Subject: Duke energy bill increase

Florida public service commission,

It has recently been brought to my attention that Duke energy was approved to increase prices of our electric to cover costs of repairs associated with storms. The customers have no other electric company to choose from and your job is to protect us from exuberant pricing especially in the current economic times. I am very disappointed in the public service provided by your commission. Honor humanity above all, that is what we ask of you.

Thank you,
Megan Tartaglia
