RE: **TL727**

Dear Ms. Salak:

Attached for filing, please find the following revised pages for the Embarq Florida, Inc. General Exchange Tariff. This filing is submitted with a proposed effective date of June 5, 2006. The Company's tariffs are available on its website at www.embarq.com/tariffs.

Index	Seventh Revised Sheet 6
Title	Second Revised Sheet 4
Section A13	Eleventh Revised Contents Sheet 6
	Third Revised Sheet 122
	Original Sheet 123

This filing introduces EMBARQ Smart ConnectSM as a new offering, and provides for transfer functionality between subscriber-designated telephone numbers.

Commission consideration and timely approval of these pages are respectfully requested. If you have questions or need additional information regarding this filing, please call Nancy Schnitzer at 850-599-1276.

Sincerely,

Mary L. Matthews

MISCELLANEOUS SERVICE ARRANGEMENTS

BB. EMBARQ SMART CONNECT

(N)(T)

1. GENERAL

EMBARQ Smart Connect is an optional business service that provides a customer with the ability to receive a simultaneous ring of an incoming call at up to three separate telephone numbers. EMBARQ Smart Connect is available with business individual lines or Direct Inward Dialing (DID) telephone numbers associated with Direct Inward Dialing (DID) Service. The telephone number associated with the Local Exchange Service for which EMBARQ Smart Connect is provided is designated as the "primary telephone number." The customer may designate up to two additional telephone numbers (referred to as "secondary telephone numbers") that will receive a simultaneous ring when a call is directed to the primary telephone number. The secondary telephone number(s) can be provided by a wireless carrier, another Local Exchange Carrier or the Company. Wireless telephone numbers can receive incoming text messages when utilized as a secondary telephone number.

2. TERMS AND CONDITIONS

- a. When a call is directed to the primary telephone number, EMBARQ Smart Connect provides a simultaneous ring on the secondary telephone number(s). Establishment and subsequent changes to the primary telephone number will be programmed by the Company upon subscriber request and the number will be in the subscriber's Reach List. The Reach List, which is limited to three telephone numbers, includes the primary and secondary telephone numbers that simultaneously ring when the subscriber's primary telephone number is dialed. Initially, the Company must program at least one secondary telephone number into the subscriber's Reach List. The subscriber may make subsequent additions and changes to the secondary telephone numbers in the Reach List through an internet-based management tool.
- b. After an incoming call is answered, the call can be transferred between predetermined telephone numbers which reside in the subscriber's Call Pickup List. The Call Pickup List, limited to five telephone numbers, includes those telephone numbers which may receive transferred calls. The Call Pickup List must include all of the telephone numbers in the subscriber's Reach List. The subscriber may establish and change the telephone numbers in the Call Pickup List through an internet-based management tool. The Customer Provided Equipment (CPE) associated with the telephone numbers in the Call Pickup List must have speed dial functionality associated with that telephone number in order to invoke the transfer.
- c. Incoming calls are transferred between telephone numbers through activation of speed dial code on the device to which the call is to be transferred. There is no limit to the number of transfers that can be made during a call.

Original Sheet 123
Effective: June 5, 2006

MISCELLANEOUS SERVICE ARRANGEMENTS

BB. EMBARQ SMART CONNECT (Cont'd)

2. TERMS AND CONDITIONS (Cont'd)

- d. All telephone numbers associated with a Reach List must be within the local calling area of the customer's primary telephone number, although telephone numbers associated with a Call Pickup List can be outside the local calling area of the customer's primary telephone number.
- e. When the customer is not available to answer an incoming call, the call may forward to a customer provided voice messaging service associated with the primary telephone number unless one of the secondary telephone numbers supports a voice messaging service or answering device that is programmed to pick up the call on a shorter ring count.
- f. The originator of a call to the EMBARQ Smart Connect subscriber is responsible for all charges (local, toll, surcharges, etc.) applicable from the originating location to the number dialed for the duration of the call, regardless of whether the call is subsequently transferred to another location/telephone number. The subscriber of the account/telephone number that picks up a transferred call is responsible for any charges (local, toll, etc.) that are applicable between the exchange from which the call is transferred and the exchange in which the call is answered.
- g. Availability of EMBARQ Smart Connect is limited to those areas served by central offices arranged for EMBARQ Smart Connect and is subject to the availability of facilities. The Company does not guarantee the quality of service for incoming calls to a secondary telephone number which is provided by a wireless carrier or a Local Exchange Carrier other than the Company.

3. RATES AND CHARGES

- a. The monthly rate applies in addition to the rates and charges for the Company provided Local Exchange Service associated with the primary telephone number.

	Monthly Rate
Per primary telephone number	\$19.95 ⁽¹⁾

- b. A Service Ordering Charge as set forth in Section 4 of this tariff will apply when establishing EMBARQ Smart Connect and when the Company makes a change to an existing primary or secondary telephone number. ⁽²⁾

⁽¹⁾ This monthly rate will be discounted to \$14.95 for customers who also subscribe to an Embarq Wireless service.

⁽²⁾ The Service Ordering Charge applicable for the establishment of service will be waived through December 31, 2006.

BB. EMBARQ SMART CONNECT

1. GENERAL

EMBARQ Smart Connect is an optional business service that provides a customer with the ability to receive a simultaneous ring of an incoming call at up to three separate telephone numbers. EMBARQ Smart Connect is available with business individual lines or Direct Inward Dialing (DID) telephone numbers associated with Direct Inward Dialing (DID) Service. The telephone number associated with the Local Exchange Service for which EMBARQ Smart Connect is provided is designated as the "primary telephone number." The customer may designate up to two additional telephone numbers (referred to as "secondary telephone numbers") that will receive a simultaneous ring when a call is directed to the primary telephone number. The secondary telephone number(s) can be provided by a wireless carrier, another Local Exchange Carrier or the Company. Wireless telephone numbers can receive incoming text messages when utilized as a secondary telephone number.

2. TERMS AND CONDITIONS

- a. When a call is directed to the primary telephone number, EMBARQ Smart Connect provides a simultaneous ring on the secondary telephone number(s). Establishment and subsequent changes to the primary telephone number will be programmed by the Company upon subscriber request and the number will be in the subscriber's Reach List. The Reach List, which is limited to three telephone numbers, includes the primary and secondary telephone numbers that simultaneously ring when the subscriber's primary telephone number is dialed. Initially, the Company must program at least one secondary telephone number into the subscriber's Reach List. The subscriber may make subsequent additions and changes to the secondary telephone numbers in the Reach List through an internet-based management tool.
- b. After an incoming call is answered, the call can be transferred between predetermined telephone numbers which reside in the subscriber's Call Pickup List. The Call Pickup List, limited to five telephone numbers, includes those telephone numbers which may receive transferred calls. The Call Pickup List must include all of the telephone numbers in the subscriber's Reach List. The subscriber may establish and change the telephone numbers in the Call Pickup List through an internet-based management tool. The Customer Provided Equipment (CPE) associated with the telephone numbers in the Call Pickup List must have speed dial functionality associated with that telephone number in order to invoke the transfer.
- c. Incoming calls are transferred between telephone numbers through activation of speed dial code on the device to which the call is to be transferred. There is no limit to the number of transfers that can be made during a call.
