BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Investigation into pricing)
of unbundled network elements)
_____)

Docket No.-990649-TP

Filed: December 7, 1999

JOINT STIPULATION REGARDING
INTERIM DEAVERAGING

THIS JOINT STIPULATION (Stipulation) is entered into by and among the following parties (Parties) to this docket: ALLTEL Communications, Inc. (ALLTEL); AT&T Communications of the Southern States, Inc. (AT&T); BellSouth Telecommunications, Inc. (BellSouth); Covad Communications Company (Covad); Florida Cable Telecommunications Association, Inc. (FCTA); Florida Competitive Carriers Association (FCCA); Florida Digital Network, Inc. (Florida Digital); GTE Florida, Incorporated (GTE); Intermedia Communications, Inc. (Intermedia); KMC Telecom, Inc., KMC Telecom II, Inc., and KMC Telecom III, Inc. (KMC); MCI WorldCom, Inc. and its Operating Subsidiaries (MCI WorldCom); MediaOne Florida Telecommunications, Inc. (MediaOne); Northpoint Communications, Inc. (Northpoint); Rhythms Links Inc., f/k/a/ ACI Corp. (Rhythms); Sprint Communications Company Limited Partnership and Sprint-Florida, Incorporated (Sprint); Supra Telecommunications and Information Systems (Supra); and Time-Warner Telecom of Florida, L.P. (Time Warner Telecom).

WHEREAS, the Florida Public Service Commission (Commission) has established this docket for the purpose of establishing rates

DOCUMENT NUMBER-DATE
14952 DEC-7⁹⁹ 001024
FPSC-REGULATORY REPORTING

for unbundled network elements (UNEs), including deaveraged rates where required; and

WHEREAS, the Federal Communications Commission (FCC) has announced that its stay of Rule 51.507(f) (the "Deaveraging Rule") will be lifted effective six months from the date of the release of the Order regarding New Mechanism for Federal Universal Service High Cost Support Provided to Non-Rural Carriers (CC Docket No. 96-45); and

WHEREAS, the Deaveraging Rule provides in part that "State commissions shall establish different rates for elements in at least three defined geographic areas within the state to reflect geographic cost differences"; and

WHEREAS, the on-going proceedings in this docket to establish permanent rates are not expected to be concluded by the date the stay of Rule 51.507(f) is lifted; and

WHEREAS, the Parties are willing to agree to a plan for interim rate deaveraging to avoid the necessity either for expedited proceedings on interim deaveraging or for the Commission to seek a waiver of the Deaveraging Rule pending the completion of the permanent pricing proceedings in this docket; and

WHEREAS, this Stipulation is not intended to set a precedent for the resolution of any issue related to permanent deaveraged rates;

NOW THEREFORE, the Parties agree as follows:

1. Interim deaveraged rates will be set only for the three large incumbent local exchange companies, BellSouth, GTE and Sprint.

2. As to Sprint, the existing deaveraged rates for loops, switching and transport shall remain in effect as interim deaveraged rates for those elements as shown on Attachment A.

3. As to BellSouth and GTE, interim deaveraged rates will be set for each of the unbundled loop elements listed in Attachment A, which are the elements for which the company currently has a non-deaveraged rate contained in any tariff or interconnection agreement.

4. As to BellSouth and GTE, interim deaveraged recurring loop rates will be set separately for each company for three geographic zones. No interim deaveraging will be performed for non-recurring charges for any ILEC.

5. The deaveraged rates described in Paragraph 4 will be developed using the per-loop investment data (on a wire center basis) produced by the final compliance run of the Benchmark Cost Proxy Model 3.1 for each company submitted in response to Commission Order No. PSC-99-0068-FOF-TP in Docket No. 980696-TP, using the following procedure:

a. BellSouth and GTE each shall group its wire centers into three proposed zones -- a low-cost zone, a mid-cost zone, and a high-cost zone -- and shall determine a weighted average loop investment for each proposed zone.

b. The relationship between the weighted average loop investment for each proposed zone and the company's statewide average loop investment will used by each company to develop three factors for the company such that:

$$\begin{array}{r} \text{(Factor 1 x Access Lines in Zone 1) +} \\ \text{(Factor 2 x Access Lines in Zone 2) +} \\ \text{(Factor 3 x Access Lines in Zone 3)} \\ \hline \text{Total Access Lines} \end{array} = 1.0$$

c. The interim deaveraged rates for each loop element shall then be determined by multiplying the factor for each proposed zone times the current price of such element.

d. The intent of the calculation in subparagraphs 5.a to 5.c is that the weighted average of the deaveraged prices for each loop element should equal the current price in effect for such element.

6. BellSouth and GTE will calculate rates in accordance with Paragraph 5, and Sprint will calculate rates in accordance with Paragraph 2, and will furnish the proposed interim rates, the identification of which wire centers are included in each proposed zone, and the supporting calculations to the other Parties for review by November 17, 1999. For BellSouth and GTE, the supporting documentation will include a list of wire centers, in order from the lowest to the highest average loop investment. This list will show the break-points between the cost zones and the calculation of the weighted average per-loop investment for each zone. The Parties will meet by conference call beginning on

November 23, 1999 for the purpose of finalizing the proposed rates and zones. Upon subsequent agreement of the Parties, the rates and zones shall be incorporated into Attachment A to this Stipulation.

7. The interim deaveraged rates will take effect on May 1, 2000 (unless the effective date of the lifting of the stay of Rule 51.507(f) is changed by the FCC, in which case the revised date established by the FCC will control) and will remain in effect until the earlier of (a) the date they are replaced by permanent deaveraged rates established by the Commission in this docket, or (b) June 30, 2001. The interim deaveraged rates will be available to parties which have an interconnection agreement with the respective ILEC. As between the Parties who are signatories to this Stipulation, the above-mentioned effective date shall have the effect of a Commission order and will not be delayed pending formal amendment of the Parties' individual interconnection agreements. The interim deaveraged rates will not be subject to true-up. The Parties intend that the interim deaveraged rates remain in effect for the minimum amount of time necessary to establish permanent rates, and the Parties will act in good faith to complete this docket as quickly as practicable.

8. Nothing in this Stipulation shall establish any precedent for the Commission's resolution of any issue in this docket. Each Party is free to advocate any position with respect to such matters. Without limiting the generality of the foregoing, the Stipulation shall not establish any precedent for:

(a) the elements required to be offered; (b) the elements required to be deaveraged; (c) the appropriate deaveraging methodology; (d) the appropriate number of zones; (e) the appropriate permanent deaveraged rate levels; (f) whether or not non-recurring charges must be deaveraged; (g) the appropriate methodology to use in establishing UNE prices; (h) universal service funding issues; or (i) rate rebalancing issues.

9. This Stipulation will take effect as soon as the Parties have reached subsequent agreement pursuant to Paragraph 6 on the rates to be included in Attachment A.

10. This Stipulation will be submitted to the Commission for approval as soon as it takes effect under Paragraph 9. If this Stipulation is not accepted by the Commission in its entirety and without modification, it shall have no further force and effect and shall not be admissible for any purpose in any further proceedings in this docket, any appeal or other judicial proceedings related to this docket, or any future judicial or regulatory proceedings.

11. Each Party agrees that if this Stipulation is approved, it will not challenge in any forum (i) the interim rates set forth on Attachment A, as to the period during which the rates are in effect, or (ii) the absence of interim deaveraged rates for any elements not included on Attachment A. This Stipulation does not affect or prejudice the position of any party in any pending judicial or administrative proceeding relating to the level of any existing averaged loop price and/or the

appropriateness of the cost methodology used to establish such price. Nothing in this Stipulation shall prevent any party from pursuing or opposing, at any time, universal service funding, rate rebalancing, recovery of stranded costs, or other actions addressing the relationship between UNE and retail rates.

IN WITNESS WHEREOF, the parties have executed this Stipulation on the dates set forth next to their respective signatures.

E19. SERVICES FOR COMPETING TELECOMMUNICATIONS PROVIDERS

E19.2 Unbundled Network Elements (Cont'd)

(M)

E19.2.14 Loops (Cont'd)

C. Loop services and port services shall be purchased by the Carrier at the interface level of the unbundled network element (i.e., two-wire voice grade). Multiplexing is optional at the charges specified in E19.8 following.

D. Rate Application

Loop rates are applied monthly on a per-loop basis. Nonrecurring charges, as listed in E19.8.2, as well as service order charges listed in E19.8.6, are applicable for service establishment. Additionally, a nonrecurring charge will apply for conditioning required for two-wire digital data ADSL capable non-standard loops with a calculated effective loop length over 18 Kft. Loop conditioning is the removal of load coils and excessive amounts of bridge tap to unfetter a digital data capable loop. When a non-standard 2W ADSL capable loop is ordered, an ICB charge will apply to remove the load coil.
