Support for FPL's Proposed Rate Adjustment

Dear Florida Public Service Commission,

As a long-time customer of Florida Power & Light, I'm writing to express my support for FPL's request for a rate adjustment.

Over the years, I've seen FPL consistently deliver reliable service, even during severe weather events that often cripple other utilities. Their proactive investment in infrastructure, including storm hardening and clean energy sources like solar, has made a real difference in both service quality and environmental responsibility.

I understand that rate changes are never easy decisions, but from my perspective as a customer, the value we get from FPL justifies the adjustment. We rely on a strong, resilient electric grid, especially in Florida's climate. If this rate change helps ensure continued investment in modernization and clean energy, I believe it's a responsible step forward.

FPL has also kept bills relatively low compared to the national average, despite making large-scale improvements. I've noticed their efforts to communicate clearly about where our money goes, and I appreciate the transparency.

Ultimately, I want an electric utility that prepares for the future while keeping reliability high. If this rate adjustment helps achieve that, I support it.

Sincerely

M. Canto
