3                                   OF  
4                                   JOHN E. CURRIER

5  
6   Q.   Please state your name, address and occupation.

7  
8   A.   My name is John E. Currier. My business address is 702  
9       North Franklin Street in Tampa, Florida 33602. I am the  
10      Manager of Commercial and Residential Energy Services for  
11      Tampa Electric Company.

12  
13   Q.   Have you previously submitted testimony in this docket?

14  
15   A.   Yes I have.

16  
17   Q.   What is the purpose of your rebuttal testimony?

18  
19   A.   The purpose of my rebuttal testimony is to respond to a  
20      number of the questions and comments contained in the  
21      Supplemental\Direct Intervenor Testimony of Mr. Maury J.  
22      Blalock filed on behalf of Peoples Gas System, Inc.  
23      ("Peoples").

24  
25   Q.   What is the first item you wish to respond to?

DOCUMENT NUMBER-DATE  
02053 FEB 21 95  
FPSC-RECORDS/REPORTING

- 1 A. Mr. first comments respond to items 2, 4 and 5 on pages 4  
2 through 6 of Mr. Blalock's testimony. Electricity is a  
3 universal service which is essential for certain appliances  
4 which have no gas alternative such as lights, refrigerators  
5 and certain electric appliances. Regardless of whether the  
6 water heating is gas or electric, there will always be an  
7 electric customer service charge necessary to serve the  
8 electric appliances.  
9
- 10 Q. Do you wish to address other portions of Mr. Blalock's  
11 testimony?  
12
- 13 A. Yes. In item 3, on pages 4 and 5 of his testimony, Mr.  
14 Blalock questions the subtraction of the \$4.00/month Prime  
15 Time credit from the resistance water heating cost.  
16 Regardless of whether customers participate in Prime Time  
17 or not, they still pay the same allocated Prime Time energy  
18 management allocation of approximately 33 cents per 1,000  
19 KWh for water heating on load management. Also, Mr.  
20 Blalock says this Prime Time credit is collected monthly  
21 through the ECCR factor so new participating customers  
22 incrementally increase the ECCR factor, and at 100% Prime  
23 Time customer saturation, the ECCR factor will equal the  
24 Prime Time credit of \$4.00. Tampa Electric's current  
25 saturation is 17% for the residential Prime Time program.

A saturation level of 100% is impractical considering the various needs and interests of customers voluntarily participating in this program.

Q. Does that conclude your testimony?

A. Yes, it does.
