Credits" on the Consolidated Balance Sheets. Amounts in this account are reduced and revenue is recorded when customer usage exceeds payments received.

We have identified our performance obligations created under tariff-based sales as 1) the commodity (natural gas or electricity, which includes generation and capacity) and 2) delivery. These commodities are sold and/or delivered to and generally consumed by customers simultaneously, leading to satisfaction of our performance obligations over time as gas or electricity is delivered to customers. Due to the at-will nature of utility customers, performance obligations are limited to the services requested and received to date. Once complete, we generally maintain no additional performance obligations.

Transaction prices for each performance obligation are generally prescribed by our respective tariff. Rates include provisions to adjust billings for fluctuations in fuel and purchased power costs and cost of natural gas. Revenues are adjusted for differences between actual costs, subject to reconciliation, and the amounts billed in current rates. Under or over recovered revenues related to these cost recovery mechanisms are included in "Regulatory Assets" or "Regulatory Liabilities" on the Consolidated Balance Sheets and are recovered from or returned to customers through adjustments to tariff rates. As we provide and deliver service to customers, revenue is recognized based on the transaction price allocated to each performance obligation. Distribution revenues are generally considered daily or "at-will" contracts as customers may cancel their service at any time (subject to notification requirements), and revenue generally represents the amount we are entitled to bill customers.

In addition to tariff-based sales, our Gas Distribution Operations segment enters into balancing and exchange arrangements of natural gas as part of our operations and off-system sales programs. Performance obligations for these types of sales include transportation and storage of natural gas and can be satisfied at a point in time or over a period of time, depending on the specific transaction. For those transactions that span a period of time, we record a receivable or payable for any cumulative gas imbalances, as well as for any gas inventory borrowed or lent under a Gas Distributions Operations exchange agreement.

**Revenue Disaggregation and Reconciliation.** We disaggregate revenue from contracts with customers based upon reportable segment as well as by customer class. The Gas Distributions Operations segment provides natural gas service and transportation for residential, commercial and industrial customers in Indiana. The Electric Operations segment provides electric service in 20 counties in the northern part of Indiana.

The tables below reconcile revenue disaggregation by customer class to segment revenue, as well as to revenues reflected on the Statements of Consolidated Operations.

Year Ended December 31, 2021 (in millions)	Gas Distribution Operations	Electric Operations	Total
<b>Customer Revenues</b>			
Residential	\$ 542.9	\$ 567.9	\$ 1,110.8
Commercial	204.9	534.9	739.8
Industrial	76.8	493.4	570.2
Miscellaneous	8.4	9.0	17.4
<b>Total Customer Revenues</b>	<b>\$ 833.0</b>	<b>\$ 1,605.2</b>	<b>\$ 2,438.2</b>
<b>Other Revenues</b>	<b>1.4</b>	<b>91.9</b>	<b>93.3</b>
<b>Total Operating Revenues</b>	<b>\$ 834.4</b>	<b>\$ 1,697.1</b>	<b>\$ 2,531.5</b>

Year Ended December 31, 2020 (in millions)	Gas Distribution Operations	Electric Operations	Total
<b>Customer Revenues</b>			
Residential	\$ 465.9	\$ 527.8	\$ 993.7
Commercial	169.7	480.3	650.0
Industrial	67.2	412.1	479.3

Miscellaneous	7.6	20.9	28.5
<b>Total Customer Revenues</b>	<b>\$ 710.4</b>	<b>\$ 1,441.1</b>	<b>\$ 2,151.5</b>
<b>Other Revenues</b>	<b>1.0</b>	<b>95.5</b>	<b>96.5</b>
<b>Total Operating Revenues</b>	<b>\$ 711.4</b>	<b>\$ 1,536.6</b>	<b>\$ 2,248.0</b>

Year Ended December 31, 2019 (in millions)	Gas Distribution Operations	Electric Operations	Total
<b>Customer Revenues</b>			
Residential	\$ 520.1	\$ 481.6	\$ 1,001.7
Commercial	191.4	486.7	678.1
Industrial	74.7	607.7	682.4
Miscellaneous	12.9	22.2	35.1
<b>Total Customer Revenues</b>	<b>\$ 799.1</b>	<b>\$ 1,598.2</b>	<b>\$ 2,397.3</b>
<b>Other Revenues</b>	<b>0.5</b>	<b>101.0</b>	<b>101.5</b>
<b>Total Operating Revenues</b>	<b>\$ 799.6</b>	<b>\$ 1,699.2</b>	<b>\$ 2,498.8</b>

**Other Revenues.** As permitted by accounting principles generally accepted in the United States, regulated utilities have the ability to earn certain types of revenue that are outside the scope of ASC 606. These revenues primarily represent revenue earned under alternative revenue programs. Alternative revenue programs represent regulator-approved mechanisms that allow for the adjustment of billings and revenue for certain approved programs. We maintain a variety of these programs, including demand side management initiatives that recover costs associated with the implementation of energy efficiency programs, as well as normalization programs that adjust revenues for the effects of weather or other external factors. Additionally, we maintain certain programs with future test periods that operate similarly to FERC formula rate programs and allow for recovery of costs incurred to replace aging infrastructure. When the criteria to recognize alternative revenue have been met, we establish a regulatory asset and present revenue from alternative revenue programs on the Statements of Consolidated Operations "Other revenues." When amounts previously recognized under alternative revenue accounting guidance are billed, we reduce the regulatory asset and record a customer account receivable.

**Customer Accounts Receivable.** Accounts receivable on our Consolidated Balance Sheets includes both billed and unbilled amounts, as well as certain amounts that are not related to customer revenues. Unbilled amounts of accounts receivable relate to a portion of a customer's consumption of gas or electricity from the date of the last cycle billing through the last day of the month (balance sheet date). Factors taken into consideration when estimating unbilled revenue include historical usage, customer rates and weather. A significant portion of our operations are subject to seasonal fluctuations in sales. During the heating season, primarily from November through March, revenues and receivables from gas sales are more significant than in other months. The opening and closing balances of customer receivables for the year ended December 31, 2021 are presented in the table below. We had no significant contract assets or liabilities during the period. Additionally, we have not incurred any significant costs to obtain or fulfill contracts.

(in millions)	Customer Accounts Receivable, Billed (less reserve)	Customer Accounts Receivable, Unbilled (less reserve)
Balance as of December 31, 2021	\$ 168.8	\$ 137.9
Balance as of December 31, 2020	149.9	137.1

Utility revenues are billed to customers monthly on a cycle basis. We expect that substantially all customer accounts receivable will be collected following customer billing, as this revenue consists primarily of periodic tariff-based billings for service and usage. We maintain common utility credit risk mitigation practices, including requiring deposits and activity pursuing collection of past due amounts. We also utilize certain regulatory mechanisms that facilitate recovery of bad debt costs within tariff-based rates, which provides further evidence of collectibility. It is probable that substantially all of the consideration to which we are entitled from customers will be collected upon satisfaction of performance obligations.

**Allowance for Credit Losses.** To evaluate for expected credit losses, customer account receivables are pooled based on similar risk characteristics, such as customer type, geography, payment terms and related macro-economic risks. Expected credit losses are established using a model that considers historical collection experience, current information and reasonable and supportable forecasts. Internal and external inputs are used in our credit model including, but are not limited to, energy consumption trends, revenue projections, actual charge-off data, recoveries data, shut-offs customer delinquencies and final bill data. We continuously evaluate available information relevant to assessing collectability of current and future receivables. We evaluate creditworthiness of specific customers periodically or following changes in facts and circumstances. When we become aware of a specific commercial or industrial customer's inability to pay, an allowance for expected credit losses is recorded for the relevant amount. We also monitor other circumstances that could affect our overall expected credit losses including, but not limited to creditworthiness of overall population in service territories, adverse conditions impacting an industry sector, and current economic conditions.

At each reporting period, we record expected credit losses to an allowance for credit losses account. When deemed to be uncollectible, customer accounts are written off. A rollforward of our allowance for credit losses as of December 31, 2021 and December 31, 2020 are presented in the tables below.

(in millions)	Gas Distribution Operations	Electric Operations	Total
<b>Balance as of January 1, 2021</b>	<b>\$ 8.3</b>	<b>\$ 9.7</b>	<b>\$ 18.0</b>
Current period provisions	2.0	1.4	3.4
Write-offs charged against allowance	(5.0)	(7.7)	(12.7)
Recoveries of amounts previously written off	0.4	0.4	0.8
<b>Balance as of December 31, 2021</b>	<b>\$ 5.7</b>	<b>\$ 3.8</b>	<b>\$ 9.5</b>

(in millions)	Gas Distribution Operations	Electric Operations	Total
<b>Balance as of January 1, 2020</b>	<b>\$ 2.8</b>	<b>\$ 3.1</b>	<b>\$ 5.9</b>
Current period provisions	7.5	9.3	16.8
Write-offs charged against allowance	(2.2)	(3.0)	(5.2)
Recoveries of amounts previously written off	0.2	0.3	0.5
<b>Balance as of December 31, 2020</b>	<b>\$ 8.3</b>	<b>\$ 9.7</b>	<b>\$ 18.0</b>

In connection with the COVID-19 pandemic, the IURC instituted a regulatory moratorium that impacted our ability to pursue our standard credit risk mitigation practices. Following the issuance of these moratoriums, we have been authorized to recognize a regulatory asset for bad debt costs above levels currently in rates. Since the expiration of our moratorium on August 14, 2020, we have reinstated our common credit mitigation practices (see Note 8, "Regulatory Matters," for additional information on regulatory moratoriums and regulatory assets).

#### 4. Variable Interest Entities

A VIE is an entity in which the controlling interest is determined through means other than a majority voting interest. Refer to Note 1-S, "VIEs and Allocation of Earnings," for information on our accounting policy for the VIEs.

We control decisions that are significant to Rosewater and Indiana Crossroads Wind's ongoing operations and economic results. Therefore, we have concluded that we are the primary beneficiary and have consolidated both.

Members of the respective joint ventures are NIPSCO (who is the managing member) and tax equity partners. Earnings, tax attributes and cash flows are allocated to both NIPSCO and the tax equity partners in varying percentages by category and over the life of the partnership. Once the tax equity partner has earned their negotiated rate of return and we have reached the agreed upon contractual date, we have the option to purchase at fair market value from the tax equity partner the remaining interest in the respective joint venture. We have an obligation to purchase, through a PPA at established market rates, 100% of the electricity generated by the joint ventures.

Rosewater

Rosewater owns and operates 102 MW of nameplate capacity wind generation assets. We, and the tax equity partner, made cash contributions in December 2020 and March 2021 per the equity capital contribution agreement. We also assumed an obligation to the developer of the wind generation assets representing the remaining economic interest, which comes due in 2023. From the contributed funds, Rosewater paid \$7.4 million and \$85.3 million to the developer of the wind generation assets as of December 31, 2021 and 2020, respectively. The developer of the facility is not a partner in the joint venture for federal income tax purposes and does not receive any share of earnings, tax attributes or cash flows of Rosewater.

Indiana Crossroads Wind

Indiana Crossroads Wind owns and operates 302 MW of nameplate capacity wind generation assets. We, and the tax equity partner, made cash contributions in December 2021 per the equity capital contribution agreement. We also assumed an obligation to the developer of the wind generation assets representing the remaining economic interest, which comes due in 2023. From the contributed funds, Indiana Crossroads Wind paid \$233.0 million and zero to the developer of the wind generation assets as of December 31, 2021 and 2020, respectively. The developer of the facility is not a partner in the joint venture for federal income tax purposes and does not receive any share of earnings, tax attributes, or cash flows of Indiana Crossroads Wind.

The following table displays the Noncontrolling interest in consolidated subsidiaries included in the Consolidated Balance Sheets.

<i>(in millions)</i>	December 31, 2021	December 31, 2020
Rosewater	\$ 88.2	\$ 85.6
Indiana Crossroads Wind	237.4	—
<b>Total</b>	<b>\$ 325.6</b>	<b>\$ 85.6</b>

The following table displays the Net income attributable to noncontrolling interest included in the Statements of Consolidated Operations for the years ended December 31.

<i>(in millions)</i>	2021	2020	2019
Rosewater	\$ (4.2)	\$ 3.4	\$ —
Indiana Crossroads Wind	8.1	—	—
<b>Total</b>	<b>\$ 3.9</b>	<b>\$ 3.4</b>	<b>\$ —</b>

The following table displays the contributions associated with each VIE.

<i>(in millions)</i>	December 31, 2021		December 31, 2020	
	Rosewater	Indiana Crossroads Wind	Rosewater	Indiana Crossroads Wind
NIPSCO Cash Contribution	\$ 0.1	\$ 2.7	\$ 0.7	\$ —
Tax Equity Partner Cash Contribution	7.5	237.6	86.1	—
NIPSCO's Obligation to Developer <sup>(1)</sup>	6.0	271.5	69.7	—
<b>Total Contributions</b>	<b>\$ 13.6</b>	<b>\$ 511.8</b>	<b>\$ 156.5</b>	<b>\$ —</b>

<sup>(1)</sup> Included in "Other noncurrent liabilities" in the Consolidated Balance Sheet.

We did not provide any financial or other support during the year that was not previously contractually required, nor do we expect to provide such support in the future.

Our Consolidated Balance Sheets included the following assets and liabilities associated with VIEs.

<i>(in millions)</i>	December 31, 2021		December 31, 2020	
	Rosewater	Indiana Crossroads Wind	Rosewater	Indiana Crossroads Wind
Net property, plant and equipment	\$ 170.1	\$ 525.8	\$ 175.6	\$ —
Current assets	6.2	8.1	1.7	—
<b>Total Assets<sup>(1)</sup></b>	<b>\$ 176.3</b>	<b>\$ 533.9</b>	<b>\$ 177.3</b>	<b>\$ —</b>
Current liabilities	\$ 2.5	\$ 7.5	\$ 15.3	\$ —
Asset retirement obligations	5.7	14.8	5.5	—
Other noncurrent liabilities	—	—	0.1	—
<b>Total Liabilities</b>	<b>\$ 8.2</b>	<b>\$ 22.3</b>	<b>\$ 20.9</b>	<b>\$ —</b>

<sup>(1)</sup> The assets of Rosewater and Indiana Crossroads represent assets consolidated VIEs that can be used only to settle obligations of the respective consolidated VIE. The creditors of the liabilities of Rosewater and Indiana Crossroads do not have recourse to the general credit of the primary beneficiary.

**5. Property, Plant and Equipment**

Our property, plant and equipment on the Consolidated Balance Sheets were classified as follows.

<i>At December 31, (in millions)</i>	2021	2020
<b>Property Plant and Equipment</b>		
Gas Distribution Utility <sup>(1)</sup>	\$ 3,683.7	\$ 3,399.8
Electric Utility <sup>(1)</sup>	6,754.9	6,478.0
Construction Work in Process	544.2	379.8
Renewable Generation Assets <sup>(2)</sup>	702.4	175.7
Non-Utility and Other <sup>(3)</sup>	1,406.3	2,706.1
<b>Total Property Plant and Equipment</b>	<b>\$ 13,091.5</b>	<b>\$ 13,139.4</b>
<b>Accumulated Depreciation and Amortization</b>		
Gas Distribution Utility <sup>(1)</sup>	(1,215.3)	\$ (1,164.3)
Electric Utility <sup>(1)</sup>	(2,433.1)	(2,305.0)
Renewable Generation Assets <sup>(2)</sup>	(6.5)	(0.1)
Non-Utility and Other <sup>(3)</sup>	(1,204.4)	(1,831.5)
<b>Total Accumulated Depreciation and Amortization</b>	<b>\$ (4,859.3)</b>	<b>\$ (5,300.9)</b>
<b>Net Property, Plant and Equipment</b>	<b>\$ 8,232.2</b>	<b>\$ 7,838.5</b>

**Net Property, Plant and Equipment**

3 0,422.2 3 1,020.2

<sup>(1)</sup> Our common utility plant and associated accumulated depreciation and amortization are allocated between Gas Distribution Utility and Electric Utility Property, Plant and Equipment.  
<sup>(2)</sup> Our renewable generation assets are part of our electric segment and represent Non-Utility Property owned and operated by joint ventures between NIPSCO and unrelated tax equity partners and depreciated straight-line over 30 years. Refer to Note 4, "Variable Interest Entities," for additional information.  
<sup>(3)</sup> Non-Utility and Other as of December 31, 2020 includes net book value of four coal units totaling \$903.8 million related to R.M. Schahfer Generating Station. Two of the four units were subsequently retired in 2021 and reclassified to current and long-term Regulatory Assets. Depreciation expense for the remaining net book value continues to be recorded at the composite depreciation rate approved by the IURC. As of December 31, 2021, Non-Utility and Other includes a net book value of \$201.5 million related to the units not yet retired.

On October 1, 2021, we retired R.M. Schahfer Generating Station Units 14 and 15. The net book value of the retired units was reclassified from "Net Property, Plant and Equipment," to current and long-term "Regulatory Assets." The estimated net book value of R.M. Schahfer Generating Station's coal Units 14 and 15 and other associated plant retired was approximately \$600 million. See Note 8, "Regulatory Matters" for additional details regarding the recovery of the regulatory assets associated with retired generating stations.

The weighted average depreciation provisions for utility plant, as a percentage of the original cost, for the periods ended December 31, 2021, 2020 and 2019 were as follows.

	2021	2020	2019
Electric Operations <sup>(1)</sup>	3.6%	3.4%	2.8%
Gas Distribution Operations	2.0%	2.1%	2.2%

<sup>(1)</sup> Increased rate beginning in 2020 primarily attributable to higher depreciation rates from the recent rate case proceeding.

We recognized depreciation expense of \$376.1 million, \$372.3 million and \$310.0 million for the years ended 2021, 2020 and 2019, respectively. The 2021 depreciation expense amount is inclusive of a \$5.3 million credit related to the regulatory deferral of income (loss) associated with our joint ventures, which is not included in current rates. See Note 8, "Regulatory Matters," for additional information.

**Amortization of Software Costs.** We amortized \$22.1 million, \$22.1 million and \$19.6 million in 2021, 2020 and 2019, respectively, related to software recorded as intangible assets. Our unamortized software balance was \$88.6 million and \$73.6 million at December 31, 2021 and 2020, respectively.

**Amortization of Cloud Computing Costs.** We amortized \$3.2 million, \$1.6 million and \$0.7 million in 2021, 2020 and 2019, respectively, related to cloud computing costs to "Operation and maintenance" expense. Our unamortized cloud computing balance was \$17.5 million and \$6.3 million at December 31, 2021 and 2020, respectively.

**6. Goodwill**

Our goodwill assets as of December 31, 2021 and 2020 were \$17.8 million and relate to the purchase of Kokomo Gas in February 1992 and Northern Indiana Fuel and Light in March 1993.

For our annual goodwill impairment analysis performed as of May 1, 2021, we completed a qualitative "step 0" assessment and determined that it was more likely than not that our estimated fair value exceeded our carrying value. For this test, we assessed various assumptions, events and circumstances that would have affected our estimated fair value as compared to our baseline May 1, 2020 "step 1" fair value measurement. There have been no impairments to the carrying value of our goodwill during the periods presented.

**7. Asset Retirement Obligations**

We have recognized asset retirement obligations associated with various legal obligations, including costs to remove and dispose of certain construction materials located within many of our facilities (including our joint venture facilities), certain costs to retire pipeline, removal costs for certain underground storage tanks, removal of certain pipelines known to contain PCB contamination, closure costs for certain sites including ash ponds, solid waste management units and a landfill, as well as some other nominal asset retirement obligations. We have a significant obligation associated with the decommissioning of two hydro facilities located in Indiana. These hydro facilities have an indeterminate life, and as such, no asset retirement obligation has been recorded.

Changes in our liability for asset retirement obligations for the years 2021 and 2020 are presented in the table below.

(in millions)	2021	2020
Beginning Balance	\$ 414.3	\$ 336.5
Accretion recorded as a regulatory liability	12.6	13.4
Additions	23.2	5.5
Settlements	(11.2)	(13.9)
Change in estimated cash flows	(47.6) <sup>(1)</sup>	72.8 <sup>(2)</sup>
Ending Balance	\$ 391.3	\$ 414.3

<sup>(1)</sup> The change in estimated cash flows for 2021 is primarily related to changes in cost estimates for electric generating stations.

<sup>(2)</sup> The change in estimated cash flows for 2020 is primarily attributed to revisions to the estimated costs associated with refining the CCR compliance plan, changes in estimated costs for electric generating stations and the changes in estimated costs for retirement of gas mains. See Note 17-D, "Environmental Matters," for additional information on CCRs.

Certain non-legal costs of removal that have been, and continue to be included in depreciation rates and collected in our customer rates are classified as "Regulatory liabilities" on the Consolidated Balance Sheet.

**8. Regulatory Matters**

Regulatory Assets and Liabilities

We follow the accounting and reporting requirements of ASC Topic 980, which provides that regulated entities account for and report assets and liabilities consistent with the economic effect of regulatory rate-making procedures if the rates established are designed to recover the costs of providing the regulated service and it is probable that such rates can be charged and collected from customers. Certain expenses and credits subject to utility regulation or rate determination normally reflected in income or expense are deferred on the Consolidated Balance Sheets and are recognized in the income statement as the related amounts are included in customer rates and recovered from or refunded to customers. We assess the probability of collection for all our regulatory assets each period.

Regulatory assets were comprised of the following items.

At December 31, (in millions)	2021	2020
<b>Regulatory Assets</b>		
Unrecognized pension and other postretirement benefit costs (see Note 11)	\$ 396.9	\$ 446.7
Retired coal generating stations	803.9	204.7
Losses on commodity price risk programs (see Note 9)	9.6	54.7

PEOPLES GAS SYSTEM, INC.  
DOCKET NO. 20230023-GU  
OPC'S FIRST REQUEST FOR PODS  
FILED: MAY 11, 2023

Depreciation	17.9	28.5
Post-in-service carrying charges	12.0	12.7
Resource adequacy deferral	1.3	3.5
Under-recovered gas costs (see Note 1-I)	20.9	—
Renewable energy investments (See Note 1-S and Note 4)	18.5	—
Other	33.1	41.4
<b>Total Regulatory Assets</b>	<b>\$ 1,314.1</b>	<b>\$ 792.2</b>
<b>Less: Current Portion</b>	<b>100.5</b>	<b>58.9</b>
<b>Total Noncurrent Regulatory Assets</b>	<b>\$ 1,213.6</b>	<b>\$ 733.3</b>

Regulatory liabilities were comprised of the following items.

At December 31, (in millions)	2021	2020
<b>Regulatory Liabilities</b>		
Regulatory effects of accounting for income taxes (see Note 1-N and 10)	\$ 510.1	\$ 542.4
Cost of removal (see Note 7)	385.8	436.4
Over-recovered gas and fuel costs (see Note 1-I)	—	23.3
Gains on commodity price risk programs (see Note 9)	34.2	14.0
Other	25.2	4.6
<b>Total Regulatory Assets</b>	<b>\$ 955.3</b>	<b>\$ 1,020.7</b>
<b>Less: Current Portion</b>	<b>68.3</b>	<b>68.4</b>
<b>Total Noncurrent Regulatory Assets</b>	<b>\$ 887.0</b>	<b>\$ 952.3</b>

Regulatory assets, including under-recovered gas costs and depreciation, of approximately \$445.6 million and \$551.1 million as of December 31, 2021 and 2020, respectively, are not earning a return on investment. These costs are recovered over a remaining life, the longest of which is 41 years.

**Assets:**

**Unrecognized pension and other postretirement benefit costs.** Represents the deferred other comprehensive income or loss of the actuarial gains or losses and the prior service costs or credits that arise during the period but that are not immediately recognized as components of net periodic benefit costs. We defer these gains or losses as a regulatory asset in accordance with regulatory orders or as a result of regulatory precedent, to be recovered through base rates.

**Retired coal generating stations.** Represents the net book value of Units 7 and 8 of Bailly Generating Station that was retired during 2018 and the net book value of Units 14 and 15 of R.M. Schahfer Generating Station retired in 2021. These amounts are currently being amortized at a rate consistent with their inclusion in customer rates. Our December 2019 electric rate case order allows for the recovery of, and on, the net book value of the stations by the end of 2032 and implements a revenue credit for the retired units. The credit is based on the difference between the net book value of Units 14 and 15 upon retirement and the last base rate case proceeding. The credit will be reset when new base rates are determined. See Note 5, "Property, Plant and Equipment," for further details.

**Losses on Commodity Price Risk Programs.** Represents the unrealized losses related to our commodity price risk programs. These programs help to protect against the volatility of commodity prices and these amounts are collected from customers through their inclusion in customer rates.

**Depreciation.** Represents differences between depreciation expense incurred on a GAAP basis and that prescribed through regulatory order. Significant components of this balance include:

- ECRM.** We obtained approval from the IURC to recover certain environmental-related costs including operation and maintenance and depreciation expense once the environmental facilities become operational. The ECRM deferred charges represent expenses that will be recovered from customers through an annual ECRM Cost Tracker (ECT) which authorizes the collection of deferred balances over a six month period. Depreciation of \$0.0 million and \$7.7 million was deferred to a regulatory asset as of December 31, 2021 and 2020, respectively. This regulatory asset was included in electric base rates, which was approved by the IURC on December 4, 2019.
- TDSIC.** We obtained approval from the IURC to recover costs for certain system modernization projects outside of a base rate proceeding. Eighty percent of the related costs, including depreciation, property taxes and debt and equity based carrying charges (see *Post-in-service carrying charges* below) are recovered through a semi-annual recovery mechanism. Recovery of these costs will continue through the TDSIC tracker until such assets are included in rate base through a gas or electric base rate case, respectively. The remaining twenty percent of the costs are deferred until the next base rate case. As of December 31, 2021 and 2020, depreciation of \$16.9 million and \$19.1 million, respectively, was deferred as a regulatory asset.

**Post-in-service carrying charges.** Represents deferred debt-based carrying charges incurred on certain assets placed into service but not yet included in customer rates. Deferral of equity-based carrying charges for the TDSIC program is allowed, however, such amounts are not reflected in regulatory asset balances for financial reporting as equity-based returns do not meet the definition of incurred costs under ASC 980. See description of TDSIC program above under the heading "Depreciation."

**Resource adequacy deferral.** We obtained approval from the IURC to recover certain capacity charges and costs associated with credits paid for the interruptible load. Recovery of these charges and credits will take place through a semi-annual RA tracker filing which authorizes the collection over a six month period.

**Under-recovered gas costs.** Represents the difference between the costs of gas and the recovery of such costs in revenue and is used to adjust future billings for such deferrals on a basis consistent with applicable IURC tariff provisions. Recovery of these costs is achieved through tracking mechanisms.

**Renewable energy investments.** Represents the regulatory deferral of certain amounts representing the timing difference between the profit earned from the joint ventures and the amount included in regulated rates to recover our approved investments in consolidated joint ventures. These amounts will be collected through base rates over the life of the renewable generating assets to which they relate. Refer to Note 1-S, "VIEs and Allocation of Earnings," for additional information. Renewable energy formation and developer costs are also included in this regulatory asset.

**Liabilities:**

**Regulatory effects of accounting for income taxes.** Represents amounts owed to customers for deferred taxes collected at a higher rate than the current statutory rates and liabilities associated with accelerated tax deductions owed to customers that are established during the rate making process. Balance includes excess deferred taxes recorded upon implementation of the TCJA in December 2017, net of amounts amortized through 2019.

**Cost of removal.** Represents anticipated costs of removal that have been, and continue to be, included in depreciation rates and collected in customer rates for future costs to be incurred.

**Over-recovered gas and fuel costs.** Represents the difference between the costs of gas and fuel and the recovery of such costs in revenues, and is the basis to adjust future billings for such refunds on a basis consistent with applicable IURC tariff provisions. Refunding of these revenues is achieved through tracking mechanisms.

**Gains on commodity price risk programs.** Represents the unrealized gains related to our commodity price risk programs. These programs help to protect against the volatility of commodity prices, and these amounts are passed back to customers through their inclusion in customer rates.

**COVID-19 Regulatory Filings**

In response to the COVID-19 pandemic, we received approval from the IURC to defer incremental bad debt expense and the costs to implement the requirements of the COVID-19 related order. Our regulatory asset balance is \$2.2 million as of December, 2021 and was \$9.2 million as of December 31, 2020. All pandemic-related regulatory actions have expired or have been lifted.

**9. Risk Management Activities**

We are exposed to certain risks relating to our ongoing business operations, namely commodity price risk. We recognize that the prudent and selective use of derivatives may help to limit volatility in the price of natural gas.

Risk management assets and liabilities associated with our derivatives are presented on the Consolidated Balance Sheets as shown below.

As of December 31, (in millions)	2021	2020
Price Risk Management Assets - Current <sup>(1)</sup>	\$ 10.6	\$ 10.4
Price Risk Management Assets - Noncurrent <sup>(2)</sup>	\$ 13.8	\$ 2.8
Price Risk Management Liabilities - Current <sup>(3)</sup>	\$ 0.4	\$ 7.3
Price Risk Management Liabilities - Noncurrent <sup>(4)</sup>	\$ 7.4	\$ 45.1

<sup>(1)</sup> Presented in "Prepayments and other" on the Consolidated Balance Sheets.

<sup>(2)</sup> Presented in "Deferred charges and other" on the Consolidated Balance Sheets.

<sup>(3)</sup> Presented in "Other accruals" on the Consolidated Balance Sheets.

<sup>(4)</sup> Presented in "Other noncurrent liabilities" on the Consolidated Balance Sheets.

**Derivatives Not Designated as Hedging Instruments**

**Commodity Price Risk Management.** We, along with our utility customers, are exposed to variability in cash flows associated with natural gas purchases and volatility in natural gas prices. We purchase natural gas for sale and delivery to our retail, commercial and industrial customers, and for most customers the variability in the market price of gas is passed through in their rates. We offer programs to certain customers whereby we assume the variability in the market price of gas. The objective of our commodity price risk programs is to mitigate the gas cost variability, for us or on behalf of our customers, associated with natural gas purchases or sales by economically hedging the various gas cost components using a combination of futures, options, forwards or other derivative contracts.

We received IURC approval to lock in a fixed price for our natural gas customers using long-term forward purchase instruments and is limited to 20% of our average annual GCA purchase volume. As of December 31, 2021, the remaining terms of these instruments range from one to six years.

All gains and losses on these derivative contracts are deferred as regulatory liabilities or assets and are remitted to or collected from customers through our quarterly GCA and FAC mechanisms, respectively. These instruments are not designated as accounting hedges. Refer to Note 8, "Regulatory Matters," for additional information.

There were no amounts excluded from effectiveness testing for derivatives in cash flow hedging relationships at December 31, 2021, 2020 and 2019.

Our derivative instruments measured at fair value as of December 31, 2021 and 2020 do not contain any credit-risk-related contingent features. Cash flows for derivative financial instruments are generally classified in cash flows from operating activities.

**10. Income Taxes**

**Income Tax Expense.** The components of income tax expense (benefit) were as follows.

Year Ended December 31, (in millions)	2021	2020	2019
<b>Income Taxes</b>			
Current			
Federal	\$ 29.5	\$ 35.3	\$ 7.9
State	—	—	(0.1)
Total Current	29.5	35.3	7.8
Deferred			
Federal	26.2	22.8	62.6
State	21.1	11.5	25.7
Total Deferred	47.3	34.3	88.3
Deferred Investment Credits	(0.4)	(0.4)	(0.7)
<b>Income Taxes</b>	<b>\$ 76.4</b>	<b>\$ 69.2</b>	<b>\$ 95.4</b>

**Statutory Rate Reconciliation.** The following table represents a reconciliation of income tax expense at the statutory federal income tax rate to the actual income tax expense from continuing operations.

Year Ended December 31, (in millions)	2021		2020		2019	
Book income before income taxes	\$ 410.0		\$ 358.8		\$ 412.4	
Tax expense at statutory federal income tax rate	86.1	21.0%	75.4	21.0%	86.4	21.0%
Increases (reductions) in taxes resulting from:						
State income taxes, net of federal income tax benefit	16.6	4.0	9.1	2.5	20.4	4.9
Regulatory treatment of depreciation differences	(24.4)	(5.9)	(21.5)	(6.0)	(11.0)	(2.7)
Nondeductible expenses	(1.9)	(0.5)	(2.0)	(0.5)	0.5	0.1
Other, net	—	—	8.2	2.3	(0.9)	(0.2)
<b>Income Taxes</b>	<b>\$ 76.4</b>	<b>18.6%</b>	<b>\$ 69.2</b>	<b>19.3%</b>	<b>\$ 95.4</b>	<b>23.1%</b>

The effective income tax rates were 18.6% 19.3% and 23.1% in 2021, 2020 and 2019, respectively. There was no material change in the effective tax rate from 2021 versus 2020. The 3.8% decrease in effective tax rate in 2020 versus 2019 was primarily the result of lower pre-tax income and increased amortization of excess deferred federal income taxes.

**Net Deferred Income Tax Liability Components.** Deferred income taxes result from temporary differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The principal components of our net deferred tax liability were as follows.

At December 31, (in millions)	2021	2020
<b>Deferred Tax Liabilities</b>		
Accelerated depreciation and other property differences	\$ 1,132.2	\$ 1,059.9
Other regulatory assets	120.1	144.6
<b>Total Deferred Tax Liabilities</b>	<b>1,252.3</b>	<b>1,204.5</b>
<b>Deferred Tax Assets</b>		
Other regulatory liabilities and deferred investment tax credits (including TCJA)	135.3	133.3
Net operating loss carryforward	126.5	143.8
Pensions and other postretirement/postemployment benefits	60.3	74.0
Other, net	29.2	32.1
<b>Total Deferred Tax Assets</b>	<b>351.3</b>	<b>383.2</b>
<b>Net Deferred Tax Liabilities</b>	<b>\$ 901.0</b>	<b>\$ 821.3</b>

At December 31, 2021, we have federal net operating loss carryforwards of \$124.1 million (tax effected). The federal net operating loss carryforwards are available to offset taxable income that will begin to expire in 2036. We believe it is more likely than not that we will realize the benefit from the federal net operating loss carryforwards.

We also have \$2.4 million (tax effected net of federal benefit) of state net operating loss carryforwards that will begin to expire in 2028. We believe it is more likely than not that we will realize the benefit from state net operating loss carryforwards.

We are subject to income taxation in the United States, the state of Indiana and several other state jurisdictions.

We participate in the IRS CAP which provides the opportunity to resolve tax matters with the IRS before filing each year's consolidated federal income tax return. As of December 31, 2021, tax years through 2020 have been audited and are effectively closed to further assessment. The audit of tax year 2021 under the CAP program is expected to be completed in 2022.

The statute of limitation period in Indiana and each of the state jurisdictions in which we operate remains open until the respective limitation period ends, which is generally within 3-4 years from the filing date. As of December 31, 2021, there were no open state income tax audits.

**11. Pension and Other Postretirement Benefits**

NiSource provides defined contribution plans and noncontributory defined benefit retirement plans that cover our employees. Benefits under the defined benefit retirement plan reflect the employees' compensation, years of service and age at retirement. Additionally, NiSource provides health care and life insurance benefits for certain of our retired employees. The majority of employees may become eligible for these benefits if they reach retirement age while working for us. The expected cost of such benefits is accrued during the employees' years of service. Cash contributions are remitted to grantor trusts.

We are a participant in the consolidated NiSource defined benefit retirement plans which cover our employees, and, therefore, we are allocated a ratable portion of NiSource's grantor trusts and investment activity for the Plans in which its employees and retirees participate. As a result, we follow multiple employer accounting under the provision of accounting principles generally accepted in the United States of America. The allocation of fair value of assets is based upon the ratable share of plan funding and participant benefit payments. Investment activity within the trust occurs at the trust level, and we are allocated a portion of investment gains and losses based on our percentage of the total NiSource projected benefit obligation.

**NiSource Pension and Other Postretirement Benefit Plans' Asset Management.** NiSource's Board of Director's have delegated oversight of the pension and other postretirement benefit plans' assets to the NiSource Benefits Committee ("the Committee"). The Committee has adopted investment policy statements for the pension and other postretirement benefit plans' assets. For the pension plans, NiSource employs a liability-driven investing strategy. A total return approach is utilized for the other postretirement benefit plans' assets. A mix of diversified investments are used to maximize the long-term return of plan assets and hedge the liabilities at a prudent level of risk. The investment portfolio includes U.S. and non-U.S. equities, real estate, long-term and intermediate-term fixed income and alternative investments. Risk tolerance is established through careful consideration of plan liabilities, funded status and asset class volatility. Investment risk is measured and monitored on an ongoing basis through quarterly investment portfolio reviews, annual liability measurements and periodic asset/liability studies.

In determining the expected long-term rate of return on plan assets, historical markets are studied, relationships between equities and fixed income are analyzed and current market factors, such as inflation and interest rates are evaluated with consideration of diversification and rebalancing. Our expected long-term rate of return on assets is based on assumptions regarding target asset allocations and corresponding long-term capital market assumptions for each asset class. The pension plans' investment policy calls for a gradual reduction in the allocation of return-seeking assets (fixed income) as the funded status of the plans' increase.

As of December 31, 2021 and December 31, 2020, the acceptable minimum and maximum ranges established by the policy for the pension and other postretirement benefit plans are as follows.

December 31, 2021	Defined Benefit Pension Plan		Postretirement Benefit Plan	
	Minimum	Maximum	Minimum	Maximum

<sup>(1)</sup> Total includes accrued dividends and pending traders with brokers.

The categorization of investments into the asset classes in the tables above are based on definitions established by the NiSource Benefits Committee.

**Fair Value Measurements.** The following table sets forth, by level within the fair value hierarchy, our allocation within the Master Trust and other postretirement benefits investment assets at fair value as of December 31, 2021 and 2020. Assets are classified in their entirety based on the observability of inputs used in determining the fair value measurement. We are allocated a portion of the investment assets at fair value classified within Level 3 of the Master Trust for disclosure purposes based upon our ownership percentage of the total Master Trust. Our allocation of investment assets at fair value classified within Level 3 were zero as of both December 31, 2021 and 2020, respectively. Such amounts were zero of our total investment in the Master Trust and other postretirement benefits' total investments as reported on the statements of net assets available for benefits at fair value as of both December 31, 2021 and 2020.

We use the following valuation techniques to determine fair value. For the year ended December 31, 2021, there were no significant changes to valuation techniques to determine the fair value of our pension and other postretirement benefits' assets.

**Level 1 Measurements**

Most common and preferred stocks are traded in active markets on national and international securities exchanges and are valued at closing prices on the last business day of each period presented. Cash is stated at cost which approximates fair value, with the exception of cash held in foreign currencies which fluctuates with changes in the exchange rates. Short-term bills and notes are priced based on quoted market values.

**Level 2 Measurements**

Most U.S. Government Agency obligations, mortgage/asset-backed securities, and corporate fixed income securities are generally valued by benchmarking model-derived prices to quoted market prices and trade data for identical or comparable securities. To the extent that quoted prices are not available, fair value is determined based on a valuation model that includes inputs such as interest rate yield curves and credit spreads. Securities traded in markets that are not considered active are valued based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Other fixed income includes futures and options which are priced on bid valuation or settlement pricing.

**Level 3 Measurements**

Investments with unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities are classified as level 3 investments.

**Not Classified**

Commingled funds, private equity limited partnerships and real estate partnerships hold underlying investments that have prices derived from quoted prices in active markets and are not classified within the fair value hierarchy. Instead, these assets are measured at estimated fair value using the net asset value per share of the investments. Commingled funds' underlying assets are principally marketable equity and fixed income securities. Units held in commingled funds are valued at the unit value as reported by the investment managers. Private equity and real estate funds invest in natural resources, commercial real estate and distressed real estate. The fair value of these investments is determined by reference to the funds' underlying assets.

<sup>(1)</sup> The change in benefit obligation for Pension Benefits represents the change in Projected Benefit Obligation while the change in benefit obligation for Other Postretirement Benefits represents the change in Accumulated Postretirement Benefit Obligation.

<sup>(2)</sup> The pension actuarial gain was primarily driven by an increase in discount rates. The postretirement benefit gain was also primarily driven by an increase in discount rates.

<sup>(3)</sup> We recognize on our Consolidated Balance Sheets the underfunded and overfunded status of our defined benefit postretirement plans measured as the difference between the fair value of the plan assets and the benefit obligation.

<sup>(4)</sup> We determined that the future recovery of pension and other postretirement benefits costs is probable. We recorded regulatory assets of \$396.9 million as of December 31, 2021 and \$446.7 million as of December 31 2020 that would otherwise have been recorded to accumulated other comprehensive income (loss).

Our accumulated benefit obligation for our pension plan was \$1,218.6 million and \$1,339.8 million as of December 31, 2021 and 2020, respectively. The accumulated benefit obligation as of a date is the actuarial present value of benefits attributed by the pension benefit formula to employee service rendered prior to that date and based on current and past compensation levels. The accumulated benefit obligation differs from the projected benefit obligation disclosed in the table above in that it includes no assumptions about future compensation levels.

Our pension plan was overfunded by \$99.4 million at December 31, 2021 compared to being overfunded, in aggregate, by \$46.8 million at December 31, 2020. The improvement in funded status was due primarily to favorable asset returns. We did not contribute to our pension plan in either 2021 or 2020.

Our other postretirement benefit plans were underfunded by \$276.4 million at December 31, 2021 compared to being underfunded by \$296.9 million at December 31, 2020. The improvement in funded status was primarily due to employer contributions and increased discount rates. We contributed \$18.3 million and \$18.0 million to our other postretirement benefits plans in 2021 and 2020, respectively.

The following table provides the key assumptions that were used to calculate the pension and other postretirement benefits obligations for our various plans as of December 31.

	Pension Benefits		Other Postretirement Benefits	
	2021	2020	2021	2020
<b>Weighted-average assumptions to determine benefit obligation</b>				
Discount rate	2.81%	2.44%	2.87%	2.51%
Rate of compensation increases	4.00%	4.00%	—	—

Interest crediting rates	4.00%	4.00%		
Health care trend rates				
Trend for new year	—	—	6.22%	6.73%
Ultimate trend	—	—	4.50%	4.50%
Year ultimate trend reached	—	—	2030	2029

We expect to make no contributions to our pension plan and expect to make contributions of approximately \$18.9 million to our postretirement medical and life plans in 2022. The following table provides benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter. The expected benefits are estimated based on the same assumptions used to measure our benefit obligation at the end of the year and include benefits attributable to the estimated future service of employees.

(in millions)	Pension Benefits	Other Postretirement Benefits
Year(s)		
2022	\$ 93.0	\$ 18.9
2023	89.5	18.5
2024	87.2	18.1
2025	85.1	17.7
2026	81.9	17.4
2027-2031	383.5	85.6

The following table provides the components of the plans' net periodic benefits costs for each of the three years ended December 31, 2021, 2020 and 2019.

(in millions)	Pension Benefits			Other Postretirement Benefits		
	2021	2020	2019	2021	2020	2019
<b>Components of Net Periodic Benefit Cost (Income) <sup>(1)</sup></b>						
Service cost	\$ 19.6	\$ 18.3	\$ 15.7	\$ 3.4	\$ 3.3	\$ 2.4
Interest cost	21.7	34.1	45.0	5.2	8.1	10.0
Expected return on assets	(70.1)	(70.4)	(67.4)	(0.8)	(0.8)	(0.7)
Amortization of prior service cost (credit)	0.1	0.2	0.2	(2.9)	(3.0)	(4.1)
Recognized actuarial loss	15.3	20.9	25.6	3.2	3.0	1.1
<b>Total Net Periodic Benefit Cost (Income)</b>	<b>\$ (13.4)</b>	<b>\$ 3.1</b>	<b>\$ 19.1</b>	<b>\$ 8.1</b>	<b>\$ 10.6</b>	<b>\$ 8.7</b>

<sup>(1)</sup> Service cost is presented in "Operation and maintenance" and non-service cost components are presented within "Other, net", on the Statements of Consolidated Operations.

The following table provides the key assumptions that were used to calculate the net period benefits costs for our various plans.

	Pension Benefits			Other Postretirement Benefits		
	2021	2020	2019	2021	2020	2019
<b>Weighted-Average Assumptions to Determine Net Periodic Benefit Cost</b>						
Discount rate - service cost	2.89%	3.47%	4.55%	3.08%	3.59%	4.65%
Discount rate - interest cost	1.67%	2.71%	3.89%	1.74%	2.77%	3.96%
Expected long-term rate of return on plan assets	5.20%	5.70%	6.10%	6.85%	6.88%	7.18%
Rate of compensation increases	4.00%	4.00%	4.00%	—	—	—
Interest crediting rates	4.00%	4.00%	—	—	—	—

We assumed a 5.2% and 6.85% rate of return on pension and other postretirement plan assets, respectively, for our calculation of 2021 pension benefits cost. These rates are primarily based on asset mix and historical rates of return and were adjusted in the current year due to anticipated changes in asset allocation and projected market returns.

The following table provides other changes in plan assets and projected benefit obligations recognized in regulatory assets or liabilities.

(in millions)	Pension Benefits		Other Postretirement Benefits	
	2021	2020	2021	2020
<b>Other Changes in Plan Assets and Projected Benefit Obligations Recognized in Regulatory Assets or Liabilities</b>				
Net actuarial loss (gain)		(23.8)	(50.5)	(10.0)
Less: amortization of prior service (credit) cost		(0.1)	(0.2)	2.9
Less: amortization of net actuarial (gain)		(15.3)	(20.9)	(3.2)
<b>Total Recognized in Regulatory Assets or Liabilities</b>		<b>\$ (39.2)</b>	<b>\$ (71.6)</b>	<b>\$ (10.3)</b>
<b>Amount Recognized in Net Periodic Benefits Cost and Regulatory Assets or Liabilities</b>		<b>\$ (52.6)</b>	<b>\$ (68.5)</b>	<b>\$ (2.2)</b>

## 12. Equity

**Noncontrolling Interest in Consolidated Subsidiaries.** As of December 31, 2021 and 2020, NIPSCO and tax equity partners have completed their cash contributions into the Indiana Crossroads Wind and Rosewater joint ventures. Earnings, tax attributes and cash flows are allocated to both NIPSCO and the respective tax equity partners in varying percentages by category and over the life of the partnership. The tax equity partner's contributions, net of these allocations, is represented as a noncontrolling interest within total equity on the Consolidated Balance Sheets. Refer to Note 4, "Variable Interest Entities," for more information.

## 13. Long-Term Debt

Our long-term debt as of December 31, 2021 and 2020 is as follows.

As of December 31, (in millions)	2021	2020
<b>Medium-Term Notes —</b>		
Interest rates between 7.16% and 7.69% with a weighted average interest rate of 7.61% and various maturities between August 30, 2022 and August 4, 2027	\$ 68.0	\$ 68.0
<b>Intercompany Notes —</b>

<b>Total Long-Term Debt</b>	<b>\$ 2,517.6</b>	<b>\$ 2,339.9</b>

Details of our 2021 long-term debt related activity are summarized below.

- On June 30, 2021 we issued \$175.0 million of 3.272% intercompany notes.

Details of our 2020 long-term debt related activity are summarized below.

- On June 26, 2020, we repaid \$137.5 million of 5.420% intercompany notes.
- On June 30, 2020, we issued \$208.0 million of 3.174% intercompany notes.

See Note 17-A, "Contractual Obligations," for the outstanding long-term debt maturities at December 31, 2021.

Unamortized debt expense and discount on long-term debt applicable to outstanding bonds are being amortized over the lives of such bonds.

#### 14. Short-Term Borrowings

We satisfy our liquidity requirements primarily through internally generated funds and through intercompany borrowings from the NiSource Money Pool. We may borrow a maximum of \$1.0 billion through the NiSource Money Pool as approved by the FERC. As of December 31, 2021, we had \$414.4 million of short-term NiSource Money Pool borrowings outstanding at an interest rate of 0.19%. As of December 31, 2020, we had \$432.2 million of short-term NiSource Money Pool borrowings outstanding at an interest rate of 1.22%. Amounts received from the NiSource Money Pool are reflected in "Short-term borrowings - affiliated" on the Consolidated Balance Sheets.

We may also deposit funds into the NiSource Money Pool. As of both December 31, 2021 and December 31, 2020, we had no short-term NiSource Money Pool deposits due. Amounts invested in the NiSource Money Pool are reflected in "Accounts receivable - affiliated" on the Consolidated Balance Sheets.

**Accounts Receivable Transfer Program.** We maintain a receivables agreement whereby we transfer customer accounts receivables to a third party financial institution through our wholly-owned and consolidated special purpose entity, NARC. The current agreement expires on August 17, 2022 and may be further extended if mutually agreed to by the parties thereto.

All receivables transferred to a third party are valued at face value, which approximates fair value due to their short-term nature. The amount of the undivided percentage ownership interest in the accounts receivables transferred is determined in part by required loss reserves under the agreement.

Transfers of accounts receivable are accounted for as secured borrowings resulting in the recognition of short-term borrowings on the Consolidated Balance Sheets. As of December 31, 2021, the maximum amount of debt that could be recognized related to our accounts receivable program is \$100.0 million.

We had no short-term borrowings related to the securitization transactions as of December 31, 2021 and December 31, 2020.

For the years ended December 31, 2021 and 2020, zero and (\$167.0) million, respectively, were recorded as cash flows used for financing activities related to the change in short-term borrowings due to securitization transactions. For the accounts receivable transfer program, we pay used facility fees for amounts borrowed, unused commitment fees for amounts not borrowed and upfront renewal fees. Fees associated with the securitization transactions were \$0.6 million, \$2.3 million and \$5.7 million for the years ended December 31, 2021, 2020 and 2019, respectively. We remain responsible for collecting on the receivables securitized, and the receivables cannot be transferred to another party.

Items listed above are presented net in the Statements of Consolidated Cash Flows as their maturities are less than 90 days.

#### 15. Leases.

**Lease Descriptions.** We are the lessee for substantially all of our leasing activity, which includes operating and finance leases for corporate and field offices, railcars and fleet vehicles. Our corporate and field office leases have remaining lease terms between 1 and 23 years with options to renew the leases for up to 25 years. We lease railcars to transport coal to and from our electric generation facilities. Our railcars are specifically identified in the lease agreements and have lease terms between 1 and 2 years with options to renew for 1 year. Our fleet vehicles include trucks, trailers and equipment that have been customized specifically for use in the utility industry. We lease fleet vehicles on 1-year terms, after which we have the option to extend on a month-to-month basis or terminate with written notice. ROU assets and liabilities on our Consolidated Balance Sheets do not include obligations for possible fleet vehicle renewals beyond the initial lease term. While we have the ability to renew these leases beyond the initial term, we are not reasonably certain to do so.

We have not provided material residual value guarantees for our leases, nor do our leases contain material restrictions or covenants. Lease contracts containing renewal and termination options are mostly exercisable at our sole discretion. Certain of our real estate and railcar leases include renewal periods in the measurement of the lease obligation if we have deemed the renewals reasonably certain to be exercised.

With respect to service contracts involving the use of assets, if we have the right to direct the use of the asset and obtain substantially all economic benefits from the use of an asset, we account for the service contract as a lease. Unless specifically provided to us by the lessor, we utilize NiSource's collateralized incremental borrowing rate commensurate to the lease term as the discount rate for all of our leases. ASC 842 permits a lessee, by class of underlying asset, not to separate non-lease components from lease components. Our policy is to apply this expedient for our leases of fleet vehicles and railcars when calculating their respective lease liabilities.

Lease costs for the year ended December 31, 2021 and December 31, 2020 are presented in the table below. These costs include both amounts recognized in expense and amounts capitalized as part of the cost of another asset. Income statement presentation for these costs, when ultimately recognized on the income statement, is also included.

Year Ended December 31, (in millions)

Income Statement Classification

2021

2020

Finance lease cost				
Amortization of right-of-use assets	Depreciation and amortization		\$ 1.8	\$ 0.2
Interest on lease liabilities	Other, net		1.1	—
Total finance lease cost			2.9	0.2
Operating lease cost	Operating and maintenance		4.1	5.2
Total lease cost			\$ 7.0	\$ 5.4

Our right-of-use assets and liabilities are presented in the following lines on the Consolidated Balance Sheets.

As of December 31, (in millions)	Classification on Consolidated Balance Sheets	2021	2020
<b>Assets</b>			
Finance leases	Net Property, Plant and Equipment	\$ 23.6	\$ 20.4
Operating leases	Deferred charges and other	7.0	7.7
<b>Total leased assets</b>		<b>\$ 30.6</b>	<b>\$ 28.1</b>
<b>Liabilities</b>			
Current			
Finance leases	Current portion of long-term debt	\$ 2.2	\$ 1.9
Operating leases	Other accruals	1.8	2.8
Noncurrent			
Finance leases	Long-term debt	16.5	14.1
Operating leases	Other noncurrent liabilities	5.4	4.9
<b>Total lease liabilities</b>		<b>\$ 25.9</b>	<b>\$ 23.7</b>

Other pertinent information related to leases was as follows.

Year Ended December 31, (in millions)	2021	2020
<b>Cash paid for amounts included in the measurement of lease liabilities</b>		
Operating cash flows used for finance leases	\$ 0.6	\$ —
Operating cash flows used for operating leases	3.9	5.2
Financing cash flows used for finance leases	2.2	0.2
<b>Right-of-use assets obtained in exchange for lease obligations</b>		
Finance leases	\$ 4.9	\$ 20.6
Operating leases	5.1	2.7

at December 31, (in millions)	2021	2020
<b>Weighted-average remaining lease term (years)</b>		
Finance leases	13.3	8.0
Operating leases	7.2	5.1
<b>Weighted-average discount rate</b>		
Finance leases	1.8 %	1.8 %
Operating leases	3.0 %	3.9 %

Maturities of our lease liabilities as of December 31, 2021 were as follows:

As of December 31, 2021 (in millions)	Total	Finance Leases	Operating Leases
2022	\$ 4.8	\$ 2.7	\$ 2.1
2023	3.7	2.7	1.0
2024	3.6	2.7	0.9
2025	3.5	2.7	0.8
2026	3.5	2.7	0.8
Thereafter	10.2	7.6	2.6
Total lease payments	29.3	21.1	8.2
Less: Imputed interest	(3.4)	(2.4)	(1.0)
Total	25.9	18.7	7.2
Reported as of December 31, 2021			
Short-term lease liabilities	4.0	2.2	1.8
Long-term lease liabilities	21.9	16.5	5.4
Total lease liabilities	\$ 25.9	\$ 18.7	\$ 7.2

There were no leases signed but not yet commenced as of December 31, 2021.

## 16. Fair Value

### A. Fair Value Measurements.

#### Recurring Fair Value Measurements

The following tables present financial assets and liabilities measured and recorded at fair value on our Consolidated Balance Sheets on a recurring basis and their level within the fair value hierarchy as of December 31, 2021 and December 31, 2020.

Recurring Fair Value Measurements December 31, 2021 (in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2021
Risk Management Assets	\$ —	\$ 24.4	\$ —	\$ 24.4
Risk Management Liabilities	\$ —	\$ 7.8	\$ —	\$ 7.8

Quoted Prices in Active Significant Other Observable Balance as of

Recurring Fair Value Measurements December 31, 2020 (in millions)	Markets for Identical Assets (Level 1)	Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	December 31, 2020
Risk Management Assets	\$ —	\$ 13.2	\$ —	\$ 13.2
Risk Management Liabilities	\$ —	\$ 52.4	\$ —	\$ 52.4

**Risk Management Assets and Liabilities.** Risk management assets and liabilities include commodity exchange-traded and non-exchange-based derivative contracts.

Level 1 - When utilized, exchange-traded derivative contracts are based on unadjusted quoted prices in active markets and are classified within Level 1. These financial assets and liabilities are secured with cash on deposit with the exchange; therefore, nonperformance risk has not been incorporated into these valuations. These financial assets and liabilities are deemed to be cleared and settled daily by NYMEX as the related cash collateral is posted with the exchange. As a result of this exchange rule, NYMEX derivatives are considered to have no fair value at the balance sheet date for financial reporting purposes, and are presented in Level 1 net of posted cash; however, the derivatives remain outstanding and subject to future commodity price fluctuations until they are settled in accordance with their contractual terms.

Level 2 - Certain non-exchange-traded derivatives are valued using broker or over-the-counter, on-line exchanges. In such cases, these non-exchange-traded derivatives are classified within Level 2. Non-exchange-based derivative instruments include forwards and options. In certain instances, these instruments may utilize models to measure fair value. We use a similar model to value similar instruments. Valuation models utilize various inputs that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, other observable inputs for the asset or liability and market-corroborated inputs, (i.e. inputs derived principally from or corroborated by observable market data by correlation or other means). Where observable inputs are available for substantially the full term of the asset or liability, the instruments are categorized within Level 2.

Level 3 - Certain derivatives trade in less active markets with a lower availability of pricing information and models may be utilized in the valuation. When such inputs have a significant impact on the measurement of fair value, the instrument is categorized within Level 3.

Credit risk is considered in the fair value calculation of derivative instruments that are not exchange-traded. Credit exposures are adjusted to reflect collateral agreements which reduce exposures. As of December 31, 2021 and 2020, there were no material transfers between fair value hierarchies. Additionally, there were no changes in the method or significant assumptions used to estimate the fair value of our financial instruments.

We have entered into long-term forward natural gas purchase instruments to lock in a fixed price for our natural gas customers. We value these contracts using a pricing model that incorporates market-based information when available, as these instruments trade less frequently and are classified within Level 2 of the fair value hierarchy. For additional information see Note 9, "Risk Management Activities."

There were no material items in the fair value reconciliation of Level 3 assets and liabilities measured at fair value on a recurring basis as of December 31, 2021 and 2020.

#### Non-recurring Fair Value Measurements

We measure the fair value of certain assets on a non-recurring basis, typically annually or when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable.

**B. Other Fair Value Disclosures for Financial Instruments.** The carrying amount of cash and cash equivalents, restricted cash, customer deposits and short-term borrowings is a reasonable estimate of fair value due to their liquid or short-term nature. Our long-term borrowings are recorded at historical amounts.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments.

**Long-term Debt.** The fair value of outstanding long-term debt is estimated based on the quoted market prices for the same or similar securities. Certain premium costs associated with the early settlement of long-term debt are not taken into consideration in determining fair value. These fair value measurements are classified within Level 2 of the fair value hierarchy. As of December 31, 2021 and 2020, there was no change in the method or significant assumptions used to estimate the fair value of long-term debt.

The carrying amount and estimated fair values of financial instruments were as follows.

(in millions)	Carrying Amount as of December 31, 2021	Estimated Fair Value as of December 31, 2021	Carrying Amount as of December 31, 2020	Estimated Fair Value as of December 31, 2020
Long-term debt (including current portion)	\$ 2,517.6	\$ 2,931.5	\$ 2,338.0	\$ 2,920.2

## 17. Other Commitments and Contingencies

**A. Contractual Obligations.** We have contractual obligations requiring payments at specified periods. The obligations include long-term debt, lease obligations, energy commodity contracts and obligations for various services including pipeline capacity. The total contractual obligations in existence at December 31, 2021 and their maturities were as follows.

(in millions)	Total	2022	2023	2024	2025	2026	After
Long-term debt <sup>(1)</sup>	\$ 2,499.0	\$ 10.0	\$ 80.0	\$ —	\$ 75.0	\$ —	\$ 2,334.0
Interest payments on long-term debt	2,359.0	115.0	111.8	109.4	108.2	104.6	1,810.0
Finance leases <sup>(2)</sup>	21.1	2.7	2.7	2.7	2.7	2.7	7.6
Operating leases <sup>(3)</sup>	25.0	4.4	4.6	4.5	4.4	4.4	2.7
Energy commodity contracts	68.6	60.4	8.2	—	—	—	—
Pipeline service obligations	242.0	88.7	83.6	56.2	13.5	—	—
Other service obligations	2.9	2.8	0.1	—	—	—	—
Other liabilities <sup>(4)</sup>	411.0	20.4	390.6	—	—	—	—
<b>Total Contractual Obligations</b>	<b>\$ 5,628.6</b>	<b>\$ 304.4</b>	<b>\$ 681.6</b>	<b>\$ 172.8</b>	<b>\$ 203.8</b>	<b>\$ 111.7</b>	<b>\$ 4,154.3</b>

<sup>(1)</sup> Long-term debt balance exclude unamortized discounts of \$0.1 million.

<sup>(2)</sup> Finance lease payments shown above are inclusive of interest totaling \$2.4 million.

<sup>(3)</sup> Operating lease payments shown above are inclusive of interest totaling \$1.0 million. Operating lease balances do not include amounts for fleet leases that can be renewed beyond the initial lease term. While we have the ability to renew these leases beyond the initial term we are not reasonably certain (as that term is defined in ASC 842) to do so as they are renewed month-to-month after the first year. If we were to continue the fleet leases outstanding at December 31, 2021, payments would be \$12.6 million in 2022, \$11.4 million in 2023, \$9.9 million in 2024, \$8.2 million in 2025, \$5.9 million in 2026 and \$6.5 million thereafter.

<sup>(4)</sup> Other liabilities shown above are inclusive of Rosewater and Indiana Crossroads Developer payments due in 2023.

**Purchase and Service Obligations.** We have entered into various purchase and service agreements whereby we are contractually obligated to make certain minimum payments in future periods. Our purchase obligations are for the purchase of physical quantities of natural gas, electricity and coal. Our service agreements encompass a broad range of business support and maintenance functions which are generally described below.

We have entered into various energy commodity contracts to purchase physical quantities of natural gas, electricity and coal. These amounts represent the minimum quantity of these commodities we are obligated to purchase at both fixed and variable prices. To the extent contractual purchase prices are variable, obligations disclosed in the table above are valued at market prices as of December 31, 2021.

We have power purchase arrangements representing a total of 500 MW of wind power, with contracts expiring between 2024 and 2040. No minimum quantities are specified within these agreements due to the variability of electricity generation from wind, so no amounts related to these contracts are included in the table above. Upon early termination of one of these agreements for any reason (other than material breach by the counterparties), we may be required to pay a termination charge that could be material depending on the events giving rise to termination and the timing of the termination.

We have pipeline service agreements that provide for pipeline capacity, transportation and storage services. These agreements, which have expiration dates from 2022 to 2038, require us to pay fixed monthly charges.

We have contracts with three major rail operators providing for coal transportation services for which there are certain minimum payments. These service contracts extend for various periods through 2028.

**B. Guarantees and Indemnities.** NiSource has provided guarantees related to its future performance under BTAs for our renewable generation projects. At December 31, 2021 and 2020, their guarantees for multiple BTAs totaled \$288.9 million and \$40.7 million, respectively. In February 2022, the amount of the guarantees increased to \$485.2 million in accordance with the Fairbanks and Cavalry BTAs. The amount of each guaranty will decrease upon the completion of the construction of the facilities. See “-E. Other Matters – Generation Transition,” below for more information.

**C. Legal Proceedings.** We are party to certain claims and legal proceedings arising in the ordinary course of business, none of which are deemed to be individually material at this time. Due to the inherent uncertainty of litigation, there can be no assurance that the resolution of any particular claim or proceeding would not have a material adverse effect on our results of operations, financial position or liquidity. If one or more of such matters were decided against us, the effects could be material to our results of operations in the period in which we would be required to record or adjust the related liability and could also be material to our cash flows in the periods that we would be required to pay such liability.

**D. Environmental Matters.** Our operations are subject to environmental statutes and regulations related to air quality, water quality, hazardous waste and solid waste. We believe we are, in all material respects, in compliance with the environmental regulations currently applicable to our operations.

It is management’s continued intent to address environmental issues in cooperation with regulatory authorities in such a manner as to achieve mutually acceptable compliance plans. However, there can be no assurance that fines and penalties will not be incurred. Management expects a majority of environmental assessment and remediation costs and asset retirement costs, further described below, to be recoverable through customer rates. See Note 8, “Regulatory Matters,” for additional details.

As of December 31, 2021 and 2020, we had recorded a liability of approximately \$40.0 million and \$40.9 million, respectively, to cover environmental remediation at various sites. This liability is included in “Legal and environmental” and “Other noncurrent liabilities” on the Consolidated Balance Sheets. We recognize costs associated with environmental remediation obligations when the incurrence of such costs is probable and the amounts can be reasonably estimated. The original estimates for remediation activities may differ materially from the amount ultimately expended. The actual future expenditures depend on many factors, including laws and regulations, the nature and extent of impact and the method of remediation. These expenditures are not currently estimable at some sites. We periodically adjust our liability as information is collected and estimates become more refined. See Note 7, “Asset Retirement Obligations,” for a discussion of all obligations, including those discussed below.

**CERCLA.** We are a potentially responsible party at waste disposal sites under the CERCLA and similar state laws. Under CERCLA, each potentially responsible party can be held jointly, severally and strictly liable for the remediation costs as the EPA, or state, can allow the parties to pay for remedial action themselves and request reimbursement from the potentially responsible parties. We have retained CERCLA environmental liabilities, including remediation liabilities, associated with certain current and former operations. At this time, we cannot estimate the full cost of remediating properties that have not yet been investigated, but it is possible that the future costs be material to the Condensed Consolidated Financial Statements (unaudited).

**MGP.** We maintain a program to identify and investigate former MGP sites where we may have liability. The program has identified 25 such sites where liability is probable. Remedial actions at many of these sites are being overseen by state or federal environmental agencies through consent agreements or voluntary remediation agreements.

We utilize a probabilistic model to estimate our future remediation costs related to our MGP sites. The model was prepared with the assistance of a third party and incorporates our experience and general industry experience with remediating MGP sites. We complete an annual refresh of the model in the second quarter of each fiscal year. No material changes to the estimated future remediation costs were noted as a result of the refresh completed as of June 30, 2021. Our total estimated liability related to the facilities subject to remediation was \$34.2 million and \$33.3 million at December 31, 2021 and 2020, respectively. The liability represents our best estimate of the probable cost to remediate the MGP sites. We believe that it is reasonably possible that remediation costs could vary by as much as \$6.5 million in addition to the costs noted above. Remediation costs are estimated based on the best available information, applicable remediation standards at the balance sheet date and experience with similar facilities.

**CCRs.** We are in compliance with the EPA’s final rule for the regulation of CCRs. The CCR rule also resulted in revisions to previously recorded legal obligations associated with the retirement of certain of our facilities. The actual asset retirement costs related to the CCR rule may vary substantially from the estimates used to record the increased asset retirement obligation due to the uncertainty about the requirements that will be established by environmental authorities, compliance strategies that will be used, and the preliminary nature of available data used to estimate costs. As allowed by the rule, we will continue to collect data over time to determine the specific compliance solutions and associated costs and, as a result, the actual costs may vary. We will also continue to work with the EPA and the Indiana Department of Environmental Management to obtain administrative approvals associated with the CCR rule. In the event that the approvals are not obtained, future operations could be impacted. We cannot estimate the likelihood that the agencies will deny approvals or the financial impact on us if these approvals are not obtained.

**E. Other Matters.**

**Generation Transition.** We have executed several PPAs to purchase 100% of the output from renewable generation facilities at a fixed price per MWh. Each facility supplying the energy will have an associated nameplate capacity, and payments under the PPAs will not begin until the associated generation facility is constructed by the owner/seller. We have also executed several BTAs with developers to construct renewable generation facilities. Our purchase requirement under the BTAs is dependent on satisfactory approval of the BTA by the IURC, successful execution of an agreement with a tax equity partner and timely completion of construction. We have either received IURC approval for all of our BTAs and PPAs. We, and the tax equity partner, are both obligated to make cash contributions to the joint venture that acquires the project at the date construction is substantially complete. Once the tax equity partner has earned their negotiated rate of return and we have reached the agreed upon contractual date, we have the option to purchase at fair market value from the tax equity partner the remaining interest in the joint venture.

**18. Other, Net**

Year Ended December 31, (in millions)	2021	2020	2019

Page 202-203

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)**

- Report below the original cost of electric plant in service according to the prescribed accounts.
- In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
- Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
- For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.
- Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
- Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of the prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d) distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.
- Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.
- For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.
- For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date.

**ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)**

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 12, column (c), and that reported for electric plant in service, page 204, column (d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

**INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)**

- Report below investments in Account 123.1, Investments in Subsidiary Companies.
- Provide a subheading for each company and list thereunder the information called for below. Sub-TOTAL by company and give a TOTAL in columns (e), (f), (g) and (h). (a) Investment in Securities - List and describe each security owned. For bonds give also principal amount, date of issue, maturity, and interest rate. (b) Investment Advances - Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
- Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.
- For any securities, notes, or accounts that were pledged designate such securities, notes, or accounts in a footnote, and state the name of pledgee and purpose of the pledge.
- If Commission approval was required for any advance made or security acquired, designate such fact in a footnote and give name of Commission, date of authorization, and case or docket number.
- Report column (f) interest and dividend revenues from investments, including such revenues from securities disposed of during the year.
- In column (h) report for each investment disposed of during the year, the gain or loss represented by the difference between cost of the investment (or the other amount at which carried in the books of account if different from cost) and the selling price thereof, not including interest adjustment includible in column (f).
- Report on Line 42, column (a) the TOTAL cost of Account 123.1.

**CAPITAL STOCKS (Account 201 and 204)**

1. Report below the particulars (details) called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show separate totals for common and preferred stock. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filing, a specific reference to report form (i.e., year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.
2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended to end of year.
3. Give details concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or noncumulative.
5. State in a footnote if any capital stock that has been nominally issued is nominally outstanding at end of year.
6. Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purpose of pledge.

**RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES**

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

**TAXES ACCRUED, PREPAID AND CHARGES DURING YEAR**

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are known, show the amounts in a footnote to these taxes.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in these taxes.
3. Include in column (g) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.
5. If any tax (exclude Federal and State income taxes) covers more than one year, show the required information separately for each tax year, identifying the tax year.
6. Enter all adjustments of the accrued and prepaid tax accounts in column (i) and explain each adjustment in a footnote. Designate debit adjustments with a minus sign.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmission to the taxing authority.
8. Report in columns (l) through (o) how the taxes were distributed. Report in column (o) only the amounts charged to Accounts 408.1 and 409.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (o) the taxes charged to other utility departments.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

**Electric Operating Revenues**

- The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
- Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
- Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The average number of customers means the average of twelve figures at the close of each month.
- If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
- Disclose amounts of \$250,000 or greater in a footnote for accounts 451, 456, and 457.2.
- Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
- See page 108, Important Changes During Period, for important new territory added and important rate increase or decreases.
- For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
- Include unmetered sales. Provide details of such Sales in a footnote.

**SALES OF ELECTRICITY BY RATE SCHEDULES**

1. Report below for each rate schedule in effect during the year the MWh of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Page 310.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

1. Report below for each rate schedule in effect during the year the MWh of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Page 310.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Line No.	Number and Title of Rate Schedule (a)	MWh Sold (b)	Revenue (c)	Average Number of Customers (d)	KWh of Sales Per Customer (e)	Revenue Per KWh Sold (f)

--	---	-------------------------------	---

**SALES FOR RESALE (Account 447)**

- Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326).
- Enter the name of the purchaser in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.

SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.

LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.

AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

- Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (g) through (k).
- In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
- Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
- The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401, line 24.
- Footnote entries as required and provide explanations following all required data.

--	---	-------------------------------	---

**PURCHASED POWER (Account 555)**

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for imbalanced exchanges).
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes prc resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category sh firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract def seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside f the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settl

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the co schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the monthly avera average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all othe (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered de integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any de explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent, excluding purchases for energy storage. Report in column (h) the the respondent for energy storage purchases. Report in columns (i) and (j) the megawatthours of power exchanges received and delivered, used as t exchange.
7. Report demand charges in column (k), energy charges in column (l), and the total of any other types of charges, including out-of-period adjustments, components of the amount shown in column (m). Report in column (n) the total charge shown on bills received as settlement by the respondent. For | settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (m) in incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in columns (g) through (n) must be totaled on the last line of the schedule. The total amount in columns (g) and (h) must be reported as Pur amount in column (i) must be reported as Exchange Received on Page 401, line 12. The total amount in column (j) must be reported as Exchange De
9. Footnote entries as required and provide explanations following all required data.

**TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1) (Including transactions referred to as "A")**

- Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-transmission facilities, etc., during the quarter.
- Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
- Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c).
- In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting period reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.
- In column (e), identify the FERC Rate Schedule or Tariff Number. On separate lines, list all FERC rate schedules or contract designations under which the energy was received as specified in the contract. In column (f), report the designation for the substation, or other appropriate identification for where the energy was received as specified in the contract. In column (g) report the designation for the substation, or other appropriate identification for where the energy was received as specified in the contract.
- Report in column (h) the number of megawatts of billing demand that is specified in the firm transmission service contract. Demand reported in column (h) must be stated on a megawatts basis and explain.
- Report in column (i) and (j) the total megawatt-hours received and delivered.
- In column (k) through (n), report the revenue amounts as shown on bills or vouchers. In column (k), provide revenues from demand charges related to the transmission service. In column (l), provide revenues from energy charges related to the amount of energy transferred. In column (m), provide the total revenues from all other transmission services. Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on the monetary settlement was made, enter zero (0) in column (n). Provide a footnote explaining the nature of the non-monetary settlement, including the amount of the settlement.
- The total amounts in columns (i) and (j) must be reported as Transmission Received and Transmission Delivered for annual report purposes only on a monthly basis.
- Footnote entries and provide explanations following all required data.

**TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)**

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to-Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter ""TOTAL"" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

**Depreciation and Amortization of Electric Plant (Account 403, 404, 405)**

- Report in section A for the year the amounts for: (b) Depreciation Expense (Account 403); (c) Depreciation Expense for Asset Retirement Costs (Account 403.1); (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
- Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
- Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.  
Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.  
In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.  
For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type of mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
- If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

**REGULATORY COMMISSION EXPENSES**

1. Report particulars (details) of regulatory commission expenses incurred during the current year (or incurred in previous years, if being amortized) related to cases before a regulatory body, or cases in which such a body was a party.
2. Report in columns (b) and (c), only the current year's expenses that are not deferred and the current year's amortization of amounts deferred in previous years.
3. Show in column (k) any expenses incurred in prior years which are being amortized. List in column (a) the period of amortization.
4. List in columns (f), (g), and (h), expenses incurred during the year which were charged currently to income, plant, or other accounts.
5. Minor items (less than \$25,000) may be grouped.

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES**

- Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D and D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects. (Identify recipient regardless of affiliation.) For any R, D and D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
- Indicate in column (a) the applicable classification, as shown below:  
Classifications:  

<p>Electric R, D and D Performed Internally:</p> <p>    Generation</p> <p>        hydroelectric</p> <p>        Recreation fish and wildlife</p> <p>        Other hydroelectric</p> <p>    Fossil-fuel steam</p> <p>    Internal combustion or gas turbine</p> <p>    Nuclear</p> <p>    Unconventional generation</p> <p>    Siting and heat rejection</p> <p>    Transmission</p> <p>        Overhead</p>	<p>    Underground</p> <p>        Distribution</p> <p>        Regional Transmission and Market Operation</p> <p>        Environment (other than equipment)</p> <p>        Other (Classify and include items in excess of \$50,000.)</p> <p>        Total Cost Incurred</p> <p>    Electric, R, D and D Performed Externally:</p> <p>        Research Support to the electrical Research Council or the Electric Power Research Institute</p> <p>        Research Support to Edison Electric Institute</p> <p>        Research Support to Nuclear Power Groups</p> <p>        Research Support to Others (Classify)</p> <p>        Total Cost Incurred</p>
--	---
- Include in column (c) all R, D and D items performed internally and in column (d) those items performed outside the company costing \$50,000 or more, briefly describing the specific area of R, D and D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under \$50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D and D activity.
- Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e).
- Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
- If costs have not been segregated for R, D and D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by ""Est.""
- Report separately research and related testing facilities operated by the respondent.

**DISTRIBUTION OF SALARIES AND WAGES**

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

**COMMON UTILITY PLANT AND EXPENSES**

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Electric Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to the order of the Commission or other authorization.

**AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS**

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

Line No.	Description of Item(s) (a)	Balance at End of Quarter 1 (b)	Balance at End of Quarter 2 (c)	Balance at End of Quarter 3 (d)	Balance at End of Year (e)
1	Energy				
2	Net Purchases (Account 555)	46,656,637	105,856,794	172,817,391	211,896,377
2.1	Net Purchases (Account 555.1)				
3	Net Sales (Account 447)	(1,641,274)	(3,352,599)	(7,089,856)	(12,149,575)

**PURCHASES AND SALES OF ANCILLARY SERVICES**

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff.  
In columns for usage, report usage-related billing determinant and the unit of measure.

1. On Line 1 columns (b), (c), (d), and (e) report the amount of ancillary services purchased and sold during the year.
2. On Line 2 columns (b), (c), (d), and (e) report the amount of reactive supply and voltage control services purchased and sold during the year.
3. On Line 3 columns (b), (c), (d), and (e) report the amount of regulation and frequency response services purchased and sold during the year.
4. On Line 4 columns (b), (c), (d), and (e) report the amount of energy imbalance services purchased and sold during the year.
5. On Lines 5 and 6, columns (b), (c), (d), and (e) report the amount of operating reserve spinning and supplement services purchased and sold during the period.
6. On Line 7 columns (b), (c), (d), and (e) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

Line No.	Type of Ancillary Service (a)	Amount Purchased for the Year			Amount Sold for the Year		
		Usage - Related Billing Determinant			Usage - Related Billing Determinant

**MONTHLY TRANSMISSION SYSTEM PEAK LOAD**

1. Report the monthly peak load on the respondent's transmission system. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
2. Report on Column (b) by month the transmission system's peak load.
3. Report on Columns (c ) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
4. Report on Columns (e) through (j) by month the system' monthly maximum megawatt load by statistical classifications. See General Instruction for the definition of each statistical classification.

**Monthly ISO/RTO Transmission System Peak Load**

1. Report the monthly peak load on the respondent's transmission system. If the Respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
2. Report on Column (b) by month the transmission system's peak load.
3. Report on Column (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
4. Report on Columns (e) through (i) by month the system's transmission usage by classification. Amounts reported as Through and Out Service in Column (g) are to be excluded from those amounts reported in Columns (e) and (f).
5. Amounts reported in Column (j) for Total Usage is the sum of Columns (h) and (i).

**MONTHLY PEAKS AND OUTPUT**

1. Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.
2. Report in column (b) by month the system's output in Megawatt hours for each month.
3. Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.
4. Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.
5. Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).

**Steam Electric Generating Plant Statistics**

1. Report data for plant in Service only.
2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants.
3. Indicate by a footnote any plant leased or operated as a joint facility.
4. If net peak demand for 60 minutes is not available, give data which is available, specifying period.
5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.
6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct.
7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20.
8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.
9. Items under Cost of Plant are based on USofA accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses.
10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

**Hydroelectric Generating Plant Statistics**

1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings).
2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number.
3. If net peak demand for 60 minutes is not available, give that which is available specifying period.
4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.
5. The items under Cost of Plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production Expenses do not include Purchased Power, System control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses."
6. Report as a separate plant any plant equipped with combinations of steam, hydro, internal combustion engine, or gas turbine equipment.

FERC FORM NO. 1 (REV. 12-03)

Page 406-407

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**Pumped Storage Generating Plant Statistics**

1. Large plants and pumped storage plants of 10,000 Kw or more of installed capacity (name plate ratings).
2. If any plant is leased, operating under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. Give project number.
3. If net peak demand for 60 minutes is not available, give that which is available, specifying period.
4. If a group of employees attends more than one generating plant, report on Line 8 the approximate average number of employees assignable to each plant.
5. The items under Cost of Plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production Expenses do not include Purchased Power System Control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses."
6. Pumping energy (Line 10) is that energy measured as input to the plant for pumping purposes.
7. Include on Line 36 the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed leave Lines 36, 37 and 38 blank and describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net MWH as reported herein for each source described. Group together stations and other resources which individually provide less than 10 percent of total pumping energy. If contracts are made with others to purchase power for pumping, give the supplier contract number, and date of contract.

**GENERATING PLANT STATISTICS (Small Plants)**

1. Small generating plants are steam plants of, less than 25,000 Kw; internal combustion and gas turbine-plants, conventional hydro plants and pumped less than 10,000 Kw installed capacity (name plate rating).
2. Designate any plant leased from others, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, and statement of the facts in a footnote. If licensed project, give project number in footnote.
3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, Part 2.
4. If net peak demand for 60 minutes is not available, give the which is available, specifying period.
5. If any plant is equipped with combinations of steam, hydro internal combustion or gas turbine equipment, report each as a separate plant. However, if from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

Line No.	Name of Plant (a)	Year Orig. Const. **ENERGY STORAGE OPERATIONS (**

1. Large Plants are plants of 10,000 Kw or more.
2. In columns (a) (b) and (c) report the name of the energy storage project, functional classification (Production, Transmission, Distribution), and location
3. In column (d), report Megawatt hours (MWH) purchased, generated, or received in exchange transactions for storage.
4. In columns (e), (f) and (g) report MWHs delivered to the grid to support production, transmission and distribution. The amount reported in column (d) :
5. In columns (h), (i), and (j) report MWHs lost during conversion, storage and discharge of energy.
6. In column (k) report the MWHs sold.
7. In column (l), report revenues from energy storage operations. In a footnote, disclose the revenue accounts and revenue amounts related to the incor
8. In column (m), report the cost of power purchased for storage operations and reported in Account 555.1, Power Purchased for Storage Operations. If fuel costs for storage operations associated with self-generated power included in Account 501 and other costs associated with self-generated power
9. In columns (q), (r) and (s) report the total project plant costs including but not exclusive of land and land rights, structures and improvements, energy purpose is to integrate or tie energy storage assets into the power grid, and any other costs associated with the energy storage project included in the

--	---	-------------------------------	---

**TRANSMISSION LINE STATISTICS**

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovoltage. If required by a State commission to report individual lines for all voltages, do so but do not group totals for each voltage under 132 kilovolts.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report:
3. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
4. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; c structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different t
5. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, ex structures are included in the expenses reported for the line designated.
6. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if y line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in c
7. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, g transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or s particular (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and ho whether lessor, co-owner, or other party is an associated company.
8. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determ
9. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**TRANSMISSION LINES ADDED DURING YEAR**

1. Report below the information called for concerning Transmission lines added or altered during the year. It is not necessary to report minor revisions or
2. Provide separate subheadings for overhead and under- ground construction and show each transmission line separately. If actual costs of completed to (o), it is permissible to report in these columns the costs. Designate, however, if estimated amounts are reported. Include costs of Clearing Land ar appropriate footnote, and costs of Underground Conduit in column (m).
3. If design voltage differs from operating voltage, indicate such fact by footnote; also where line is other than 60 cycle, 3 phase, indicate such other cha

--	---	-------------------------------	---

**SUBSTATIONS**

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVA except those serving customers with energy for resale, may be grouped according to functional character to be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended to function the capacities reported for the individual stations in column (f).
5. Show in columns (l), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole owner equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in each case whether lessor, co-owner, or other party is an associated company.

Name of Respondent: Northern Indiana Public Service Company LLC	This report is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission	Date of Report: 04/18/2022	Year/Period of Report End of: 2021/ Q4
--	---	-------------------------------	---

**TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES**

1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.
2. The reporting threshold for reporting purposes is \$250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".
3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.
