To whom it may concern,

I am in favor of supporting the FPL rate increase. I have witnessed first-hand the good work FPL has done to deliver inexpensive electricity and energy to South Florida. Being in the restaurant business, I am grateful for how quickly FPL works to restore power to our communities after major storms impact our region. I have friends and affiliates in other states where their electrical companies take significantly longer to get power back to businesses after weather events. These delays have a major impact on their ability to operate and recover.

Thank you for your consideration.

To Whom It May Concern,

Good morning.

When it comes to rate increases for FPL, I am most definitely in favor. Having lived in South Florida for most of my life, I have intimate knowledge of the fast, efficient and constant work they do after hurricanes and other strong storms to get communities back on their feet. I'm a chef and therefore constantly in need of the peace of mind FPL provides by being the best at restoring businesses back to normal operations.

Furthermore, for several years, my younger brother worked for FPL and was doing the hard work of restoring power to neighborhoods and homes that were affected sometimes multiple times in a summer. It was arduous, consistent work that deserves recognition and reward. I personally believe FPL is second to none - speaking with family and friends in other states after natural disasters, I've learned just how fast FPL works to repair regions in disrepair.

Thank you for your consideration,

Andre Martinez

Good afternoon!!

I hope this email finds you well. I have been a resident of South Florida for 10+ years, and have always been grateful for FPL for many reasons personally and professionally. In the toughest times without power, due to natural disaster or construction or just sheer luck- FPL has been there to save the day every time!! There have been many times our businesses have been back up and running while other states are still calling for help with no avail. Due to experience, customer service, and a powerful (no pun intended!) team FPL gets the job done and QUICK. I am and will always be in favor of FPL! Have a great day!

Hi there,

I just wanted to share my support for the proposed FPL rate increase. From my experience, FPL has consistently done a great job providing affordable and reliable energy to us in SoFlo.

As someone in the restaurant industry, I've especially appreciated how quickly FPL gets the power back on after major storms or whenever we have any issues. It makes a big difference. I have friends in other states who've told me their power can be out for days after a storm—something that can seriously hurt a business trying to bounce back.

Thanks for taking the time to consider this.

Best,

Martin Verano

To Whom It May Concern,

I am writing to express my support for the proposed FPL rate increase. As a long-time resident of South Florida and a business owner in the restaurant industry, I have experienced firsthand the value and reliability FPL provides to our community.

FPL consistently delivers affordable and dependable electricity. In particular, I appreciate the speed and efficiency with which power is restored following major storms. This is critical for businesses like mine, where prolonged outages can severely affect operations and recovery efforts. I have peers in other states who face much longer restoration times, and the difference in their ability to bounce back is significant.

FPL's investment in infrastructure and rapid response capabilities is a benefit to all of us. For these reasons, I support their request for a rate adjustment and thank you for considering my perspective.

Sincerely,
Daniel Melcher

To whom it may concern,

I support the FPL rate increase. As a resident of Florida for more than 35 years, I have witnessed the excellent work of FPL over the years. Their responses during outages, especially after storms have been remarkable. The low rates for electricity have been a benefit for me as being a resident of this state. I have also lived in areas where I was forced to use another power source, and they did not match the consistency of rates and service that FPL provides. When hearing about the hardships of other communities outside of Florida during storm related outages, it reinforces the great work FPL does during these hard times.

Thank you for your time.
