A. List	
B. Organizational Chart	

- E. Affiliates and Relationships - List all affiliates and their relationship to the utility.
- F. Current and Projected Growth Patterns - Provide a concise estimate of future annual growth for the next two to four years. A short table may be used to provide this data. For instance, a table for three years showing the KWH sales, revenue and customers would be sufficient for an electric utility. Major assumptions such as "revenue forecasts based on current rates" may be provided.

PART III - Corporate Records:

The principal location and any important secondary locations of records should be provided in Section A on Page 5. The chart of accounts used, the location of any copies of the corporate records and a description of the types of records maintained at secondary locations should be furnished in Section B. Under Section C, list any outside auditors, regulatory agencies or internal auditors from affiliates that audit the books and records.

PART IV - Parent/Affiliate Organizational Chart:

Provide an organizational chart showing the relationship of affiliates involved either directly or indirectly in providing utility services including the furnishing of any management services to the utility. All other affiliates should also be shown. If there is, however, an unwieldy number of affiliates, those that are irrelevant to the provision of utility services may be omitted from the organizational chart.

PART V - Liaison Personnel Directory:

All employees or outside professionals who are in regular recurring contact with the Florida Public Service Commission on behalf of the utility should be listed under Section A on Page 7, together with the title, position, organizational unit, name of immediate supervisor and area(s) of responsibility. Employees who infrequently contact or are contacted by the Florida Public Service Commission need not be listed unless contact occurs on important issues. Organizational charts covering the employees listed as liaison personnel should be included in Section B.

EXECUTIVE SUMMARY

INSTRUCTIONS

Purpose of Executive Summary:

The Executive Summary provides the Florida Public Service Commission management with contact persons, positions and telephone numbers, a brief narrative of the company profile, corporate records and corporate organization. The Executive Summary is both more readable and shorter than an annual report. It contains nontechnical data of general interest and applicability to individuals who are not intimately familiar with the individual utility.

PART I - Telephone Numbers:

The utility's primary telephone number for its main administrative office is to be included in Section A on Page 2. The name, title, and telephone number (other than the universal number in Section A) for officers of the utility are to be included in Section B. Include the name of the directors, their position title and employer, and telephone number in Section C.

PART II - Company Profile:

The company profile is a brief synopsis, which should be approximately three pages long for a major utility, in narrative format with a few statistics included. The six areas covered are:

- A. Brief Company History - Year and state of the organization, whether as a subsidiary or parent name changes and other pertinent data.
- B. Operating Territory - Provide the area of state or states served, and a few statistics such as the number of cities served, the number of customers or similar available statistics that provide a reader a basic understanding of the scope and nature of the operations of the utility.
- C. Major Goals and Objectives - State the goals and objectives of the utility such as desired return on equity, increased productivity by a specific percentage and other such goals. Specific goals such as "to achieve a rate of return on equity of 14.5% is preferable to general statements of goals such as to achieve a reasonable return on equity."
- D. Major Operating Divisions and Functions - Provide the major operating divisions and activities performed by each. For some companies, the vice presidents or other officers and their respective responsibilities may correspond to major operating divisions. For instance, the Vice President of Finance may constitute a major operating division and accounting, corporate and treasury, and rates and regulatory matters may be the related functions assigned to the Vice President.

GAS PLANT IN SERVICE (Accounts 101, 102, 103, and 106)

1. Report below the original cost of gas plant in service according to the prescribed accounts.

2. In addition to Account 101, *Gas Plant in Service (Classified)*, this page and the next include Account 102, *Gas Plant Purchased or Sold*; Account 103, *Experimental Gas Plant Unclassified*; and Account 106, *Completed Construction Not Classified—Gas*.

3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.

4. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.

5. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the

entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d) reversals of tentative distributions or prior year of unclassified retirements. Attach supplemental statement showing the account distributions of these tentative classifications in columns (c) and (d).

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, line 11, column (c), and that reported for gas plant in service, pages 204-209, column (d), excluding retirements of non-depreciable property.

the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.

4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

1. Prepare this page regardless of the method of accounting adopted for the investment tax credits. By footnote state the method of accounting adopted, and whether the company has consented or is required by another Commission to pass the tax credits on to customers.

2. As indicated in column (a), show each year's activities from 1962 through the year covered by this report, identifying the data by the indicated percentages.

3. Report in columns (b) and (e) the amount of investment tax credits generated from properties acquired for use in utility operations. Report in columns (c) and (f) the amount of such generated credits utilized in computing the annual income taxes. Also explain by footnote any adjustments to

columns (b) through (f) such as corrections, etc., or carryback of unused credits. Such adjustments should be carried back or forward to the applicable years.

4. Report in column (d), the weighted-average useful life of all properties used in computing the investment tax credits in column (b). Also, show in this column for the year 1971 and thereafter, the option exercised [(1) rate base treatment, (2) ratable flow through, or (3) flow through] for rate purposes in accordance with section 46(f) of the Internal Revenue Code.

5. Show by footnote (page 551, Footnotes) any unused credits available at end of each year for carrying forward as a reduction of taxes in subsequent years.

FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS (Continued)

5. Designate the entries in point of delivery, column (c), that they can be readily identified on map of the respondent's pipe line system.

6. For column (d), use the following codes to designate type of sale: Firm 1; Off peak 2; Interruptible 3; Other 4. Define by appropriate footnote, the meaning of each term in describing the type of sale, indicating specifically any order of priority in service between types of sale and among sales of the same type.

7. On each line following an entry in column (h), itemize separately the adjustment portion of the entry in column (h) (for example, purchased gas, tax, Btu or other rate adjustments). The difference between columns (g) and (h) should be the revenues resulting from the base contract rate named in the docket

number entered in column (b). Show the effect of purchased gas, tax, Btu, or other rate adjustment provision as the quotient of the total annual revenues received for the year from the application of each rate adjustment provision divided by the annual volume of gas delivered.

8. For each sale of 50,000 Mcf or more per year at each point of delivery, show (a) in column (l) the noncoincidental peak day volume of delivery at pressure base indicated, (b) in column (m) the coincidental system peak day volume of delivery at pressure base indicated and (c) in column (k) the dates of the noncoincidental peak day deliveries. In a footnote state the date of the entire system peak day coincidental delivery. If an estimate is used for any peak day delivery, state the basis for such estimate in a footnote.

FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS					
<p>1. Report below particulars (details) concerning sales of natural gas to industrial customers served other than from local distribution systems operated by the respondent. Classify between field sales and transmission sales and further subdivide these sales between sales subject to FERC certification and sales not requiring a FERC certificate. Include also any field and main line sales, classified as Other Sales to Public Authorities and indicate such inclusion in a footnote. Field sales means sales made from wells, from points along gathering lines in gas field or production areas or from points along transmission lines within field or production areas. Transmission sales means sales made from points along transmission lines not within gas fields or production areas.</p>			<p>2. Natural gas means either natural gas unmixed, or any mixture of any natural and manufactured gas. Designate with an asterisk, however, any sales of mixed gas. In a footnote state the components of mixed gas, i.e., natural and refinery gases, natural and coke oven gases, etc., and specify the approximate percentage of natural gas in the mixture.</p> <p>3. Report separately sales to each field and main line industrial consumer to which sales of 50,000 Mcf or more were made during the year, grouped and totalled by State. Report other sales in total for each State, showing number of sales grouped.</p> <p>4. Provide separate grand totals for each State in addition to a grand total for all field and main line industrial sales.</p>

2. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted

for each group of meters added. The average number of customers means the average of twelve figures at the close of each month.

4. Report quantities of natural gas sold in Mcf (14.73 psia at 60°F). If billings are on a therm basis, give the Btu contents of the gas sold and the sales converted to Mcf.

5. If increases or decreases from previous year (columns (c), (e) and (g)), are not derived from previously

FERC rate schedule, the required information (columns) shall be furnished for each point of delivery.

8. Designate in a footnote if Btu per cubic foot of gas is different for any delivery point from that shown in the heading of column d.

9. If an estimate is used for any peak day delivery, state the basis for such estimate. If deliveries are made to one customer at more than one delivery point, show the peak day delivery and date thereof for each delivery point if billing is on a non-conjunctive basis, and show the total for

each such customer if billing is on a conjunctive basis.

10. Summarize total sales as follows: A. Field sales subdivided by deliveries to (i) interstate pipeline companies and (ii) others; B. Transmission system sales divided by deliveries to (i) interstate pipeline companies, (ii) intrastate pipeline companies and gas utilities for resale under FERC rate schedules, and (iii) others. "Field sales" means sales made from wells, from points along gathering lines in gas field or production areas or from points along transmission lines within fields or production areas. "Transmission sales" means sales made from points along transmission lines not within gas fields or production areas.

GAS ACCOUNT — NATURAL GAS

1. The purpose of this page is to account for the quantity of natural gas received and delivered by the respondent, taking into consideration differences in pressure bases used in measuring Mcf of natural gas received and delivered.

2. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.

3. Enter in column (c) the Mcf as reported in the schedules indicated for the items of receipts and deliveries.

4. In a footnote report the volumes of gas from respondent's own production delivered to respondent's transmission system and included in natural gas sale.

5. If the respondent operates two or more systems which are not interconnected, submit separate pages for this purpose. Use copies of pages 520 and 521.

6. Also indicate by footnote the volumes of gas not subject to Commission regulation which did not incur FERC regulatory costs by showing (1) the local distribution volumes delivered to the local distribution-company portion of the reporting pipeline by another jurisdictional pipeline; (2) the volumes which the reporting pipeline transported or sold

through its local distribution facilities or intrastate facilities, and which the reporting pipeline received through gathering facilities, distribution facilities or intrastate facilities, but not through any of the interstate portion of the reporting pipeline and, (3) the gathering line volumes which were not destined for interstate market or which were not transported through any interstate portion of the reporting pipeline.

7. Also indicate by footnote (1) the system supply volumes of gas which are stored by the reporting pipeline during the reporting year and also reported as sales, transportation and compression volumes by the reporting pipeline during the same reporting year, (2) the system supply volumes of gas which are stored by the reporting pipeline during the reporting year and which the reporting pipeline intends to sell or transport in a future reporting year, and (3) contract storage volumes.

8. Also indicate the volumes of pipeline production field sales which are included in both the company's total sales figure and the company's total transportation figure (lines 42 and 46 of page 521).

CHANGES IN ESTIMATED HYDROCARBON RESERVES AND COSTS, AND NET REALIZABLE VALUE			

1. Report changes during the year in recoverable saleable reserves of the respondent located on acreage acquired after October 7, 1969. Have the reported reserves attested to every three years by an independent appraiser. File the attestation with the Commission along with this report. If the reserves, at the time the reserve determination is made, significantly differ from those reported on this page, file a reconciliation and explanation of such differences along with the attestation.

2. For any important changes in the estimated reserves due to purchases, sales, or exchanges of lands, leaseholds, or rights, furnish on page 505 a brief explanation of the transactions and

reserves involved. Also, explain the criteria used to estimate the net realizable value of reserves.

3. For column (d), report the reserves and changes associated with lands, leaseholds, and rights included in Account 105.1, *Production Properties Held for Future Use*. (See Gas Plant Accounts Instruction 7G of the U.S. of A.)

4. Report pressure base of gas volumes at 14.73 psia at 60°F.

5. For line 16 base the net realizable value of hydrocarbon reserves on the current selling price of the hydrocarbon reserves less estimated costs of extraction, completion, and disposal.

CHANGES IN ESTIMATED NATURAL GAS RESERVES

1. Report below changes (made during the year) in estimated recoverable natural gas reserves of the respondent on acreage acquired before October 8, 1969.

2. In explanations of revisions of basic reserve estimates, identify the changes with the production areas, fields, and horizons as shown on pages 500-501, natural gas reserves. State the type of studies by which change in the reserve estimates was determined, and furnish such other pertinent explanations as appropriate.

3. For any important changes in the estimated reserves due to purchases, sales, or exchanges of natural gas lands, leaseholds, or gas rights, furnish below a brief explanation of the transactions and the Mcf of gas reserves involved.

4. The gas reserves and changes therein to be reported in column (d) are those associated with lands, leaseholds, and gas rights included in Account 105, *Gas Plant Held for Future Use*. (See *Gas Plant Accounts Instruction 7G of the U.S. of A.*) Do not report estimates of gas reserves for unproven fields; however, if the company has made estimates for such lands and normally

includes such estimates in stating its reserve position in connection with proposed financing and for managerial and other purposes, include such estimates on this page and on pages 500-501. Indicate in a footnote the inclusion of such reserve estimates.

5. If the respondent submitted estimates of natural gas reserves to the Commission during the year in connection with any proceeding, such as an application for certificate of convenience and necessity, state in a footnote the amount of such reserve estimate, date of submission and docket number of case with respect to which submitted. Explain that the estimates submitted may differ in amount with the reserves shown on this page and state the estimated amount of difference and the reasons for the difference.

6. Submit such additional information as may be appropriate concerning the size and dependability of natural gas reserves associated with lands, leaseholds, and gas rights owned by the respondent for which reserve estimates are not reported on this page or on pages 500-501.

7. Report pressure base of gas volumes at 14.73 psia at 60°F.

NATURAL GAS RESERVES AND LAND ACREAGE (Continued)

4. For non-producing gas lands, report the required information alphabetically by State, County, or offshore area by blocks. Report offshore lands in the same manner as producing gas lands. The land, leasehold, and gas rights costs reported should agree with the amounts carried under Accounts 105, *Gas Plant Held for Future Use*, and 105.1, *Production Properties Held for Future Use*, and reported in total on pages 214 and 215. Do not report estimates of gas reserves (column (e)) for unproven fields; however, if the company made estimates for such lands and normally includes such estimates in stating its reserve position in connection with proposed financing and for managerial and other purposes, include such estimates on this page.

5. Report the cost of lands, leaseholds, and gas rights in accordance with the provisions of the Uniform System of Accounts for Natural Gas Companies.

6. For columns (j) and (k), do not duplicate acreages reported for owned lands and leaseholds. Designate with an asterisk royalty interests separately owned.

7. Indicate by footnote whether acres reported are gross acres or net acres based on proportion of ownership in jointly owned tracts.

8. Do not include oil mineral interests in the cost of acreage reported.

9. Report volumes on a pressure base of 14.73 psia at 60°F.
