**Subject:** Docket # 20250023-WS Grenelefe water proposed increase

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

This email is to submit my opposition to the proposed water utility rate increase by Grenelefe water utilities. This rate is unreasonable as it represents a thousand percent increase to my current monthly water utility bill. This increase would cause tremendous, financial hardship and does not appear to be proposed to finance improvement for existing customers. I feel proposed improvement for this water utility should be financed primarily through the CDD for and the planned future residential development. It was my understanding through all the previous meetings, presentation and approval that the water treatment plant could handle current and proposed residential development, "was this a lie?" I feel that it is unreasonable and unfair to have current resistance fund this upgrade in it's entirety, when the planned future developments will benefit as will the developer at no expense to them.

Thank for your consideration,  
Vera Bocskor
