3. That the City of Longwood has standing to object on the grounds that the issuance or amendment of the certificate of authorization violates the established local comprehensive plans developed pursuant to Florida Statute Section 163.3161 - 163.3211.

4. That the public can be adequately served by modifying or extending the current wastewater system into the area of the subject application.

5. That the granting of the amendment to the certificate of authorization of the existing system will result in the system being in competition with, and/or a duplication of, the system of the City of Longwood. The City of Longwood has a system that is adequate to meet the reasonable needs of the public in the subject area and is able to provide reasonably adequate service.
