FLORIDA PUBLIC SERVICE COMMISSION

VOTE SHEET

DATE: May 6, 1997

RE: DOCKET NO. 970056-EG - Petition for approval of revised program participation standards for Residential Home Energy Improvement and Residential New Construction Programs by Florida Power Corporation.

Issue 1: Should the Commission approve Florida Power Corporation's (FPC) revised program participation standards for the Residential Home Energy Improvement (RHEI) program?

Recommendation: Yes. The proposed program revisions are expected to increase program participation, reduce unnecessary costs for contractors and meet the criteria established for DSM program approval by the Commission in Order No. 23560. The program as modified is cost effective, directly monitorable, and advances the policy objectives set forth in Rule 25-17.001, F.A.C., and the Florida Energy Efficiency and Conservation Act (FEECA), Sections 366.80 through 366.85, F.S.

APPROVED

PSC/RAR33(5/90)

Issue 2: Should the Commission approve Florida Power Corporation's (FPC) revised program participation standards for the Residential New Construction (RNC) program?

Recommendation: Yes. The program as modified is cost effective, directly monitorable, and advances the policy objectives set forth in Rule 25-17.001, F.A.C., and FEECA. While the benefit/cost ratio of this program is marginal, with a RIM value of 1.09, FPC's requirement that Level Two incentives will be paid only if a commensurate reduction in the Energy Performance Index (EPI) results will reduce the risk that incentives will be paid when demand and energy savings may not materialize.

APPROVED

Issue 3: Should this docket be closed?

Recommendation: Yes. If no person whose substantial interests are affected by the Commission's proposed agency action files a protest within 21 days of issuance of this order, this docket should be closed.
