Hello,

Please data enter into CATs and send an email to John asking him to "Please forward email to Clerk's office."

John will send you an email letting you know that he has forwarded the email and you will add that to CAT's as well. Please let me know if you have any questions.

If you feel that the email should be a complaint please send back to me to complete.

Thanks

Antonia Hover

Regarding: PSC #20250011

Due to the state's push for solar panels and battery storage investments by power companies serving Florida, electric costs for customers will skyrocket by 40% over the next four years. China's solar panels and battery storage costs are unaffordable for Florida's families.

Please deny FPL's rate hike request #20250011.

Thank you.
Terri Routman

To Whom It May Concern:

As a customer of FPL for over 30 years, I have always felt that the company has offered quality service at a fair price. With the rising cost of everything, an increase in rates is justified in order to maintain the quality service that we have come to expect

To whom it may concern:

I am writing in support of the quality service and customer experience with Florida Power & Light. Electricity is often taken for granted, like other utilities, but recent experience compels me to offer a healthy shout-out for FPL.

Recently, my wife and I purchased and remodeled a home in Gainesville, Florida, supported by Gainesville Regional Utilities (GRU). Our primary residence is in Port Orange, Florida, and serviced by FPL. Although our primary residence in Port Orange is more than double the square footage of our home in Gainesville, the electric bills are nearly even. We were shocked by the charges from GRU and came to appreciate the quality and pricing received by FPL.

Hurricane Season also gives us an annual reminder of the quality of FPL. Last year, Hurricane Milton knocked out the power at our home in Port Orange for less than 24 hours. Our home barely had time to warm up before the power was restored and the air conditioning was humming again. Conversely, our home in Gainesville lost power from Hurricane Helene and GRU was unable to restore power for nearly 5 days. My wife and I would normally consider an area located in the middle of Florida as a safe place to escape a hurricane, but if GRU's service after Hurricane Helene is any example, perhaps we should flee to a service area protected by FPL.

Of course, everyone in Florida expects the power to operate with the flip of a switch. Not much thought is given to the tremendous resources expended by FPL to maintain utility services at a fair price. This customer would like to express sincere thanks to FPL for the quality of its services.

Way to go, FPL!

Governor DeSantis and the PSC,

Please stop FPL from increasing our rates to pay for their dangerous and irresponsible decisions to wildly increase solar power in the FL grid.

A 40% increase in rates for an inferior power grid is unacceptable.

John Esposito
Palm Beach County resident and FPL customer
