We would appreciate any comments or information on intermodal local competition (e.g., wireless, cable telephony, VoIP), reports or studies you have completed on CLEC market share, or anything else that you believe to be relevant.

RESPONSE:

Competition is alive and well in Florida. Consumers have many choices throughout the state not only for basic telephone service, but for all their communications needs.

- **Verizon has experienced a 40% drop in residential access lines since 2001, while wireless subscription has increased by 83% and broadband line growth has exploded statewide.**
- **Analysts anticipate another 25-30% reduction in the number of access lines by the end of this year for ILECs such as Verizon.**
- **In a recent article by the St. Petersburg Times, it was reported that Bright House Networks had over one million phone customers**

- **As of 2007, the U.S. Bureau of Labor Statistics found that cellular phone expenditures actually surpassed spending on residential landline phone services.**
- **Thanks to pro-competitive regulatory policies, telecom companies are investing heavily in new networks, creating high-paying jobs, and enabling productivity growth and price reductions throughout the economy.**
