To whom it may concern,

I am looking for clarification on why a request from FPL to raise rates is even being entertained?

For the full year 2024, Florida Power & Light Company (FPL) reported a net income on a GAAP basis of \$4.543 billion.

That is Billion with a "B". How much profit is enough to not raise rates year after year? That \$4.543 BILLION is after all expenses. That is profit. At what point does the good of the people outweigh the greed and political contributions?

Thanks,

Jason
