Dear Director,

I refer to the 4 November 1993  
application of Sweet Village Utility,  
Inc. to operate a wastewater utility  
in Franklin County.

This wastewater utility would  
be located near Nick's Hole, one of the most  
prolific seabird breeding grounds of  
Apalachee Bay. Overflow from the  
utility because of a defect or improper  
operation could drain into Nick's Hole  
and commence a pollutant discharge,  
possibly an irreversible one.

Sincerely,

Harry A. Buzzett
