Number of shares of common stock outstanding at Apr l 30, 2020:

Registrant	Description	Shares
Duke Energy	Common stock, $0.001 par value	734,852,539

This combined Form 10-Q/A is filed separately by eight registrants: Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont (collectively the Duke Energy Registrants). Information contained herein relating to any individual registrant is f led by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

EXPLANATORY NOTE

Duke Energy Corporation and its subsidiaries (collectively, the “Company”) filed its Quarterly Report on Form 10-Q for the quarter ended March 31, 2020 (the “Original Filing”) with the U.S. Secur ties and Exchange Commission (the “SEC”) on May 12, 2020. The Company is filing this Amendment No. 1 (the “Amendment”) to ts Original Filing solely to add this Explanatory Note which was inadvertently omitted from the Original Filing.

As previously disclosed in the Company’s Current Report on Form 8-K f led with the SEC on May 8, 2020 (the “Form 8-K”), and in accordance w th the SEC’s “Order Under Section 36 of the Secur ties Exchange Act of 1934 Modifying Exemptions From the Reporting and Proxy Delivery Requirements for Public Companies," dated March 25, 2020 (Release No. 34-88465) (the “Order”), the Company (i) relied on the relief provided by the Order in connection with the f ling of the Original F ling and (ii) the delay in the Original Filing was necess tated by the additional time required by our workforce, who are largely working remotely during the COVID-19 pandemic, to complete the processes necessary for our internal controls. In addition, as required by Rule 12b-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company is including in this Amendment certifications from its Chief Executive Officer and Chief Financial Officer as required by Rule 13a-14(a) or Rule 15d-14(a) under the Exchange Act as exhib ts to this Amendment. Because no financial statements have been included in this Amendment and this Amendment does not contain or amend any disclosure w th respect to Items 307 and 308 of Regulation S-K, paragraphs 3, 4 and 5 of the certifications have been om tted. We are not including the certifications under Section 906 of the Sarbanes-Oxley Act of 2002 as no financial statements are being filed w th this Amendment.

This Amendment has not been updated for events or information subsequent to the f ling date of the Original F ling and should be read in conjunction with the Original Filing and Duke Energy’s other filings w th the SEC. Except as described above, no other changes have been made in the Amendment to modify or update the other disclosures in or exh bits filed or furnished w th the Original Filing. Material events may have occurred subsequent to the filing of the Original Filing that are not reflected in this Amendment.

This combined Form 10-Q is filed separately by eight registrants: Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont (collectively the Duke Energy Registrants). Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont meet the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q and are therefore filing this form with the reduced disclosure format specified in General Instructions H(2) of Form 10-Q.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management's beliefs and assumptions and can often be identified by terms and phrases that include "anticipate," "believe," "intend," "estimate," "expect," "continue," "should," "could," "may," "plan," "project," "predict," "will," "potential," "forecast," "target," "guidance," "outlook" or other similar terminology. Various factors may cause actual results to be materially different than the suggested outcomes within forward-looking statements; accordingly, there is no assurance that such results will be realized. These factors include, but are not limited to:

- The impact of the COVID-19 pandemic;
- State, federal and foreign legislative and regulatory initiatives, including costs of compliance with existing and future environmental requirements, including those related to climate change, as well as rulings that affect cost and investment recovery or have an impact on rate structures or market prices;
- The extent and timing of costs and liabilities to comply with federal and state laws, regulations and legal requirements related to coal ash remediation, including amounts for required closure of certain ash impoundments, are uncertain and difficult to estimate;
- The ability to recover eligible costs, including amounts associated with coal ash impoundment retirement obligations and costs related to significant weather events, and to earn an adequate return on investment through rate case proceedings and the regulatory process;
- The costs of decommissioning nuclear facilities could prove to be more extensive than amounts estimated and all costs may not be fully recoverable through the regulatory process;
- Costs and effects of legal and administrative proceedings, settlements, investigations and claims;
- Industrial, commercial and residential growth or decline in service territories or customer bases resulting from sustained downturns of the economy and the economic health of our service territories or variations in customer usage patterns, including energy efficiency efforts and use of alternative energy sources, such as self-generation and distributed generation technologies;
- Federal and state regulations, laws and other efforts designed to promote and expand the use of energy efficiency measures and distributed generation technologies, such as private solar and battery storage, in Duke Energy service territories could result in customers leaving the electric distr bution system, excess generation resources as well as stranded costs;
- Advancements in technology;
- Additional competition in electric and natural gas markets and continued industry consolidation;
- The influence of weather and other natural phenomena on operations, including the economic, operational and other effects of severe storms, hurricanes, droughts, earthquakes and tornadoes, including extreme weather associated with climate change;
- The ability to successfully operate electric generating facilities and deliver electricity to customers including direct or indirect effects to the company resulting from an incident that affects the United States electric grid or generating resources;
- The ability to obtain the necessary permits and approvals and to complete necessary or desirable pipeline expansion or infrastructure projects in our natural gas business;
- Operational interruptions to our natural gas distribution and transmission activities;
- The availability of adequate interstate pipeline transportation capacity and natural gas supply;
- The impact on facilities and business from a terrorist attack, cybersecurity threats, data security breaches, operational accidents, information technology failures or other catastrophic events, such as fires, explosions, pandemic health events or other similar occurrences;
- The inherent risks associated with the operation of nuclear facilities, including environmental, health, safety, regulatory and financial risks, including the financial stability of third-party service providers;
- The timing and extent of changes in commodity prices and interest rates and the ability to recover such costs through the regulatory process, where appropriate, and their impact on liquidity positions and the value of underlying assets;
- The results of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings, interest rate fluctuations, compliance with debt covenants and conditions and general market and economic conditions;
- Credit ratings of the Duke Energy Registrants may be different from what is expected;
- Declines in the market prices of equity and fixed-income securities and resultant cash funding requirements for defined benefit pension plans, other post-retirement benefit plans and nuclear decommissioning trust funds;
- Construction and development risks associated with the completion of the Duke Energy Registrants' capital investment projects, including risks related to financing, obtaining and complying with terms of permits, meeting construction budgets and schedules and satisfying operating and environmental performance standards, as well as the ability to recover costs from customers in a timely manner, or at all;
- Changes in rules for regional transmission organizations, including changes in rate designs and new and evolving capacity markets, and risks related to obligations created by the default of other participants;
- The ability to control operation and maintenance costs;
- The level of creditworthiness of counterparties to transactions;
- The ability to obtain adequate insurance at acceptable costs;
- Employee workforce factors, including the potential inability to attract and retain key personnel;

- The ability of subsidiaries to pay dividends or distributions to Duke Energy Corporation holding company (the Parent);
- The performance of projects undertaken by our nonregulated businesses and the success of efforts to invest in and develop new opportunities;
- The effect of accounting pronouncements issued periodically by accounting standard-setting bodies;
- The impact of United States tax legislation to our financial condition, results of operations or cash flows and our credit ratings;
- The impacts from potential impairments of goodwill or equity method investment carrying values; and
- The ability to implement our business strategy, including enhancing existing technology systems.

Additional risks and uncertainties are identified and discussed in the Duke Energy Registrants' reports filed with the SEC and available at the SEC's website at sec.gov. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than described. Forward-looking statements speak only as of the date they are made and the Duke Energy Registrants expressly disclaim an obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Glossary of Terms

The following terms or acronyms used in this Form 10-Q are defined below:

Term or Acronym	Definition
2013 Settlement	Revised and Restated Stipulation and Settlement Agreement approved in November 2013 among Duke Energy Florida, the Florida OPC and other customer representatives
2017 Settlement	Second Revised and Restated Settlement Agreement in 2017 among Duke Energy Florida, the Florida OPC and other customer representatives, which replaces and supplants the 2013 Settlement
ACP	Atlantic Coast Pipeline, LLC, a limited liability company owned by Dominion Energy, Inc. and Duke Energy
ACP pipeline	The approximately 600-mile canceled interstate natural gas pipeline
AFS	Available for Sale
AFUDC	Allowance for funds used during construction
AMT	Alternative Minimum Tax
ARO	Asset retirement obligations
Bison	Bison Insurance Company Limited
CC	Combined Cycle
CCR	Coal Combustion Residuals
CARES Act	Coronavirus Aid, Relief and Economic Security Act
Coal Ash Act	North Carolina Coal Ash Management Act of 2014
the Company	Duke Energy Corporation and its subsidiaries
Constitution	Constitution Pipeline Company, LLC
COVID-19	Coronavirus Disease 2019
CRC	Cinergy Receivables Company, LLC
Crystal River Unit 3	Crystal River Unit 3 Nuclear Plant
DEFPF	Duke Energy Florida Project Finance, LLC
DEFR	Duke Energy Florida Receivables, LLC
DEPR	Duke Energy Progress Receivables, LLC
DERF	Duke Energy Receivables Finance Company, LLC
Duke Energy	Duke Energy Corporation (collectively with its subsidiaries)
Duke Energy Ohio	Duke Energy Ohio, Inc.
Duke Energy Progress	Duke Energy Progress, LLC
Duke Energy Carolinas	Duke Energy Carolinas, LLC
Duke Energy Florida	Duke Energy Florida, LLC
Duke Energy Indiana	Duke Energy Indiana, LLC
Duke Energy Kentucky	Duke Energy Kentucky, Inc.
Duke Energy Registrants	Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont
EDIT	Excess deferred income tax
EPA	U.S. Environmental Protection Agency
EPS	Earnings Per Share
ESP	Electric Security Plan
ETR	Effective tax rate
Exchange Act	Securities Exchange Act of 1934

FERC	Federal Energy Regulatory Commission
FPSC	Florida Public Service Commission
FTR	Financial transmission rights
GAAP	Generally accepted accounting principles in the U.S.
GAAP Reported Earnings (Loss)	Net Income (Loss) Available to Duke Energy Corporation Common Stockholders
GAAP Reported Earnings (Loss) Per Share	Basic Earnings (Loss) Per Share Available to Duke Energy Corporation common stockholders
GWh	Gigawatt-hours
IGCC	Integrated Gasification Combined Cycle
IMR	Integrity Management Rider
IRS	Internal Revenue Service
Investment Trusts	NDTF investments and grantor trusts of Duke Energy Progress, Duke Energy Florida and Duke Energy Indiana
IURC	Indiana Utility Regulatory Commission
KPSC	Kentucky Public Service Commission
LLC	Limited Liability Company
MGP	Manufactured gas plant
MMBtu	Million British Thermal Unit
MW	Megawatt
MWh	Megawatt-hour
NCUC	North Carolina Utilities Commission
NDTF	Nuclear decommissioning trust funds
NPNS	Normal purchase/normal sale
OPEB	Other Post-Retirement Benefit Obligations
ORS	South Carolina Office of Regulatory Staff

Tables within the notes may not sum across due to (i) Progress Energy's consolidation of Duke Energy Progress, Duke Energy Florida and other subsidiaries that are not registrants and (ii) subsidiaries that are not registrants but included in the consolidated Duke Energy balances.

1. ORGANIZATION AND BASIS OF PRESENTATION

BASIS OF PRESENTATION

These Condensed Consolidated Financial Statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, these Condensed Consolidated Financial Statements do not include all information and notes required by GAAP for annual financial statements and should be read in conjunction with the Consolidated Financial Statements in the Duke Energy Registrants' combined Annual Report on Form 10-K for the year ended December 31, 2019.

The information in these combined notes relates to each of the Duke Energy Registrants as noted in the Index to Combined Notes to Condensed Consolidated Financial Statements. However, none of the registrants make any representations as to information related solely to Duke Energy or the subsidiaries of Duke Energy other than itself.

These Condensed Consolidated Financial Statements, in the opinion of the respective companies' management, reflect all normal recurring adjustments necessary to fairly present the financial position and results of operations of each of the Duke Energy Registrants. Amounts reported in Duke Energy's interim Condensed Consolidated Statements of Operations and each of the Subsidiary Registrants' interim Condensed Consolidated Statements of Operations and Comprehensive Income are not necessarily indicative of amounts expected for the respective annual periods due to effects of seasonal temperature variations on energy consumption, regulatory rulings, timing of maintenance on electric generating units, changes in mark-to-market valuations, changing commodity prices and other factors.

In preparing financial statements that conform to GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities, the reported amounts of revenues and expenses and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

BASIS OF CONSOLIDATION

These Condensed Consolidated Financial Statements include, after eliminating intercompany transactions and balances, the accounts of the Duke Energy Registrants and subsidiaries or VIEs where the respective Duke Energy Registrants have control. See Note 11 for additional information on VIEs. These Condensed Consolidated Financial Statements also reflect the Duke Energy Registrants' proportionate share of certain jointly owned generation and transmission facilities.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. In March 2020, the World Health Organization declared COVID-19 a global pandemic, and President Trump proclaimed that the COVID-19 outbreak in the United States constitutes a national emergency. The extent to which the COVID-19 pandemic will impact the Duke Energy Registrants during 2020 and beyond is uncertain, and the Duke Energy Registrants are monitoring developments closely. The company incurred approximately $34 million and $40 million of incremental COVID-19 costs for the three and six months ended June 30, 2020, respectively, included in Operation, maintenance and other on the Condensed Consolidated Statements of Operations. These costs were primarily bad debt expense, personal protective equipment and cleaning supplies. Further the company experienced approximately another $25 million of waived late payment fees for the three and six months ended June 30, 2020. See Notes 3, 5, 11, 12 and 15 for additional information as well as steps taken to mitigate the impacts to our business and customers from the COVID-19 pandemic.

OTHER CURRENT ASSETS

Included in Other within Current Assets on the Piedmont Condensed Consolidated Balance Sheets are income taxes receivable of $22 million and $14 million as of June 30, 2020, and December 31, 2019, respectively, and prepaid assets of $19 million and $3 million as of June 30, 2020, and December 31, 2019, respectively. The income taxes receivable relates to increases of net operating losses for Piedmont and intercompany tax settlements. The prepaid assets relate to natural gas storage injections and inventory transfers classified as prepaid assets until winter season when the gas is moved to Inventory on the Piedmont Condensed Consolidated Balance Sheets under certain agreements.

OTHER CURRENT LIABILITIES

During the second quarter of 2020, Duke Energy recorded a current liability related to the abandonment of ACP within Current Liabilities in the Gas Utilities and Infrastructure segment. The liability represents Duke Energy's obligation to fund ACP's obligations of outstanding debt and satisfy ARO requirements to restore construction sites. As a result, Liabilities associated with unconsolidated affiliates is $920 million, and exceeds 5% of Total current liabilities on the Duke Energy Condensed Consolidated Balance Sheets as of June 30, 2020. See Notes 3, 4 and 11 for further information.

NONCONTROLLING INTEREST

Duke Energy maintains a controlling financial interest in certain less than wholly owned nonregulated subsidiaries. As a result, Duke Energy consolidates these subsidiaries and presents the third-party investors' portion of Duke Energy's net income (loss), net assets and comprehensive income (loss) as noncontrolling interest. Noncontrolling interest is included as a component of equity on the Condensed Consolidated Balance Sheet.

Several operating agreements of Duke Energy's subsidiaries with noncontrolling interest are subject to allocations of earnings, tax attributes and cash flows in accordance with contractual agreements that vary throughout the lives of the subsidiaries. Therefore, Duke Energy and the other investors' (the owners) interests in the subsidiaries are not fixed, and the subsidiaries apply the Hypothetical Liquidation at Book Value (HLBV) method in allocating income or loss and other comprehensive income or loss (all measured on a pretax basis) to the owners. The HLBV method measures the amounts that each owner would hypothetically claim at each balance sheet reporting date, including tax benefits realized by the owners over the IRS recapture period, upon a hypothetical liquidation of the subsidiary at the net book value of its underlying assets. The change in the amount that each owner would hypothetically receive at the reporting date compared to the amount it would have received on the previous reporting date represents the amount of income or loss allocated to each owner for the reporting period. The following table presents cash received for the sale of noncontrolling interest to tax equity members and allocated losses to noncontrolling tax equity members utilizing the HLBV method for the three and six months ended June 30, 2020, and 2019.

	Three Months Ended		Six Months Ended	
(in millions)	**June 30, 2020**	**June 30, 2019**	**June 30, 2020**	**June 30, 2019**
Cash received for the sale of noncontrolling interest to tax equity members	**$ 60**	$ 187	**$ 163**	$ 193
Allocated losses to noncontrolling tax equity members utilizing the HLBV method	**79**	83	**128**	90

Other operating agreements of Duke Energy's subsidiaries with noncontrolling interest allocate profit and loss based on their pro rata shares of the ownership interest in the respective subsidiary. Therefore, Duke Energy allocates net income or loss and other comprehensive income or loss of these subsidiaries to the owners based on their pro rata shares.

CASH, CASH EQUIVALENTS AND RESTRICTED CASH

Duke Energy, Progress Energy and Duke Energy Florida have restricted cash balances related primarily to collateral assets, escrow deposits and VIEs. See Notes 9 and 11 for additional information. Restricted cash amounts are included in Other within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets. The following table presents the components of cash, cash equivalents and restricted cash included in the Condensed Consolidated Balance Sheets.

	June 30, 2020			December 31, 2019		
	Duke Energy	**Progress Energy**	**Duke Energy Florida**	**Duke Energy**	**Progress Energy**	**Duke Energy Florida**

Total inventory	$ 3,232	$ 996	$ 1,423	$ 934	$ 489	$ 135	$ 517	$ 72

NEW ACCOUNTING STANDARDS

The following new accounting standard was adopted by the Duke Energy Registrants in 2020.

Current Expected Credit Losses. In June 2016, the Financial Accounting Standards Board (FASB) issued new accounting guidance for credit losses. Duke Energy adopted the new accounting guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year results. Duke Energy did not adopt any practical expedients.

Duke Energy recognizes allowances for credit losses based on management's estimate of losses expected to be incurred over the lives of certain assets or guarantees. Management monitors credit quality, changes in expected credit losses and the appropriateness of the allowance for credit losses on a forward-looking basis. Management reviews the risk of loss periodically as part of the existing assessment of collectability of receivables.

Duke Energy reviews the credit quality of its counterparties as part of its regular risk management process and requires credit enhancements, such as deposits or letters of credit, as appropriate and as allowed by regulators.

Duke Energy recorded cumulative effects of changes in accounting principles related to the adoption of new credit loss standard, for allowances for credit losses of trade and other receivables, insurance receivables and financial guarantees. These amounts are included in the Condensed Consolidated Balance Sheets in Receivables, Receivables of VIEs, Other Noncurrent Assets and Other Noncurrent Liabilities. See Notes 4 and 12 for more information.

Duke Energy recorded an adjustment for the cumulative effect of a change in accounting principle due to the adoption of this standard on January 1, 2020, as shown in the table below:

	January 1, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Piedmont
Total pretax impact to Retained Earnings	$ 120	$ 16	$ 2	$ 1	$ 1	$ 1

The following new accounting standard has been issued but not yet adopted by the Duke Energy Registrants as of June 30, 2020.

Reference Rate Reform. In March 2020, the FASB issued new accounting guidance for reference rate reform. This guidance is elective and provides expedients to facilitate financial reporting for the anticipated transition away from the London Inter-bank Offered Rate (LIBOR) and other interbank reference rates by the end of 2021. The optional expedients are effective for modification of existing contracts or new arrangements executed between March 12, 2020, through December 31, 2022.

Duke Energy has variable-rate debt and manages interest rate risk by entering into financial contracts including interest rate swaps that are generally indexed to LIBOR. Impacted financial arrangements extending beyond 2021 may require contractual amendment or termination to fully adapt to a post-LIBOR environment. Duke Energy is assessing these financial arrangements and is evaluating the use of optional expedients outlined in the new accounting guidance. Alternative index provisions are also being assessed and incorporated into new financial arrangements that extend beyond 2021. The full outcome of the transition away from LIBOR cannot be determined at this time, but is not expected to have a material impact on the financial statements.

2. BUSINESS SEGMENTS

Duke Energy

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The Electric Utilities and Infrastructure segment primarily includes Duke Energy's regulated electric utilities in the Carolinas, Florida and the Midwest. The Gas Utilities and Infrastructure segment includes Piedmont, Duke Energy's natural gas local distribution companies in Ohio and Kentucky, and Duke Energy's natural gas storage and midstream pipeline investments.

The Commercial Renewables segment is primarily comprised of nonregulated utility-scale wind and solar generation assets located throughout the U.S. In 2020, Duke Energy evaluated recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Duke Energy determined that the asset was not impaired because the carrying value of $155 million approximates the aggregate estimated future cash flows and therefore further testing was not required. A continued decline in energy market pricing would likely result in a future impairment. Duke Energy retained 51% ownership interest in this facility following the 2019 transaction to sell a minority interest in certain renewable assets.

The remainder of Duke Energy’s operations is presented as Other, which is primarily comprised of interest expense on holding company debt, unallocated corporate costs, Duke Energy’s wholly owned captive insurance company, Bison, and Duke Energy's interest in National Methanol Company.

Business segment information is presented in the following tables. Segment assets presented exclude intercompany assets.

	Three Months Ended June 30, 2020						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total

(a) Gas Utilities and Infrastructure includes $2.0 billion of pretax costs related to the abandonment of its ACP investment recorded within Equity in (losses) earnings of unconsolidated affiliates on the Condensed Consolidated Statements of Operations. See Notes 1, 3 and Note 11 for additional information.

(b) Other includes a $98 million reversal, included in Operations, maintenance and other on the Condensed Consolidated Statements of Operations, of 2018 severance costs due to the partial settlement of the Duke Energy Carolina's 2019 North Carolina rate case. See Note 3 for additional information.

(c) Includes the allocation of losses to noncontrolling tax equity members. See Note 1 for additional information.

Duke Energy Ohio

Duke Energy Ohio has two reportable segments, Electric Utilities and Infrastructure and Gas Utilities and Infrastructure. The remainder of Duke Energy Ohio's operations is presented as Other.

(in millions)	Three Months Ended June 30, 2020					
	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Eliminations	Total
Total revenues	$ 330	$ 93	$ 423	$ —	$ —	$ 423

3. REGULATORY MATTERS

RATE-RELATED INFORMATION

The NCUC, PSCSC, FPSC, IURC, PUCO, TPUC and KPSC approve rates for retail electric and natural gas services within their states. The FERC approves rates for electric sales to wholesale customers served under cost-based rates (excluding Ohio and Indiana), as well as sales of transmission service. The FERC also regulates certification and siting of new interstate natural gas pipeline projects.

Duke Energy Carolinas and Duke Energy Progress

COVID-19 Filings

North Carolina

On March 10, 2020, Governor Roy Cooper issued Executive Order No. 116 declaring a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued an order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency (as defined by Executive Order No. 116) and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Duke Energy Carolinas and Duke Energy Progress filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted the companies' request on March 20, 2020.

On March 31, 2020, the governor issued Executive Order No. 124, which, in addition to requiring the steps in the NCUC order noted above, stated that nothing in Executive Order No. 124 shall relieve a customer of its obligation to pay bills for receipt of utility services provided. Executive Order No. 124 remains in effect for 60 days unless otherwise rescinded or replaced with a superseding Executive Order. On May 30, 2020, the governor issued Executive Order No. 142, which extended effective period for Executive Order No. 124 to July 29, 2020. Executive Order No. 142 was not extended.

On July 10, 2020, Duke Energy Carolinas and Duke Energy Progress filed a petition with the NCUC for clarification regarding when they may begin working with customers on establishing payment arrangements for arrears accumulated since March 13, 2020. On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: 1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; 2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; 3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and 4) no sooner than September 1, 2020, the collection of past-due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions.

Duke Energy Carolinas and Duke Energy Progress filed a joint petition on August 7, 2020, with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

South Carolina

On March 13, 2020, Governor Henry McMaster issued Executive Order No. 2020-08 declaring a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for poss ble reporting to the PSCSC.

On April 30, 2020, the ORS requested the PSCSC grant a waiver of the applicable regulations to allow customers the flexibility to obtain deferred payment plans longer than six months for past-due amounts. On May 5, 2020, Duke Energy Carolinas and Duke Energy Progress filed responsive comments stating that while utility bills will remain due, Duke Energy Carolinas and Duke Energy Progress do not plan to immediately reinstitute disconnection upon the expiration of the state of emergency and intend to work through a potential grace period as economic recovery begins. Duke Energy Carolinas and Duke Energy Progress also concurred with the observation of the ORS that reduced usage is impacting the fixed-cost recovery and revenue assumptions included in rates. Those costs include not only ongoing operational and financing costs necessary to serve customers, but also the borrowings necessary to support extended payment arrangements that will be an important part of emerging from the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress will continue to track such costs, lost revenues and potential cost savings for future evaluation by the PSCSC.

Additionally, on May 8, 2020, the ORS filed a motion for the PSCSC to solicit comments from utilities and interested stakeholders regarding measures to be taken to mitigate impacts of COVID-19 on utility customers and require recordkeeping. In a detailed motion, the ORS specifically asked the PSCSC to: (1) solicit input from utilities regarding the temporary mitigation measures to address COVID-19; (2) request utilities to inform the PSCSC of the plans utilities have to return to normalized operations; (3) require utilities to track revenue impacts, incremental costs and savings related to COVID-19 and file the findings with the PSCSC on a quarterly basis; and (4) include any other matters that the PSCSC believes should be addressed. On May 14, 2020, the PSCSC adopted the ORS' motion.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Duke Energy Carolinas and Duke Energy Progress filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. Duke Energy Carolinas and Duke Energy Progress are evaluating a filing with the PSCSC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

2017 North Carolina Rate Case

On August 25, 2017, Duke Energy Carolinas filed an application with the NCUC for a rate increase for retail customers of approximately $647 million. On February 28, 2018, Duke Energy Carolinas and the North Carolina Public Staff (Public Staff) filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On June 22, 2018, the NCUC issued an order approving the Stipulation of Partial Settlement and requiring a revenue reduction.

342

The North Carolina Attorney General and other parties separately filed Notices of Appeal to the North Carolina Supreme Court. On August 8, 2018, the Public Staff filed a Notice of Cross Appeal to the North Carolina Supreme Court. On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Carolinas and Duke Energy Progress appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. On November 29, 2018, the North Carolina Supreme Court adopted a schedule for briefing set forth in the motion to consolidate the Duke Energy Carolinas and Duke Energy Progress appeals. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Carolinas cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On September 30, 2019, Duke Energy Carolinas filed an application with the NCUC for a net rate increase for retail customers of approximately $291 million, which represented an approximate 6% increase in annual base revenues. The gross rate case revenue increase request was $445 million, which was offset by an EDIT rider of $154 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for a rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Carolinas requested rates be effective no later than August 1, 2020. The NCUC established a procedural schedule with an evidentiary hearing to begin on March 23, 2020. On March 16, 2020, in consideration of public health and safety as a result of the COVID-19 pandemic, Duke Energy Carolinas filed a motion with the NCUC seeking a suspension of the procedural schedule in the rate case, including issuing discovery requests, and postponement of the evidentiary hearing for 60 days. Also on March 16, 2020, the NCUC issued an Order Postponing Hearing and Addressing Procedural Matters, which postponed the evidentiary hearing until further order by the commission.

On March 25, 2020, Duke Energy Carolinas and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: 1) a hearing on issues common to both rate cases conducted remotely; 2) a hearing on Duke Energy Carolinas specific rate case issues conducted in person, followed immediately by; 3) a hearing on Duke Energy Progress specific rate case issues conducted in person. On July 24, 2020, Duke Energy Carolinas filed its request for approval of its notice to customers required to implement temporary rates. On July 27, 2020, Duke Energy Carolinas filed a joint motion with Duke Energy Progress and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff and requesting a postponement of the evidentiary hearing until August 24, 2020. The NCUC granted the joint motion on July 27, 2020. Also on July 27, 2020, Duke Energy Carolinas filed a letter stating that it intended to update its temporary rates calculation to reflect the terms of the partial settlement.

On July 31, 2020, Duke Energy Carolinas and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $45 million; and
- Settlement on certain grid deferral projects of $0.8 billion and agreement to withdraw Duke Energy Carolinas' request for deferral of remaining grid projects of $0.5 billion.

The remaining items to be litigated at hearing include recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting, implementation of new depreciation rates and amortization of the hydro station sale. As a result of the additional settlement terms, the NCUC ordered the Duke Energy Carolinas and Duke Energy Progress remote, consolidated evidentiary hearing to be delayed until August 24, 2020.

On August 4, 2020, Duke Energy Carolinas, filed an amended motion for approval of its amended notice to customers, seeking to exercise its statutory right to implement temporary rates subject to refund on or after August 24, 2020. The revenue requirement to be recovered, subject to refund, through the temporary rates is based on and consistent with the base rate component of the Second Partial Settlement with the Public Staff and excludes the items to be litigated noted above. Duke Energy Carolinas will not begin the amortization or implementation of these items until a final order is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Carolinas also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Carolinas on a permanent basis. The NCUC approved the August 4, 2020 amended temporary rates motion on August 6, 2020.

Duke Energy Carolinas expects the NCUC to issue an order on its net rate increase by the end of the year. Duke Energy Carolinas cannot predict the outcome of this matter.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Carolinas filed an application with the PSCSC for a rate increase for retail customers of approximately $168 million.

After hearings in March 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of cancellation of the Lee Nuclear Project, with Duke Energy Carolinas maintaining the Combined Operating License;
- Approval of recovery of $125 million (South Carolina retail portion) of Lee Nuclear Project development costs (including AFUDC through December 2017) over a 12-year period, but denial of a return on the deferred balance of costs;
- Approval of recovery of $96 million of coal ash costs over a five-year period with a return at Duke Energy Carolinas' WACC;
- Denial of recovery of $115 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $66 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $45 million decrease through the EDIT Rider to return EDIT resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with the Average Rate Assumption Method (ARAM) for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a five-year period for the deferred revenues; and
- Approval of a $17 million decrease through the EDIT Rider related to reductions in the North Carolina state income tax rate from 6.9% to 2.5% to be returned over a five-year period.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Carolinas filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Carolinas were prejudiced by unlawful, arbitrary and capricious rulings by the commission on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Carolinas' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Carolinas filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. On November 20, 2019, the South Carolina Energy Users Committee filed a Notice of Appeal and the ORS filed a Notice of Cross Appeal with the Supreme Court of South Carolina. On February 12, 2020, Duke Energy Carolinas and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020, which included the South Carolina Energy User's Committee brief arguing that the PSCSC erred in allowing Duke Energy Carolinas' recovery of costs related to the Lee Nuclear Station. Response briefs were filed on July 6, 2020, and reply briefs are due on August 11, 2020. Based on legal analysis and the filing of the appeal, Duke Energy Carolinas has not recorded an adjustment for its deferred coal ash costs. Duke Energy Carolinas cannot predict the outcome of this matter.

Duke Energy Progress

2017 North Carolina Rate Case

On June 1, 2017, Duke Energy Progress filed an application with the NCUC for a rate increase for retail customers of approximately $477 million, which was subsequently adjusted to $420 million. On November 22, 2017, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On February 23, 2018, the NCUC issued an order approving the stipulation. The Public Staff, the North Carolina Attorney General and the Sierra Club filed notes of appeal to the North Carolina Supreme Court.

On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Progress and Duke Energy Carolinas appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Progress cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On October 30, 2019, Duke Energy Progress filed an application with the NCUC for a net rate increase for retail customers of approximately $464 million, which represented an approximate 12.3% increase in annual base revenues. The gross rate case revenue increase request was $586 million, which was offset by riders of $122 million, primarily an EDIT rider of $120 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Progress seeks to defer and recover incremental Hurricane Dorian storm costs in this proceeding and requests rates be effective no later than September 1, 2020. As a result of the COVID-19 pandemic, on March 24, 2020, the NCUC suspended the procedural schedule and postponed the previously scheduled evidentiary hearing on this matter indefinitely. On April 7, 2020, the NCUC issued an order partially resuming the procedural schedule requiring intervenors to file direct testimony on April 13, 2020. Public Staff filed supplemental direct testimony on April 23, 2020. Duke Energy Progress filed rebuttal testimony on May 4, 2020.

On June 2, 2020, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing;
- Agreement that the Asheville CC project is complete and in service and agreement on the amount to be included in rate base; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Progress, Duke Energy Carolinas and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: 1) a hearing on issues common to both rate cases conducted remotely; 2) a hearing on Duke Energy Carolinas specific rate case issues conducted in person, followed immediately by; 3) a hearing on Duke Energy Progress specific rate case issues conducted in person. On July 27, 2020, Duke Energy Progress filed a joint motion with Duke Energy Carolinas and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff and requesting a postponement of the evidentiary hearing until August 24, 2020. The NCUC granted the joint motion on July 27, 2020.

On July 31, 2020, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $25 million; and
- Settlement on certain grid deferral projects of $0.5 billion and agreement to withdraw Duke Energy Progress' request for deferral of remaining grid projects of $0.5 billion.

The remaining items to be litigated at hearing include recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting and implementation of new depreciation rates. As a result of the additional settlement terms, the NCUC ordered the Duke Energy Progress and Duke Energy Carolinas remote, consolidated evidentiary hearing to be delayed until August 24, 2020.

On August 7, 2020, Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund on or after September 1, 2020. The revenue requirement to be recovered subject to refund through the temporary rates is based on and consistent with the terms of the base rate component of the settlement agreements with the Public Staff and excludes items to be litigated noted above. Duke Energy Progress will not begin the amortization or implementation of these items until a final determination is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Progress also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Progress on a permanent basis.

Duke Energy Progress expects the NCUC to issue an order on its net rate increase by the end of the year. Duke Energy Progress cannot predict the outcome of this matter.

Hurricane Dorian

Hurricane Dorian reached the Carolinas in September 2019 as a Category 2 hurricane making landfall within Duke Energy Progress’ service territory. Total estimated incremental operation and maintenance expenses incurred to repair and restore the system are approximately $165 million with an additional $4 million in capital investments made for restoration efforts. Approximately $139 million and $179 million of the operation and maintenance expenses are deferred in Regulatory assets within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively. A request for an accounting order to defer incremental storm costs associated with Hurricane Dorian was included in Duke Energy Progress' October 30, 2019, general rate case filing with the NCUC. Terms of the June 2, 2020, Agreement and Stipulation of Partial Settlement removed incremental storm costs from the general rate case. A petition seeking to securitize these costs will be filed within 120 days of an NCUC order in the general rate case. Duke Energy Progress cannot predict the outcome of this matter.

On February 7, 2020, a petition was filed with the PSCSC in the 2019 storm deferrals docket requesting deferral of approximately $22 million in operation and maintenance expenses to an existing storm deferral balance previously approved by the PSCSC. The PSCSC voted to approve the request on March 4, 2020, and issued a final order on April 7, 2020. On July 1, 2020, Duke Energy Progress filed a supplemental true up reducing the actual costs to $17 million.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Progress filed an application with the PSCSC for a rate increase for retail customers of approximately $59 million.

After hearings in April 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of recovery of $4 million of coal ash costs over a five-year period with a return at Duke Energy Progress' WACC;
- Denial of recovery of $65 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $17 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $12 million decrease through the EDIT Tax Savings Rider resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with ARAM for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a three-year period for the deferred revenues; and
- Approval of a $12 million increase due to the expiration of EDIT related to reductions in the North Carolina state income tax rate from 6.9% to 2.5%.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Progress filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Progress were prejudiced by unlawful, arbitrary and capricious rulings by the commission on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Progress' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses, but allowing additional litigation-related costs. As a result of the Directive allowing litigation-related costs, customer rates were revised effective July 1, 2019. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Progress filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. The ORS filed a Notice of Cross Appeal on November 20, 2019. On February 12, 2020, Duke Energy Progress and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020. Response briefs were filed on July 6, 2020, and reply briefs are due on August 11, 2020. Based on legal analysis and the filing of the appeal, Duke Energy Progress has not recorded an adjustment for its deferred coal ash costs. Duke Energy Progress cannot predict the outcome of this matter.

Western Carolinas Modernization Plan

Duke Energy Progress retired the 376-MW Asheville coal-fired plant on January 29, 2020, at which time the net book value, including associated ash basin closure costs, of $214 million was transferred from Generation facilities to be retired, net to Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

On December 27, 2019, Asheville Combined Cycle Unit 5 Combustion Turbine and Unit 6 Steam Turbine Generator and the common systems that serve combined cycle units went into commercial operation. Duke Energy Progress placed the Unit 7 Combustion Turbine into commercial operation in simple-cycle mode on January 15, 2020. The Unit 8 Steam Turbine Generator went into commercial operation on April 5, 2020. On June 2, 2020, Duke Energy Progress filed a request with the PSCSC for an accounting order for the deferral of post-in-service costs incurred in connection with the addition of the Asheville combined cycle generating plant. The petition requested the PSCSC issue an accounting order authorizing Duke Energy Progress to defer post-in-service costs including the Asheville combined cycle’s depreciation expense, property taxes, incremental O&M and carrying costs at WACC of approximately $8 million annually. On June 17, 2020, the PSCSC voted to approve the petition and issued its final order on July 6, 2020.

On October 8, 2018, Duke Energy Progress filed an application with the NCUC for a CPCN to construct the Hot Springs Microgrid Solar and Battery Storage Facility, which was approved with certain conditions on May 10, 2019. A hearing to update the NCUC on the status of the project was held on March 5, 2020. Construction began in May 2020 with commercial operation expected to begin in December 2020.

FERC Return on Equity Complaint

On October 11, 2019, North Carolina Eastern Municipal Power Agency (NCEMPA) filed a complaint at the FERC against Duke Energy Progress pursuant to Section 206 of the Federal Power Act (FPA). Duke Energy Progress provides NCEMPA with service under the Full Requirements Power Purchase Agreement (FRPPA). The complaint alleges that the 11% stated return on equity (ROE) component contained in the FRPPA’s demand formula rate is unjust and unreasonable. On July 16, 2020, the FERC set this matter for hearing and settlement judge procedures and established a refund effective date of October 11, 2019. In its order setting the matter for settlement, the FERC allowed for variation to the base transmission-related ROE methodology developed in Order No. 569-A, through the introduction of “specific facts and circumstances” involving the parties to this case. It is Duke Energy Progress’ view that, in consideration of the specific facts and circumstances of risks under the provisions of the FRPPA, the stated 11% ROE applied to NCEMPA’s metered billing demand is just and reasonable. Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Florida

COVID-19 Filings

On March 1, 2020, Governor Ron DeSantis issued Executive Order No. 20-51 directing the State Health Officer of Florida to declare a public health emergency in Florida related to the COVID-19 pandemic. The governor then issued a second Executive Order No. 20-52 on March 9, 2020, in which he declared a state of emergency in Florida and directed the Director of the Division of Emergency Management to implement the state’s Comprehensive Emergency Management Plan. The governor issued additional Executive Orders – Nos. 2020-68, 2020-69, 2020-71, 2020-72 and 2020-83 – in response to the ongoing health care emergency that, among other things, suspended the in-person public meeting requirements for state agencies and local governments and directed the state surgeon general to issue public health advisories to limit potential exposure to COVID-19, advising against gatherings of 10 or more persons. On March 19, 2020, Duke Energy Florida filed a request to modify its tariff to allow it to waive late fees for customers, and on April 6, 2020, the FPSC issued an order approving the request. Duke Energy Florida had already voluntarily waived reconnect fees and credit card fees, and is not disconnecting customers for nonpayment. On April 2, 2020, Duke Energy Florida filed a petition with the FPSC to accelerate a $78 million fuel cost refund to customers in the month of May 2020. Typically, the refund would be made over the course of 2021. The FPSC approved the petition on April 28, 2020.

Storm Restoration Cost Recovery

Duke Energy Florida filed a petition with the FPSC on April 30, 2019, to recover $223 million of estimated retail incremental storm restoration costs for Hurricane Michael, consistent with the provisions in the 2017 Settlement, and the FPSC approved the petition on June 11, 2019. The FPSC also approved allowing Duke Energy Florida to use the tax savings resulting from the Tax Act to recover these storm costs in lieu of implementing a storm surcharge. Approved storm costs are currently expected to be fully recovered by approximately year-end 2021. On November 22, 2019, Duke Energy Florida filed a petition for approval of actual retail recoverable storm restoration costs related to Hurricane Michael in the amount of $191 million plus interest. On May 19, 2020, Duke Energy Florida filed a supplemental true up reducing the actual retail recoverable storm restoration costs related to Hurricane Michael by approximately $3 million, resulting in a total request to recover $188 million actual retail recoverable storm restoration costs, plus interest. An Order Establishing Procedure was issued on January 30, 2020, and hearings are scheduled to begin September 15, 2020. Approximately $163 million and $204 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Florida filed a petition with the FPSC on December 19, 2019, to recover $169 million of estimated retail incremental storm restoration costs for Hurricane Dorian, consistent with the provisions in the 2017 Settlement and the FPSC approved the petition on February 24, 2020. Approved storm costs are currently expected to be recovered over a 12-month period with rates effective in March 2020 and subject to true up. The final actual amount will be filed later in 2020 and the FPSC will hold a hearing to determine the final amount of incremental costs. Approximately $95 million and $167 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively, representing recoverable costs under the FPSC's storm rule and Duke Energy Florida's OATT formula rates. Duke Energy Florida cannot predict the outcome of this matter.

Clean Energy Connection

On July 1, 2020, Duke Energy Florida petitioned the FPSC for approval of a voluntary solar program. The program consists of 10 new solar generating facilities with combined capacity of approximately 750 MW. The program allows participants to support cost effective solar development in Florida. Participants will pay a subscription fee based on per kilowatt-subscriptions and receive a credit on their bill based on the generation associated with their portion of the solar portfolio. The estimated cost of the 10 new solar generation facilities is approximately $1 billion over the next four years, and this investment will be included in base rates offset by the revenue from the subscription fees. The credits will be included for recovery in the fuel cost recovery clause. Duke Energy Florida cannot predict the outcome of this matter.

Crystal River Unit 3 Accelerated Decommissioning Filing

On May 29, 2019, Duke Energy Florida entered into a Decommissioning Services Agreement for the accelerated decommissioning of the Crystal River Unit 3 nuclear power station located in Citrus County, Florida, with ADP CR3, LLC and ADP SF1, LLC, each of which is a wholly owned subsidiary of Accelerated Decommissioning Partners, LLC, a joint venture between NorthStar Group Services, Inc. and Orano USA LLC. Closing of this agreement is contingent upon the approval of the U.S. Nuclear Regulatory Commission (NRC), which was received on April 1, 2020, and FPSC. If approved, the decommissioning will be accelerated starting in 2020 and continuing through 2027, rather than the expected time frame under SAFSTOR of starting in 2067 and ending in 2074. Duke Energy Florida expects that the assets of the Nuclear Decommissioning Trust Fund will be sufficient to cover the contract price. On July 10, 2019, Duke Energy Florida petitioned the FPSC for approval of the agreement. The FPSC held the hearing on July 7-9, 2020, and is expected to vote on the petition at its August 18 Agenda Conference. Duke Energy Florida cannot predict the outcome of this matter.

Storm Protection Plan

On April 10, 2020, Duke Energy Florida filed its initial Storm Protection Plan (SPP) with the FPSC. The SPP outlines storm protection programs over a 10-year planning period intended to enhance the existing infrastructure for the purpose of reducing restoration costs and reducing outage times associated with extreme weather conditions therefore improving overall service reliability. The FPSC will hold a hearing to determine whether to approve, deny, or approve the SPP with modifications beginning on August 10, 2020. On July 31, 2020, Duke Energy Florida entered into a settlement with certain intervenors in support of this filing. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Ohio

Duke Energy Ohio COVID-19 Filing

In response to the COVID-19 pandemic, on March 9, 2020, Governor Mike DeWine issued Executive Order No. 2020-01D declaring a state of emergency in the state of Ohio. The PUCO issued an order directing utilities to cease disconnections for nonpayment and waive late payment and reconnection fees and to minimize direct customer contact. The PUCO also directed utilities to maintain flexible payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers, if necessary. In response, Duke Energy Ohio has ceased all disconnections except for safety-related concerns and is waiving late payment and reconnection fees. On March 19, 2020, Duke Energy Ohio filed its compliance plan with the PUCO and sought waiver of several regulations to minimize direct customer contact. On May 4, 2020, Duke Energy Ohio filed a motion to suspend payment rules to enable proactive outreach to residential customers offering additional options for managing their utility bills. PUCO found the proposal to address the state of emergency and the accompanying waivers reasonable and directed Duke Energy Ohio to work with the PUCO Staff on a comprehensive plan for resumption of activities and operations, to be filed 45 days before resumption of activities. The transition plan was filed on June 26, 2020, and approved by the PUCO on July 29, 2020.

On April 16, 2020, Duke Energy Ohio filed an application for a Reasonable Arrangement to temporarily lower the minimum bill for demand-metered commercial and industrial customers. On June 17, 2020, the PUCO denied Duke Energy Ohio's application for a reasonable arrangement and ordered the Duke Energy Ohio to work with the PUCO Staff on payment arrangements for impacted nonresidential customers.

On May 11, 2020, Duke Energy Ohio filed with the PUCO a request seeking deferral of incremental costs incurred, as well as specific miscellaneous lost revenues using existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application. The commission denied the accrual of carrying costs and ordered Duke Energy Ohio to also track potential savings experienced as a result of COVID-19.

Duke Energy Kentucky COVID-19

In response to the COVID-19 pandemic, on March 6, 2020, Governor Andy Beshear issued Executive Order No. 2020-215 declaring a state of emergency in the commonwealth of Kentucky. The KPSC issued an order directing utilities to cease disconnections for nonpayment and waive late payment. The KPSC also directed utilities to maintain flex ble payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers if necessary. In response, Duke Energy Kentucky has ceased all disconnections except for safety-related concerns and is waiving late payment and reconnection fees. On June 23, 2020, the KPSC issued data requests to all jurisdictional utilities seeking information on customer bill impacts, arrearages, bad debt and incremental costs and savings due to COVID-19. Responses were filed on July 21, 2020. Duke Energy Kentucky cannot predict the outcome of this matter.

2017 Electric Security Plan Filing

On June 1, 2017, Duke Energy Ohio filed with the PUCO a request for a standard service offer in the form of an ESP. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation and Recommendation (Stipulation) with the PUCO resolving that the term of the ESP would be from June 1, 2018, to May 31, 2025, and included continuation of market-based customer rates through competitive procurement processes for generation, continuation and expansion of existing rider mechanisms and approved new rider mechanisms relating to costs incurred to enhance the customer experience and transform the grid and a service reliability rider for vegetation management. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the Ohio Consumers' Counsel (OCC), respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

Electric Base Rate Case

Duke Energy Ohio filed with the PUCO an electric distribution base rate case application and supporting testimony in March 2017. Duke Energy Ohio requested an estimated annual increase of approximately $15 million and a return on equity of 10.4%. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed the Stipulation with the PUCO including a $19 million decrease in annual base distr bution revenue with a return on equity unchanged from the current rate of 9.84% based upon a capital structure of 50.75% equity and 49.25% debt. Upon approval of new rates, Duke Energy Ohio's rider for recovering its initial SmartGrid implementation ended as these costs would be recovered through base rates. The Stipulation also renewed 14 existing riders, some of which were included in the company's ESP, and added two new riders including the Enhanced Service Reliability Rider to recover vegetation management costs not included in base rates, up to $10 million per year (operation and maintenance only) and the Power Future Initiatives Rider (formerly PowerForward Rider) to recover costs incurred to enhance the customer experience and further transform the grid (operation and maintenance and capital). In addition to the changes in revenue attributable to the Stipulation, Duke Energy Ohio's capital-related riders, including the Distribution Capital Investments Rider, began to reflect the lower federal income tax rate associated with the Tax Act with updates to customers' bills beginning April 1, 2018. This change reduced electric revenue by approximately $20 million on an annualized basis. On December 19, 2018, the PUCO approved the Stipulation without material modification. New base rates were implemented effective January 2, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC, respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

Ohio Valley Electric Corporation

On March 31, 2017, Duke Energy Ohio filed for approval to adjust its existing Rider PSR to pass through net costs related to its contractual entitlement to capacity and energy from the generating assets owned by OVEC. Duke Energy Ohio sought deferral authority for net costs incurred from April 1, 2017, until the new rates under Rider PSR were put into effect. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation with the PUCO resolving numerous issues including those related to Rider PSR. The Stipulation activated Rider PSR for recovery of net costs incurred from January 1, 2018, through May 2025. On December 19, 2018, the PUCO approved the Stipulation without material modification. The PSR rider became effective April 1, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

On July 23, 2019, House Bill 6 (HB6) was signed into law that became effective January 1, 2020. Among other things, the bill allows for funding of two nuclear generating facilities located in Northern Ohio through a charge on utility bills owned by Energy Harbor (f/k/a FirstEnergy Solutions), repeal of energy efficiency mandates, and recovery of prudently incurred costs, net of any revenues, for Ohio investor-owned utilities that are participants under the OVEC power agreement. The recovery shall be through a non-bypassable rider that is to replace any existing recovery mechanism approved by the PUCO and will remain in place through 2030. The amounts recoverable from customers will be subject to an annual cap, with incremental costs that exceed such cap eligible for deferral and recovery subject to review. See Note 13 for additional discussion of Duke Energy Ohio's ownership interest in OVEC. In July 2020, legislation to repeal HB 6 has been proposed in both the Ohio House and Senate. Duke Energy Ohio cannot predict the outcome of this matter.

Energy Efficiency Cost Recovery

On March 28, 2014, Duke Energy Ohio filed an application for recovery of program costs, lost distr bution revenue and performance incentives related to its energy efficiency and peak demand reduction programs. The PUCO approved Duke Energy Ohio's application but found that Duke Energy Ohio was not permitted to use banked energy savings from previous years in order to calculate the amount of allowed incentive. This conclusion represented a change to the cost recovery mechanism that had been agreed upon by intervenors and approved by the PUCO in previous cases. The PUCO granted the applications for rehearing filed by Duke Energy Ohio and an intervenor. On January 6, 2016, Duke Energy Ohio and the PUCO Staff entered into a stipulation, pending the PUCO's approval, to resolve issues related to performance incentives and the PUCO Staff audit of 2013 costs, among other issues. In December 2015, based upon the stipulation, Duke Energy Ohio re-established approximately $20 million of the revenues that had been previously reversed. On October 26, 2016, the PUCO issued an order approving the stipulation without modification. On February 26, 2020, the PUCO issued an order directing utilities to wind down their demand-side management programs by September 30, 2020, and to terminate the programs by December 31, 2020, in response to changes in Ohio law that eliminated Ohio's energy efficiency mandates. On March 27, 2020, Duke Energy Ohio filed an Application for Rehearing seeking clarification on the final true up and reconciliation process after 2020. On April 22, 2020, the PUCO granted rehearing for further consideration.

On June 8, 2020, Duke Energy Ohio filed an application to implement a voluntary energy efficiency program portfolio to commence on January 1, 2021. The application proposes a mechanism for recovery of program costs, lost margins and a shared savings incentive mechanism similar to those previously approved by the PUCO. On June 17, 2020, the PUCO, on its own motion, struck Duke Energy Ohio's proposal to include a shared savings mechanism in its plan finding such incentives are not permissible or supportable under Ohio law. On June 26, 2020, Duke Energy Ohio withdrew its application.

Natural Gas Pipeline Extension

Duke Energy Ohio is proposing to install a new natural gas pipeline (the Central Corridor Project) in its Ohio service territory to increase system reliability and enable the retirement of older infrastructure. Duke Energy Ohio currently estimates the pipeline development costs and construction activities will range from $163 million to $245 million in direct costs (excluding overheads and AFUDC) and that construction of the pipeline extension is expected to be completed before the 2021/2022 winter season. An evidentiary hearing for a Certificate of Environmental Compat bility and Public Need concluded on April 11, 2019. Briefs were filed on May 13, 2019, and reply briefs were filed on June 10, 2019. On November 21, 2019, the OPSB approved Duke Energy Ohio's application subject to 41 conditions on construction. Applications for rehearing were filed by several stakeholders on December 23, 2019, arguing that the OPSB approval was incorrect. On February 20, 2020, the OPSB denied the rehearing requests. On April 15, 2020, Joint Appellants filed a notice of appeal at the Supreme Court of Ohio of the OPSB's decision approving Duke Energy Ohio's Central Corridor application. On June 4, 2020, the OPSB filed a motion to dismiss claims raised by one of the Joint Appellants and to suspend the briefing schedule while the court considers the motion to dismiss. On August 5, 2020, the Supreme Court of Ohio dismissed one of the Joint Appellants from the appeal and established a new briefing schedule, with appellants' briefs due in 20 days. Duke Energy Ohio cannot predict the outcome of this matter.

MGP Cost Recovery

As part of its 2012 natural gas base rate case, Duke Energy Ohio has approval to defer and recover costs related to environmental remediation at two sites (East End and West End) that housed former MGP operations. Duke Energy Ohio has made annual applications for recovery of these deferred costs. Duke Energy Ohio has collected approximately $55 million in environmental remediation costs between 2009 through 2012 through Rider MGP, which is currently suspended. Duke Energy Ohio has made annual applications with the PUCO to recover its incremental remediation costs consistent with the PUCO's directive in Duke Energy Ohio's 2012 natural gas rate case. To date, the PUCO has not ruled on Duke Energy Ohio's annual applications for the calendar years 2013 through 2017. On September 28, 2018, the staff of the PUCO issued a report recommending a disallowance of approximately $12 million of the $26 million in MGP remediation costs incurred between 2013 through 2017 that staff believes are not eligible for recovery. Staff interprets the PUCO's 2012 Order granting Duke Energy Ohio recovery of MGP remediation as limiting the recovery to work directly on the East End and West End sites. On October 30, 2018, Duke Energy Ohio filed reply comments objecting to the staff's recommendations and explaining, among other things, the obligation Duke Energy Ohio has under Ohio law to remediate all areas impacted by the former MGPs and not just physical property that housed the former plants and equipment. On March 29, 2019, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2018 seeking recovery of approximately $20 million in remediation costs. On July 12, 2019, the staff recommended a disallowance of approximately $11 million for work that staff believes occurred in areas not authorized for recovery. Additionally, staff recommended that any discussion pertaining to Duke Energy Ohio's recovery of ongoing MGP costs should be directly tied to or netted against insurance proceeds collected by Duke Energy Ohio. An evidentiary hearing concluded on November 21, 2019. Initial briefs were filed on January 17, 2020, and reply briefs were filed on February 14, 2020. Duke Energy Ohio cannot predict the outcome of this matter.

On March 31, 2020, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2019 seeking recovery of approximately $39 million in remediation costs incurred during 2019. On July 23, 2020, the staff recommended a disallowance of approximately $4 million for work the staff believes occurred in areas not authorized for recovery. Additionally, the staff recommended insurance proceeds, net of litigation costs and attorney fees, should be reimbursed to customers and not be held by Duke Energy Ohio until all investigation and remediation is complete. Duke Energy Ohio cannot predict the outcome of this matter.

The 2012 PUCO order also contained conditional deadlines for completing the MGP environmental investigation and the deferral of remediation costs at the MGP sites. Subsequent to the order, the deadline was extended to December 31, 2019. On May 10, 2019, Duke Energy Ohio filed an application requesting a continuation of its existing deferral authority for MGP remediation and investigation that must occur after December 31, 2019. On September 13, 2019, intervenor comments were filed opposing Duke Energy Ohio's request for continuation of existing deferral authority and on October 2, 2019, Duke Energy Ohio filed reply comments. Duke Energy Ohio cannot predict the outcome of this matter.

Duke Energy Kentucky Electric Base Rate Case

On September 3, 2019, Duke Energy Kentucky filed a rate case with the KPSC requesting an increase in electric base rates of approximately $46 million. On January 31, 2020, Duke Energy Kentucky filed rebuttal testimony updating its rate increase calculations to approximately $44 million. Hearings concluded on February 20, 2020, and briefing was completed March 20, 2020. On April 27, 2020, the KPSC issued its decision approving a $24 million increase for Duke Energy Kentucky with a 9.25% return on equity. The KPSC denied Duke Energy Kentucky's major storm deferral mechanism and EV and battery storage pilots. The KPSC approved Duke Energy Kentucky's Green Source Advantage tariff. New customer rates were effective on May 1, 2020. On May 18, 2020, Duke Energy Kentucky filed its motion for rehearing and on June 4, 2020, the motion was granted in part and denied in part by the KPSC. On August 6, 2020, Duke Energy Kentucky submitted a letter to the commission submitting the case for decision without hearing. On August 6, 2020, the Kentucky Attorney General also filed a letter requesting to submit the rehearing case for decision without hearing. The Attorney General's letter also stated that the commission's reduction to the company's forecasted capital in its initial order was overstated and should be corrected, resulting in an approximate $5 million increase in the company's revenue requirement. Duke Energy Kentucky cannot predict the outcome of this matter.

Duke Energy Indiana

COVID-19

In response to the COVID-19 pandemic, on March 6, 2020, Governor Eric Holcomb issued Executive Order No. 20-02, which by law expired in 30 days unless extended, declaring a public health disaster emergency in the state of Indiana. Subsequently, the governor issued Executive Orders Nos. 20-17, 20-25, 20-30 and 20-34, each renewing the public health disaster emergency declaration for an additional 30 days, which is currently extended through September 2, 2020. All other Executive Orders issued since March 6, 2020, (Nos. 20-04 – 20-16) were renewed for the same 30-day period, provided they were supplements to Executive Order No. 20-02. Executive Order No. 20-05 was issued on March 19, 2020, requiring utilities in the state to suspend disconnections of utility service. Duke Energy Indiana had already voluntarily suspended all disconnections and is waiving late payment fees and check return fees. The utility is also waiving credit card fees for residential customers.

On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs and revenue reductions associated with the COVID-19 pandemic. The utilities requested initial deferral approval in July 2020, with individual subdockets for each utility to be established for consideration of utility-specific cost and revenue impacts, cost recovery timing and customer payment plans. On June 29, 2020, the IURC issued an order in Phase 1 wherein it extended the disconnection moratorium for jurisdictional utilities until August 14, 2020, along with requiring six month payment arrangements, waiver of late fees, reconnection fees, convenience fees and deposits. The IURC permitted jurisdictional utilities to use regulatory accounting for any impacts associated with the prohibition on utility disconnections, waiver or exclusion of certain utility fees (i.e., late fees, convenience fees, deposits, and reconnection fees), the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollect ble and incremental bad debt expense. The IURC did not permit recovery of lost revenues due to load reduction or carrying costs. In Phase 2 filings, individual utilities may choose to request regulatory accounting for other COVID-19 related operation and maintenance costs wherein evidence of the impact of any costs or offsetting savings can be presented and considered in an evidentiary hearing. Duke Energy Indiana cannot predict the outcome of this matter.

2019 Indiana Rate Case

On July 2, 2019, Duke Energy Indiana filed a general rate case with the IURC for a rate increase for retail customers of approximately $395 million. The rebuttal case, filed on December 4, 2019, updated the requested revenue requirement to result in a 15.6% or $396 million average retail rate increase, including the impacts of the Utility Receipts Tax. Hearings concluded on February 7, 2020. On June 29, 2020, the IURC issued the order in the rate case approving a revenue increase of $146 million before certain adjustments and ratemaking refinements. The order provided for an overall cost of capital of 5.7% based on a 9.7% return on equity and a 53% equity component of the capital structure, and approved Duke Energy Indiana's requested forecasted rate base of $10.2 billion as of December 31, 2020, including the Edwardsport IGCC Plant. The IURC reduced Duke Energy Indiana's request by slightly more than $200 million, when accounting for the utility receipts tax and other adjustments. Approximately 50% of the reduction is due to a prospective change in depreciation and use of regulatory asset for the end-of-life inventory at retired generating plants, approximately 20% is due to the approved 9.7% return on equity versus requested 10.4% and approximately 20% is related to miscellaneous earnings neutral adjustments. The rates were effective July 30, 2020. Several groups filed notices of appeal of the IURC order on July 29, 2020. Duke Energy Indiana cannot predict the outcome of this matter.

2020 Indiana Coal Ash Recovery Case

In Duke Energy Indiana's rate case, the IURC approved coal ash basin closure costs expended through 2018 including financing costs as a regulatory asset and included in rate base. The IURC opened a subdocket to deal with the post-2018 coal ash related expenditures. Duke Energy Indiana filed testimony on April 15, 2020, in the coal ash subdocket requesting recovery for the post-2018 coal ash basin closure costs for plans that have been approved by the Indiana Department of Environmental Management as well as continuing deferral, with carrying costs, on the balance. An evidentiary hearing is scheduled to begin on September 14, 2020, and an order is expected in the first quarter of 2021. Duke Energy Indiana cannot predict the outcome of this matter.

Piedmont

COVID-19 Filings

North Carolina

On March 10, 2020, Governor Roy Cooper issued Executive Order No. 116 declaring a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued on order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency (as defined by Executive Order No. 116) and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Piedmont filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted Piedmont's request on March 20, 2020.

On March 31, 2020, the governor issued Executive Order No. 124, which, in addition to requiring the steps in the NCUC order noted above, stated that nothing in Executive Order No. 124 shall relieve a customer of its obligation to pay bills for receipt of utility services provided. Executive Order No. 124 remains in effect for 60 days unless otherwise rescinded or replaced with a superseding Executive Order. On May 30, 2020, the governor issued Executive Order No. 142, which extended effective period for Executive Order No. 124 to July 29, 2020. Executive Order No. 142 was not extended.

On July 10, 2020, Piedmont filed a petition with the NCUC for clarification regarding when they may begin working with customers on establishing payment arrangements for arrears accumulated since March 13, 2020. On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: 1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; 2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; 3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and 4) no sooner than September 1, 2020, the collection of past due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions. Piedmont cannot predict the outcome of this matter.

351

South Carolina

On March 13, 2020, Governor Henry McMaster issued Executive Order No. 2020-08 declaring a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for poss ble reporting to the PSCSC.

On April 30, 2020, the ORS requested the PSCSC grant a waiver of the applicable regulations to allow customers the flexibility to obtain deferred payment plans longer than six months for past-due amounts. On May 5, 2020, Piedmont filed responsive comments stating that while utility bills will remain due, Piedmont does not plan to immediately reinstitute disconnection upon the expiration of the state of emergency and intends to work through a potential grace period as economic recovery begins. Piedmont also concurred with the observation of the ORS that reduced usage is impacting the fixed-cost recovery and revenue assumptions included in rates. Those costs include not only ongoing operational and financing costs necessary to serve customers, but also the borrowings necessary to support extended payment arrangements that will be an important part of emerging from the COVID-19 pandemic. Piedmont will continue to track such costs, lost revenues and potential cost savings for future evaluation by the PSCSC.

Additionally, on May 8, 2020, the ORS filed a motion for the PSCSC to solicit comments from utilities and interested stakeholders regarding measures to be taken to mitigate impacts of COVID-19 on utility customers and require recordkeeping. In a detailed motion, the ORS specifically asked the PSCSC to: (1) solicit input from utilities regarding the temporary mitigation measures to address COVID-19; (2) request utilities to inform the PSCSC of the plans utilities have to return to normalized operations; (3) require utilities to track revenue impacts, incremental costs and savings related to COVID-19 and file the findings with the PSCSC on a quarterly basis; and (4) include any other matters that the PSCSC believes should be addressed. On May 14, 2020, the PSCSC adopted the ORS' motion.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Piedmont filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. Piedmont cannot predict the outcome of this matter.

Tennessee

On March 12, 2020, Governor Bill Lee issued Executive Order No. 14 declaring a state of emergency due to the COVID-19 pandemic. In an effort to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 20, 2020, Piedmont filed a request with the TPUC seeking authorization to waive, effective March 21, 2020: (1) any late payment charges incurred by a residential or nonresidential customer; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; and (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit. The TPUC granted Piedmont's request by Order issued March 31,2020. The Order also stated that customers were not relieved of their obligation to pay for utility services received.

2020 Tennessee Rate Case

On July 2, 2020, Piedmont filed an application with the TPUC, its first general rate case in Tennessee in nine years, for a rate increase for retail customers of approximately $30 million, which represents an approximate 15% increase in annual revenues. The rate increase is driven by significant infrastructure upgrade investments since its previous rate case. Approximately half of the plant additions being added to rate base are categories of capital investment not covered under the IMR mechanism, which was approved in 2013. An evidentiary hearing is expected to be scheduled for fall 2020, and a decision and revised customer rates are expected to become effective January 1, 2021. Piedmont cannot predict the outcome of this matter.

OTHER REGULATORY MATTERS

Atlantic Coast Pipeline, LLC

On September 2, 2014, Duke Energy, Dominion Energy, Inc. (Dominion), Piedmont and Southern Company Gas announced the formation of Atlantic Coast Pipeline, LLC (ACP) to build and own the proposed Atlantic Coast Pipeline (ACP pipeline), an approximately 600-mile interstate natural gas pipeline running from West Virginia to North Carolina. The ACP pipeline was designed to meet, in part, the needs identified by Duke Energy Carolinas, Duke Energy Progress and Piedmont. Dominion would have been responsible for building and operating the ACP pipeline and holds a leading ownership percentage in ACP of 53%, following the purchase in March 2020 of Southern Company Gas' 5% ownership interest. Duke Energy owns a 47% interest, which is accounted for as an equity method investment through its Gas Utilities and Infrastructure segment.

On April 15, 2020, the United States District Court for the District of Montana granted partial summary judgment in favor of the plaintiffs in Northern Plains Resource Council v. U.S. Army Corps of Engineers (USACE) (Northern Plains), vacating USACE's Nationwide Permit 12 (NWP 12) and remanding it to USACE for consultation under the Endangered Species Act (ESA) of 1973. In Northern Plains, the court ruled that NWP 12 was unlawful because USACE did not consult under the ESA with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service prior to NWP 12's reissuance in 2017. Because NWP 12 has been vacated and its application enjoined, USACE currently has suspended verification of any new or pending applications under NWP 12 until further court action clarifies the situation.

On May 28, 2020, the U.S. Court of Appeals for the Ninth Circuit issued a ruling that limited the NWP 12 vacatur to energy infrastructure projects. In July 2020, the Supreme Court of the United States issued an order allowing other new oil and gas pipeline projects to use the NWP 12 process pending appeal to the U.S. Court of Appeals for the Ninth Circuit; however, that did not decrease the uncertainty associated with an eventual ruling. Together, these rulings indicated that the timeline to reinstate the necessary water crossing permits for ACP would likely cause further delays and cost increases.

On July 5, 2020, Dominion announced a sale of substantially all of its gas transmission and storage segment assets, operations core to the ACP pipeline project.

As a result of the uncertainty created by the NWP 12 rulings, the potential impact on the cost and schedule for the project, the ongoing legal challenges and the risk of additional legal challenges and delays through the construction period and Dominion's decision to sell substantially all of its gas transmission and storage segment assets, Duke Energy's Board of Directors and management decided that it was not prudent to continue to invest in the project. On July 5, 2020, Duke Energy and Dominion announced the cancellation of the ACP pipeline.

As a result, Duke Energy recorded a pretax charge to earnings of approximately $2.0 billion for the three months and six months ended June 30, 2020, within Equity in (losses) earnings of unconsolidated affiliates on the Duke Energy Condensed Consolidated Statements of Operations. The tax benefit associated with this abandonment was $374 million and is recorded in Income Tax (Benefit) Expense on the Duke Energy Condensed Consolidated Statements of Operations. Additional charges of less than $100 million are expected to be recorded within the next 12 months as ACP incurs obligations to exit operations.

As part of the pretax charge to earnings of approximately $2.0 billion, Duke Energy established a $920 million current liability related to the abandonment of ACP within Current Liabilities in the Gas Utilities and Infrastructure segment. The liability represents Duke Energy's obligation of approximately $860 million to fund ACP's outstanding debt and approximately $60 million to satisfy ARO requirements to restore construction sites.

See Notes 1, 4 and 11 for additional information regarding this transaction.

Potential Coal Plant Retirements

The Subsidiary Registrants periodically file integrated resource plans (IRPs) with their state regulatory commissions. The IRPs provide a view of forecasted energy needs over a long term (10 to 20 years) and options being considered to meet those needs. IRPs filed by the Subsidiary Registrants included planning assumptions to potentially retire certain coal-fired generating facilities in North Carolina and Indiana earlier than their current estimated useful lives. Duke Energy continues to evaluate the potential need to retire these coal-fired generating facilities earlier than the current estimated useful lives and plans to seek regulatory recovery for amounts that would not be otherwise recovered when any of these assets are retired.

The table below contains the net carrying value of generating facilities planned for retirement or included in recent IRPs as evaluated for potential retirement. Dollar amounts in the table below are included in Net property, plant and equipment on the Condensed Consolidated Balance Sheets as of June 30, 2020, and exclude capitalized asset retirement costs.

	Capacity (in MW)	Remaining Net Book Value (in millions)
Duke Energy Carolinas		
Allen Steam Station Units 1-3[(a)]	**585**	**$ 145**
Duke Energy Indiana		
Gallagher Units 2 and 4[(b)]	**280**	**116**
Gibson Units 1-5[(c)]	**3,132**	**1,690**
Cayuga Units 1-2[(c)]	**1,005**	**953**
Total Duke Energy	**5,002**	**$ 2,904**

(a) Duke Energy Carolinas will retire Allen Steam Station units 1 through 3 by December 31, 2024, as part of the resolution of a lawsuit involving alleged New Source Review violations.

(b) Duke Energy Indiana committed to either retire or stop burning coal at Gallagher units 2 and 4 by December 31, 2022, as part of the 2016 settlement of Edwardsport IGCC matters.

(c) On July 1, 2019, Duke Energy Indiana filed its 2018 IRP with the IURC. The 2018 IRP included scenarios evaluating the potential retirement of coal-fired generating units at Gibson and Cayuga. The rate case filed July 2, 2019, included proposed depreciation rates reflecting retirement dates from 2026 to 2038. These updated retirement dates were approved by the IURC as part of the rate case order issued on June 29, 2020.

353

Duke Energy continues to evaluate the potential need to retire generating facilities earlier than the current estimated useful lives, and plans to seek regulatory recovery, as necessary, for amounts that would not be otherwise recovered when any of these assets are retired. However, such recovery, including recovery of carrying costs on remaining book values, could be subject to future approvals and therefore cannot be assured.

Duke Energy Carolinas and Duke Energy Progress are evaluating the potential for coal-fired generating unit retirements with a net carrying value of approximately $693 million and $1.2 billion, respectively, included in Net property, plant and equipment on the Condensed Consolidated Balance Sheets as of June 30, 2020.

4. COMMITMENTS AND CONTINGENCIES

ENVIRONMENTAL

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time, imposing new obligations on the Duke Energy Registrants. The following environmental matters impact all Duke Energy Registrants.

Remediation Activities

In addition to AROs recorded as a result of various environmental regulations, the Duke Energy Registrants are responsible for environmental remediation at various sites. These include certain properties that are part of ongoing operations and sites formerly owned or used by Duke Energy entities. These sites are in various stages of investigation, remediation and monitoring. Managed in conjunction with relevant federal, state and local agencies, remediation activities vary based upon site conditions and location, remediation requirements, complexity and sharing of responsibility. If remediation activities involve joint and several liability provisions, strict liability, or cost recovery or contr bution actions, the Duke Energy Registrants could potentially be held responsible for environmental impacts caused by other potentially responsible parties and may also benefit from insurance policies or contractual indemnities that cover some or all cleanup costs. Liabilities are recorded when losses become probable and are reasonably estimable. The total costs that may be incurred cannot be estimated because the extent of environmental impact, allocation among potentially responsible parties, remediation alternatives and/or regulatory decisions have not yet been determined at all sites. Additional costs associated with remediation activities are l kely to be incurred in the future and could be significant. Costs are typically expensed as Operation, maintenance and other on the Condensed Consolidated Statements of Operations unless regulatory recovery of the costs is deemed probable.

The following table contains information regarding reserves for probable and estimable costs related to the various environmental sites. These reserves are recorded in Accounts Payable within Current Liabilities and Other within Other Noncurrent Liabilities on the Condensed Consolidated Balance Sheets.

(in millions)	June 30, 2020	December 31, 2019
Reserves for Environmental Remediation		
Duke Energy	**$ 55**	$ 58
Duke Energy Carolinas	**10**	11
Progress Energy	**14**	16
Duke Energy Progress	**5**	4
Duke Energy Florida	**8**	9
Duke Energy Ohio	**19**	19
Duke Energy Indiana	**5**	4
Piedmont	**7**	8

Additional losses in excess of recorded reserves that could be incurred for the stages of investigation, remediation and monitoring for environmental sites that have been evaluated at this time are not material except as presented in the table below.

(in millions)	
Duke Energy	$ 59
Duke Energy Carolinas	11
Duke Energy Ohio	42

LITIGATION

Duke Energy Carolinas and Duke Energy Progress

Coal Ash Insurance Coverage Litigation

In March 2017, Duke Energy Carolinas and Duke Energy Progress filed a civil action in North Carolina Business Court against various insurance providers. The lawsuit seeks payment for coal ash-related liabilities covered by third-party liability insurance policies. The insurance policies were issued between 1971 and 1986 and provide third-party liability insurance for property damage. The civil action seeks damages for breach of contract and indemnification for costs arising from the Coal Ash Act and the EPA CCR rule at 15 coal-fired plants in North Carolina and South Carolina. In February and March 2020, the court heard arguments on numerous cross motions filed by the parties to seek legal determinations concerning several insurance related defenses raised by the insurance providers. On June 5, 2020, the court issued four rulings in favor of Duke Energy's legal positions in the coal ash recovery litigation proceedings. Due to COVID-19, the court has issued a new scheduling order and the trial is now scheduled for January 2022. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

Asbestos-related Injuries and Damages Claims

Duke Energy Carolinas has experienced numerous claims for indemnification and medical cost reimbursement related to asbestos exposure. These claims relate to damages for bodily injuries alleged to have arisen from exposure to or use of asbestos in connection with construction and maintenance activities conducted on its electric generation plants prior to 1985. As of June 30, 2020, there were 118 asserted claims for non-malignant cases with cumulative relief sought of up to $27 million, and 59 asserted claims for malignant cases with cumulative relief sought of up to $20 million. Based on Duke Energy Carolinas' experience, it is expected that the ultimate resolution of most of these claims likely will be less than the amount claimed.

Duke Energy Carolinas has recognized asbestos-related reserves of $590 million at June 30, 2020, and $604 million at December 31, 2019. These reserves are classified in Other within Other Noncurrent Liabilities and Other within Current Liabilities on the Condensed Consolidated Balance Sheets. These reserves are based upon Duke Energy Carolinas' best estimate for current and future asbestos claims through 2039 and are recorded on an undiscounted basis. In light of the uncertainties inherent in a longer-term forecast, management does not believe they can reasonably estimate the indemnity and medical costs that might be incurred after 2039 related to such potential claims. It is possible Duke Energy Carolinas may incur asbestos liabilities in excess of the recorded reserves.

Duke Energy Carolinas has third-party insurance to cover certain losses related to asbestos-related injuries and damages above an aggregate self-insured retention. Duke Energy Carolinas' cumulative payments began to exceed the self-insured retention in 2008. Future payments up to the policy limit will be reimbursed by the third-party insurance carrier. The insurance policy limit for potential future insurance recoveries indemnification and medical cost claim payments is $747 million in excess of the self-insured retention. Receivables for insurance recoveries were $742 million at June 30, 2020, and December 31, 2019. These amounts are classified in Other within Other Noncurrent Assets and Receivables within Current Assets on the Condensed Consolidated Balance Sheets. Duke Energy Carolinas is not aware of any uncertainties regarding the legal sufficiency of insurance claims. Duke Energy Carolinas believes the insurance recovery asset is probable of recovery as the insurance carrier continues to have a strong financial strength rating.

Duke Energy Progress and Duke Energy Florida

Spent Nuclear Fuel Matters

On June 18, 2018, Duke Energy Progress and Duke Energy Florida sued the U.S. in the U.S. Court of Federal Claims for damages incurred for the period 2014 through 2018. The lawsuit claimed the Department of Energy breached a contract in failing to accept spent nuclear fuel under the Nuclear Waste Policy Act of 1982 and asserted damages for the cost of on-site storage in the amount of $100 million and $203 million for Duke Energy Progress and Duke Energy Florida, respectively. Discovery is ongoing and a trial is expected to occur in 2021.

Duke Energy Florida

Power Purchase Dispute Arbitration

Duke Energy Florida, on behalf of its customers, entered into a power purchase contract for the purchase of firm capacity and energy from a qualified facility. Duke Energy Florida determined the qualified facility did not perform in accordance with the power purchase contract, and Duke Energy Florida terminated the power purchase contract. The qualified facility counterparty filed a confidential American Arbitration Association (AAA) arbitration demand, challenging the termination of the power purchase contract and seeking damages. Duke Energy Florida denies liability and is vigorously defending the arbitration claim. The final arbitration hearing is scheduled for December 2020. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Indiana

Coal Ash Basin Closure Plan Appeal

On January 27, 2020, Hoosier Environmental Council filed a Petition for Administrative Review with the Indiana Office of Environmental Adjudication (the court) challenging the Indiana Department of Environmental Management's December 10, 2019, partial approval of Duke Energy Indiana's ash pond closure plan. On March 11, 2020, Duke Energy Indiana filed a Motion to Dismiss. On May 5, 2020, the court entered an order denying that motion. The parties are engaged in discovery and a hearing is scheduled for February 22, 2021. Duke Energy Indiana cannot predict the outcome of this matter.

Other Litigation and Legal Proceedings

The Duke Energy Registrants are involved in other legal, tax and regulatory proceedings arising in the ordinary course of business, some of which involve significant amounts. The Duke Energy Registrants believe the final disposition of these proceedings will not have a material effect on their results of operations, cash flows or financial position.

The table below presents recorded reserves based on management's best estimate of probable loss for legal matters, excluding asbestos-related reserves discussed above. Reserves are classified on the Condensed Consolidated Balance Sheets in Other within Other Noncurrent Liabilities and Other within Current Liabilities. The reasonably possible range of loss in excess of recorded reserves is not material, other than as described above.

(in millions)	June 30, 2020	December 31, 2019
Reserves for Legal Matters		
Duke Energy	**$ 60**	$ 62
Duke Energy Carolinas	**3**	2
Progress Energy	**52**	55
Duke Energy Progress	**9**	12
Duke Energy Florida	**23**	22
Piedmont	**1**	1

OTHER COMMITMENTS AND CONTINGENCIES

General

As part of their normal business, the Duke Energy Registrants are party to various financial guarantees, performance guarantees and other contractual commitments to extend guarantees of credit and other assistance to various subsidiaries, investees and other third parties. These guarantees involve elements of performance and credit risk, which are not fully recognized on the Condensed Consolidated Balance Sheets and have uncapped maximum potential payments. However, the Duke Energy Registrants do not believe these guarantees will have a material effect on their results of operations, cash flows or financial position.

In addition, the Duke Energy Registrants enter into various fixed-price, noncancelable commitments to purchase or sell power or natural gas, take-or-pay arrangements, transportation, or throughput agreements and other contracts that may or may not be recognized on their respective Condensed Consolidated Balance Sheets. Some of these arrangements may be recognized at fair value on their respective Condensed Consolidated Balance Sheets if such contracts meet the definition of a derivative and the NPNS exception does not apply. In most cases, the Duke Energy Registrants' purchase obligation contracts contain provisions for price adjustments, minimum purchase levels and other financial commitments.

As descr bed in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The reserve for credit losses for insurance receivables based on adoption of the new standard is $15 million for Duke Energy and Duke Energy Carolinas as of June 30, 2020. Insurance receivables are evaluated based on the risk of default and the historical losses, current conditions and expected conditions around collectability. Management evaluates the risk of default annually based on payment history, credit rating and changes in the risk of default from credit agencies.

As of June 30, 2020, Duke Energy recognized $860 million related to the guarantees of ACP's outstanding debt of which $95 million was previously recognized due the adoption of new guidance for credit losses effective January 1, 2020. This reserve is included within Other current liabilities on the Condensed Consolidated Balance Sheets. See Notes 1, 3 and 11 for more information. The remaining reserve for credit losses for financial guarantees of $4 million as of June 30, 2020, is included within Other noncurrent liabilities on the Duke Energy's Condensed Consolidated Balance Sheets. Management considers financial guarantees for evaluation under this standard based on the anticipated amount outstanding at the time of default. The reserve for credit losses is based on the evaluation of the contingent components of financial guarantees. Management evaluates the risk of default, exposure and length of time remaining in the period for each contract.

5. DEBT AND CREDIT FACILITIES

SUMMARY OF SIGNIFICANT DEBT ISSUANCES

The following table summarizes significant debt issuances (in millions).

			Six Months Ended June 30, 2020						
Issuance Date	Maturity Date	Interest Rate	Duke Energy	Duke Energy (Parent)	Duke Energy Carolinas	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Unsecured Debt									
May 2020[a]	Jun 2030	2.450%	**$ 500**	**$ 500**	$ —	$ —	$ —	$ —	**$ —**
May 2020[b]	Jun 2050	3.350%	**400**	**—**	**—**	**—**	**—**	**—**	**400**
First Mortgage Bonds									
January 2020[c]	Feb 2030	2.450%	**500**	**—**	**500**	**—**	**—**	**—**	**—**
January 2020[c]	Aug 2049	3.200%	**400**	**—**	**400**	**—**	**—**	**—**	**—**
March 2020[d]	Apr 2050	2.750%	**550**	**—**	**—**	**—**	**—**	**550**	**—**
May 2020[b]	Jun 2030	2.125%	**400**	**—**	**—**	**—**	**400**	**—**	**—**
June 2020[b]	Jun 2030	1.750%	**500**	**—**	**—**	**500**	**—**	**—**	**—**
Total issuances			**$ 3,250**	**$ 500**	**$ 900**	**$ 500**	**$ 400**	**$ 550**	**$ 400**

(a) Debt issued to repay $500 million borrowing made under Duke Energy (Parent) revolving credit facility in March 2020, and for general corporate purposes.
(b) Debt issued to repay short-term debt and for general corporate purposes.
(c) Debt issued to repay at maturity $450 million first mortgage bonds due June 2020 and for general corporate purposes.
(d) Debt issued to repay at maturity $500 million first mortgage bonds due July 2020 and to pay down short-term debt.

CURRENT MATURITIES OF LONG-TERM DEBT

The following table shows the significant components of Current Maturities of Long-Term Debt on the Condensed Consolidated Balance Sheets. The Duke Energy Registrants currently anticipate satisfying these obligations with cash on hand and proceeds from additional borrowings.

(in millions)	Maturity Date	Interest Rate	June 30, 2020
Unsecured Debt			
Duke Energy Progress	December 2020	0.986% [(a)]	$ 700
Progress Energy, Inc	January 2021	4.400%	500
Duke Energy (Parent)	May 2021	0.924% [(a)]	500
Piedmont	June 2021	4.240%	160
Secured Debt			
Duke Energy Florida	April 2021	1.384% [(a)]	250
First Mortgage Bonds			
Duke Energy Indiana	July 2020	3.750%	500
Duke Energy Progress	September 2020	0.498% [(a)]	300
Duke Energy Carolinas	June 2021	3.900%	500
Other[(b)]			346
Current maturities of long-term debt			$ 3,756

(a) Debt has a floating interest rate.
(b) Includes finance lease obligations, amortizing debt and small bullet maturities.

AVAILABLE CREDIT FACILITIES

Master Credit Facility

In March 2020, Duke Energy amended its existing $8 billion Master Credit Facility to extend the termination date to March 2025. The Duke Energy Registrants, excluding Progress Energy, have borrowing capacity under the Master Credit Facility up to a specified sublimit for each borrower. Duke Energy has the unilateral ability at any time to increase or decrease the borrowing sublimits of each borrower, subject to a maximum sublimit for each borrower. The amount available under the Master Credit Facility has been reduced to backstop issuances of commercial paper, certain letters of credit and variable-rate demand tax-exempt bonds that may be put to the Duke Energy Registrants at the option of the holder.

The table below includes the current borrowing sublimits and available capacity under these credit facilities.

	June 30, 2020							
(in millions)	Duke Energy	Duke Energy (Parent)	Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Facility size[(a)]	$ 8,000	$ 2,650	$ 1,500	$ 1,250	$ 800	$ 600	$ 600	$ 600
Reduction to backstop issuances								
Commercial paper[(b)]	(2,480)	(1,248)	(389)	(323)	(156)	(79)	(150)	(135)
Outstanding letters of credit	(47)	(40)	(3)	(2)	—	—	—	(2)
Tax-exempt bonds	(81)	—	—	—	—	—	(81)	—
Available capacity under the Master Credit Facility	$ 5,392	$ 1,362	$ 1,108	$ 925	$ 644	$ 521	$ 369	$ 463

(a) Represents the sublimit of each borrower.
(b) Duke Energy issued $625 million of commercial paper and loaned the proceeds through the money pool to Duke Energy Carolinas, Duke Energy Progress, Duke Energy Ohio and Duke Energy Indiana. The balances are classified as Long-Term Debt Payable to Affiliated Companies on the Condensed Consolidated Balance Sheets.

Term Loan Facility

In response to market volatility and ongoing liquidity impacts from COVID-19, in March 2020, Duke Energy (Parent) entered into a $1.5 billion, 364-day Term Loan Credit Agreement, borrowing the full $1.5 billion available on March 19, 2020. The term loan contains a provision for increasing the amount available for borrowing by up to $500 million. Duke Energy (Parent) exercised this provision on March 27, 2020, borrowing an additional $188 million. Proceeds were used to reduce outstanding commercial paper and for general corporate purposes. Refer to Note 1 for additional information on the COVID-19 pandemic.

Other Credit Facilities

(in millions)	June 30, 2020	
	Facility size	Amount drawn
Duke Energy (Parent) Three-Year Revolving Credit Facility[(a)]	$ 1,000	$ 500
Duke Energy Progress Term Loan Facility	700	700

(a) In March 2020, Duke Energy (Parent) drew down the remaining $500 million. In May 2020, Duke Energy (Parent) repaid $500 million with proceeds of May 2020 unsecured debt issuance.

6. GOODWILL

Duke Energy

The following table presents the goodwill by reportable segment included on Duke Energy's Condensed Consolidated Balance Sheets at June 30, 2020, and December 31, 2019.

(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total
Goodwill balance	$ 17,379	$ 1,924	$ 122	$ 19,425
Accumulated impairment charges	—	—	(122)	(122)
Goodwill, adjusted for accumulated impairment charges	$ 17,379	$ 1,924	$ —	$ 19,303

Duke Energy Ohio

Duke Energy Ohio's Goodwill balance of $920 million, allocated $596 million to Electric Utilities and Infrastructure and $324 million to Gas Utilities and Infrastructure, is presented net of accumulated impairment charges of $216 million on the Condensed Consolidated Balance Sheets at June 30, 2020, and December 31, 2019.

Progress Energy

Progress Energy's Goodwill is included in the Electric Utilities and Infrastructure segment and there are no accumulated impairment charges.

Piedmont

Piedmont's Goodwill is included in the Gas Utilities and Infrastructure segment and there are no accumulated impairment charges.

7. RELATED PARTY TRANSACTIONS

The Subsidiary Registrants engage in related party transactions in accordance with applicable state and federal commission regulations. Refer to the Condensed Consolidated Balance Sheets of the Subsidiary Registrants for balances due to or due from related parties. Material amounts related to transactions with related parties included on the Condensed Consolidated Statements of Operations and Comprehensive Income are presented in the following table.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	**2020**	**2019**	**2020**	**2019**
Duke Energy Carolinas

Duke Energy Florida				
Corporate governance and shared service expenses[(a)]	**$ 76**	$ 75	**$ 147**	$ 145
Indemnification coverages[(b)]	**4**	6	**9**	11
Duke Energy Ohio				
Corporate governance and shared service expenses[(a)]	**$ 77**	$ 83	**$ 161**	$ 168
Indemnification coverages[(b)]	**1**	1	**2**	2
Duke Energy Indiana				
Corporate governance and shared service expenses[(a)]	**$ 92**	$ 93	**$ 198**	$ 190
Indemnification coverages[(b)]	**2**	1	**4**	3
Piedmont				
Corporate governance and shared service expenses[(a)]	**$ 37**	$ 37	**$ 71**	$ 69
Indemnification coverages[(b)]	**—**	—	**1**	1
Intercompany natural gas sales[(d)]	**29**	22	**54**	45
Natural gas storage and transportation costs[(e)]	**6**	6	**12**	11

(a) The Subsidiary Registrants are charged their proportionate share of corporate governance and other shared services costs, primarily related to human resources, employee benefits, information technology, legal and accounting fees, as well as other third-party costs. These amounts are primarily recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(b) The Subsidiary Registrants incur expenses related to certain indemnification coverages through Bison, Duke Energy's wholly owned captive insurance subsidiary. These expenses are recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(c) Duke Energy Carolinas and Duke Energy Progress participate in a JDA, which allows the collective dispatch of power plants between the service territories to reduce customer rates. Revenues from the sale of power and expenses from the purchase of power pursuant to the JDA are recorded in Operating Revenues and Fuel used in electric generation and purchased power, respectively, on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(d) Piedmont provides long-term natural gas delivery service to certain Duke Energy Carolinas and Duke Energy Progress natural gas-fired generation facilities. Piedmont records the sales in Operating revenues, and Duke Energy Carolinas and Duke Energy Progress record the related purchases as a component of Fuel used in electric generation and purchased power on their respective Condensed Consolidated Statements of Operations and Comprehensive Income.

(e) Piedmont has related party transactions as a customer of its equity method investments in Pine Needle LNG Company, LLC, Hardy Storage Company, LLC and Cardinal Pipeline Company, LLC natural gas storage and transportation facilities. These expenses are included in Cost of natural gas on Piedmont's Condensed Consolidated Statements of Operations and Comprehensive Income.

In addition to the amounts presented above, the Subsidiary Registrants have other affiliate transactions, including rental of office space, participation in a money pool arrangement, other operational transactions, such as pipeline lease arrangements, and their proportionate share of certain charged expenses. These transactions of the Subsidiary Registrants are incurred in the ordinary course of business and are eliminated in consolidation.

As discussed in Note 11, certain trade receivables have been sold by Duke Energy Ohio and Duke Energy Indiana to CRC, an affiliate formed by a subsidiary of Duke Energy. The proceeds obtained from the sales of receivables are largely cash but do include a subordinated note from CRC for a portion of the purchase price.

Intercompany Income Taxes

Duke Energy and the Subsidiary Registrants file a consolidated federal income tax return and other state and jurisdictional returns. The Subsidiary Registrants have a tax sharing agreement with Duke Energy for the allocation of consolidated tax liabilities and benefits. Income taxes recorded represent amounts the Subsidiary Registrants would incur as separate C-Corporations. The following table includes the balance of intercompany income tax receivables and payables for the Subsidiary Registrants.

(in millions)	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
June 30, 2020							
Intercompany income tax receivable	**$ —**	**$ 63**	**$ —**	**$ —**	**$ —**	**$ 10**	**$ 23**
Intercompany income tax payable	**19**	**—**	**7**	**51**	**1**	**—**	**—**
December 31, 2019							
Intercompany income tax receivable	$ —	$ 125	$ 28	$ —	$ 9	$ 28	$ 13
Intercompany income tax payable	5	—	—	2	—	—	—

8. DERIVATIVES AND HEDGING

The Duke Energy Registrants use commodity and interest rate contracts to manage commodity price risk and interest rate risk. The primary use of commodity derivatives is to hedge the generation portfolio against changes in the prices of electricity and natural gas. Piedmont enters into natural gas supply contracts to provide diversification, reliability and natural gas cost benefits to its customers. Interest rate derivatives are used to manage interest rate risk associated with borrowings.

All derivative instruments not identified as NPNS are recorded at fair value as assets or liabilities on the Condensed Consolidated Balance Sheets. Cash collateral related to derivative instruments executed under master netting arrangements is offset against the collateralized derivatives on the Condensed Consolidated Balance Sheets. The cash impacts of settled derivatives are recorded as operating activities on the Condensed Consolidated Statements of Cash Flows.

INTEREST RATE RISK

The Duke Energy Registrants are exposed to changes in interest rates as a result of their issuance or anticipated issuance of variable-rate and fixed-rate debt and commercial paper. Interest rate risk is managed by limiting variable-rate exposures to a percentage of total debt and by monitoring changes in interest rates. To manage risk associated with changes in interest rates, the Duke Energy Registrants may enter into interest rate swaps, U.S. Treasury lock agreements and other financial contracts. In anticipation of certain fixed-rate debt issuances, a series of forward-starting interest rate swaps or Treasury locks may be executed to lock in components of current market interest rates. These instruments are later terminated prior to or upon the issuance of the corresponding debt.

Cash Flow Hedges

For a derivative designated as hedging the exposure to variable cash flows of a future transaction, referred to as a cash flow hedge, the effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings once the future transaction impacts earnings. Amounts for interest rate contracts are reclassified to earnings as interest expense over the term of the related debt. Gains and losses reclassified out of accumulated other comprehensive income (loss) for the three and six months ended June 30, 2020, and 2019, were not material. Duke Energy's interest rate derivatives designated as hedges include interest rate swaps used to hedge existing debt within the Commercial Renewables business and forward-starting interest rate swaps not accounted for under regulatory accounting.

Undesignated Contracts

Undesignated contracts primarily include contracts not designated as a hedge because they are accounted for under regulatory accounting or contracts that do not qualify for hedge accounting.

Duke Energy’s interest rate swaps for its regulated operations employ regulatory accounting. With regulatory accounting, the mark-to-market gains or losses on the swaps are deferred as regulatory liabilities or regulatory assets, respectively. Regulatory assets and liabilities are amortized consistent with the treatment of the related costs in the ratemaking process. The accrual of interest on the swaps is recorded as Interest Expense on the Duke Energy Registrant's Condensed Consolidated Statements of Operations and Comprehensive Income.

360

2021 Settlement Updated MFR F Schedules-000361

The following table shows notional amounts of outstanding derivatives related to interest rate risk.

	June 30, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 650	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,477	400	1,050	1,050	—	27
Total notional amount[(a)]	$ 2,127	$ 400	$ 1,050	$ 1,050	$ —	$ 27

	December 31, 2019					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 993	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,277	450	800	250	550	27
Total notional amount[(a)]	$ 2,270	$ 450	$ 800	$ 250	$ 550	$ 27

(a) Duke Energy includes amounts related to consolidated VIEs of $650 million in cash flow hedges as of June 30, 2020, and $693 million in cash flow hedges as of December 31, 2019.

COMMODITY PRICE RISK

The Duke Energy Registrants are exposed to the impact of changes in the prices of electricity purchased and sold in bulk power markets and coal and natural gas purchases, including Piedmont's natural gas supply contracts. Exposure to commodity price risk is influenced by a number of factors including the term of contracts, the liquidity of markets and delivery locations. For the Subsidiary Registrants, bulk power electricity and coal and natural gas purchases flow through fuel adjustment clauses, formula-based contracts or other cost-sharing mechanisms. Differences between the costs included in rates and the incurred costs, including undesignated derivative contracts, are largely deferred as regulatory assets or regulatory liabilities. Piedmont policies allow for the use of financial instruments to hedge commodity price risks. The strategy and objective of these hedging programs are to use the financial instruments to reduce natural gas costs volatility for customers.

Volumes

The tables below include volumes of outstanding commodity derivatives. Amounts disclosed represent the absolute value of notional volumes of commodity contracts excluding NPNS. The Duke Energy Registrants have netted contractual amounts where offsetting purchase and sale contracts exist with identical delivery locations and times of delivery. Where all commodity positions are perfectly offset, no quantities are shown.

	June 30, 2020						
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Ohio	Duke Energy Indiana	Piedmont

Natural gas (millions of dekatherms)	704	130	160	160	—	3	411

U.S. EQUITY SECURITIES RISK

In May 2019, Duke Energy Florida entered into a Decommissioning Services Agreement for the accelerated decommissioning of Crystal River Unit 3 with ADP CR3, LLC and ADP SF1, LLC. See Note 3 for additional information on the accelerated decommissioning. Duke Energy Florida executed U.S. equity option collars within the NDTF in May 2019, to preserve the U.S. equity portfolio value in the Duke Energy Florida NDTF in the event the accelerated decommissioning is approved. The Duke Energy Florida NDTF liquidated the options in April 2020, and received proceeds of approximately $7 million.

LOCATION AND FAIR VALUE OF DERIVATIVE ASSETS AND LIABILITIES RECOGNIZED ON THE CONDENSED CONSOLIDATED BALANCE SHEETS

The following tables show the fair value and balance sheet location of derivative instruments. Although derivatives subject to master netting arrangements are netted on the Condensed Consolidated Balance Sheets, the fair values presented below are shown gross and cash collateral on the derivatives has not been netted against the fair values shown.

OFFSETTING ASSETS AND LIABILITIES

The following tables present the line items on the Condensed Consolidated Balance Sheets where derivatives are reported. Substantially all of Duke Energy's outstanding derivative contracts are subject to enforceable master netting arrangements. The gross amounts offset in the tables below show the effect of these netting arrangements on financial position, and include collateral posted to offset the net position. The amounts shown are calculated by counterparty. Accounts receivable or accounts payable may also be available to offset exposures in the event of bankruptcy. These amounts are not included in the tables below.

OBJECTIVE CREDIT CONTINGENT FEATURES

Certain derivative contracts contain objective credit contingent features. These features include the requirement to post cash collateral or letters of credit if specific events occur, such as a credit rating downgrade below investment grade. The following tables show information with respect to derivative contracts that are in a net liability position and contain objective credit-risk-related payment provisions.

	June 30, 2020			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	**$ 63**	**$ 29**	**$ 34**	**$ 34**
Fair value of collateral already posted	**—**	**—**	**—**	**—**
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	**63**	**29**	**34**	**34**

	December 31, 2019			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	$ 79	$ 35	$ 44	$ 44
Fair value of collateral already posted	—	—	—	—
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	79	35	44	44

The Duke Energy Registrants have elected to offset cash collateral and fair values of derivatives. For amounts to be netted, the derivative and cash collateral must be executed with the same counterparty under the same master netting arrangement.

9. INVESTMENTS IN DEBT AND EQUITY SECURITIES

Duke Energy's investments in debt and equity securities are primarily comprised of investments held in (i) the NDTF at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, (ii) the grantor trusts at Duke Energy Progress, Duke Energy Florida and Duke Energy Indiana related to OPEB plans and (iii) Bison. The Duke Energy Registrants classify investments in debt securities as AFS and investments in equity securities as fair value through net income (FV-NI).

For investments in debt securities classified as AFS, the unrealized gains and losses are included in other comprehensive income until realized, at which time they are reported through net income. For investments in equity securities classified as FV-NI, both realized and unrealized gains and losses are reported through net income. Substantially all of Duke Energy's investments in debt and equity securities qualify for regulatory accounting, and accordingly, all associated realized and unrealized gains and losses on these investments are deferred as a regulatory asset or liability.

Duke Energy classifies the majority of investments in debt and equity securities as long term, unless otherwise noted.

Investment Trusts

The investments within the Investment Trusts are managed by independent investment managers with discretion to buy, sell and invest pursuant to the objectives set forth by the investment manager agreements and trust agreements. The Duke Energy Registrants have limited oversight of the day-to-day management of these investments. As a result, the ability to hold investments in unrealized loss positions is outside the control of the Duke Energy Registrants. Accordingly, all unrealized losses associated with debt securities within the Investment Trusts are recognized immediately and deferred to regulatory accounts where appropriate.

Other AFS Securities

Unrealized gains and losses on all other AFS securities are included in other comprehensive income until realized, unless it is determined the carrying value of an investment has a credit loss. The Duke Energy Registrants analyze all investment holdings each reporting period to determine whether a decline in fair value is related to a credit loss. If a credit loss exists, the unrealized credit loss is included in earnings. There were no material credit losses as of June 30, 2020, and December 31, 2019.

Other Investments amounts are recorded in Other within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

DUKE ENERGY

Total	$ 2,532	$ 1,239	$ 1,043	$ 991	$ 52	$ 45

10. FAIR VALUE MEASUREMENTS

Fair value is the exchange price to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. The fair value definition focuses on an exit price versus the acquisition cost. Fair value measurements use market data or assumptions market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs may be readily observable, corroborated by market data or generally unobservable. Valuation techniques maximize the use of observable inputs and minimize use of unobservable inputs. A midmarket pricing convention (the midpoint price between bid and ask prices) is permitted for use as a practical expedient.

Fair value measurements are classified in three levels based on the fair value hierarchy as defined by GAAP. Certain investments are not categorized within the fair value hierarchy. These investments are measured at fair value using the net asset value (NAV) per share practical expedient. The NAV is derived based on the investment cost, less any impairment, plus or minus changes resulting from observable price changes for an identical or similar investment of the same issuer.

Fair value accounting guidance permits entities to elect to measure certain financial instruments that are not required to be accounted for at fair value, such as equity method investments or the company's own debt, at fair value. The Duke Energy Registrants have not elected to record any of these items at fair value.

Valuation methods of the primary fair value measurements disclosed below are as follows.

Investments in equity securities

The majority of investments in equity securities are valued using Level 1 measurements. Investments in equity securities are typically valued at the closing price in the principal active market as of the last business day of the quarter. Principal active markets for equity prices include published exchanges such as the New York Stock Exchange and Nasdaq Stock Market. Foreign equity prices are translated from their trading currency using the currency exchange rate in effect at the close of the principal active market. There was no after-hours market activity that was required to be reflected in the reported fair value measurements.

Investments in debt securities

Most investments in debt securities are valued using Level 2 measurements because the valuations use interest rate curves and credit spreads applied to the terms of the debt instrument (maturity and coupon interest rate) and consider the counterparty credit rating. If the market for a particular fixed-income security is relatively inactive or illiquid, the measurement is Level 3.

Commodity derivatives

Commodity derivatives with clearinghouses are classified as Level 1. If forward price curves are not observable for the full term of the contract and the unobservable period had more than an insignificant impact on the valuation, the commodity derivative is classified as Level 3. In isolation, increases (decreases) in natural gas forward prices result in favorable (unfavorable) fair value adjustments for natural gas purchase contracts; and increases (decreases) in electricity forward prices result in unfavorable (favorable) fair value adjustments for electricity sales contracts. Duke Energy regularly evaluates and validates pricing inputs used to estimate the fair value of natural gas commodity contracts by a market participant price verification procedure. This procedure provides a comparison of internal forward commodity curves to market participant generated curves.

Interest rate derivatives

Most over-the-counter interest rate contract derivatives are valued using financial models that utilize observable inputs for similar instruments and are classified as Level 2. Inputs include forward interest rate curves, notional amounts, interest rates and credit quality of the counterparties.

Other fair value considerations

See Note 12 in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, for a discussion of the valuation of goodwill and intangible assets.

DUKE ENERGY

The following tables provide recorded balances for assets and liabilities measured at fair value on a recurring basis on the Condensed Consolidated Balance Sheets. Derivative amounts in the tables below for all Duke Energy Registrants exclude cash collateral, which is disclosed in Note 8. See Note 9 for additional information related to investments by major security type for the Duke Energy Registrants.

Balance at end of period	$ (105)	$ (114)	$ (105)	$ (114)

QUANTITATIVE INFORMATION ABOUT UNOBSERVABLE INPUTS

The following tables include quantitative information about the Duke Energy Registrants' derivatives classified as Level 3.

	June 30, 2020				
Investment Type	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range	Weighted Average Range
Duke Energy Ohio					
FTRs	**$ 3**	RTO auction pricing	FTR price – per MWh	**$ 0.23 - $ 1.45**	**$ 0.69**
Duke Energy Indiana					
FTRs	**10**	RTO auction pricing	FTR price – per MWh	**(1.03) - 6.19**	**0.71**
Piedmont					
Natural gas contracts	**(105)**	Discounted cash flow	Forward natural gas curves – price per MMBtu	**1.73 - 2.39**	**2.01**
Duke Energy					
Total Level 3 derivatives	**$ (92)**				

	December 31, 2019				
Investment Type	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range	Weighted Average Range
Duke Energy Ohio					
FTRs	$ 4	RTO auction pricing	FTR price – per MWh	$ 0.59 - $ 3.47	$ 2.07
Duke Energy Indiana					
FTRs	11	RTO auction pricing	FTR price – per MWh	(0.66) - 9.24	1.15
Piedmont					
Natural gas contracts	(117)	Discounted cash flow	Forward natural gas curves – price per MMBtu	1.59 - 2.46	1.91
Duke Energy					
Total Level 3 derivatives	$ (102)				

OTHER FAIR VALUE DISCLOSURES

The fair value and book value of long-term debt, including current maturities, is summarized in the following table. Estimates determined are not necessarily indicative of amounts that could have been settled in current markets. Fair value of long-term debt uses Level 2 measurements.

	June 30, 2020		December 31, 2019	
(in millions)	Book Value	Fair Value	Book Value	Fair Value
Duke Energy[(a)]	**$ 59,899**	**$ 68,428**	$ 58,126	$ 63,062
Duke Energy Carolinas	**12,521**	**15,046**	11,900	13,516
Progress Energy	**19,604**	**23,476**	19,634	22,291
Duke Energy Progress	**9,063**	**10,506**	9,058	9,934
Duke Energy Florida	**7,951**	**9,655**	7,987	9,131
Duke Energy Ohio	**3,019**	**3,551**	2,619	2,964
Duke Energy Indiana	**4,603**	**5,617**	4,057	4,800
Piedmont	**2,779**	**3,289**	2,384	2,642

(a) Book value of long-term debt includes $1.4 billion at June 30, 2020, and $1.5 billion at December 31, 2019, of unamortized debt discount and premium, net of purchase accounting adjustments related to the mergers with Progress Energy and Piedmont that are excluded from fair value of long-term debt.

At both June 30, 2020, and December 31, 2019, fair value of cash and cash equivalents, accounts and notes receivable, accounts payable, notes payable and commercial paper and nonrecourse notes payable of VIEs are not materially different from their carrying amounts because of the short-term nature of these instruments and/or because the stated rates approximate market rates.

11. VARIABLE INTEREST ENTITIES

CONSOLIDATED VIEs

The obligations of the consolidated VIEs discussed in the following paragraphs are nonrecourse to the Duke Energy Registrants. The registrants have no requirement to provide liquidity to, purchase assets of or guarantee performance of these VIEs unless noted in the following paragraphs.

No financial support was provided to any of the consolidated VIEs during the six months ended June 30, 2020, and the year ended December 31, 2019, or is expected to be provided in the future that was not previously contractually required.

Receivables Financing – DERF/DEPR/DEFR

DERF, DEPR and DEFR are bankruptcy remote, special purpose subsidiaries of Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, respectively. DERF, DEPR and DEFR are wholly owned LLCs with separate legal existence from their parent companies, and their assets are not generally available to creditors of their parent companies. On a revolving basis, DERF, DEPR and DEFR buy certain accounts receivable arising from the sale of electricity and related services from their parent companies.

DERF, DEPR and DEFR borrow amounts under credit facilities to buy these receivables. Borrowing availability from the credit facilities is limited to the amount of qualified receivables purchased which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligations is cash collections from the receivables. Amounts borrowed under the credit facilities for DERF and DEPR are reflected on the Condensed Consolidated Balance Sheets as Long-Term Debt. Amounts borrowed under the credit facilities for DEFR are reflected on the Condensed Consolidated Balance Sheets as Current maturities of long-term debt.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The full impact of COVID-19 and the Duke Energy Registrant's related response on customers' ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In the second quarter of 2020, DERF, DEPR and DEFR executed amendments to their credit facilities to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. See Note 3 for information about COVID-19 filings with state utility commissions.

The most significant activity that impacts the economic performance of DERF, DEPR and DEFR are the decisions made to manage delinquent receivables. Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida are considered the primary beneficiaries and consolidate DERF, DEPR and DEFR, respectively, as they make those decisions.

Receivables Financing – CRC

CRC is a bankruptcy remote, special purpose entity indirectly owned by Duke Energy. On a revolving basis, CRC buys certain accounts receivable arising from the sale of electricity, natural gas and related services from Duke Energy Ohio and Duke Energy Indiana. CRC borrows amounts under a credit facility to buy the receivables from Duke Energy Ohio and Duke Energy Indiana. Borrowing availability from the credit facility is limited to the amount of qualified receivables sold to CRC which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligation is cash collections from the receivables. Amounts borrowed under the credit facility are reflected on Duke Energy's Condensed Consolidated Balance Sheets as Long-Term Debt.

The proceeds Duke Energy Ohio and Duke Energy Indiana receive from the sale of receivables to CRC are approximately 75% cash and 25% in the form of a subordinated note from CRC. The subordinated note is a retained interest in the receivables sold. Depending on collection experience, additional equity infusions to CRC may be required by Duke Energy to maintain a minimum equity balance of $3 million.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The full impact of COVID-19 and the Duke Energy Registrant's related response on customers' ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Ohio and Duke Energy Indiana have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In July of 2020, CRC executed an amendment to its credit facility to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. See Note 3 for information about COVID-19 filings with state utility commissions.

CRC is considered a VIE because (i) equity capitalization is insufficient to support its operations, (ii) power to direct the activities that most significantly impact the economic performance of the entity is not held by the equity holder and (iii) deficiencies in net worth of CRC are funded by Duke Energy. The most significant activities that impact the economic performance of CRC are decisions made to manage delinquent receivables. Duke Energy is considered the primary beneficiary and consolidates CRC as it makes these decisions. Neither Duke Energy Ohio nor Duke Energy Indiana consolidate CRC.

Receivables Financing – Credit Facilities

The following table summarizes the amounts and expiration dates of the credit facilities and associated restricted receivables described above.

	Duke Energy			
		Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida
(in millions)	CRC	DERF	DEPR	DEFR
Expiration date	February 2023	December 2022	April 2023	April 2021
Credit facility amount	$ 350	$ 475	$ 350	$ 250
Amounts borrowed at June 30, 2020	**350**	**475**	**333**	**250**
Amounts borrowed at December 31, 2019	350	474	325	250
Restricted Receivables at June 30, 2020	**454**	**675**	**451**	**463**
Restricted Receivables at December 31, 2019	522	642	489	336

Nuclear Asset-Recovery Bonds – DEFPF

DEFPF is a bankruptcy remote, wholly owned special purpose subsidiary of Duke Energy Florida. DEFPF was formed in 2016 for the sole purpose of issuing nuclear asset-recovery bonds to finance Duke Energy Florida's unrecovered regulatory asset related to Crystal River Unit 3.

In 2016, DEFPF issued senior secured bonds and used the proceeds to acquire nuclear asset-recovery property from Duke Energy Florida. The nuclear asset-recovery property acquired includes the right to impose, bill, collect and adjust a non-bypassable nuclear asset-recovery charge from all Duke Energy Florida retail customers until the bonds are paid in full and all financing costs have been recovered. The nuclear asset-recovery bonds are secured by the nuclear asset-recovery property and cash collections from the nuclear asset-recovery charges are the sole source of funds to satisfy the debt obligation. The bondholders have no recourse to Duke Energy Florida.

DEFPF is considered a VIE primarily because the equity capitalization is insufficient to support its operations. Duke Energy Florida has the power to direct the significant activities of the VIE as described above and therefore Duke Energy Florida is considered the primary beneficiary and consolidates DEFPF.

The following table summarizes the impact of DEFPF on Duke Energy Florida's Condensed Consolidated Balance Sheets.

(in millions)	June 30, 2020	December 31, 2019
Receivables of VIEs	**$ 6**	$ 5
Regulatory Assets: Current	**53**	52
Current Assets: Other	**32**	39
Other Noncurrent Assets: Regulatory assets	**969**	989
Current Liabilities: Other	**10**	10
Current maturities of long-term debt	**54**	54
Long-Term Debt	**1,028**	1,057

Commercial Renewables

Certain of Duke Energy's renewable energy facilities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Assets are restricted and cannot be pledged as collateral or sold to third parties without prior approval of debt holders. Additionally, Duke Energy has VIEs associated with tax equity arrangements entered into with third-party investors in order to finance the cost of renewable assets eligible for tax credits. The activities that most significantly impacted the economic performance of these renewable energy facilities were decisions associated with siting, negotiating PPAs and Engineering, Procurement and Construction agreements, and decisions associated with ongoing operations and maintenance-related activities. Duke Energy is considered the primary beneficiary and consolidates the entities as it is responsible for all of these decisions.

The table below presents material balances reported on Duke Energy's Condensed Consolidated Balance Sheets related to Commercial Renewables VIEs.

(in millions)	June 30, 2020	December 31, 2019
Current Assets: Other	**$ 228**	$ 203
Property, Plant and Equipment: Cost	**6,198**	5,747
Accumulated depreciation and amortization	**(1,145)**	(1,041)
Other Noncurrent Assets: Other	**75**	106
Current maturities of long-term debt	**158**	162
Long-Term Debt	**1,457**	1,541
Other Noncurrent Liabilities: AROs	**144**	127
Other Noncurrent Liabilities: Other	**251**	228

NON-CONSOLIDATED VIEs

The following tables summarize the impact of non-consolidated VIEs on the Condensed Consolidated Balance Sheets.

	June 30, 2020					
	Duke Energy				Duke	Duke
(in millions)	Pipeline Investments	Commercial Renewables	Other VIEs	Total	Energy Ohio	Energy Indiana

Net assets (liabilities)	$ 1,121	$ 299	$ (15)	$ 1,405	$ 64	$ 77

The Duke Energy Registrants are not aware of any situations where the maximum exposure to loss significantly exceeds the carrying values shown above except for the PPA with OVEC, which is discussed below, and future exit costs associated with the abandonment of the investment in ACP, as discussed below.

Pipeline Investments

Duke Energy has investments in various joint ventures to construct and operate pipeline projects. These entities are considered VIEs due to having insufficient equity to finance their own activities without subordinated financial support. Duke Energy does not have the power to direct the activities that most significantly impact the economic performance, the obligation to absorb losses or the right to receive benefits of these VIEs and therefore does not consolidate these entities.

On July 5, 2020, Duke Energy determined that it would no longer invest in the construction of the ACP pipeline. See Notes 1, 3 and 4 for further information regarding this transaction.

For the three and six months ended June 30, 2020, the ACP investment is considered a significant subsidiary because its income exceeds 20% of Duke Energy's income. The table below presents unaudited summarized financial information for ACP.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2020	2019	2020	2019
Net (Loss) Income	$ (4,414)	$ 61	$ (4,342)	$ 114

2021 Settlement Updated MFR F Schedules-000379

The table below presents Duke Energy's ownership interest and investment balances in these joint ventures.

Entity Name	Ownership Interest	VIE Investment Amount (in millions) June 30, 2020	December 31, 2019
ACP[a]	47%	**$ (920)**	$ 1,179
Constitution[b]	24%	**—**	—
Total		**$ (920)**	$ 1,179

(a) During the quarter ended June 30, 2020, Duke Energy abandoned its investment in ACP as described above. The current liability related to the abandonment of ACP represents Duke Energy's obligation to fund ACP's obligations. See Notes 1, 3 and 4 for more information.

(b) During the year ended December 31, 2019, Duke Energy recorded an other-than-temporary impairment related to Constitution. This charge resulted in the full write-down of Duke Energy's investment in Constitution.

Commercial Renewables

Duke Energy has investments in various renewable energy project entities. Some of these entities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Duke Energy does not consolidate these VIEs because power to direct and control key activities is shared jointly by Duke Energy and other owners.

Other

In 2019, Duke Energy acquired a majority ownership in a portfolio of distributed fuel cell projects from Bloom Energy Corporation. Duke Energy is not the primary beneficiary of the assets within the portfolio and does not consolidate the assets in the portfolio.

OVEC

Duke Energy Ohio's 9% ownership interest in OVEC is considered a non-consolidated VIE due to OVEC having insufficient equity to finance its activities without subordinated financial support. The activities that most significantly impact OVEC's economic performance include fuel strategy and supply activities and decisions associated with ongoing operations and maintenance-related activities. Duke Energy Ohio does not have the unilateral power to direct these activities, and therefore, does not consolidate OVEC.

As a counterparty to an Inter-Company Power Agreement (ICPA), Duke Energy Ohio has a contractual arrangement to receive entitlements to capacity and energy from OVEC's power plants through June 2040 commensurate with its power participation ratio, which is equivalent to Duke Energy Ohio's ownership interest. Costs, including fuel, operating expenses, fixed costs, debt amortization and interest expense, are allocated to counterparties to the ICPA based on their power participation ratio. The value of the ICPA is subject to variability due to fluctuation in power prices and changes in OVEC's cost of business. On March 31, 2018, FirstEnergy Solutions Corp (FES), a subsidiary of FirstEnergy Corp. and an ICPA counterparty with a power participation ratio of 4.85%, filed for Chapter 11 bankruptcy, which could increase costs allocated to the counterparties. On July 31, 2018, the bankruptcy court rejected the FES ICPA, which means OVEC is an unsecured creditor in the FES bankruptcy proceeding. In addition, certain proposed environmental rulemaking could result in future increased OVEC cost allocations. In July 2020, legislation was proposed to repeal HB 6. Duke Energy cannot predict the outcome in this matter. See Note 3 for additional information.

CRC

See discussion under Consolidated VIEs for additional information related to CRC.

Amounts included in Receivables from affiliated companies in the above table for Duke Energy Ohio and Duke Energy Indiana reflect their retained interest in receivables sold to CRC. These subordinated notes held by Duke Energy Ohio and Duke Energy Indiana are stated at fair value.

The following table shows the gross and net receivables sold.

(in millions)	Duke Energy Ohio June 30, 2020	December 31, 2019	Duke Energy Indiana June 30, 2020	December 31, 2019
Receivables sold	**$ 221**	$ 253	**$ 280**	$ 307
Less: Retained interests	**34**	64	**49**	77
Net receivables sold	**$ 187**	$ 189	**$ 231**	$ 230

The following table shows sales and cash flows related to receivables sold.

	Duke Energy Ohio				Duke Energy Indiana			
	Three Months Ended June 30,		Six Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2020	2019	2020	2019	2020	2019	2020	2019
Sales								
Receivables sold	**$ 429**	$ 429	**$ 966**	$ 1,004	**$ 583**	$ 676	**$ 1,230**	$ 1,410
Loss recognized on sale	**2**	3	**6**	7	**2**	4	**6**	9
Cash flows								
Cash proceeds from receivables sold	**$ 431**	$ 448	**$ 990**	$ 1,045	**$ 580**	$ 680	**$ 1,252**	$ 1,438
Return received on retained interests	**—**	2	**2**	4	**1**	2	**3**	5

Cash flows from sales of receivables are reflected within Cash Flows From Operating Activities on Duke Energy Ohio's and Duke Energy Indiana's Condensed Consolidated Statements of Cash Flows.

12. REVENUE

Duke Energy earns substantially all of its revenues through its reportable segments, Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables.

Electric Utilities and Infrastructure

Electric Utilities and Infrastructure earns the majority of its revenues through retail and wholesale electric service through the generation, transmission, distribution and sale of electricity. Duke Energy generally provides retail and wholesale electric service customers with their full electric load requirements or with supplemental load requirements when the customer has other sources of electricity.

The majority of wholesale revenues are full requirements contracts where the customers purchase the substantial majority of their energy needs and do not have a fixed quantity of contractually required energy or capacity. As such, related forecasted revenues are considered optional purchases. Supplemental requirements contracts that include contracted blocks of energy and capacity at contractually fixed prices have the following estimated remaining performance obligations:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Progress Energy	**$ 58**	$ 92	$ 94	$ 44	$ 45	$ 58	$ 391
Duke Energy Progress	**4**	8	8	8	8	—	36
Duke Energy Florida	**54**	84	86	36	37	58	355
Duke Energy Indiana	**5**	5	—	—	—	—	10

Revenues for block sales are recognized monthly as energy is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates.

Gas Utilities and Infrastructure

Gas Utilities and Infrastructure earns its revenues through retail and wholesale natural gas service through the transportation, distr bution and sale of natural gas. Duke Energy generally provides retail and wholesale natural gas service customers with all natural gas load requirements. Additionally, while natural gas can be stored, substantially all natural gas provided by Duke Energy is consumed by customers simultaneously with receipt of delivery.

Fixed-capacity payments under long-term contracts for the Gas Utilities and Infrastructure segment include minimum margin contracts and supply arrangements with municipalities and power generation facilities. Revenues for related sales are recognized monthly as natural gas is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates. Estimated remaining performance obligations are as follows:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Piedmont	**$ 34**	$ 65	$ 64	$ 61	$ 58	$ 376	$ 658

Commercial Renewables

Commercial Renewables earns the majority of its revenues through long-term PPAs and generally sells all of its wind and solar facility output, electricity and Renewable Energy Certificates (RECs) to customers. The majority of these PPAs have historically been accounted for as leases. For PPAs that are not accounted for as leases, the delivery of electricity and the delivery of RECs are considered separate performance obligations.

Other

The remainder of Duke Energy's operations is presented as Other, which does not include material revenues from contracts with customers.

Disaggregated Revenues

Disaggregated revenues are presented as follows:

	Three Months Ended June 30, 2020							
(in millions) By market or type of customer	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont

As descr bed in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The following table presents the reserve for credit losses for trade and other receivables based on adoption of the new standard.

	Three Months Ended June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont

Trade and other receivables are evaluated based on an estimate of the risk of loss over the life of the receivable and current and historical conditions using supportable assumptions. Management evaluates the risk of loss for trade and other receivables by comparing the historical write-off amounts to total revenue over a specified period. Historical loss rates are adjusted due to the impact of current conditions, including the impacts of COVID-19, as well as forecasted conditions over a reasonable time period. The calculated write-off rate can be applied to the receivable balance for which an established reserve does not already exist. Management reviews the assumptions and risk of loss periodically for trade and other receivables. Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The specific actions taken by each Duke Energy Registrant are described in Note 3. The impact of COVID-19 and Duke Energy's related response on customers' ability to pay for service is uncertain, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates.

The aging of trade receivables is presented in the table below. Duke Energy considers receivables greater than 30 days outstanding past due.

	June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont

UNBILLED REVENUE

Unbilled revenues are recognized by applying customer billing rates to the estimated volumes of energy or natural gas delivered but not yet billed. Unbilled revenues can vary significantly from period to period as a result of seasonality, weather, customer usage patterns, customer mix, average price in effect for customer classes, timing of rendering customer bills and meter reading schedules and the impact of weather normalization or margin decoupling mechanisms.

Unbilled revenues are included within Receivables and Receivables of VIEs on the Condensed Consolidated Balance Sheets as shown in the following table.

(in millions)	June 30, 2020	December 31, 2019
Duke Energy	$ 829	$ 843
Duke Energy Carolinas	332	298
Progress Energy	274	217
Duke Energy Progress	137	122
Duke Energy Florida	137	95
Duke Energy Ohio	1	1
Duke Energy Indiana	7	16
Piedmont	6	78

Additionally, Duke Energy Ohio and Duke Energy Indiana sell, on a revolving basis, nearly all of their retail accounts receivable, including receivables for unbilled revenues, to an affiliate, CRC, and account for the transfers of receivables as sales. Accordingly, the receivables sold are not reflected on the Condensed Consolidated Balance Sheets of Duke Energy Ohio and Duke Energy Indiana. See Note 11 for further information. These receivables for unbilled revenues are shown in the table below.

(in millions)	June 30, 2020	December 31, 2019
Duke Energy Ohio	$ 68	$ 82
Duke Energy Indiana	106	115

13. STOCKHOLDERS' EQUITY

Basic EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities, by the weighted average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities, by the diluted weighted average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other agreements to issue common stock, such as stock options and equity forward sale agreements, were exercised or settled. Duke Energy's participating securities are restricted stock units that are entitled to dividends declared on Duke Energy common stock during the restricted stock unit's vesting periods. Dividends declared on preferred stock are recorded on the Condensed Consolidated Statements of Operations as a reduction of net income to arrive at net income available to Duke Energy common stockholders. Dividends accumulated on preferred stock are an adjustment to net income used in the calculation of basic and diluted EPS.

The following table presents Duke Energy's basic and diluted EPS calculations, the weighted average number of common shares outstanding and common and preferred share dividends declared.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions, except per share amounts)	2020	2019	2020	2019
Net (loss) income available to Duke Energy common stockholders excluding impact of participating securities	$ (817)	$ 819	$ 82	$ 1,718
Accumulated preferred stock dividends	(12)	—	—	—
Net (loss) income available to Duke Energy common stockholders excluding impact of participating securities and including accumulated preferred stock dividends	$ (829)	$ 819	$ 82	$ 1,718
Weighted average common shares outstanding – basic	735	728	734	728
Equity forwards	—	—	1	—
Weighted average common shares outstanding – diluted	735	728	735	728
Earnings (Loss) Per Share available to Duke Energy common stockholders				
Basic and diluted	$ (1.13)	$ 1.12	$ 0.11	$ 2.36
Potentially dilutive items excluded from the calculation[a]	2	2	2	2
Dividends declared per common share	$ 0.945	$ 0.928	$ 1.890	$ 1.855
Dividends declared on Series A preferred stock per depositary share[b]	$ 0.359	$ 0.307	$ 0.719	$ 0.307
Dividends declared on Series B preferred stock per share[c]	$ —	$ —	$ 24.917	$ —

(a) Performance stock awards were not included in the dilutive securities calculation because the performance measures related to the awards had not been met.

(b) 5.75% Series A Cumulative Redeemable Perpetual Preferred Stock dividends are payable quarterly in arrears on the 16th day of March, June, September and December. The preferred stock has a $25 liquidation preference per depositary share.

(c) 4.875% Series B Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Stock dividends are payable semiannually in arrears on the 16th day of March and September. The preferred stock has a $1,000 liquidation preference per share.

2021 Settlement Updated MFR F Schedules-000387

Common Stock

In November 2019, Duke Energy filed a prospectus supplement and executed an Equity Distribution Agreement (EDA) under which it may sell up to $1.5 billion of its common stock through an at-the-market (ATM) offering program, including an equity forward sales component. Under the terms of the EDA, Duke Energy may issue and sell shares of common stock through September 2022. In March 2020, Duke Energy marketed approximately 940,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $89.76 per share. In May 2020, Duke Energy marketed approximately 903,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $82.44 per share.

Separately, in November 2019, Duke Energy marketed an equity offering of 28.75 million shares of common stock through an Underwriting Agreement. In connection with the offering, Duke Energy entered into an equity forward sales agreement with an initial forward price of $85.99 per share.

The equity forward sales agreements require Duke Energy to either physically settle the transaction by issuing shares in exchange for net proceeds at the then-applicable forward sale price specified by the agreement, or net settle in whole or in part through the delivery or receipt of cash or shares. The settlement alternatives are at Duke Energy's election. Settlement of the forward sales agreements are expected to occur on or prior to December 31, 2020. Until settlement of the equity forwards, EPS dilution resulting from the agreements, if any, will be determined under the treasury stock method.

14. EMPLOYEE BENEFIT PLANS

DEFINED BENEFIT RETIREMENT PLANS

Duke Energy and certain subsidiaries maintain, and the Subsidiary Registrants participate in, qualified and non-qualified, non-contributory defined benefit retirement plans. Duke Energy's policy is to fund amounts on an actuarial basis to provide assets sufficient to meet benefit payments to be paid to plan participants.

QUALIFIED PENSION PLANS

The following tables include the components of net periodic pension costs for qualified pension plans.

	Three Months Ended June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 42	$ 14	$ 12	$ 8	$ 6	$ 1	$ 2	$ 2

(in millions)	Six Months Ended June 30, 2020							
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 83	$ 26	$ 24	$ 14	$ 11	$ 2	$ 4	$ 3
Interest cost on projected benefit obligation	135	31	43	19	23	8	11	5
Expected return on plan assets	(286)	(72)	(95)	(44)	(51)	(14)	(21)	(11)
Amortization of actuarial loss	64	14	20	9	11	3	6	5
Amortization of prior service credit	(16)	(4)	(2)	(1)	(1)	—	(1)	(5)
Amortization of settlement charges	5	2	1	1	—	—	—	—
Net periodic pension costs	$ (15)	$ (3)	$ (9)	$ (2)	$ (7)	$ (1)	$ (1)	$ (3)

(in millions)	Six Months Ended June 30, 2019							
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 74	$ 24	$ 21	$ 12	$ 10	$ 2	$ 4	$ 3
Interest cost on projected benefit obligation	165	41	52	24	27	9	13	6
Expected return on plan assets	(286)	(75)	(89)	(44)	(44)	(14)	(21)	(11)
Amortization of actuarial loss	49	11	18	6	12	1	3	3
Amortization of prior service credit	(16)	(4)	(1)	(1)	(1)	—	(1)	(5)
Net periodic pension costs	$ (14)	$ (3)	$ 1	$ (3)	$ 4	$ (2)	$ (2)	$ (4)

NON-QUALIFIED PENSION PLANS

Net periodic pension costs for non-qualified pension plans were not material for the three and six months ended June 30, 2020, and 2019.

OTHER POST-RETIREMENT BENEFIT PLANS

Net periodic costs for OPEB plans were not material for the three and six months ended June 30, 2020, and 2019.

15. INCOME TAXES

EFFECTIVE TAX RATES

The ETRs from continuing operations for each of the Duke Energy Registrants are included in the following table.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Duke Energy	**26.2%**	15.9%	**98.9%**	12.6%
Duke Energy Carolinas	**13.7%**	19.7%	**15.1%**	18.7%
Progress Energy	**14.9%**	16.7%	**16.1%**	17.0%
Duke Energy Progress	**13.9%**	16.3%	**15.7%**	17.1%
Duke Energy Florida	**19.1%**	19.6%	**19.4%**	19.5%
Duke Energy Ohio	**15.4%**	16.1%	**16.6%**	16.5%
Duke Energy Indiana	**17.3%**	24.2%	**19.3%**	24.2%
Piedmont	**128.6%**	22.2%	**5.8%**	21.8%

The increase in the ETR for Duke Energy for the three and six months ended June 30, 2020, was primarily due to the impact of an abandonment of the ACP investment and an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Carolinas for the three months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes and certain favorable tax credits.

The decrease in the ETR for Duke Energy Carolinas for the six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Progress Energy for the three months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Progress for the three and six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Indiana for the three and six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The increase in the ETR for Piedmont for the three months ended June 30, 2020, was primarily due to an increase in AFUDC Equity, in relation to pretax losses.

The decrease in the ETR for Piedmont for the six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC equity.

OTHER TAX MATTERS

On March 27, 2020, the CARES Act was enacted. The CARES Act is an emergency economic stimulus package in response to the COVID-19 pandemic. Among other provisions, the CARES Act accelerates the remaining AMT credit refund allowances resulting in taxpayers being able to immediately claim a refund in full for any AMT credit carryforwards. As a result, the remaining AMT credit carryforwards were reclassified in the first quarter 2020 to a current receivable included in Other within Current Assets on the Condensed Consolidated Balance Sheets. The total income tax receivable related to AMT credit carryforwards is approximately $572 million as of June 30, 2020. The other provisions within the CARES Act do not materially impact Duke Energy's income tax accounting. See Note 1 for information on COVID-19.

16. SUBSEQUENT EVENTS

For information on subsequent events related to regulatory matters and variable interest entities, see Notes 3 and 11.

2021 Settlement Updated MFR F Schedules-000390

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following combined Management's Discussion and Analysis of Financial Condition and Results of Operations is separately filed by Duke Energy and Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. However, none of the registrants make any representation as to information related solely to Duke Energy or the Subsidiary Registrants of Duke Energy other than itself.

DUKE ENERGY

Duke Energy is an energy company headquartered in Charlotte, North Carolina. Duke Energy operates in the U.S. primarily through its wholly owned subsidiaries, Duke Energy Carolinas, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. When discussing Duke Energy's consolidated financial information, it necessarily includes the results of the Subsidiary Registrants, which, along with Duke Energy, are collectively referred to as the Duke Energy Registrants.

Management's Discussion and Analysis should be read in conjunction with the Condensed Consolidated Financial Statements and Notes for the six months ended June 30, 2020, and with Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Executive Overview

ACP

On April 15, 2020, the United States District Court for the District of Montana granted partial summary judgment in favor of the plaintiffs in Northern Plains Resource Council v. U.S. Army Corps of Engineers (USACE) (Northern Plains), vacating USACE's Nationwide Permit 12 (NWP 12) and remanding it to USACE for consultation under the Endangered Species Act (ESA) of 1973. In Northern Plains, the court ruled that NWP 12 was unlawful because USACE did not consult under the ESA with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service prior to NWP 12's reissuance in 2017. Because NWP 12 has been vacated and its application enjoined, USACE currently has suspended verification of any new or pending applications under NWP 12 until further court action clarifies the situation.

On May 28, 2020, the U.S. Court of Appeals for the Ninth Circuit issued a ruling that limited the NWP 12 vacatur to energy infrastructure projects. In July 2020, the Supreme Court of the United States issued an order allowing other new oil and gas pipeline projects to use the NWP 12 process pending appeal to the U.S. Court of Appeals for the Ninth Circuit; however, that did not decrease the uncertainty associated with an eventual ruling. Together, these rulings indicated that the timeline to reinstate the necessary water crossing permits for ACP would likely cause further delays and cost increases.

On July 5, 2020, Dominion announced a sale of substantially all of its gas transmission and storage segment assets, operations core to the ACP pipeline project.

As a result of the uncertainty created by the NWP 12 rulings, the potential impact on the cost and schedule for the project, the ongoing legal challenges and risk of additional legal challenges throughout construction and Dominion's decision to sell substantially all of its gas transmission and storage segment assets, Duke Energy's Board of Directors and management decided that it was not prudent to continue to invest in the project. On July 5, 2020, Duke Energy and Dominion announced the cancellation of the ACP pipeline.

As a result, Duke Energy recorded a pretax charge to earnings of approximately $2.0 billion for the three months and six months ended June 30, 2020, within Equity in (losses) earnings of unconsolidated affiliates on the Duke Energy Condensed Consolidated Statements of Operations. The tax benefit associated with this abandonment was $374 million and is recorded in Income Tax (Benefit) Expense on the Duke Energy Condensed Consolidated Statements of Operations. Additional charges of less than $100 million are expected to be recorded within the next 12 months as ACP incurs obligations to exit operations.

See Notes 3, 4, and 11 to the Condensed Consolidated Financial Statements, "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information.

Even though the ACP pipeline was a critical infrastructure project for transporting natural gas into the Southeastern United States, natural gas still is an important fuel to help Duke Energy reach its carbon reduction goals of 50% by 2030 and net-zero carbon emissions by 2050 in a reliable and cost effective manner. In addition, Duke Energy will continue advancing its clean energy goals by investing in renewables, battery storage, energy efficiency programs and grid projects.

Social Justice and Racial Equity

In response to national events, in June and July 2020, the Duke Energy Foundation pledged $1.75 million to nonprofit organizations committed to social justice and racial equity. This grant builds upon the company's past efforts to support and encourage diversity, inclusion and equity in our company and communities. The company will continue to engage its employees, local organizations and leaders to understand how to be a part of the long-term solution to the social justice issues our communities and organizations face.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. Retail electric sales are down 6.5% for the quarter compared to the prior year due to the pandemic. This reduction however is not as steep as expected in our revised March 2020 forecast reflecting the potential economic impact of COVID-19 on 2020 results. The company also incurred approximately $40 million of incremental COVID-19 costs, primarily bad debt expense, personal protective equipment and cleaning supplies, and experienced another $25 million of waived late payment fees for the six months ended June 30, 2020. The Duke Energy Registrants are monitoring developments closely, have taken steps to mitigate the impacts to our business, and have a pandemic response plan in place to protect our employees, customers and communities. We expect to begin a sales rebound during the second half of 2020 and have cost mitigation plans.

- Employees. The health of our employees is of paramount importance. Power plants and electricity and natural gas delivery facilities are staffed. Employees who are not involved with power generation, power delivery, customer service or certain other functions have been performing their work duties remotely from home. Employees who need to interact with customers in person are following the Centers for Disease Control and Prevention's safety guidelines, including social distancing and use of face masks. Operating procedure changes include additional cleaning and disinfection procedures at our facilities.

- Customers. The Duke Energy Subsidiary Registrants began, in the first quarter of 2020, a suspension of disconnections for nonpayment in order to give customers experiencing financial hardship extra time to make payments. This is expected to result in an increase in future charge-offs over historical levels. In addition, several Subsidiary Registrants are waiving late payment charges and other fees for credit cards and returned checks. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information. The COVID-19 pandemic and stay-at-home orders have impacted commercial and industrial customers, and many of them have suspended operations which is impacting the Duke Energy Registrants' volumes. Several large industrial customers have begun to restart their businesses since initially closing in late March and April.

- Communities. The Duke Energy Foundation announced approximately $6 million in donations and grants as of June 30, 2020, to support hunger relief, local health and human services nonprofits, and education initiatives across the Duke Energy Registrants' service territories.

- Balance Sheet Strength and Liquidity Assurance. See Notes 5 and 13 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities," and "Stockholders Equity," respectively, for additional information. During the six months ended June 30, 2020:

    - Duke Energy issued approximately $3.3 billion of debt.

    - Duke Energy entered into and borrowed approximately $1.7 billion under a 364-day Term Loan Credit Agreement.

    - Duke Energy drew down the remaining $500 million of availability under its existing $1 billion Three-Year Revolving Credit Facility.

    - Duke Energy issued $85 million of common stock through a forward sales agreement which is expected to settle on or prior to December 31, 2020.

- Policymaker actions. The CARES Act was signed by President Trump on March 27, 2020. Duke Energy Registrants will benefit from certain provisions such as the AMT acceleration and deferral of certain payroll taxes. See Note 15 to the Condensed Consolidated Financial Statements, "Income Taxes," for additional information.

Rate Case and utility commission filings. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

- On July 31, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain remaining issues in the 2019 base rate proceeding. As a result of the additional settlement terms, the NCUC ordered the remote evidentiary hearing to be delayed until August 24, 2020. Duke Energy Carolinas and Duke Energy Progress expect the NCUC to issue an order on each net rate increase by the end of the year. On August 4, 2020 and August 7, 2020, respectively, Duke Energy Carolinas and Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund.

- Duke Energy Florida filed a petition with the FPSC on April 2, 2020, to accelerate a fuel cost refund to customers in the month of May 2020. Typically, the refund would be made over the course of 2021. The FPSC approved the petition on April 28, 2020.

- Duke Energy Kentucky filed an electric rate case with the KPSC on September 3, 2019. On April 27, 2020, the KPSC issued its decision and new customer rates were effective on May 1, 2020. On May 18, 2020, Duke Energy Kentucky filed its motion for rehearing, and on June 4, 2020, the motion was granted in part and denied in part by the KPSC.

- Duke Energy Indiana filed a general rate case with the IURC on July 2, 2019. The IURC issued its order June 29, 2020, approving a revenue increase of approximately $146 million, before utility receipt taxes. Customer rates were effective July 30, 2020. Several groups filed notices of appeal of the IURC order on July 29, 2020.

- COVID-19 deferral requests

    - Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic on August 7, 2020. Duke Energy Carolinas and Duke Energy Progress are evaluating a filing with the PSCSC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic.

    - Duke Energy Ohio on May 11, 2020, filed with the PUCO a request seeking deferral of incremental costs incurred due to the COVID-19 pandemic, as well as specific miscellaneous lost revenues. The request seeks to use existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application.

    - On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs associated with the COVID-19 pandemic. On June 29, 2020, the IURC issued its order permitting jurisdictional utilities to use regulatory accounting for any impacts associated with the proh bition on utility disconnections, waiver or exclusion of certain utility fees, the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollectible and incremental bad debt expense.

Results of Operations

Non-GAAP Measures

Management's Discussion and Analysis includes financial information prepared in accordance with GAAP in the U.S., as well as certain non-GAAP financial measures such as adjusted earnings and adjusted EPS discussed below. Generally, a non-GAAP financial measure is a numerical measure of financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. Non-GAAP financial measures should be viewed as a supplement to, and not a substitute for, financial measures presented in accordance with GAAP. Non-GAAP measures presented may not be comparable to similarly titled measures used by other companies because other companies may not calculate the measures in the same manner.

Management evaluates financial performance in part based on non-GAAP financial measures, including adjusted earnings and adjusted EPS. Adjusted earnings and adjusted EPS represent income from continuing operations available to Duke Energy Corporation common stockholders in dollar and per share amounts, adjusted for the dollar and per share impact of special items. As discussed below, special items represent certain charges and credits, which management believes are not indicative of Duke Energy's ongoing performance. The most directly comparable GAAP measures for adjusted earnings and adjusted EPS are GAAP Reported Earnings (Loss) and GAAP Reported Earnings (Loss) Per Share, respectively.

Special items included in the periods presented below include the following, which management believes do not reflect ongoing costs:

- ACP represents costs related to the abandonment of the ACP investment.
- Severance represents the reversal of 2018 costs which were deferred as a result of the partial settlement in the Duke Energy Carolinas 2019 North Carolina rate case.

Three Months Ended June 30, 2020, as compared to June 30, 2019

GAAP reported loss per share was $(1.13) for the second quarter of 2020 compared to earnings per share of $1.12 in the second quarter of 2019. GAAP reported earnings decreased primarily due to the abandonment of the investment in ACP.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy's second quarter 2020 adjusted EPS was $1.08 compared to $1.12 for the second quarter of 2019. The decrease in adjusted earnings was primarily due to unfavorable weather, lower volumes and higher depreciation expense, partially offset by lower operations and maintenance expense.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Three Months Ended June 30,			
	2020		2019	
(in millions, except per share amounts)	**(Loss) Earnings**	**(Loss) Earnings Per Share**	**Earnings**	**EPS**
GAAP Reported (Loss) Earnings/GAAP Reported (Loss) Earnings Per Share	**$ (817)**	**$ (1.13)**	$ 820	$ 1.12
Adjustments:				
ACP[(a)]	**1,626**	**2.21**	—	—
Adjusted Earnings/Adjusted EPS	**$ 809**	**$ 1.08**	$ 820	$ 1.12

(a) Net of tax benefit of $374 million.

Six Months Ended June 30, 2020, as compared to June 30, 2019

GAAP Reported EPS was $0.11 for the six months ended June 30, 2020, compared to $2.36 for the six months ended June 30, 2019. GAAP reported earnings decreased primarily due to the abandonment of the investment in ACP.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy's adjusted EPS was $2.22 for the six months ended June 30, 2020, compared to $2.36 for the six months ended June 30, 2019. The decrease in adjusted earnings was primarily due to unfavorable weather, lower volumes, higher depreciation expense, higher financing costs and a prior year adjustment related to income tax recognition for equity method investments. This was partially offset by positive rate case impacts, growth in Commercial Renewables and lower operations and maintenance expense.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Six Months Ended June 30,			
	2020		2019	
(in millions, except per-share amounts)	Earnings	EPS	Earnings	EPS
GAAP Reported Earnings/GAAP Reported EPS	**$ 82**	**$ 0.11**	$ 1,720	$ 2.36
Adjustments:				
ACP[(a)]	**1,626**	**2.21**	—	—
Severance[(b)]	**(75)**	**(0.10)**	—	—
Adjusted Earnings/Adjusted EPS	**$ 1,633**	**$ 2.22**	$ 1,720	$ 2.36

(a) Net of tax benefit of $374 million.
(b) Net of tax expense of $23 million.

SEGMENT RESULTS

The remaining information presented in this discussion of results of operations is on a GAAP basis. Management evaluates segment performance based on segment income. Segment income is defined as income from continuing operations net of income attr butable to noncontrolling interests and preferred stock dividends. Segment income includes intercompany revenues and expenses that are eliminated in the Condensed Consolidated Financial Statements.

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The remainder of Duke Energy's operations is presented as Other. See Note 2 to the Condensed Consolidated Financial Statements, "Business Segments," for additional information on Duke Energy's segment structure.

Three Months Ended June 30, 2020, as compared to June 30, 2019

Electric Utilities and Infrastructure's variance is due to unfavorable weather, lower weather-normal retail sale volumes driven by impacts from the COVID-19 pandemic and lower wholesale revenues, partially offset by higher revenues resulting from the South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $332 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;

- a $79 million decrease in retail sales, net of fuel revenues, due to unfavorable weather compared to prior year;
- a $47 million decrease in wholesale revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress; and
- a $32 million decrease in weather-normal retail sale volumes due to lower nonresidential customer demand driven by impacts from the COVID-19 pandemic.

Partially offset by:

- a $23 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $13 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $295 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel, coal, and natural gas costs; and
- a $78 million decrease in operation, maintenance and other expense driven by lower employee benefit costs and lower outage costs.

Partially offset by:

- a $42 million increase in depreciation and amortization expense primarily due to additional plant in service and impacts from the South Carolina retail rate cases.

Interest Expense. The variance was primarily due to higher outstanding debt in the current year and favorable debt return on deferred coal ash spend in the prior year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the three months ended June 30, 2020, and June 30, 2019, were 15.3% and 19.5%. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Electric Utilities and Infrastructure’s variance is due to unfavorable weather, lower weather-normal retail sale volumes driven by impacts from the COVID-19 pandemic and lower wholesale revenues, partially offset by higher revenues resulting from the South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $482 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;
- a $124 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year;
- a $63 million decrease in wholesale revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress; and
- a $15 million decrease in weather-normal retail sale volumes due to lower nonresidential customer demand driven by impacts from the COVID-19 pandemic.

Partially offset by:

- a $39 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $32 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $458 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel, coal, and natural gas costs; and
- a $35 million decrease in operation, maintenance and other expense primarily lower employee benefit costs and lower outage costs.

Partially offset by:

- a $72 million increase in depreciation and amortization expense primarily due to additional plant in service and impacts from the South Carolina retail rate cases.

Interest Expense. The variance was primarily due to higher outstanding debt in the current year and favorable debt return on deferred coal ash spend in the prior year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the six months ended June 30, 2020, and 2019, were 16.4% and 19.0%, respectively. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Gas Utilities and Infrastructure

	Three Months Ended June 30,			Six Months Ended June 30,

395

Three Months Ended June 30, 2020, as compared to June 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the abandonment of the investment in ACP. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $16 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs; and
- a $7 million decrease due to return of EDIT to customers.

Partially offset by:

- a $7 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $16 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs; and
- an $8 million decrease in operation, maintenance and other due to deferral of previously expensed IT project costs and lower employee benefits costs.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by the abandonment of the investment in ACP.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, offset by lower AFUDC debt income.

Income Tax Benefit. The decrease in tax expense was primarily due to a decrease in pretax income driven by the impact of an abandonment of the ACP investment. The ETRs for the three months ended June 30, 2020, and 2019, were 19.2% and 7%, respectively. The increase in the ETR was primarily due to the impact of an abandonment of the ACP investment.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the abandonment of ACP. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $144 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs; and
- a $27 million decrease due to return of EDIT to customers.

Partially offset by:

- a $60 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $144 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs; and
- an $8 million decrease in operation, maintenance and other due to deferral of previously expensed IT project costs and lower employee benefits costs.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by the abandonment of the investment in ACP.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, offset by lower AFUDC debt income.

Income Tax Benefit. The decrease in tax expense was primarily due to a decrease in pretax income driven by the impact of an abandonment of the ACP investment. The ETRs for the six months ended June 30, 2020, and 2019, were 20.7% and 2.9%, respectively. The increase in the ETR was primarily due to an adjustment, recorded in the first quarter of 2019, related to the income tax recognition for equity method investments. The equity method investment adjustment was immaterial and relates to prior years.

Commercial Renewables

	Three Months Ended June 30,			Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**	**2020**	**2019**	**Variance**

(a) Certain projects are included in tax equity structures where investors have differing interests in the project's economic attributes. One hundred percent of the tax equity project's capacity is included in the table above.

Three Months Ended June 30, 2020, as compared to June 30, 2019

Commercial Renewables' results were favorable primarily due to new investments in solar projects. During the second quarter of 2020, Commercial Renewables had over 250MW of capacity placed in service. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The increase was primarily due to new solar projects placed in service.

Operating Expenses. The increase was primarily due to higher depreciation and property tax expense as a result of new projects placed in service and an impairment charge in the current year related to a non-contracted wind project.

Other Income and Expenses, net. The increase was primarily due to mark-to-market losses in the solar portfolio in the prior year.

Interest Expense. The decrease was primarily due to higher capitalized interest for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by a decrease in production tax credits generated and an increase in taxes associated with new tax equity investments.

Loss Attributable to Noncontrolling Interests. The increase was primarily due to tax equity structures related to new renewable investments.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Commercial Renewables' results were favorable primarily due to new investments in renewable projects and favorable wind revenue. Since the second quarter of 2019, Commercial Renewables has placed in service over 700MW of capacity.

The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The increase was primarily due to new projects placed in service and favorable wind portfolio revenue as a result of favorable market pricing and wind resource.

Operating Expenses. The increase was primarily due to higher depreciation and property tax expense as a result of new projects placed in service and an impairment charge in the current year related to a non-contracted wind project.

Other Income and Expenses, net. The increase was primarily due to mark-to-market losses in the solar portfolio in the prior year.

Interest Expense. The decrease was primarily due to higher capitalized interest for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by an increase in taxes associated with new tax equity investments and a decrease in production tax credits generated.

Loss Attributable to Noncontrolling Interests. The increase was primarily due to tax equity structures related to new renewable investments.

Net Loss	**$ (84)**	$ (115)	$ 31	**$ (196)**	$ (204)	$ 8

Three Months Ended June 30, 2020, as compared to June 30, 2019

The variance was primarily driven by lower state income tax expense. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The increase was primarily driven by higher loss experience related to non-property captive insurance claims and higher expenses associated with certain employee benefit obligations.

Other Income and Expenses, net. The variance was primarily due to higher returns on investments that fund certain employee benefit obligations, partially offset by lower earnings on the NMC investment.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Income Tax Benefit. The increase in the tax benefit was primarily driven by lower state income tax expense. The ETRs for the three months ended June 30, 2020, and 2019 were 48.1% and 24.3%, respectively. The increase in the ETR was primarily due to lower state income tax expense.

Six Months Ended June 30, 2020, as compared to June 30, 2019

The variance was primarily driven by a reversal of corporate allocated severance costs, partially offset by lower returns on investments and the declaration of preferred stock dividends. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The decrease was primarily due to the deferral of 2018 corporate allocated severance costs due to the partial settlement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case.

Other Income and Expenses, net. The variance was primarily due to lower returns on investments that fund certain employee benefit obligations, lower earnings on the NMC investment and lower interest income due to a tax true up in the prior year.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Preferred Dividends. The variance was driven by the declaration of preferred stock dividends on preferred stock issued in 2019.

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential sales	(5.0)%
General service sales	(6.7)%
Industrial sales	(9.6)%
Wholesale power sales	(3.0)%
Joint dispatch sales	(60.0)%
Total sales	(7.2)%
Average number of customers	1.8 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $77 million decrease in retail sales due to unfavorable weather in the current year; and
- a $66 million decrease in fuel revenues due to lower prices and retail sales volumes.

Partially offset by:

- a $37 million increase in weather-normal retail sales volumes; and
- a $17 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $65 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by higher storm restoration costs; and
- a $38 million decrease in fuel used in electric generation and purchased power primarily due to lower retail sales volumes, net of a prior period true up.

Partially offset by:

- a $55 million increase in depreciation and amortization expense primarily due to additional plant in service and new depreciation rates associated with the South Carolina rate case.

Other Income and Expenses, net. The variance was primarily due to higher AFUDC equity in the current year.

Interest Expense. The variance was primarily due to higher debt outstanding in the current year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

Income Before Income Taxes	**747**	695	52
Income Tax Expense	**120**	118	2
Net Income	**627**	577	50

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $380 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic at Duke Energy Florida and lower fuel prices, volumes and native load transfer sales in the current year at Duke Energy Progress;
- a $49 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress, partially offset by increased demand at Duke Energy Florida;
- a $44 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year at Duke Energy Progress, partially offset by favorable weather in the current year at Duke Energy Florida;
- a $32 million decrease in rider revenues primarily due to the Crystal River 3 uprate regulatory asset being fully recovered in 2019 at Duke Energy Florida; and
- a $29 million decrease in weather-normal retail sales volume.

Partially offset by:

- a $55 million increase in storm revenues due to Hurricane Dorian collections at Duke Energy Florida;
- a $39 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment at Duke Energy Florida;
- a $15 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers at Duke Energy Progress; and
- a $12 million increase in other revenues primarily due to increased transmission revenues at Duke Energy Florida.

Operating Expenses. The variance was driven primarily by:

- a $373 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix at Duke Energy Progress and lower fuel costs at Duke Energy Florida;
- a $30 million decrease in operation, maintenance and other expense at Duke Energy Progress primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs, partially offset by storm cost amortizations at Duke Energy Florida; and
- an $8 million decrease in property and other taxes primarily due to lower revenue related taxes as a result of the decreased fuel revenues, and lower accrued property taxes at Duke Energy Florida.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt at Duke Energy Progress.

Joint dispatch sales	22.8 %
Total sales	(6.4)%
Average number of customers	1.6 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $185 million decrease in fuel cost recovery driven by lower fuel prices and volumes as well as less native load transfer sales in the current year;
- a $61 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and decreased volumes, partially offset by increased capacity rates;
- a $60 million decrease in retail sales due to unfavorable weather in the current year; and
- a $13 million decrease in weather-normal retail sales volumes in the current year.

Partially Offset by:

- a $15 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $194 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix; and
- a $70 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

Wholesale and other	(10.7)%
Total sales	(1.0)%
Average number of customers	1.7 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $195 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic;
- a $32 million decrease in rider revenues primarily due to full recovery of the Crystal River 3 uprate regulatory asset in 2019; and
- a $16 million decrease in weather-normal retail sales volumes.

Partially offset by:

- a $55 million increase in storm revenues due to Hurricane Dorian collections;
- a $39 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment;
- a $16 million increase in retail sales, net of fuel revenues, due to favorable weather in the current year;
- a $12 million increase in other revenues primarily due to increased transmission revenues; and
- a $12 million increase in wholesale power revenues, net of fuel, primarily due to increased demand.

Operating Expenses. The variance was driven primarily by:

- a $179 million decrease in fuel used in electric generation and purchased power primarily due to lower fuel costs; and
- a $16 million decrease in property and other taxes driven by lower gross receipts taxes due to decreased fuel revenues as well as lower accrued property taxes.

Partially offset by:

- a $40 million increase in operation, maintenance and other expense primarily due to storm cost amortizations.

Income Tax Expense. The increase in tax expense was primarily due to an increase in pretax income.

Average number of customers	1.3 %	0.8 %

402

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $34 million decrease in fuel related revenues primarily due to lower natural gas prices and decreased volumes;
- an $8 million decrease in other revenues due to lower OVEC sales into PJM; and
- a $6 million decrease in bu k power marketing sales.

Partially offset by:

- a $10 million increase in retail pricing primarily due to rate case impacts in Kentucky.

Operating Expenses. The variance was driven primarily by:

- a $36 million decrease in fuel expense, primarily driven by lower natural gas prices and decreased volumes; and
- a $37 million decrease in operations, maintenance and other expense primarily due to Customer Connect and Network Integration Transmission Services deferrals, the timing of energy efficiency programs and outage costs, lower employee benefit expenses and lower vegetation and pole maintenance costs.

Partially offset by:

- a $6 million increase in depreciation and amortization primarily driven by an increase in distribution plant, partially offset by lower amortization due to the suspension of the MGP rider in Ohio.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity and lower intercompany interest income.

2021 Settlement Updated MFR F Schedules-000403

DUKE ENERGY INDIANA

Results of Operations

(in millions)	Six Months Ended June 30, 2020	2019	Variance
Operating Revenues	**$ 1,309**	$ 1,482	$ (173)

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential sales	(3.5)%
General service sales	(9.3)%
Industrial sales	(9.8)%
Wholesale power sales	(4.3)%
Total sales	(7.1)%
Average number of customers	1.4 %

403

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $118 million decrease in fuel revenues primarily due to lower fuel cost recovery driven by customer demand and fuel prices;
- a $20 million decrease in weather-normal retail sales volumes driven by lower nonresidential customer demand;
- an $18 million decrease in rider revenues primarily related to lower Edwardsport IGCC sales volumes; and
- a $9 million decrease primarily related to the true up of wholesale revenues in the current year.

Operating Expenses. The variance was driven primarily by:

- a $131 million decrease in fuel used in electric generation and purchased power expense primarily due to lower coal and natural gas costs, lower amortization of deferred fuel costs and lower purchased power expense; and
- a $20 million decrease in operation, maintenance and other expense primarily due to lower outage expenses, storm restoration costs, training costs, employee related costs and the Customer Connect deferral.

Other Income and Expenses, net. The decrease was primarily due to life insurance proceeds received in the prior year.

Interest Expense. The variance was primarily due to higher fixed-rate debt outstanding in the current year and a favorable debt return, in the prior year, on the cumulative balance of deferred coal ash spend.

Income Tax Expense. The decrease in income tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

2021 Settlement Updated MFR F Schedules-000404

PIEDMONT

Results of Operations

(in millions)	Six Months Ended June 30, 2020	2019	Variance
Operating Revenues	**$ 709**	$ 788	$ (79)
Operating Expenses			
Cost of natural gas	**215**	338	(123)
Operation, maintenance and other	**159**	163	(4)
Depreciation and amortization	**88**	84	4
Property and other taxes	**24**	25	(1)
Total operating expenses	**486**	610	(124)
Operating Income	**223**	178	45
Other Income and Expenses, net	**28**	12	16
Interest Expense	**60**	43	17
Income Before Income Taxes	**191**	147	44
Income Tax Expense	**11**	32	(21)
Net Income	**$ 180**	$ 115	$ 65

The following table shows the percent changes in dekatherms delivered and average number of customers. The percentages for all throughput deliveries represent billed and unbilled sales. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential deliveries	(4.6)%
Commercial deliveries	(11.8)%
Industrial deliveries	(3.3)%
Power generation deliveries	(2.8)%
For resale	(15.0)%
Total throughput deliveries	(4.3)%
Secondary market volumes	(17.7)%
Average number of customers	1.7 %

Due to the margin decoupling mechanism in North Carolina and the weather normalization adjustment (WNA) mechanisms in South Carolina and Tennessee and fixed-price contracts with most power generation customers, changes in throughput deliveries do not have a material impact on Piedmont's revenues or earnings. The margin decoupling mechanism adjusts for variations in residential and commercial use per customer, including those due to weather and conservation. The WNA mechanisms mostly offset the impact of weather on bills rendered, but do not ensure full recovery of approved margin during periods when winter weather is significantly warmer or colder than normal.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $123 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs;
- a $27 million decrease due to return of EDIT to customers; and
- a $7 million decrease due to NCUC approval related to tax reform accounting from fixed-rate contracts in the prior year.

Partially offset by:

- a $60 million increase due to North Carolina base rate case increases; and
- a $15 million increase due to North Carolina IMR increases.

Operating Expenses. The variance was driven primarily by:

- a $123 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs.

Other Income and Expenses, net. The variance was driven primarily by AFUDC equity and intercompany interest related to Belews Creek and Marshall Power Generation contracts.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, partially offset by lower AFUDC debt income.

Income Tax Expense. The decrease in income tax expense was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC Equity, partially offset by an increase in pretax income.

Matters Impacting Future Results

The matters discussed herein could materially impact the future operating results, financial condition and cash flows of the Duke Energy Registrants and Business Segments.

COVID-19

Duke Energy cannot predict the extent to which the COVID-19 pandemic will impact its results of operations, financial position and cash flows in the future. Duke Energy will continue to actively monitor the impacts of COVID-19 including the economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown will adversely affect the company's customers, suppliers and partners and could cause an increase in certain costs, such as bad debt, and a reduction in the demand for energy. It could also cause delays in construction for Commercial Renewables and availability of financing. The company also has various pending rate case proceedings that have been delayed. Duke Energy has cost mitigation plans in place to partially offset these impacts, and the ability to execute these plans is critical to preserving future financial results. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

ACP

On July 5, 2020, Duke Energy and Dominion Energy determined that they would no longer invest in the construction of the Atlantic Coast Pipeline. Duke Energy has recorded $2.0 billion of pretax charges and expects additional charges of less than $100 million to be recorded when certain exit costs related to the project are incurred by ACP. Estimates used to calculate the loss could be revised and exit obligations which have not yet been incurred or recorded could have an adverse impact on future results. Furthermore, the loss of earnings from this project, including AFUDC, will lower Duke Energy's future expected results. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information.

Regulatory Matters

On December 31, 2019, Duke Energy Carolinas and Duke Energy Progress entered into a settlement agreement with North Carolina Department of Environmental Quality and certain community groups under which Duke Energy Carolinas and Duke Energy Progress agreed to excavate seven of the nine remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the two remaining basins, uncapped basin ash will be excavated and moved to lined landfills. Duke Energy Carolinas and Duke Energy Progress have also received orders from the PSCSC granting the companies' requests for retail rate increases but denying recovery of certain coal ash costs. Duke Energy Carolinas and Duke Energy Progress have appealed these decisions to the South Carolina Supreme Court and those appeals are pending. Appeals of the 2017 North Carolina approved rate cases for Duke Energy Carolinas and Duke Energy Progress are still pending at the North Carolina Supreme Court. The North Carolina Attorney General and various intervenors primarily dispute the allowance of recovery of coal ash costs from customers, which was approved by the NCUC. An order from regulatory or judicial authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on future results.

405

In 2015, the EPA published in the Federal Register a rule to regulate the disposal of CCR from electric utilities as solid waste. Duke Energy Indiana has interpreted the rule to identify the coal ash basin sites impacted and has assessed the amounts of coal ash subject to the rule and a method of compliance. Duke Energy Indiana's interpretation of the requirements of the CCR rule is subject to potential legal challenges and further regulatory approvals, which could result in additional ash basin closure requirements, higher costs of compliance and greater AROs. Additionally, Duke Energy Indiana has retired facilities that are not subject to the CCR rule. Duke Energy Indiana may incur costs at these facilities to comply with environmental regulations or to mitigate risks associated with on-site storage of coal ash. An order from regulatory authorities disallowing recovery of costs related to closure of ash basins could have an adverse impact.

Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida's service territories were impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages to the service territories of Duke Energy Carolinas and Duke Energy Progress. Duke Energy Florida's service territory was also impacted by Hurricane Michael, a Category 5 hurricane and the most powerful storm to hit the Florida Panhandle in recorded history. In September 2019, Hurricane Dorian impacted Duke Energy Progress and Duke Energy Florida's service territories. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact.

Duke Energy Carolinas received an order from the NCUC in 2018, which denied the Grid Rider Stipulation and deferral treatment of grid improvement costs. Duke Energy Carolinas and Duke Energy Progress have petitioned for deferral of future grid improvement costs in their 2019 rate cases. There could be adverse impact if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

In 2019, Duke Energy Carolinas and Duke Energy Progress filed general rate cases with the NCUC. The outcome of these rate cases could have a material impact.

The PUCO has issued an order authorizing recovery of MGP costs at certain sites in Ohio with a deadline to complete the MGP environmental investigation and remediation work prior to December 31, 2016. This deadline was subsequently extended to December 31, 2019. Duke Energy Ohio has filed for a request for extension of the deadline. A hearing on that request has not been scheduled. Disallowance of costs incurred, failure to complete the work by the deadline or failure to obtain an extension from the PUCO could result in an adverse impact.

For additional information, see Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters."

Other Matters

Duke Energy continues to experience growth in Commercial Renewables with tax equity structures; however, the future expiration of federal tax incentives could result in adverse impacts to future results of operations, financial position and cash flows.

2021 Settlement Updated MFR F Schedules-000406

Duke Energy continues to monitor recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market, due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Based on the most recent recoverability test performed this quarter, the carrying value approximated the aggregate estimated future cash flows for this plant and therefore further testing was not required. A continued decline in energy market pricing would likely result in a future impairment. Impairment of this asset could result in adverse impacts. For additional information, see Note 2 to the Condensed Consolidated Financial Statements, "Business Segments."

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

Duke Energy relies primarily upon cash flows from operations, debt and equity issuances and its existing cash and cash equivalents to fund its liquidity and capital requirements. Duke Energy's capital requirements arise primarily from capital and investment expenditures, repaying long-term debt and paying dividends to shareholders. Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, included a summary and detailed discussion of projected primary sources and uses of cash for 2020 to 2022.

During March 2020, in response to market volatility and the ongoing economic uncertainty related to COVID-19, Duke Energy took several actions to enhance the company's liquidity position including:

- Duke Energy drew down the remaining $500 million of availability under the existing $1 billion Three-Year Revolving Credit Facility, which was subsequently repaid during the second quarter of 2020; and
- Duke Energy entered into and borrowed the full amount under a $1.5 billion, 364-day Term Loan Credit Agreement. The Term Loan Credit Agreement contains a provision for additional borrowing capacity of $500 million. Duke Energy exercised the provision and borrowed an additional $188 million, for a total borrowing of approximately $1.7 billion.

Following March 2020, access to credit and equity markets has normalized. In addition to the financings to address the company's liquidity position, for the six months ended June 30, 2020, Duke Energy issued approximately $3.3 billion in debt, raised $111 million of common equity through its dividend reinvestment program, and paid down $500 million on the Three-Year Revolving Credit Facility. Despite the recovery in capital markets, Duke Energy continues to monitor access to credit and equity markets amid the ongoing economic uncertainty related to COVID-19.

As of June 30, 2020, Duke Energy had approximately $341 million of cash on hand, $5.4 billion available under its $8 billion Master Credit Facility and $500 million available under the $1 billion Three-Year Revolving Credit Facility. Duke Energy has additional liquidity available totaling approximately $2.6 billion under outstanding equity forward agreements. Duke Energy expects to have sufficient liquidity in the form of cash on hand, cash from operations and available credit capacity to support its funding needs. Duke Energy continues to monitor access to credit and equity markets. Refer to Notes 5 and 13 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities" and "Stockholders' Equity," respectively, for information regarding Duke Energy's debt and equity issuances, debt maturities and available credit facilities including the Master Credit Facility.

In light of the COVID-19 pandemic and cancellation of the ACP pipeline, Duke Energy currently does not expect significant changes to the total projected capital and investment expenditures provided in the Form 10-K for the year ended December 31, 2019. However, Duke Energy will continue to reassess capital projects depending on the duration and severity of economic impacts caused by the pandemic.

Cash Flow Information

The following table summarizes Duke Energy's cash flows.

	Six Months Ended June 30,	
(in millions)	**2020**	**2019**
Cash flows provided by (used in):		
Operating activities	**$ 3,357**	$ 3,056
Investing activities	**(5,471)**	(5,788)
Financing activities	**2,182**	2,622
Net increase (decrease) in cash, cash equivalents and restricted cash	**68**	(110)
Cash, cash equivalents and restricted cash at beginning of period	**573**	591
Cash, cash equivalents and restricted cash at end of period	**$ 641**	$ 481

406

2021 Settlement Updated MFR F Schedules-000407

OPERATING CASH FLOWS

The following table summarizes key components of Duke Energy's operating cash flows.

	Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**
Net (loss) income	**$ (2)**	$ 1,641	$ (1,643)
Non-cash adjustments to net income	**4,592**	2,917	1,675
Payments for asset retirement obligations	**(287)**	(336)	49
Working capital	**(946)**	(1,166)	220
Net cash provided by operating activities	**$ 3,357**	$ 3,056	$ 301

The variance was primarily due to timing of payments of property taxes, higher Nuclear Electric Insurance Limited (NEIL) refunds in the current year and lower storm costs in the current year.

INVESTING CASH FLOWS

The following table summarizes key components of Duke Energy's investing cash flows.

	Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**
Capital, investment and acquisition expenditures	**$ (5,267)**	$ (5,627)	$ 360
Other investing items	**(204)**	(161)	(43)
Net cash used in investing activities	**$ (5,471)**	$ (5,788)	$ 317

The variance relates to lower capital expenditures in the current year for plants now in service.

FINANCING CASH FLOWS

The following table summarizes key components of Duke Energy's financing cash flows.

	Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**
Issuances of long-term debt, net	**$ 1,837**	$ 2,467	$ (630)
Issuances of common stock	**57**	27	30
Issuances of preferred stock	**—**	973	(973)
Notes payable, commercial paper and other short-term borrowings	**1,624**	324	1,300
Dividends paid	**(1,391)**	(1,312)	(79)
Contributions from noncontrolling interests	**163**	193	(30)
Other financing items	**(108)**	(50)	(58)
Net cash provided by financing activities	**$ 2,182**	$ 2,622	$ (440)

The variance was primarily due to:

- a $1.3 billion increase in net proceeds from issuances of notes payable and commercial paper primarily due to borrowings of $1.7 billion under the 364-day Term Loan Credit Agreement.

Partially offset by:

- a $973 million decrease in proceeds from the issuance of preferred stock; and
- a $630 million decrease in proceeds from net issuances of long-term debt primarily due to the timing of issuances and redemptions of long-term debt.

OTHER MATTERS

Environmental Regulations

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time and result in new obligations of the Duke Energy Registrants. Refer to Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for further information regarding potential plant retirements and regulatory filings related to the Duke Energy Registrants.

On May 14, 2020, the five-year probation period following the Dan River coal ash spill ended. The court appointed monitor confirmed in U.S. District Court for the Eastern District of North Carolina that Duke Energy met or exceeded every obligation throughout the process. Separately, in a final report to the EPA, it was noted that the company made significant enhancements to its Ethics and Compliance Program and its environmental compliance programs.

Section 126 Petitions

On November 16, 2016, the state of Maryland filed a petition with EPA under Section 126 of the Clean Air Act alleging that 19 power plants, including two plants (three units) that Duke Energy Registrants own and operate, contribute to violations of EPA's National Ambient Air Quality Standards (NAAQS) for ozone in the state of Maryland. On March 12, 2018, the state of New York filed a petition with EPA, also under Section 126 of the Clean Air Act alleging that over 60 power plants, including six that Duke Energy Registrants own and operate, contribute to violations of EPA's ozone NAAQS in the state of New York. Both Maryland and New York sought EPA orders requiring the states in which the named power plants operate to impose more stringent NOx emission limitations on the plants. On October 5, 2018, EPA denied the Maryland petition. That same day, Maryland appealed EPA's denial. On October 18, 2019, EPA denied the New York petition, and New York appealed that decision on October 29, 2019. On May 19, 2020, the U.S. Court of Appeals for the D.C. Circuit issued its decision, finding, with one exception, that EPA reasonably denied the Maryland petition. The court remanded one issue to EPA regarding target sources lacking catalytic controls. All of the Duke Energy units targeted have selective catalytic reduction so the decision is favorable for these units. A different panel of the same court heard oral argument in New York's appeal of EPA's denial of its Section 126 Petition on May 7, 2020, and on July 14, 2020, the panel issued its decision remanding the Petition to EPA for further review. The Duke Energy Registrants cannot predict the outcome of this matter.

Off-Balance Sheet Arrangements

During the three and six months ended June 30, 2020, there were no material changes to Duke Energy's off-balance sheet arrangements. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information on ACP. See Note 13 to the Condensed Consolidated Financial Statements, "Stockholders' Equity," for information regarding equity forward sales agreements. For additional information on Duke Energy's off-balance sheet arrangements, see "Off-Balance Sheet Arrangements" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Contractual Obligations

Duke Energy enters into contracts that require payment of cash at certain specified periods, based on certain specified minimum quantities and prices. During the three and six months ended June 30, 2020, there were no material changes in Duke Energy's contractual obligations. For an in-depth discussion of Duke Energy's contractual obligations, see "Contractual Obligations" and "Quantitative and Qualitative Disclosures about Market Risk" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

408

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For an in-depth discussion of the Duke Energy Registrants' market risks, see "Quantitative and Qualitative Disclosures about Market Risk" in Item 7 of the Annual Report on Form 10-K for the Duke Energy Registrants. During the three and six months ended June 30, 2020, there were no material changes to the Duke Energy Registrants' disclosures about market risk, other than as described below.

Credit Risk

In response to the COVID-19 pandemic, in March 2020, the Duke Energy Subsidiary Registrants announced a suspension of disconnections for nonpayment to be effective throughout the national emergency. This has resulted in an increase in charge-offs over historical levels. In addition, the Registrants are monitoring the effects of the resultant economic slowdown on counterparties' abilities to perform under their contractual obligations.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified by the SEC rules and forms.

Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated the effectiveness of their disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2020, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective in providing reasonable assurance of compliance.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15 and 15d-15 under the Exchange Act) that occurred during the fiscal quarter ended June 30, 2020, and have concluded no change has materially affected, or is reasonably l kely to materially affect, internal control over financial reporting.

ITEM 1. LEGAL PROCEEDINGS

For information regarding material legal proceedings, including regulatory and environmental matters, see Note 3, "Regulatory Matters," and Note 4, "Commitments and Contingencies," to the Condensed Consolidated Financial Statements. For additional information, see Item 3, "Legal Proceedings," in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, “Item 1A. Risk Factors” in the Duke Energy Registrants' Annual Report on Form 10-K for the year ended December 31, 2019, which could materially affect the Duke Energy Registrants’ financial condition or future results. The information presented below updates, and should be read in conjunction with, the risk factors and information disclosed in the Annual Report on Form 10-K for the year ended December 31, 2019.

The Duke Energy Registrants’ operations have been and may be affected by COVID-19 in ways listed below and in ways the registrants cannot predict at this time.

The COVID-19 pandemic has begun to impact the Duke Energy Registrants' business strategy, results of operations, financial position and cash flows, a beit not materially as of this filing date, from specific activities listed below:

- Decreased demand for electricity and natural gas;
- Delays in rate cases and other legal proceedings;
- The health and availability of our critical personnel and their ability to perform business functions; and
- Actions of state utility commissions or federal or state governments to allow customers to suspend or delay payment of bills related to the provision of electric or gas services.

Furthermore, due to the unpredictability of the COVID-19 pandemic’s ongoing impact on global health and economic stability as of this filing date, the Duke Energy Registrants expect that the activities listed below could negatively impact their business strategy, results of operations, financial position and cash flows:

- An inability to procure satisfactory levels of fuels or other necessary equipment to continue production of electricity and delivery of natural gas;
- An inability to obtain labor or equipment necessary for the construction of generation projects or pipeline expansion;
- An inability to maintain information technology systems and protections from cyberattack;
- An inability to obtain financing in volatile financial markets;
- Additional federal regulation tied to stimulus and other aid packages; and
- Impairment charges, which could include real estate as options for working remotely are evaluated and goodwill.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

2021 Settlement Updated MFR F Schedules-000411

ITEM 6. EXHIBITS

Exhibits filed herein are designated by an asterisk (*). All exhibits not so designated are incorporated by reference to a prior filing, as indicated. Items constituting management contracts or compensatory plans or arrangements are designated by a double asterisk (**). The company agrees to furnish upon request to the commission a copy of any omitted schedules or exhibits upon request on all items designated by a triple asterisk (***).

Business Contracts with Officers, Directors and Affiliates

Company: Duke Energy Florida, LLC

For the Year Ended December 31, 2019

List all contracts, agreements, or other business arrangements* entered into during the calendar year (other than compensation-related to position with respondent) between the respondent and each officer and director listed in Part 1 of the Executive Summary. In addition, provide the same information with respect to professional services for each firm, partnership, or organization with which the officer or director is affiliated.

Note: * Business agreement, for this schedule, shall mean any oral or written business deal which binds the concerned parties for products or services during the reporting year or future years.

Name of Officer or Director	Name and Address of Affiliated Entity	Amount	Identification of Product or Service
No such contracts, agreements or other business arrangements to report.			

Note: The above listing excludes contributions and industry association dues.
See pages 455 through 458 for affiliate transactions.

I. Overview of Forecasting Process

A. Description

The forecasting process employed by Duke Energy Florida to develop the projected test year(s) data is essentially the 2020 Corporate Budget.

The forecasting process for the budget is comprised of several parts: strategic and business planning, load forecasting, energy dispatch planning, facilities construction planning, and the development of financial statements utilizing the corporate financial model.

Load Forecasting (Customer Energy and Peak Demand) is accomplished through an econometric modeling process which employs historic and projected input data addressing economic conditions, demographics, weather, electric price levels, and in some instances, specific customer operating plans. The output of the load forecasting process is employed in the development of system energy requirements which is a key input into the production simulation model (GenTrader).

GenTrader is used for the planning of system dispatch and simulates the use of system generation, purchased power and load control capabilities. The inputs involved are fuel and purchased power costs, system energy requirements, and plant maintenance schedules. The output of GenTrader is employed by the Financial Model to determine fuel and purchased power expense and the associated revenue. The proposed construction expenditures reflect the facilities construction plans developed by the business units in support of their mission and serves as input into the financial model.

The operation and maintenance expenses, exclusive of fuel and purchased power, are based on the 2020 budget data.

The income statement is developed within the financial model using the construction expenditures, operating expense, and a number of other assumptions as inputs.

The balance sheet projection begins with actual balances as of 12/31/19 and records each known change in every significant balance sheet account. This process is done monthly. The main sources of information for the monthly balance sheet activity are the operating and construction budgets, and other assumptions input into the corporate financial model.

II. Description of Forecasting Methodology

A. Construction Budget

The process employed to define corporate construction requirements and to estimate construction costs involves the various business units and the budget development process. The business units develop their capital requirements based upon considerations such as the customers, demand and energy forecasts, safety, reliability, and economic benefit. Once they have defined their requirements, cost estimates are developed and reviewed by several levels of management. At the corporate level they are arranged in capital prioritization groups such as system growth, safety, reliability, regulatory requirements, etc. and evaluated. After they have been reviewed and approved at the corporate level the detail capital budget is developed.

B. Operating Budget

1. Operating Revenues

The 2022/23 base revenue projection (retail & wholesale) is based on the 2020 Fall Load Forecast by rate class. As further described in MFR F-5/F-8 Load forecast section.

Fuel Clause Revenue Fuel & Operations Forecast is developed by modeling a twelve month test period of the retail and wholesale recovery rate for 2020 & 2021 with the customer and demand forecast. The fuel revenues are based on recovery of the projected fuel expenses and calculated in the same manner as is embodied in the Commission's present procedure. Recovery is constrained by the levelized factors which had been established for 2020.

2. Other Operating Revenues, Exclusive of Deferred Fuel

Other Operating Revenues for 2022 and 2023 were developed by business unit staff utilizing sales forecast data and historical trends.

II. Description of Forecasting Methodology (Cont'd)

B. Operating Budget (cont'd)

3. Deferred Fuel and Capacity Revenues

The forecast of deferred fuel and capacity revenue is developed on a monthly basis using the Corporate Financial Model. These revenues are determined in the Model using the same approach as used by Accounting in developing actual deferred fuel and capacity revenues, recognizing the interaction between monthly fuel expenses and the levelized fuel adjustment factors.

4. Fuel and Purchased Power

This process begins with the preparation of a fuel forecast. The forecast includes projected prices by fuel type, transportation costs, heat value of fuels, unit size of deliveries for coal and target inventory levels and supporting economic assumptions.

The Fuels and System Optimization Department then uses the GenTrader program to determine fuel burn requirements for the forecast period. This simulation requires assumptions for unit characteristics and availabilities, purchased power availability and price, and system requirements (from the sales forecast) in addition to the fuel forecast. The GenTrader program produces burn requirements by fuel type (physical units and BTU basis) and the price of fuels monthly for the forecast period. The price determined by GenTrader for each fuel type is a weighted average to incorporate the effect of differential fuel and transportation costs for each generation unit modeled by GenTrader.

The Financial Planning Department employs the resulting GenTrader output in computing fuel expense. The initial value and quantity of inventory by fuel type is provided by Fuel Accounting. Fuel Planning personnel then simulate the physical movement of fuels through inventory for the forecast period based on initial conditions, burn requirements, purchase commitments and inventory targets. The fuel expense for each inventoried fuel is computed based on average inventory cost at the time the fuel is burned. Fuel handling expenses are projected by operations personnel based on historical experience adjusted for inflation, changes in inventory target levels, and the projected mix of fuel to be burned as determined by GenTrader.

Assumptions for purchased power contract terms, quantities, availabilities, and prices are developed jointly by the System Planning and Operations and Term Marketing Departments. This data is used by GenTrader in determining system generation requirements as indicated above.

5. Operation and Maintenance Expenses (Exclusive of Fuel and Purchased Power)

The forecast of operation and maintenance expense exclusive of fuel and purchased power is developed from the 2020 Corporate Budget adjusted for benefits, salary and wage increase, achieved synergies, and other known changes.

6. Depreciation and Amortization

Depreciation expense is determined using forecasted monthly Electric Plant In Service through 2023. Depreciation rates were obtained from the depreciation study approved by the commission in FPSC Docket number 20090079. Dismantlement and decommissioning accruals were based on rates obtained from the dismantlement study approved by the commission in FPSC Docket 20090079.

7. Taxes Other Than Income Taxes

Taxes other than income taxes are forecasted by applying the estimated rate times the applicable basis for the specific item, such as real and personal property taxes, franchise fees, state gross receipts tax, regulatory commission fee, payroll taxes, etc.

8. State and Federal Income Taxes

Current income taxes are computed by applying the statutory tax rates in effect during the test year to estimated taxable income each month. Estimated taxable income is computed by adjusting the forecasted income before taxes for all permanent and timing differences between book and taxable income. Deferred income taxes are provided for all of the aforementioned timing differences.

9. Other Income and Deductions (Net)

Activity in this account is made up of projected CR3 Securitization Equity Return Amortization and other miscellaneous interest.

10. Interest Charges

Interest expense for Long Term Debt is determined by the series interest rate applied to the amount outstanding. There is a $1.4 billion debt issue forecasted in August 2021 with a weighted average life of 20 years; $500 million debt issue forecasted in August 2022 with a weighted average life of 20 years; and $700 million debt issue forecasted in 2023 with a weighted average life of 20 years; each of these debt issuances is projected have an interest rate equal to a weighted average of 5 year, 10 year and 30 year issuances.

Interest expense on Short Term Debt is determined by applying the assumed rates between 0.050% and 0.065% on the average outstanding amount each month. Interest on Customer Deposits is calculated using a blended interest rate applied against the projected total customer deposit balance. Customer deposit balance is based on historical relationship using a blended between total deposits and number of customers.

II. Description of Forecasting Methodology (Cont'd)

C. Balance Sheet (items discussed generally reflect accounts that specifically impact rate base)

1. Utility Plant includes, but is not limited to items such as:

a. Electric Plant in Service

The month end balances for Electric Plant in Service are derived by adding plant additions expected to be closed to plant in service and subtracting expected plant retirements. The plant additions for major projects are computed using budget forecasts from the business units. Plant additions related to minor projects and blanket projects are also based on budgeted construction expenditures. Retirement estimates are based upon past historical trends.

b. Construction Work in Progress

The balance for Construction Work in Progress (CWIP) is calculated by adding monthly construction expenditures from the construction budget forecast, reduced for estimated closings to plant in service.

c. Accumulated Depreciation

The balances of Accumulated Depreciation and Amortization are derived by adding the monthly depreciation expense, (computed on the average depreciable plant in service balances), subtracting the cost of expected plant retirements. This same methodology is used for both system and 100% retail balances.

2. Other Property and Investments includes, but is not limited to such items as:

a. Non Utility Property

Represents the change resulting from additions, depreciation and retirements on property assets utilized in the non-regulated business which are calculated in essentially the same manner as the utility plant changes described above.

3. Current and Accrued Assets includes, but is not limited to such items as:

a. Cash

Cash balance is assumed to remain unchanged for the budget year and cash needs are modeled as a change in short term debt.

II. Description of Forecasting Methodology (Cont'd)

C. Balance Sheet (items discussed generally reflect accounts that specifically impact rate base) (cont'd)

b. Customer Accounts Receivable

The monthly balances for Customer Accounts Receivable was projected assuming that a specified percent of a forecasted month's revenue would be received as cash that month and other amounts would be collected in subsequent months. A different lag factor is applied to different types of revenue receipts.

c. Materials and Supplies

In general, it was assumed that the average material and supplies balance would be equal to the beginning balance; therefore the material and supplies are forecast at a constant level.

d. Accrued Utility Revenue

It was assumed that the accrued utility revenue balance would be equal to the beginning balance; therefore the accrued utility revenues are forecast at a constant level.

e. Other Current and Accrued Assets

It was assumed that other current and accrued assets relating to rate base would be equal to the beginning balance; therefore the other current and accrued assets are forecast at a constant level.

4. Deferred Charges &Other Assets

a. Deferred Clause Balances

This account captures such items as the FUEL, CCR, SPP, ECCR and ECRC clause current month deferral and the amortization of the prior month's deferral. In addition, it includes the GPIF amortization.

b. Regulatory Assets & Other Deferred Debits

It was assumed that, in general, remaining regulatory assets and deferred debits would be forecasted to be amortized in accordance with an amortization schedule or amortized evenly over the assumed life of the asset.

c. Unamortized Loss on Reaquired Debt

This line item is reduced for amortization of loss on reacquired debt and increased for new issues - amortization is calculated over the life of the debt instrument

d. Accumulated deferred income Taxes

This line item fluctuates for impact of deferred tax assets

5. Capitalization

The monthly balances for common stock, preferred stock and long-term debt are developed from the Company's financing plan. The monthly balances for unappropriated retained earnings are calculated from the monthly income statement projections less expected dividends.

C. Balance Sheet (items discussed generally reflect accounts that specifically impact rate base) (cont'd)

6. Non-current Liabilities includes, but is not limited to such items as:

a. Retail Unfunded Storm Damage (Storm Reserve)

The reserve will be replenished to $132 million by May 2022 as approved in FPSC Docket 20190110.

c. Other Miscellaneous Operating Reserves

There are various accounts such items as DOE Facility Decommissioning, Deferred SERP, Medical &Life Insurance reserves, Workers Comp Accrual, and Environmental liability. In general, it was assumed that the average of the remaining miscellaneous operating reserves would be equal to the beginning balance; therefore they are forecast at a constant level.

d. Pension Liability

The monthly balance increases or decreases by the pension expense or income incurred to achieve the required net funding.

7. Current and Accrued Liabilities include but are not limited to line items such as:

a. Notes Payable

Short-term borrowing requirements as determined by the budget forecast.

b. Accounts Payable

It was assumed that the accounts payable balance would be equal to the beginning balance; therefore the accounts payable are forecast at a constant level.

c. Customer Deposits

Customer deposit balance is based on historical relationship between total deposits and number of customers. Accrued interest for the customer accounts are credited to the customers in June.

d. Taxes Accrued

The monthly balances increase by the accruals for property and income tax shown on the income statement and decrease by the cash payments.

e. Interest Accrued

The monthly balances increase by the accruals shown on the income statement and decrease by the cash payments.

f. Other Current Liabilities

Change reflects the loss in the Company Owned Life Insurance (COLI) shown on the income statement

a. Regulatory Liability - SFAS 109

This balance changes to reflect the amortization of the SFAS 109 Regulatory Liability

b. Other Deferred Credits

Other deferred credits in this category include such items as Customer Advances for Construction, Deferred Stranded Costs and other miscellaneous accounts. In general, it was assumed that these balances would be equal to the beginning balance; therefore the other deferred credit are forecast at a constant level.

c. Accumulated Deferred Investment Tax Credit and Accumulated Deferred Income Tax Liability

The net monthly balance reflects the change on the income statement.

d. Interest on Tax Deficiency - LT Liabilities

The monthly balances increase by the accruals shown on the income statement and decrease by the cash payments.

e. Asset Retirement Obligations FAS 143

The change in this balance represents the accretion expense associated with FAS 143

III. Description of Forecasting Models (Cont'd)

B. Customers, Energy and Demand Forecast

The DEF forecast of customers, energy sales, and peak demand applies both an econometric and end-use methodology. The residential and commercial energy projections incorporate Itron's SAE approach while other classes use customer-class specific econometric models. These models are expressly designed to capture class-specific variation over time. Peak demand models are projected on a disaggregated basis as well. This allows for appropriate handling of individual assumptions in the areas of wholesale contracts, demand response, interruptible service and changes in self-service generation capacity.

ENERGY AND CUSTOMER FORECAST

In the retail jurisdiction, customer class models have been specified showing a historical relationship to weather and economic/demographic indicators using monthly data for sales models and customer models. Sales are regressed against "driver" variables that best explain monthly fluctuations over the historical sample period. Forecasts of these input variables are either derived internally or come from a review of the latest projections made by several independent forecasting concerns. The external sources of data include Moody's Analytics and the University of Florida's BEBR. Internal company forecasts are used for projections of electricity price, weather conditions, the length of the billing month and rates of customer owned renewable and electric vehicle adoption. The incorporation of residential and commercial "end-use" energy has been modeled as well. Surveys of residential appliance saturation and average efficiency performed by the company's Market Research department and the Energy Information Agency (EIA), along with trended projections of both by Itron capture a significant piece of the changing future environment for electric energy consumption.

Finally, after all class energy and peak model projections are complete, estimates of future "impacts" on monthly retail class energy sales and monthly/hourly retail peak demand are applied. The Duke Renewables Group analyze and develop projections of "behing the meter" rooftop solar (PV) and Plug-in Electric Vehicles (EV) imacts upon the forecast. Likewise, the DEF Energy Efficiency Department analyze and estimate the service area market potential for cost effective Utility-driven energy efficiency (UEE) programs. Once these three "external" impacts are applied to the energy sales and peak projections on a net new cumulative basis is the forecast finalized. Specific sectors are modeled as follows:

Residential Sector

Residential kWh usage per customer is modeled using the SAE framework. This approach explicitly introduces trends in appliance saturation and efficiency, dwelling size and thermal efficiency. It allows for an easier explanation of usage levels and changes in weather-sensitivity over time. The "bundling" of 19 residential appliances into "heating", "cooling" and "other" end uses form the basis of equipment-oriented drivers that interact with typical exogenous factors such as real median household income, average household size, cooling degree-days, heating degree-days, the real price of electricity to the residential class and the average number of billing days in each sales month. This structure captures significant variation in residential usage caused by changing appliance efficiency and saturation levels, economic cycles, weather fluctuations, electric price, and sales month duration. Projections of kWh usage per customer combined with the customer forecast provide the forecast of total residential energy sales. The residential customer forecast is developed by correlating monthly residential customers with county level population projections for counties in which DEF serves residential customers are provided by the BEBR.

III. Description of Forecasting Models (Cont'd)

B. Customers, Energy and Demand Forecast (cont'd)

Commercial Sector

Commercial MWh energy sales are forecast based on commercial sector (non-agricultural, non-manufacturing and non-governmental) employment, the real price of electricity to the commercial class, the average number of billing days in each sales month and heating and cooling degree-days. As in the residential sector, these variables are interacted with the commercial end-use equipment (listed below) after trends in equipment efficiency and saturation rates have been projected.

- **Heating**
- **Cooling**
- **Ventilation**
- **Water heating**
- **Cooking**
- **Refrigeration**
- **Outdoor Lighting**
- **Indoor Lighting**
- **Office Equipment (PCs)**
- **Miscellaneous**

The SAE model contains indices that are based on end-use energy intensity projections developed from EIA's commercial end-use forecast database. Commercial energy intensity is measured in terms of end-use energy use per square foot. End-use energy intensity projections are based on end-use efficiency and saturation estimates that are in turn driven by assumptions in available technology and costs, energy prices, and economic conditions. Energy intensities are calculated from the EIA's Annual Energy Outlook (AEO) commercial database. End-use intensity projections are derived for eleven building types. The energy intensity (EI) is derived by dividing end-use electricity consumption projections by square footage:

$$EI_{bet} = Energy_{bet} / SQFT_{bt}$$

Where:
$Energy_{bet}$ = energy consumption for building type b, end-use e, year t
$Sqft_{bt}$ = square footage for building type b in year t

Commercial customers are modeled using the projected level of residential customers.

III. Description of Forecasting Models (Cont'd)

B. Customers, Energy and Demand Forecast (cont'd)

Industrial Sector

Energy sales to this sector are separated into two sub-sectors. A significant portion of industrial energy use is consumed by the phosphate mining industry. Because this one industry is such a large share of the total industrial class, it is separated and modeled apart from the rest of the class. The term "non-phosphate industrial" is used to refer to those customers who comprise the remaining portion of total industrial class sales. Both groups are impacted significantly by changes in economic activity. However, adequately explaining sales levels requires separate explanatory variables. Non-phosphate industrial energy sales are modeled using Florida manufacturing employment interacted with the Florida industrial production index, and the average number of sales month billing days.

The industrial phosphate mining industry is modeled using customer-specific information with respect to expected market conditions. Since this sub-sector is comprised of only three customers, the forecast is dependent upon information received from direct customer contact. DEF Large Account Management employees provide specific phosphate customer information regarding customer production schedules, inventory levels, area mine-out and start-up predictions, and changes in self-service generation or energy supply situations over the forecast horizon. These Florida mining companies compete globally into a global market where farming conditions dictate the need for “crop nutrients”. The projection of industrial accounts is not expected to decline as rapidly as it has for years. The pace of “off-shoring” manufacturing jobs is expected to decline from past levels. Secondly, the rapid increase in Florida population should recalibrate Florida’s competitiveness in “location analysis” studies performed by industry when determining site selection for new operations.

Street Lighting

Electricity sales to the street and highway lighting class have now declined for several years. A continued decline is expected as improvements in lighting efficiency are projected. The number of accounts, which has dropped by more than one-third since 1995 due to most transferring to public authority ownership, is expected to decline further before leveling off in the intermediate term. A simple time-trend was used to project energy consumption and customer growth in this class.

III. Description of Forecasting Models (Cont'd)

B. Customers, Energy and Demand Forecast (cont'd)

Public Authorities

Energy sales to public authorities (SPA), comprised of federal, state and local government operated services, is also projected to grow within the DEF's service area. The level of government services, and thus energy, can be tied to the population base, as well as the amount of tax revenue collected to pay for these services. Factors affecting population growth will affect the need for additional governmental services (i.e. public schools, city services, etc.) thereby increasing SPA energy consumption. Government employment has been determined to be the best indicator of the level of government services provided. This variable, along with cooling degree-days and the sales month billing days, results in a significant level of explained variation over the historical sample period. Adjustments are also included in this model to account for the large change in school-related energy use throughout the year. The SPA customer forecast is projected linearly as a function of a time-trend. Recent budget issues have also had an impact on the near-term pace of growth.

Sales for Resale Sector

The Sales for Resale sector encompasses all firm sales to other electric power entities. This includes sales to other utilities (municipal or investor-owned) as well as power agencies (rural electric authority or municipal).

SECI is a wholesale, or sales for resale, customer of DEF that contracts for both seasonal and stratified loads over the forecast horizon. The municipal sales for resale class includes a number of customers, divergent not only in scope of service (i.e., full or partial requirement), but also in composition of ultimate consumers. Each customer is modeled separately in order to accurately reflect its individual profile. Three customers in this class, Chattahoochee, Mt. Dora, and Williston, are municipalities whose full energy requirements are supplied by DEF. Energy projections for full requirement customers grow at a rate that approximates their historical trend with additional information coming from the respective city officials. DEF serves partial requirement service (PR) to municipalities such as RCID. In each case, these customers contract with DEF for a specific level and type of stratified capacity needed to provide their particular electrical system with an appropriate level of reliability. The energy forecast for each contract is derived using its historical load factors where enough history exists, or typical load factors for a given type of contracted stratified load and expected fuel prices. Electric energy growth and competitive market prices will dictate the amount of wholesale demand and energy throughout the forecast horizon.

III. Description of Forecasting Models (Cont'd)

B. Customers, Energy and Demand Forecast (cont'd)

PEAK DEMAND FORECAST

The forecast of peak demand also employs a disaggregated econometric methodology. For seasonal (winter and summer) peak demands, as well as each month of the year, DEF's coincident system peak is separated into five major components. These components consist of total retail load, interruptible and curtailable tariff non-firm load, conservation and demand response program capability, wholesale demand, and company use demand. Once this is complete, the three "impacts": PV, EV and UEE will be applied.

Total retail load refers to projections of DEF retail monthly net peak demand before any activation of DEF's General Load Reduction Plan. The historical values of this series are constructed to show the size of DEF's retail net peak demand assuming no utility activated load control had ever taken place. The value of constructing such a "clean" series enables the forecaster to observe and correlate the underlying trend in retail peak demand to retail customer levels and coincident weather conditions at the time of the peak and the amounts of Base-Heating-Cooling load estimated by the monthly Itron models without the impacts of year-to-year variation in utility-sponsored DR programs. Monthly peaks are projected using the Itron SAE generated use patterns for both weather sensitive (cooling & heating) appliances and base load appliances calculated by class in the energy models. Daily and hourly models of applying DEF class-of-business load research survey data lead to class and total retail hourly load profiles when a 30-year normal weather template replaces actual weather. The projections of retail peak are the result of a monthly model driven by the summation of class base, heating and cooling energy interpolated 30-year normal weather pattern-driven load profile. The projection for the months of January (winter) and August (summer) are typically when the seasonal peaks occur. Energy conservation and direct load control estimates consistent with DEF's DSM goals that have been established by the FPSC are applied to the MW forecast. Projections of dispatchable and cumulative non dispatchable DSM impacts are subtracted from the projection of potential firm retail demand resulting in a projected series of firm retail monthly peak demand figures. The Interruptible and Curtailable service (IS and CS) tariff load projection is developed from historic monthly trends, as well as the incorporation of specific projected information obtained from DEF's large industrial accounts on these tariffs by account executives. Developing this piece of the demand forecast allows for appropriate firm retail demand results in the total retail coincident peak demand projection.

Sales for Resale demand projections represent load supplied by DEF to other electric suppliers such as SECI, RCID, and other electric transmission and distribution entities. For Partial Requirement demand projections, contracted MW levels dictate the level of seasonal demands. The Full Requirement municipal demand forecast is estimated for individual cities using historically trended growth rates adjusted for current economic conditions.

DEF "company use" at the time of system peak is estimated using load research metering studies similar to potential firm retail. It is assumed to remain stable over the forecast horizon as it has historically.

Each of the peak demand components described above is a positive value except for the DSM program MW impacts and IS and CS load. These impacts represent a reduction in peak demand and are assigned a negative value. Total system firm peak demand is then calculated as the arithmetic sum of the five components.

III. Description of Forecasting Models (Cont'd)

C. Production Cost Model

Duke Energy Florida utilizes a production cost model called GenTrader, developed by Power Cost, Inc., to project future fuel requirements and system production costs. As part of its forecasting process, the Company updates the GenTrader production cost model with all the needed inputs, which include, but are not limited to, the following: 1) all generation unit minimum and maximum capacity ratings; 2) ramp rates; 3) heat rates; 4) Variable O&M rates; 5) planned maintenance outage schedules; 6) forced outage rates; 7) purchased power agreements for capacity and energy; 8) solar forecasts; 9) fuel and emission prices; and, 10) system load forecasts.

The Company's fuel price forecasting methodology utilizes known observable market prices for the applicable forward periods that are selected as of a specific Close of Business date. The Company obtains its forward market price curves from industry recognized third-party forward market source providers for natural gas, fuel oil and coal. In addition to market pricing, delivered fuel prices include transportation and storage costs to deliver the fuel to destination facilities.

The basic GenTrader outputs are fuel and operations costs, fuel quantities consumed, energy generation, and BTU requirements.

III. Description of Forecasting Models (Cont'd)

D. Corporate Model

The Corporate Financial Model is used to forecast monthly and yearly financial data through the use of a number of integrated calculations and dependent reports. The model essentially consists of a series of calculating reports grouped in categories such as Construction & Plant, Revenue, Fuel &Purchased Power, O&M, Financing, Income Taxes, Regulatory, and other miscellaneous data. The model was developed by Utilities International Inc. and is used by a number of utilities

The projection logic relies on defined relationships and input parameters to produce the financial projections. Input data include O&M expense, capital expenditures, GenTrader output, Sales Forecast of Customer and Sales, estimates of other operating revenues, etc. Input parameters include tax rates, depreciation rates, interest rates, CWIP closing rules, composite tariff rates, etc.

The results of a study are summarized into monthly or annual financial and supporting statements or reports. The basic statements are:

1. Income Statement - This report contains the actual and projected operating revenues and expenses. In addition, debt interest, preferred stock dividends, and common stock earnings are reported on this statement.

2. Balance Sheet -This report contains the actual and projected assets and liabilities of Florida Power Corporation.

3. Cash Flow - This report summarizes the Inflow and Outflow of the Company's cash

4. Ratios and Statistics - This report contains summaries of capital amounts of stocks and bonds, stock-bond ratios, and other data pertaining to the financial picture of the Company.

5. Electric Revenue Summary Report - This statement gives a breakdown of revenues by various classes of customers such as residential, commercial, etc. as well as their individual component; fuel, energy conservation, capacity, gross receipts tax, franchise fees, regulatory assessment fees, etc.

6. Fuel Expense Report - This report provides generation and fuel expense by plant site.

In addition to the above reports, other reports are available to provide additional detail with respect to the calculated results.

I. GENERAL ASSUMPTIONS

Forecast Assumptions - Customers, Energy and Demand Forecast

Normal weather conditions for energy sales are assumed over the forecast horizon using a sales-weighted 30-year average of conditions at the St Petersburg, Orlando, and Tallahassee weather stations. For billed kilowatt-hour (kWh) sales projections, the normal weather calculation begins with a historical 30-year average of calendar and billing cycle weighted monthly heating and cooling degree-days (HDD and CDD). The expected consumption period read dates for each projected billing cycle determines the exact historical dates for developing the 30-year average weather condition each month. Each class displays different weather-sensitive base temperatures from which degree day (DD) values begin to accumulate. Seasonal and monthly peak demand projections are based on a 30-year historical average of system-weighted degree days using the "Itron Rank-Sort Normal" approach which takes annual weather extremes into account as well as the date and hour of occurrence.

DEF customer forecast is based upon historical population estimates and produced by the BEBR at the University of Florida (as published in "Florida Population Studies", Bulletin No. 186 April 2020) and provides the basis for the population and household forecasts used in the development of the DEF customer forecast. National and Florida economic projections produced by Moody's Analytics in their July 2020 forecast, along with EIA 2020 surveys of residential appliance saturation and average appliance efficiency levels provided the basis for development of the DEF energy forecast.

Within the DEF service area, the phosphate mining industry is the dominant sector in the industrial sales class. Three major customers accounted for 24% of the industrial class MWh sales in 2019, significantly less than 2018. These energy intensive "crop nutrient" producers mine and process phosphate-based fertilizer products for the global marketplace. The supply and demand (price) for their products are dictated by global conditions that include, but are not limited to, foreign competition, national/international agricultural industry conditions, exchange-rate fluctuations, international trade pacts and U.S. environmental regulations. The market price of the raw mined commodity often dictates production levels. Load and energy consumption at the DEF-served mining or chemical processing sites depend heavily on plant operations, which are heavily influenced by these global as well as the local conditions, including environmental regulations. Going forward, global currency fluctuations and global stockpiles of farm commodities will determine the demand for fertilizers. The DEF forecast calls for an immediate rebound in electric consumption from this sector as a major producer recently restructured its supply chain. The U.S. farm sector was hit hard by retaliatory sanctions from China which imports U.S. farm products. The forecast does account for one customer's intention to open a new mine in phases between the years 2020 and 2022. Any increase in self-service generation will act to reduce energy requirements from DEF. An upside risk to this projection lies in the price of energy, especially low natural gas price, which is a major cost in mining and producing phosphoric fertilizers. Trade issues appear to have stabilized in 2020 and demand for farm products should improve, as will the demand for crop nutrients.

DEF supplies load and energy service to wholesale customers on a "full" and "partial" requirement basis. Full requirements (FR) customers, the cities of Chattahoochee, Mt. Dora and Williston have recently contracted to purchase all their requirements from other sources starting January 1, 2021. Partial requirements (PR) customers load is assumed to reflect the current contractual obligations reflected by the nature of the stratified load they have contracted for, plus their ability to receive dispatched energy from power marketers any time it is more economical for them to do so. Contracts for PR service included in this forecast are with the Reedy Creek Improvement District (RCID) and Seminole Electric Cooperative, Inc. (SECI). All contracts are projected to "term out" in the final contracted year in this projection.

This forecast assumes that DEF will successfully renew all future Municipal franchise agreements.

This forecast incorporates demand and energy reductions expected to be realized through currently FPSC approved DSM goals as stated in Docket No. 20190018-EG.

I. GENERAL ASSUMPTIONS (Continued)

Forecast Assumptions - Customers, Energy and Demand Forecast (continued)

This forecast reflects impacts from both Plug-in Hybrid Electric Vehicle (PHEV) and behind the meter (customer-owned) Photo Voltaic (PV) units on energy and peak demand. PHEV customer penetration levels, which are expected to be a small share of the total DEF service area vehicle stock over the planning horizon, incorporates an EPRI Model view that includes gasoline price expectations. DEF customer PV penetration levels are expected to continue to grow over the planning horizon and the forecast incorporates a view on equipment and electric price impacts on customer use.

Expected energy and demand reductions from customer-owned self-service cogeneration facilities are also included in this forecast. DEF will supply the supplemental load of self-service cogeneration customers. While DEF offers “standby” service to all cogeneration customers, the forecast does not assume an unplanned need for power at time of peak.

This forecast assumes that the regulatory environment and the obligation to serve our retail customers will continue throughout the forecast horizon. Regarding wholesale customers, the forecast does not plan for generation resources unless a long-term contract is in place.

I. GENERAL ASSUMPTIONS (Continued)

GENERAL INFLATION RATES

Inflation is not considered in the financial forecasting process. Business units are expected to find O&M cost savings/efficiencies to absorb general inflation.

WAGE AND SALARY INCREASE

Forecast assumptions for wage and salary increases is an effective annual increase of 3% based on an assessment of competition, inflation, corporate bargaining unit agreements, and merit increases for non-bargaining unit employees. For purposes of MFR C-35, payroll is presented flat as business units are expected to find O&M cost savings to absorb the increase in salaries necessary to maintain a competitive work force.

FINANCINGS

There is a $1.4 billion debt issue forecasted in August 2021 with a weighted average life of 20 years; $500 million debt issue forecasted in August 2022 with a weighted average life of 20 years; and $700 million debt issue forecasted in 2023 with a weighted average life of 20 years; each of these debt issuances is projected have an interest rate equal to a weighted average of 5 year, 10 year and 30 year issuances.

PROPERTY TAX PAYMENT

Property taxes are paid in November of each year.

FRANCHISE FEE PAYMENT

Paid to cities on a monthly basis

I. GENERAL ASSUMPTIONS (Continued)

Residual Fuel Oil Assumptions

Residual fuel oil is no longer consumed, purchased or stored by Duke Energy Florida.

Distillate Fuel Oil Assumptions

Crude oil supply will remain relatively stable through the forecast period.

U.S. Government policy is not expected to impact the residual or light oil market except that environmental restrictions will increase the relative demand and price of lower sulfur oil such as distillate fuel oil.

Ultra low sulfur #2 oil demand will remain relatively stable as it is used as a back-up fuel for natural gas as well as on-road diesel fuel.

Weather is assumed to be normal throughout the period.

Natural Gas Assumptions

Overall supply of natural gas will be adequate except during extreme weather and during pipeline outages.

Interruptible supply from Florida Gas Transmission, Gulfstream Natural Gas pipeline, Sabal Trail Transmission, and Southern Natural Gas will be available in limited quantities as the pipeline capacity is utilized for firm supply contracts for Duke Energy Florida.

Coal Assumptions

Crystal River (CR) Units 1&2 retired effective 12/31/18.

Installation of scrubbers on CR 4&5 was completed and the station is now able to burn a blend of higher sulfur coal products up to a max of 5.5 lbs per million BTU.

Coal supplies are expected to tighten through the forecast period as production continues to come in balance with declining domestic demand

II. OPERATING ASSUMPTIONS
Income Statement

Operating Revenue

A. Base Revenue - KWH sales are determined by the Load Forecasting Department (See general assumptions for customer, energy. and demand forecast).

B. Fuel Revenue - No change in the methodology presently in place for the recovery of fuel expense.

C. Capacity Revenue - No change in the methodology presently in place for the recovery of capacity expense. capacity clause includes recovery of nuclear

D. Energy Conservation Revenue - No change in the methodology presently in place for the recovery of energy conservation expenses.

E. Environmental Revenue - No change in methodology presently in place for the recovery of environmental expenses.

F. Franchise Fee and Gross Receipts Revenue - Assumed that an average historic tax rate would be representative for 2022-23.

G. Other Operating Revenue - Pole attachments. rentals. and miscellaneous other service revenues assumed that current rental agreements would remain in effect through 2023 and that service revenues will remain constant for 2022-23 based on 2020 actuals.

Fuel Expense and Purchased Power

Fuel expense and purchased power is determined by the Company's production cost simulation model. The model uses input from fuel price forecasts, purchased power contracts, generating unit operating characteristics, maintenance outage schedules and other pertinent data to determine the most economical way to satisfy the corporate forecast of demand and energy.

Depreciation Expense

Depreciation expense is determined using forecasted Electric Plant In Service through 2023. Depreciation rates were obtained from the depreciation study approved by the commission in FPSC Docket number 20090079. Dismantlement and decommissioning accruals were based on rates obtained from the dismantlement study approved by the commission in FPSC Docket 20090079.

II. OPERATING ASSUMPTIONS (Continued)
Income Statement (Continued)

Amortization of Limited Plant

Amortization of intangible plant and ECCR plant assets were based on current approved rates.

Taxes Other Than Income Taxes

Taxes other than income taxes include property taxes, payroll related taxes, revenue related taxes. The property taxes reflect an estimate of next year's taxes by the tax department, payroll related taxes were estimated based on budgeted payroll and rates in current law. Revenue related taxes are based on current law and franchise agreement and the budgeted revenues.

Income Taxes

Federal and state statutory tax rates are based upon law in effect at the time the forecast was prepared. Temporary timing differences are fully normalized. Investment Tax Credit is amortized over the remaining lives of related equipment as required by the Internal Revenue Service under Section 46 of the IRS Code. Excess deferred income taxes for protected items are flowed back in accordance with 2017 TCJA PL 115-97, Title I, Subtitle C, Part I, Sec. 13001.

Other Income and Deduction (Net)

Non-regulated income and expenses are forecasted based on budgets from appropriate business units. Activity in this account is made up of projected CR3 Securitization Equity Return Amortization and other miscellaneous interest.

Gross Interest Expense

Interest expense for Long Term Debt is determined by the series interest rate applied to the amount outstanding. There is a $1.4 billion debt issue forecasted in August 2021 with a weighted average life of 20 years; $500 million debt issue forecasted in August 2022 with a weighted average life of 20 years; and $700 million debt issue forecasted in 2023 with a weighted average life of 20 years; each of these debt issuances is projected have an interest rate equal to a weighted average of 5 year, 10 year and 30 year issuances.

Interest on customer deposits is calculated using a blended interest rate applied against the projected total customer deposit balance. Customer deposit balance is based on historical relationship between total deposits and number of customers.

III. CONSTRUCTION BUDGET ASSUMPTIONS

Line No.

FACILITY ASSUMPTIONS - FUNCTIONAL AREA

Production Plant

Projected Fossil/Hydro capital spend is primarily for the maintenance of existing plants.

Transmission and Distribution Plant

Delivery plant expenditures of $573M in 2022 and $573M during 2023 include those expenditures required to provide the infrastructure for the projected customer growth, and maintain or improve the quality of service and reliability to existing customer base. In general, all projects are justified on the basis. None of these expenditures individually exceed 0.5% of net plant in service. In general, all projects are justified on the basis of environmental, capacity, availability, safety, regulatory requirements and/or discretion (where benefits exceed cost).

Transmission plant expenditures of $492M in 2022 and $532M in 2023 include expenditures for expansion of the transmission system and maintenance of the existing plant in service.

General Plant

General plant expenditures are used to a) provide proper equipment for new employees with proper equipment to perform their jobs, b) replace existing equipment that can not be properly maintained or repaired.

Storm Protection Plan

Programs that involve overhead hardening of electrical transmission/distribution facilities, the undergrounding of certain electrical distribution lines, and vegetation management fall under the Storm Protection Plan meant to achieve the objectives of reducing restoration costs and outage times associated with extreme weather events and enhancing reliability

Capital and O&M expenditures that fall under the definition of Storm Protection and are not already being recovered through base rates have been excluded from the calculation of rate base.

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION

The system level of CWIP allowed in rate base was assumed to be the amount associated with work order projects not eligible for AFUDC and work order projects ready for service but accruing additional expenditures. This amount is consistent with the amount authorized at the time this forecast was prepared.

III. CONSTRUCTION BUDGET ASSUMPTIONS (Continued)

OVERHEADS

Burden rates for benefits, payroll taxes and exceptional hours are applied to all charges for productive labor.

All budgeted base salaries are considered to productive labor.

Labor is burdened at a 7.65% rate for payroll taxes (including FICA, Medicare, and federal and state unemployment taxes).

The employee benefit burden rate is 31.88% and is based on the following categories:

- Health and insurance (medical, dental, life, disability)
- Retirement (pension, 401k)
- Service awards
- EAP costs
- Tuition reimbursement
- Associated administrative fees

The resulting total burden rate applied to productive labor is as follows:

Payroll taxes	7.65%
Benefits including Pension	31.88%
Total burden rate	39.53%

Additional details can be found on MFR C-35.

IV. BALANCE SHEET ASSUMPTIONS

UTILITY PLANT

ELECTRIC PLANT IN SERVICE

The timing and dollar amount of additions related to major projects is based on the current budget submissions from the business units. The dollar amount for minor project additions and blanket additions is also based on the current budget submissions from the business units. The timing of these additions is based on a percentage of the prior month CWIP balance and historical trends. Retirements are based on known amortization schedules and historical trends.

ELECTRIC PLANT HELD FOR FUTURE USE

Existing electric plant held for future use will not be placed in service before December 31,2023. There are no additional closings to this account projected for 2022 or 2023

CONSTRUCTION WORK IN PROGRESS

Total expenditures are derived from the 2022/2023 Corporate Construction Budget. Allowance for Funds Used During Construction is calculated at an annual rate of approximately 6.2%.

ACCUMULATED PROVISION FOR DEPRECIATION

Depreciation expense is derived from the Budgeted income statement. Plant retirements are taken from monthly Electric Plant in-service activity.

ACCUMULATED DEPRECATION OF ELECTRIC PLANT

The only activity affecting this account is the monthly amortization expense from the income statement.

NON-UTILITY PROPERTY

Represents the change resulting from additions and depreciation on property assets utilized in the non-regulated business.

ACCUMULATED PROVISION FOR DEPRECIATION - NON-UTILITY

The monthly balance will increase by the provision for depreciation.

IV. BALANCE SHEET ASSUMPTIONS (Continued)

OTHER PROPERTY AND INVESTMENTS

Other Investments
The monthly balance will remain unchanged for the budget year.

CURRENT AND ACCRUED ASSETS

CASH
Monthly balances are derived from the budgeted cash forecast.

SPECIAL DEPOSITS
Monthly balances related to deposits on mortgaged property sold or destroyed are assumed to be zero.

NOTES AND ACCOUNTS RECEIVABLE FROM ASSOCIATED COMPANIES
The monthly balances in accounts receivable from associated companies will remain constant for the year.

ACCOUNTS RECEIVABLE
The monthly balances for Customer Accounts Receivable was projected assuming that a specified percent of a forecasted months revenue would be received as cash that month and other amounts would be collected in subsequent months. A different lag factor is applied to different types of revenue receipts.

MATERIALS AND SUPPLIES
In general, it was assumed that the average material and supplies balance would be equal to the beginning balance; therefore the material and supplies are forecast at a constant level.

FUEL STOCK
The fuel inventory level was projected by subtracting the estimated cost of the fuel burn as determined by the Production Simulation Model and the average inventory cost and adding the projected costs to purchase additional fuel at forecasted prices sufficient to bring inventory to targeted quantity levels.

PREPAYMENTS
Monthly balances based on expected payment dates for insurance and the related amortization period for these amounts.

IV. BALANCE SHEET ASSUMPTIONS (Continued)

CURRENT AND ACCRUED ASSETS (CONTINUED)

ACCRUED UTILITY REVENUES

It was assumed that the accrued utility revenue balance would be equal to the beginning balance; therefore the accrued utility revenues are forecast at a constant level.

OTHER CURRENT AND ACCRUED ASSETS

It was assumed that other current and accrued assets relating to rate base would be equal to the beginning balance; therefore the other current and accrued assets are forecast at a constant level.

DEFERRED CHARGES AND OTHER ASSETS

DEFERRED CLAUSE BALANCES

This account captures such items as the FUEL, CCR, SPP, ECCR and ECRC clause current month deferral and the amortization of the prior month's deferral. In addition, it includes the GPIF amortization.

OTHER REGULATORY ASSETS &OTHER DEFERRED DEBITS

It was assumed that, in general, remaining regulatory assets and deferred debits would be forecasted to be amortized in accordance with an amortization schedule or amortized evenly over the assumed life of the asset.

UNAMORTIZED LOSS ON REACQUIRED DEBT

This line item is reduced for amortization of loss on reacquired debt and increased for new issues - amortization is calculated over the life of the debt instrument

ACCUMULATED DEFERRED INCOME TAXES

This line item fluctuates for impact of deferred tax assets.

CAPITALIZATION

COMMON STOCK

No changes are expected.

PREFERRED STOCK

Not Applicable.

OTHER PAID IN CAPITAL

No changes are expected.

UNAPPROPRIATED RETAINED EARNINGS

The projected monthly balances are expected to increase by the monthly earnings applicable to common from the Budgeted income statement and will be reduced by expected common dividends to parent.

FLORIDA PUBLIC SERVICE COMMISSION

IV. BALANCE SHEET ASSUMPTIONS (Continued)

LONG-TERM DEBT

There is a $1.4 billion debt issue forecasted in August 2021 with a weighted average life of 20 years; $500 million debt issue forecasted in August 2022 with a weighted average life of 20 years; and $700 million debt issue forecasted in 2023 with a weighted average life of 20 years; each of these debt issuances is projected to have an interest rate equal to a weighted average of 5 year, 10 year and 30 year issuances.

OTHER NON-CURRENT LIABILITIES

RETAIL UNFUNDED STORM DAMAGE (STORM RESERVE)

The reserve will be replenished to $132 million by May 2022 as approved in FPSC Docket 20190110.

OTHER MISCELLANEOUS OPERATING RESERVES

There are various accounts such items as DOE Facility Decommissioning, Deferred SERP, Medical &Life Insurance reserves, Workers Comp Accrual, and Environmental liability.
In general, it was assumed that the average of the remaining miscellaneous operating reserves would be equal to the beginning balance; therefore they are forecast at a constant level.

CURRENT AND ACCRUED LIABILITIES

NOTES PAYABLE

Short-term borrowing requirements are as determined in the budgeted cash forecast.

ACCOUNTS PAYABLE

It was assumed that the accounts payable balance would be equal to the beginning balance; therefore the accounts payable are forecast at a constant level.

ACCOUNTS PAYABLE TO ASSOCIATED COMPANY

The monthly balances are derived from information provided by Associated Companies.

CUSTOMER DEPOSITS

Customer deposit balance is based on historical relationship between total deposits and number of customers. Accrued interest for the customer accounts are credited to the customers in June.

TAXES ACCRUED

The monthly balances increase by the accruals for property and income tax shown on the income statement and decrease by the cash payments.

INTEREST ACCRUED

The monthly balances increase by the accruals shown on the income statement and decrease by the cash payments.

DIVIDENDS DECLARED· COMMON STOCK

Dividends declared and paid in the current month.

IV. BALANCE SHEET ASSUMPTIONS (Continued)

CURRENT AND ACCRUED LIABILITIES (CONTINUED)

OTHER CURRENT LIABILITIES

Change reflects the loss in the Company Owned Life Insurance (COLI) shown on the income statement

OTHER TAX COLLECTIONS PAYABLE

The monthly tax accruals comes from the budget income statement. Payments for other taxes are derived from an analysis of each specific "Other Tax"

OTHER LIABILITIES

REGULATORY LIABILITY • SFAS 109

This balance changes to reflect the amortization of the SFAS 109 Regulatory Liability

ACCUMULATED DEFERRED INVESTMENT TAX CREDIT/ACCUMULATED DEFERRED INCOME TAXES

The net monthly balance reflects the change on the income statement.

OTHER DEFERRED LIABILITIES/CREDITS

It was assumed that the other deferred liabilities balance would be equal to the beginning balance; therefore the other deferred liabilities are forecast at a constant level.

ASSET RETIREMENT OBLIGATIONS FAS 143

The change in this balance represents the accretion expense associated with FAS 143.

DUKE ENERGY. FLORIDA

RATE SCHEDULE BA-1
BILLING ADJUSTMENTS
(Continued from Page 1)

(3) Capacity Cost Recovery Factor:

The Capacity Cost Recovery (CCR) Factors applicable to the Energy Charge under the Company's various rate schedules are normally determined annually by the Florida Public Service Commission for the billing months of January through December. This factor is designed to recover the cost of capacity payments made by the Company for off-system capacity and is adjusted to reflect changes in these costs from one period to the next. For time of use demand rates the CCR charge will be included in the base demand only.

(4) Environmental Cost Recovery Clause Factor:

The Environmental Cost Recovery Clause (ECRC) Factors applicable to the Energy Charge under the Company's various rate schedules are normally determined annually by the Florida Public Service Commission for the billing months of January through December. This factor is designed to recover environmental compliance costs incurred by the Company and is adjusted to reflect changes in these costs from one period to the next.

(5) Asset Securitization Charge Factor:

The Asset Securitization Charge (ASC) Factors applicable to the Energy Charge under the Company's various rate schedules represent a Nuclear Asset-Recovery Charge approved in a financing order issued to the Company by the Florida Public Service Commission and are adjusted at least semi-annually to ensure timely payment of principal, interest and financing costs of nuclear asset-recovery bonds from the effective date of the ASC until the nuclear asset-recovery bonds have been paid in full or legally discharged and the financing costs have been fully recovered. As approved by the Commission, a Special Purpose Entity (SPE) has been created and is the owner of all rights to the Nuclear Asset-Recovery Charge. The Company shall act as the SPE's collection agent or servicer for the Nuclear Asset-Recovery Charge. The Nuclear Asset-Recovery Charge shall be paid by all existing or future customers receiving transmission or distribution service from the Company or its successors or assignees under Commission-approved rate schedules or under special contracts, even if the customer elects to purchase electricity from alternative electric suppliers following a fundamental change in regulation of public utilities in this state.

(6) Storm Cost Recovery Surcharge Factor:

In accordance with a Florida Public Service Commission ruling, the Storm Cost Recovery Surcharge (SCRS) factor is applicable to the Energy Charge under the Company's various rate schedules for the billing months of March 2020 through February 2021. This surcharge is designed to recover storm-related costs incurred by the Company related to Hurricane Dorian and Tropical Storm Nestor in 2019.

Gross Receipts Tax Factor:

In accordance with Section 203.01(1)(a)1 of the Florida Statutes, a factor of 2.5641% is applicable to electric sales charges for collection of the state Gross Receipts Tax.

Regulatory Assessment Fee Factor:

In accordance with Section 350.113 of the Florida Statutes and Rule 25-6.0131, F.A.C., a factor of 0.072% is applicable to electric sales charges for collection of the Regulatory Assessment Fee.

Right-of-Way Utilization Fee:

A Right-of-Way Utilization Fee is applied to the charges for electric service (exclusive of any Municipal, County, or State Sales Tax) provided to customers within the jurisdictional limits of each municipal or county governmental body or any unit of special-purpose government or other entity with authority requiring the payment of a franchise fee, tax, charge, or other imposition whether in money, service, or other things of value for utilization of rights-of-way for location of Company distribution or transmission facilities. The Right-of-Way Utilization Fee shall be determined in a negotiated agreement (i.e., franchise and other agreements) in a manner which reflects the Company's payments to a governmental body or other entity with authority plus the appropriate Gross Receipts Taxes and Regulatory Assessment Fees resulting from such additional revenue. The Right-of-Way Utilization Fee is added to the charges for electric service prior to the application of any appropriate taxes.

Municipal Tax:

A Municipal Tax is applied to the charge for electric service provided to customers within the jurisdictional limits of each municipal or other governmental body imposing a utility tax on such service. The Municipal Tax shall be determined in accordance with the governmental body's utility tax ordinance, and the amount collected by the Company from the Municipal Tax shall be remitted to the governmental body in the manner required by law. No Municipal Tax shall apply to fuel charges in excess of 0.699¢/kWh.

Sales Tax:

A State Sales Tax is applied to the charge for electric service provided to all non-residential customers and equipment rental provided to all customers (unless a qualified sales tax exemption status is on record with the Company). The State Sales Tax shall be determined in accordance with the State's sales tax laws. The amount collected by the Company shall be remitted to the State in the manner required by law. In those counties that have enacted a County Discretionary Sales Surtax, such tax shall be applied and paid in a like manner. An additional tax factor is applied to the charge for electric service consistent with the applicability of State Sales Tax as described in this paragraph, in accordance with Section 203.01(1)(a)3 and (b)4 of the Florida Statutes.

(Continued on Page No. 3)

RATE SCHEDULES SC-1
SERVICE CHARGES

Establishment of Service:

A service charge shall be made for each establishment or re-establishment of service. This charge shall apply to each new service connection, service reconnection and transfer of account from one occupant to another. It shall also apply to reconnections after disconnection for non-payment or violation of Company or Florida Public Service Commission (Commission) Rules. If there is an involuntary transfer upon death, service charges that would otherwise be required for establishment or re-establishment of service will be waived.

1. A charge of $58.00 will be made for initial establishment of service to a premise.

2. A charge of $12.00 will be made for each subsequent re-establishment of service to said premise.

3. A charge of $4.00 will be made for each subsequent re-establishment of service to said premise where the customer has executed and has on file a Revert to Owner agreement for rental properties.

4. A charge of $13.00 will be made for the reconnection of service after disconnection for nonpayment or violation of Company or Commission Rules where such reconnection is performed during normal working hours (M-F, 7AM-7PM). For reconnection of lighting service, the Company may assess this charge for each lighting installation on an account.

5. A charge of $14.00 will be made for the reconnection of service for nonpayment or violation of Company or Commission Rules where such reconnection is performed outside of normal working hours. For reconnection of lighting service, the Company may assess this charge for each lighting installation on an account.

Late Payment Charge:

Charges for services due and rendered which are unpaid as of the past due date are subject to a Late Payment Charge of the greater of $5.00 or 1.5%, except the accounts of federal, state, and local governmental entities, agencies, and instrumentalities. A Late Payment Charge shall be applied to the accounts of federal, state, and local governmental entities, agencies and instrumentalities at a rate no greater than allowed, and in a manner permitted, by applicable law.

Returned Check Charge:

A service charge as allowed by Florida Statute 68.065 shall be added to the Customer's bill for electric service for each check or draft dishonored by the bank upon which it is drawn. Termination of service shall not be made for failure to pay the returned check charge.

Waiver Clause for Above Charges:

The Company shall have the discretion to waive any of the foregoing charges that would otherwise apply to customers as a consequence of significant damage to their premises caused by a natural disaster, or during periods of declared emergencies, or other similar conditions for which an emergency has been declared by a governmental body authorized to make such a declaration.

Investigation of Unauthorized Use Charge:

The Customer shall be assessed a charge by the Company for reimbursement of all investigative expenses related to a premise for which the Customer has undertaken unauthorized use of service and the Company has not elected to seek full recovery by prosecution under the law. The charge shall be $200.00 for residential customers and $1,000.00 for all other customers, and such charge may be assessed in lieu of proof of actual expenses incurred. In addition to this charge, the Customer is responsible for any damages to the Company's facilities, correction of measured consumption, and/or any other service charges which may be applicable.

RATE SCHEDULE RS-1
RESIDENTIAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To residential customers taking service exclusively for domestic purposes in a single dwelling house, a mobile home, or individually metered single apartment unit or other unit having housekeeping facilities, occupied by one family or household as a residence. The premises of such single dwelling may include an additional apartment with separate housekeeping facilities, as well as a garage, a boat slip, and other separate structures where they are occupied or used solely by the members or servants of such family or household for domestic purposes only. Also, for energy used in commonly-owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

1. 100% of the energy is used exclusively for the co-owner's benefit.
2. None of the energy is used in any endeavor which sells or rents a commodity or provides service for a fee.
3. Each point of delivery is separately metered and billed.
4. A responsible legal entity is established as the customer to whom the Company can render its bill(s) for said service.

Character of Service:

Continuous service, alternating current, 60 cycles per second, single-phase or three-phase, at the Company's standard available distribution voltage. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:	$ 12.45

Energy and Demand Charges:

Non-Fuel Energy Charges:

(1) For the calendar months of December through February:	
First 1,000 kWh	7.623¢ per kWh
All additional kWh	8.773¢ per kWh
(2) For the calendar months of March through November:	
First 1,000 kWh	6.587¢ per kWh
All additional kWh	7.474¢ per kWh

Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Off-Peak Electric Vehicle (EV) Charging Credit:

Residential customers on this rate schedule and other residential customers that are not on a time-of-use rate schedule, have an EV charger at their residence, and are participating in the Off-Peak EV Charging Program in compliance with its terms are eligible to receive an off-peak EV charging credit of $10 per month.

The designated off-peak periods for the EV charging credit, expressed in terms of prevailing clock time shall be as follows:

For all calendar months, Monday through Friday: 10:00 a.m. to 6:00 p.m. and 9:00 p.m. to 5:00 a.m.

Customers must use the EV charger only during designated off-peak periods during the billing period; provided, however, that customers may have, at most, 2 occasions of opt-out charging in a billing period and still receive the EV off-peak charging credit in that billing period. An occasion of opt-out charging is defined as charging outside of the designated off-peak periods for 15 minutes or more at 3kW capacity or above.

(Continued on Page No. 2)

RATE SCHEDULE RS-1
RESIDENTIAL SERVICE
(Continued from Page No. 1)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The Minimum Monthly Bill shall be $30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges and excluding the off-peak EV charging credit, are less than the minimum monthly bill amount.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at company-designated locations.

Term of Service:

From billing period to billing period, until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company rules.

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT

Availability:

Available only within the range of the Company's Load Management System.
Available to customers whose premises have active load management devices installed prior to June 30, 2007.
Available to customers whose premises have load management devices installed after June 30, 2007 that have and are willing to submit to load control of, at a minimum, central electric cooling and heating systems.

Applicable:

To customers eligible for Residential Service under Rate Schedule RS-1 having a minimum average monthly usage of 600 kWh (based on the most recent 12 months, or, where not available, a projection for 12 months), and utilizing any of the following electrical equipment:

1. Water Heater
2. Central Electric Heating System
3. Central Electric Cooling System
4. Swimming Pool Pump

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Service to the electrical equipment specified above may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

For new service requests after June 30, 2007 customers with a central electric heating system that is a heat pump will be installed on Interruption Schedule S. All other new service requests will be installed on Interruption Schedule B. Interruption Schedule C shall be at the option of the customer.

For new service requests after April 1, 1995, and before June 30, 2007, customers who select the swimming pool pump schedule must also select at least one other schedule.

An installation of an alternative thermal storage heating system under Special Provision No. 7 of this rate schedule is not available after April 1, 1995.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:	$ 12.45
Energy and Demand Charges:	
Non-Fuel Energy Charges:	
(1) For the calendar months of December through February	
First 1,000 kWh	7.623¢ per kWh
All additional kWh	8.773¢ per kWh

Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT
(Continued from Page No. 1)

Load Management Monthly Credit Amounts:[1,2]

Interruptible Equipment	Interruption Schedule				
	A	B	C	D	S
Water Heater	-	-	$3.50	-	-
Central Heating System[3]	$2.00	$8.00	-	-	$8.00
Central Heating System w/Thermal Storage[3]	-	-	-	$8.00	-
Central Cooling System[4]	$1.00	$5.00	-	-	$5.00
Swimming Pool Pump	-	-	$2.50	-	-

Any customer with a heat pump not taking service under Schedule S who requests a change under this tariff will be required to take service under Schedule S.
Premises taking service under this tariff and controlled by load management devices will remain on the existing schedule until such time as the current customer affirmatively requests a change.
See also Special Provisions 10 and 11 below for further customer optional adjustments to the above credits.

Notes: (1) Load Management credits shall not exceed 40% of the Non-Fuel Energy Charge associated with kWh billed in excess of 600 kWh per month.

(2) Premises that have load management devices installed prior to June 30, 2007 may remain on the existing schedule until such time as the customer requests a change under this tariff. When a change is requested, customers may take service only under Schedule B or Schedule S if the customer has a heat pump. Customers may also opt for Schedule C if taking service under another Schedule. Customers whose premises have load management devices installed after June 30, 2007 will be subject to the Limitations of Service above.

(3) For the billing months of November through March only.

(4) For the billing months of April through October only.

Interruption Schedules:

Schedule A Equipment interruptions to achieve an effective equipment duty cycle of approximately 66% during control periods within the Company's designated Peak Periods.

Schedule B Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods.

Schedule C Equipment may be interrupted continuously, not to exceed 300 minutes, and during the Company's designated Peak Periods. Where a thermal storage system has been installed hereunder, additional interruptions to the water heater will be made during periods of charging thermal storage system.

Schedule D The regular heating system may be interrupted continuously and alternative heating provided by means of a thermal storage system installed hereunder.

Schedule S Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods. Heat pump back-up strip may be interrupted continuously, not to exceed 300 minutes, during the Company's designated Peak. When the heat pump back-up strip is being interrupted, the heat pump will not be interrupted.

Peak Periods:

The Peak Periods expressed in terms of prevailing clock time shall be, but are not limited to these as follows:

(1) For the calendar months of December through February, All Days: 5:00 a.m. to 10:00 a.m.
(2) For all calendar months, All Days: 6:00 p.m. to 9:00 p.m.

Terms and Conditions:

All terms and conditions of Rate Schedule RS-1, Residential Service, (i.e. Fuel Charges and other Billing Adjustments, Minimum Monthly Bill, Terms of Payment, Term of Service and Average Billing Plan), shall apply to service under this rate schedule.

(Continued on Page No. 3)

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT
(Continued from Page No. 2)

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment.

3. The Company shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons, such as, excessive installation costs, insufficient load, oversized equipment or abnormal utilization of equipment, including but not limited to, vacation or other limited occupancy residences or qualifying common use facilities.

4. Multiple units of any electrical equipment specified above must all be installed with load management devices to qualify for the credit attributable to that equipment type at that premise.

5. The limitation on interruptible schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

6. If the Company determines that the load management devices have been tampered with or disconnected without notice, or the customer's Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for all prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

7. Billing under this Rate Schedule will commence with the first complete billing period following installation of the load management devices. A customer may change interruption schedules or the selection of electrical equipment installed with load management devices or transfer to another rate schedule by notifying the Company forty-five days in advance. However, in the event of any revision to the interruption schedules which may affect customer, the Customer shall be allowed ninety days from the effective date of the revision to change schedules or equipment or transfer to another rate schedule. If a customer transfers to another rate schedule they are not eligible for service under this rate schedule for 12 months from the date of transfer.

8. If the Company determines that the effect of equipment interruptions has been offset by the customer's use of supplementary or alternative electrical equipment, or if access cannot be obtained by the Company to inspect, maintain, or remove load management devices, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six months.

9. Effective 8/31/07, for customers at premises taking service under Interruption Schedule B or S, and C for electric water heating, for which the premise at any time received the solar thermal water heating incentive, the monthly credit amount will be 25% of the above credit values for Interruption Schedules B, S and C, except for the pool pump. The pool pump credit amount will be at 100%.

RATE SCHEDULE RSL-2
RESIDENTIAL LOAD MANAGEMENT – WINTER ONLY

Availability:

Available only within the range of the Company's Load Management System.

Applicable:

To customers eligible for Residential Service under Rate Schedule RS-1 having a minimum average monthly usage of 600 kWh for the months of December through February (based on the most recent billings, where not available, a projection for those months) and utilizing **both** electric water heater and central electric heating systems.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Service to the electrical equipment specified above may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:	$ 12.45
Energy and Demand Charges:	
Non-Fuel Energy Charges:	
(1) For the calendar months of December through February	
First 1,000 kWh	7.623¢ per kWh
All additional kWh	8.773¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Load Management Credit Amount:[1]

Interruptible Equipment	Monthly Credit[2]
Water Heater and Central Heating System	$11.50

Notes: (1) Load management credit shall not exceed 40% of the Non-Fuel Energy Charge associated with kWh billed in excess of 600 kWh/month.

(2) For billing months of November through March only.

Appliance Interruption Schedule:

Heating — Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods. Heat pump back-up strip may be interrupted continuously, not to exceed 300 minutes, during the Company's designated Peak. When the heat pump back-up strip is being interrupted, the heat pump will not be interrupted.

Water Heater — Equipment may be interrupted continuously, not to exceed 300 minutes, and during the Company's designated Peak Periods.

(Continued on Page No. 2)

RATE SCHEDULE RSL-2
RESIDENTIAL LOAD MANAGEMENT – WINTER ONLY
(Continued from Page No. 1)

Peak Periods:

The Peak Periods expressed in terms of prevailing clock time shall be, but are not limited to these as follows:

(1) For the calendar months of December through February - All Days: 5:00 a.m. to 10:00 a.m., and 6:00 p.m. to 9:00 p.m.

Terms and Conditions:

All terms and conditions of Rate Schedule RS-1, Residential Service (i.e. Non-Winter Energy and Demand Charges, Fuel Charges and other Billing Adjustments, Minimum Monthly Bill, Terms of Payment, Term of Service and Budget Billing Plan), shall apply to service under this rate schedule.

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment.

3. The Company shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons, such as, excessive installation costs, insufficient load, oversized equipment, or abnormal utilization of equipment, including but not limited to, vacation or other limited occupancy residences or qualifying common use facilities.

4. Multiple units of any electrical equipment specified above must all be installed with load management devices to qualify for the credit attributable to that equipment at that premise.

5. The limitation on interruptible schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

6. If the Company determines that the load management devices have been tampered with or disconnected without notice, or the customer's Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty (30) consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for all prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

7. Billing under this Rate Schedule will commence with the first complete billing period following installation of the load management devices. A customer may transfer to another rate schedule by notifying the Company forty-five (45) days in advance. If a customer transfers to another rate schedule they are not eligible for service under this rate schedule for 12 months from the date of transfer.

8. If the Company determines that the effect of equipment interruptions has been offset by the customer's use of supplementary or alternative electrical equipment, or if access cannot be obtained by the Company to inspect, maintain, or remove load management devices, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six (6) months.

RATE SCHEDULE RST-1
RESIDENTIAL SERVICE
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of residential customers otherwise eligible for service under Rate Schedule RS-1, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Rate Per Month:

Customer Charge: $ 12.45

Energy and Demand Charges:

Non-Fuel Energy Charges:	8.818¢ per On-Peak kWh 7.308¢ per Off-Peak kWh 4.237¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy used during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Rating Periods:

(a) **On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1)	For the calendar months of December through February, Monday through Friday *:	5:00 a.m. to 10:00 a.m.
(2)	For all calendar months, Monday through Friday*:	6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) **Super-Off-Peak Periods** - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November, Every day, including weekends and holidays	12:00 a.m. (midnight) to 6:00 a.m.

(c) **Off-Peak Periods -** The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE RST-1
RESIDENTIAL SERVICE
OPTIONAL TIME OF USE RATE

(Continued from Page No. 1)

Minimum Monthly Bill:

The minimum monthly bill shall be $30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) consecutive months.

Special Provisions:

1. All service rendered under this rate schedule shall be measured by metering equipment capable of determining energy use during specified hourly periods.

2. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

3. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

RATE SCHEDULE GS-1
GENERAL SERVICE – NON-DEMAND
(Closed to New Customers as of 01/01/2022)

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Unmetered Account:	$ 8.74
Secondary Metering Voltage:	$ 15.47
Primary Metering Voltage:	$ 195.60
Transmission Metering Voltage:	$ 964.77

Energy and Demand Charges:

Non-Fuel Energy Charge:	7.073¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Energy Charge included in the Rate per Month section of this rate schedule shall be increased by 1.339¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above standard distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE GS-1
GENERAL SERVICE – NON-DEMAND
(Closed to New Customers as of 01/01/2022)
(Continued from Page No. 1)

Minimum Monthly Bill:

The minimum monthly bill shall be $30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Where special equipment to serve the customer is required, the Company may require an additional specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of twelve (12) months from commencement of service and shall continue thereafter until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules

Customers who change service characteristics (i.e. metering voltage level, delivery voltage level, load requirements, etc.) will be allowed to remain on the rate.

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

3. For fixed wattage and/or automatically controlled loads, the kWh consumption may, at the option of the Company, be estimated in lieu of installing meters.

RATE SCHEDULE GST-1
GENERAL SERVICE – NON-DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of non-residential customers otherwise eligible for service under Rate Schedule GSD-1, provided that all of the electric load requirements on the Customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or Resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Secondary Metering Voltage:	$ 15.47
Primary Metering Voltage:	$ 195.60
Transmission Metering Voltage:	$ 964.77

Energy and Demand Charge:

Non-Fuel Energy Charge:	8.878¢ per On-Peak kWh 8.243¢ per Off-Peak kWh 4.692¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Charges included in the Rate per Month section of this rate schedule shall be increased by 1.339¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

(a) **On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1)	For the calendar months of December through February, Monday through Friday *:	5:00 a.m. to 10:00 a.m.
(2)	For all calendar months, Monday through Friday*:	6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) **Super-Off-Peak Periods** - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November, Every day, including weekends and holidays	12:00 a.m. (midnight) to 6:00 a.m.

(Continued on Page No. 2)

RATE SCHEDULE GST-1
GENERAL SERVICE – NON-DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods: (Continued)

(b) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy and Demand Charges hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No, 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be $30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Where special equipment to serve the customer is required, the Company may require an additional specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electric load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

3. All service rendered under this rate schedule shall be measured by metering equipment capable of determining energy use during specified hourly periods.

4. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

5. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

RATE SCHEDULE GS-2
GENERAL SERVICE – NON-DEMAND
100% LOAD FACTOR USAGE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, with fixed wattage loads operating continuously throughout the billing period (such as traffic signals, cable TV amplifiers and gas transmission substations).

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Unmetered Account:	$ 9.01
Metered Account:	$ 15.94

Energy and Demand Charges:

Non-Fuel Energy Charge:	2.728¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Energy Charge included in the Rate per Month section of this rate schedule shall be increased by 0.237¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE GS-2
GENERAL SERVICE – NON-DEMAND
100% LOAD FACTOR USAGE
(Continued from Page No. 1)

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

From billing period to billing period, until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules.

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

3. The calculated kWh usage at each unmetered point shall be determined by operating test or utilization of manufacturer's rating and specifications. The monthly operation shall be based on a standard of 730 hours. For cable TV amplifiers or similar equipment, the input wattage used to calculate kWh usage shall be:

$$\text{Input Wattage} = \frac{\text{Output Amperage x Output Voltage}}{\text{Manufacturer's Rated Efficiency}}$$

where, such above values are established by the Manufacturer.

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable.

Character of Service:

Continuous service, alternating current, 60 cycle, singe-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 15.94
Primary Metering Voltage:	$ 201.54
Transmission Metering Voltage:	$ 994.07

Demand Charge: $ 6.73 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Energy Charge:

Non-Fuel Energy Charge: 2.955¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period.

(Continued on Page No. 2)

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND
(Continued from Page No. 1)

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credits:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Billing Demand
For Transmission Delivery Voltage below 230kV:	$5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of twelve (12) months from commencement of service and shall continue thereafter until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules.

Customers taking service under another Company rate schedule who elect to transfer to this rate must remain on this rate for a minimum term of twelve (12) months.

(Continued on Page No. 3)

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND
(Continued from Page No. 2)

Term of Service: (Continued)

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate schedule, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month times the installed cost of such additional equipment.

RATE SCHEDULE GSDT-1
GENERAL SERVICE - DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of the customer, otherwise eligible for service under Rate Schedule GSD-1, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or Resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Secondary Metering Voltage:	$ 15.94
Primary Metering Voltage:	$ 201.54
Transmission Metering Voltage:	$ 994.07

Demand Charges:

Base Demand Charge:	$ 2.20 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.18 per kW of Mid-Peak Demand
On-Peak Demand Charge:	$ 1.16 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand	See Sheet No. 6.105 and 6.106

Energy Charges:

Non-Fuel Energy Charge:	3.210¢ per On-Peak kWh 2.694¢ per Off-Peak kWh 1.672¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE GSDT-1
GENERAL SERVICE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) **On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday *: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) **Super-Off-Peak Periods** - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,
Every day, including weekends and holidays: 12:00 a.m. (midnight) to 6:00 a.m

(c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established over the current and eleven previous billing periods.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credits:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Monthly Max Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges and Delivery Voltage Credit hereunder:

Metering Voltage	**Reduction Factor**
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.

(Continued on Page No. 3)

RATE SCHEDULE GSDT-1
GENERAL SERVICE - DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge.

Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate schedule at the location for a minimum term of twelve (12) months.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

3. All service rendered under this rate schedule shall be measured by the metering equipment capable of determining energy use during specified hourly periods.

4. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

5. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

RATE SCHEDULE GSLM-1
GENERAL SERVICE - LOAD MANAGEMENT
(Closed to New Customers as of 07/20/2000)

Availability:

Available only within the range of the Company's Load Management System.

Applicable:

To customers who are eligible for service under Rate Schedules GS-1, GST-1, GSD-1, or GSDT-1, excluding those customers served under the General Service transition rates, and who elect service under this rate schedule and have electric space cooling equipment suitable for interruptible operation. Also applicable to those customers who have any of the following electrical equipment installed on permanent residential structures and utilized for domestic (household) purposes: (1) water heater(s), (2) central electric heating system(s), (3) central electric cooling system(s), and/or (4) swimming pool pump(s).

Limitation of Service:

Service to specified electrical equipment may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

The rates and all other terms and conditions of Company Rate Schedules GS-1, GST-1, GSD-1 or GSDT-1 (whichever shall otherwise be applicable) shall be applicable to service under this rate schedule, subject to the following:

LOAD MANAGEMENT MONTHLY CREDIT AMOUNT

Interruptible Equipment	Interruption Schedule	Credit Based on Installed Capacity[1]	Applicable Billing Months
Electric Space Cooling[3]	A	$ 0.26 Per kW	March thru November
Electric Space Cooling[3]	B	$ 0.56 Per kW	March thru November
Domestically Utilized Equipment[2,3]	[Availability, Schedules and Credits of the otherwise applicable Rate Schedule RSL-1or RSL-2 shall apply]		

Notes:

(1) Credit shall not exceed 50% of the Non-Fuel Energy and Demand Charges; nor, for otherwise applicable Rate Schedule GSDT-1, shall the credit exceed the On-Peak and Base Demand Charges.

(2) Equipment includes water heaters, central heating systems, central cooling systems and swimming pool pumps when such equipment is installed on permanent residential structures and utilized for domestic purposes.

(3) Restricted to existing customers as of July 20, 2000.

Interruption Schedules:

Schedule A Interruptions to achieve an effective equipment duty cycle of approximately 66% during control periods within the designated Peak Periods.

Schedule B Interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the designated Peak Periods.

(Continued on Page No. 2)

RATE SCHEDULE GSLM-1
GENERAL SERVICE – LOAD MANAGEMENT
(Continued from Page No. 1)

Peak Periods:

The designated Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
All Days: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
All Days: 6:00 p.m. to 9:00 p.m.

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment. The Company may, at its option, require a commercial energy audit as a prerequisite to receiving service under this rate. The audit may be used to establish or confirm equipment capacity, operating hours, or to determine the ability of the Company to control electric demand.

3. The Company shall not be required to install load management devices on electrical equipment, which would not be economically justified, for reasons such as excessive installation costs, oversized equipment or abnormal utilization of equipment, including operating hours which are not considered within the designated Peak Periods.

4. If the Company determines that equipment operating schedules and/or business hours have reduced the ability of the Company to control electric demand during the above designated peak periods, then service under this rate will be discontinued.

5. Where multiple units (including standby or multi-stage) of space conditioning equipment are used to heat or cool a building, all of these units must be equipped with load management devices and normally must be controlled on the same interruption cycle.

6. Billing under this rate schedule will commence with the first complete billing period following installation of the load management devices. During the first year of service, a customer may transfer to another rate schedule by notifying the Company forty-five (45) days in advance. After the first year of service, the customer may transfer to another rate schedule by notifying the Company twelve (12) months in advance. However, in the event of any revision to the interruption schedules which may affect customer, the customer shall be allowed ninety (90) days from the effective date of the revision to change schedules or equipment or transfer to another rate schedule.

7. The limitations on Interruptible Schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

8. If the Company determines that the load management devices have been tampered with or disconnected without notice or customer Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty (30) consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

9. If the Company determines that the effect of equipment interruptions have been offset by the customer's use of supplementary or alternative electrical equipment, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six (6) months.

10. For purposes of determining eligible credits related to domestically utilized equipment, the customer shall provide the Company actual occupancy rates of permanent residential structures containing each type of equipment for the previous winter (December through February) and summer (March through November) periods. Credits for the current billing period shall apply to the number of items of each installed type of equipment multiplied by the corresponding previous seasonal period's occupancy rate.

RATE SCHEDULE GSLM-2
GENERAL SERVICE LOAD MANAGEMENT – STANDBY GENERATION

Availability:

Available only within the range of the Company's radio switch communications capability.

Applicable:

To customers who are eligible for service under Rate Schedules GS-1, GST-1, GSD-1, or GSDT-1 who have standby generation that will allow facility demand reduction at the request of the Company. The customer's Standby Generation Capacity calculation must be at least 50 kW in order to remain eligible for the rate. Customers cannot be on this rate schedule and also the General Service Load Management (GSLM-1) rate schedule. Not applicable to Net Metering customers. Customers cannot use the standby generation for peak shaving. Available only to those customers whose standby generation equipment is compliant with all applicable federal, state, and local codes and rules.

Limitation of Service:

Operation of the customer's equipment will occur at the Company's request. Requests by the Company for the customer to reduce facility demand by operation of their standby generation can occur at any time. Power to the facility from the Company will normally remain as back up power for the standby generation. The Customer will be given fifteen (15) minutes to initiate the demand reduction before the capacity calculation (see Definitions) is impacted.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

The rates and all other terms and conditions of Company Rate Schedules GS-1, GST-1, GSD-1 or GSDT-1 (whichever shall otherwise be applicable) shall be applicable to service under this rate schedule, subject to the following:

GSLM-2 MONTHLY CREDIT AMOUNT
STANDBY GENERATION

	Credit	Cumulative Fiscal Year Hours
	$6.61 x ***C*** + $0.10 x kWh monthly	All CRH

Immediately upon going on the rate, the customer's Capacity (***C***) is set to a value equivalent to the load the customer's standby generator carries during testing observed by the Customer and a Company representative. The ***C*** will remain at that value until the equipment is requested to run by the Company. The ***C*** for that month and subsequent months will be a calculated value based upon the following formula:

$$C = \frac{\text{kWh annual}}{[\text{CAH} - (\#\text{ of Requests} \times \tfrac{1}{4}\text{ hour})]}$$

Definitions:

kWh annual = Actual measured kWh generated by the standby generator during the previous twelve (12) months during Company control periods (rolling total).

CAH = Cumulative hours requested by the Company for the standby generation to operate for the previous twelve (12) months (rolling total).

CRH = Cumulative standby generator running hours during request periods of the Company for the current fiscal year (the fiscal year begins on the month the customer goes on the GSLM-2 rate).

# of Requests = The cumulative number of times the Company has requested the standby generation to be operated for the previous twelve (12) months (rolling total).

kWh monthly = Actual measured kWh generated by the standby generator for the current month during Company control periods.

(Continued on Page No. 2)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes where the billing demand is 500 kW or more, and where the customer agrees to curtail 25% or more of their average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection for twelve (12) months).

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Curtailable service under this rate schedule is not subject to curtailment during any time period for economic reasons. Curtailable service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 87.44
Primary Metering Voltage:	$ 242.77
Transmission Metering Voltage:	$ 906.04

Demand Charge: $ 10.81 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ 7.72 per kW of Contracted On-Peak Demand Capability

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge: 1.973¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday*: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.

Determination of Contracted On-Peak Demand Capability:

The Contracted On-Peak Demand Capability shall be the lesser of the Contracted Curtailable Demand and the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Billing Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing the resulting power factor actually established at the time of maximum demand during the current month.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of two (2) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

(Continued on Page No. 3)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 2)

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. Under the provisions of this rate, the Company will require a contract with the customer upon the Company's filed standard contract Form No. 2. An initial Non-Curtailable Demand shall be specified in the contract and shall be based on specifications for power requirements supplied to the Company. (Note: the initial contract Non-Curtailable Demand cannot be set any greater than 75% of the customer's average monthly billing demand in accordance with the Applicable Clause of this rate schedule). Contracted Curtailable Demand shall be the difference between the customer's average monthly billing demand and the Non-Curtailable Demand. The contract Non-Curtailable Demand shall be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer shall establish a new contract Non-Curtailable Demand.

   (b) If the customer establishes a demand higher than the contract Non-Curtailable demand during any period of requested curtailment in the billing period, such higher demand shall become the contract Non-Curtailable Demand effective with the next billing period. In addition. Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand lower than the contract Non-Curtailable demand during all periods of requested curtailment in the billing period, such lower demand upon request by the customer shall become the contract Non-Curtailable Demand effective with the next billing period.

   (d) If the customer's contract Non-Curtailable Demand exceeds 75% of the customer's average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection of twelve (12) months), the contract Non-Curtailable Demand shall be set equal to 75% of the customer's average monthly billing demand effective with the current billing period. A re-establishment of the customer's contract Non-Curtailable Demand under this condition shall supersede any other establishment.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of his power requirements to no more than his contract Non-Curtailable Demand upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. A customer will be deemed to have complied with his curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment does not exceed his contract Non-Curtailable Demand.

5. If the maximum 30-minute kW demand established during a requested curtailment in the billing period exceeds the customer's contract Non-Curtailable Demand, the customer will be billed the following additional charge for all billing periods from the most recent prior billing period of requested curtailment through the current billing period, not to exceed a total of twelve (12) billing periods:

   1.25 times the difference in Demand and Energy Charges which would result under Rate Schedule GSD-1 and those Demand and Energy Charges calculated under this rate schedule plus the difference between ECCR, CCR and ECRC of this rate schedule and GSD-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

(Continued on Page No. 4)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 3)

Special Provisions: (Continued)

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

7. If the customer increases his power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of 1.08% times the installed cost of such additional equipment.

9. Customers taking service under this curtailable rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

10. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster.

11. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods preceding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 9 of this rate.

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes where the billing demand is 2,000 kW or more (based on most recent twelve (12) months or, where not available, projected billing demand for twelve (12) months), and where the customer agrees to curtail its demand by a fixed contractual amount of not less than 2,000 kW upon request of the Company in accordance with the provisions of this rate schedule.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. Service under this rate schedule is not subject to curtailment for economic reasons.

Service under this rate is subject to the "General Rules and Regulations Governing Electric Service" contained in Section IV of the Company's currently effective and filed retail tariff.

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 87.44
Primary Metering Voltage:	$ 242.77
Transmission Metering Voltage:	$ 906.04

Demand Charge: $ 10.81 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ 7.72 per kW of Fixed Curtailable Demand

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge: 1.973¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where the customer receives Premium Distribution Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer, including, all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 2,000 kW.

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Billing Demand
For Transmission Delivery Voltage:	$5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

(Continued on Page No. 3)

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
(Continued from Page No. 1)

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor Adjustment:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing the resulting power factor actually established at the time of maximum demand during the current month.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of two (2) years from the commencement of service and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. As a condition for service under this rate schedule, a customer is required to enter into a contract with the Company on the Company's filed standard contract Form No. 2. An initial Fixed Curtailable Demand of at least 2,000 kW shall be specified in the contract, which may be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer may establish a new Fixed Curtailable Demand.

   (b) If the customer fails to reduce load by the Fixed Curtailable Demand for the duration of any period of requested curtailment, the lowest measured load reduction achieved during such period shall become the Fixed Curtailable Demand effective with the next billing period following the period of requested curtailment. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand reduction larger than the Fixed Curtailable Demand for the duration of each period of requested curtailment occurring within a billing period, upon request by the customer, the lowest of the demand reductions achieved during each such period shall become the Fixed Curtailable Demand effective with the next billing period.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of its load by at least the Fixed Curtailable Demand upon each curtailment request from the Company. Such requests will be made during those periods specified under Limitation of Service above. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of such limitations.

(Continued on Page No. 3)

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
(Continued from Page No. 2)

Special Provisions: (Continued)

4. A customer will be deemed to have complied with its curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment is lower than what the customer's maximum 30-minute kW demand would otherwise have been during the period of requested curtailment by at least the Fixed Curtailable Demand defined in Special Provision No. 2. This will be determined by the Company using the customer's load data of similar day, time and weather conditions where a curtailment was not requested.

5. If a customer has not complied with its curtailment responsibility during a period of requested curtailment, the customer will be billed the following additional charge for all billing periods following the previous period of requested curtailment through the billing period in which such non-compliance occurred, not to exceed a total of twelve (12) billing periods:

   125% of the difference in Demand and Energy Charges which would have resulted under Rate Schedule GSD-1 and those Demand and Energy Charges calculated under this rate schedule, plus the difference between ECCR, CCR and ECRC of this rate schedule and GSD-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.
7. If the customer increases its power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of 1.08% times the installed cost of such additional equipment.

9. Customers taking non-firm service under this rate schedule who desire to transfer to a rate schedule providing firm service will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the notice.

10. Service under this rate is not available if all or a part of the customer's load serves a facility designated by an appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of customers otherwise eligible for service under Rate Schedule CS-2, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Curtailable service under this rate schedule is not subject to curtailment during any time period for economic reasons. Curtailable service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 87.44
Primary Metering Voltage:	$ 242.77
Transmission Metering Voltage:	$ 906.04

Demand Charges:

Base Demand Charge:	$ 1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
On-Peak Demand Charge:	$ 1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106
Curtailable Demand Credit:	$ 7.72 per kW of Contracted On-Peak Demand Capability

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge:	1.848¢ per On-Peak kWh 1.607¢ per Off-Peak kWh 1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday *: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,

Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.
(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.
(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.
(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Determination of Contracted On-Peak Demand Capability:

The Contracted On-Peak Demand Capability shall be the lesser of the Contracted Curtailable Demand and the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Monthly Max Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.

(Continued on Page No. 3)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

For customers electing to take service hereunder in lieu of the otherwise applicable Rate Schedule CS-2, the term of service requirements under this optional rate schedule shall be the same as that required under Rate Schedule CS-2 provided, however, at a given location the customer shall have the right during the initial term of service to transfer to the otherwise applicable Rate Schedule CS-2 at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. Under the provisions of this rate, the Company will require a contract with the customer upon the Company's filed standard contract Form No. 2. An initial Non-Curtailable Demand shall be specified in the contract and shall be based on specifications for power requirements supplied to the Company. (Note: the initial contract Non-Curtailable Demand cannot be set any greater than 75% of the customer's average monthly billing demand in accordance with the Applicable Clause of Rate Schedule CS-2). Contracted Curtailable Demand shall be the difference between the customer's average monthly billing demand and the Non-Curtailable Demand. The contract Non-Curtailable Demand shall be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer shall establish a new contract Non-Curtailable Demand.

   (b) If the customer establishes a demand higher than the contract Non-Curtailable demand during any period of requested curtailment in the billing period, such higher demand shall become the contract Non-Curtailable Demand effective with the next billing period. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand lower than the contract Non-Curtailable Demand during all periods of requested curtailment in the billing period, such lower demand upon request by the customer shall become the contract Non-Curtailable Demand effective with the next billing period.

(Continued on Page No. 4)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 3)

Special Provisions: (Continued)

(d) If the customer's contract Non-Curtailable Demand exceeds 75% of the customer's average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection of twelve (12) months), the contract Non-Curtailable Demand shall be set equal to 75% of the customer's average monthly billing demand effective with the current billing period. A re-establishment of the customer's contract Non-Curtailable Demand under this condition shall supersede any other establishment.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of his power requirements to no more than his contract Non-Curtailable Demand upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. A customer will be deemed to have complied with his curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment does not exceed his contract Non-Curtailment Demand.

5. If the maximum 30-minute kW demand established during a requested curtailment in the billing period exceeds the customer's contract Non-Curtailable Demand, the customer will be billed the following additional charge for all billing periods from the most recent prior billing period of requested curtailment through the current billing period, not to exceed a total of twelve (12) billing periods:

   1.25 times the difference in Demand and Energy Charges which would result under Rate Schedule GSDT-1 and those Demand and Energy Charges calculated under this rate schedule plus the difference between ECCR, CCR and ECRC of this rate schedule and GSDT-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases7. If the customer increases their power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install, and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of 1.08% times the installed cost of such additional equipment.

9. Customers taking service under this curtailable rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

10. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use at a public shelter during periods of emergency or natural disaster.

11. Any customer who established a Base billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 9 of this rate.

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer otherwise eligible for service under Rate Schedule CS-3, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments, or b) supply emergency interchange service to another utility for its firm load obligations only. Service under this rate schedule is not subject to curtailment for economic reasons.

Service under this rate is subject to the "General Rules and Regulations Governing Electric Service" contained in Section IV of the Company's currently effective and filed retail tariff.

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 87.44
Primary Metering Voltage:	$ 242.77
Transmission Metering Voltage:	$ 906.04

Demand Charges:

Base Demand Charge:	$ 1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
On-Peak Demand Charge:	$ 1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ 7.72 per kW of Fixed Curtailable Demand

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge:	1.848¢ per On-Peak kWh
	1.607¢ per Off-Peak kWh
	1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where the customer receives Premium Distribution Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including, all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1)	For the calendar months of December through February, Monday through Friday *:	5:00 a.m. to 10:00 a.m.
(2)	For all calendar months, Monday through Friday*:	6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November,	
Every day, including weekends and holidays	12:00 a.m. (midnight) to 6:00 a.m.

(c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demand:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established over the current and the eleven previous billing periods, but not less than 2,000 kW.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$ 28 per kW of Monthly Max Demand
For Transmission Delivery Voltage below 230 kV:	$ 5.17 per kW of Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV:	$ 7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit, and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor Adjustment:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.

(Continued on Page No. 3)

`RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of two (2) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. As a condition for service under this rate schedule, a customer is required to enter into a contract with the Company on the Company's filed standard contract Form No. 2. An initial Fixed Curtailable Demand of at least 2,000 kW shall be specified in the contract, which may be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer may establish a new Fixed Curtailable Demand of at least 2,000 kW.

   (b) If the customer fails to reduce load by the Fixed Curtailable Demand for the duration of any period of requested curtailment, the lowest measured load reduction achieved during such period, but not less than 2,000 kW, shall become the Fixed Curtailable Demand effective with the next billing period following the period of requested curtailment. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand reduction larger than the Fixed Curtailable Demand for the duration of each period of requested curtailment occurring within a billing period, upon request by the customer, the lowest of the demand reductions achieved during each such period shall become the Fixed Curtailable Demand effective with the next billing period.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of its load by at least the Fixed Curtailable Demand upon each curtailment request from the Company. Such requests will be made during those periods specified under Limitation of Service above. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of such limitations.

4. A customer will be deemed to have complied with its curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment is lower than what the customer's maximum 30-minute kW demand would otherwise have been during the period of requested curtailment by at least the Fixed Curtailable Demand defined in Special Provision No. 2. This will be determined by the Company using customer's load data of similar day, time and weather conditions where a curtailment was not requested.

5. If a customer has not complied with its curtailment responsibility during a period of requested curtailment, the customer will be billed the following additional charge for all billing periods following the previous period of requested curtailment through the billing period in which such non-compliance occurred, not to exceed a total of twelve (12) billing periods:

   125% of the difference in Demand and Energy Charges which would have resulted under Rate Schedule GSDT-1 and those Demand and Energy Charges calculated under this rate schedule, plus the difference between ECCR, CCR and ECRC of this rate schedule and GSDT-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

(Continued on Page No. 4)

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 3)

Special Provisions: (Continued)

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

7. If the customer increases its power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of 1.08% times the installed cost of such additional equipment.

9. Customers taking non-firm service under this rate schedule who desire to transfer to a rate schedule providing firm service will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the notice.

10. Service under this rate is not available if all or a part of the customer's load serves a facility designated by an appropriate governmental agency for use at a public shelter during periods of emergency or natural disaster.

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicability:

Applicable to customers, other than residential, for light and power purposes where the billing demand is 500 kW or more, and where service may be interrupted by the Company. For customer accounts established under this rate schedule after June 3, 2003, service is limited to premises at which an interruption of electric service will primarily affect only the customer, its employees, agents, lessees, tenants or business guests, and will not significantly affect members of the general public, nor interfere with functions performed for the protection of public health or safety. Examples of premises at which service under this rate schedule may not be provided, unless adequate on-site backup generation is available, include, but are not limited to: retail businesses, offices, and governmental facilities open to members of the general public, stores, hotels, motels, convention centers, theme parks, schools, hospitals and health care facilities, designated public shelters, detention and correctional facilities, police and fire stations, and other similar facilities.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency Interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 321.05
Primary Metering Voltage:	$ 476.39
Transmission Metering Voltage:	$ 1,139.69
Demand Charge:	$ 8.95 per kW of Base Demand
Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:	See Sheet No. 6.105 and 6.106
Interruptible Demand Credit:	$ 7.72 per kW of On-Peak Demand
Energy Charge:	
Non-Fuel Energy Charge:	1.298¢ per kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 5 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February, Monday through Friday*:	5:00 a.m. to 10:00 a.m.
(2) For all calendar months, Monday through Friday*:	6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(Continued on Page No. 2)

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE
(Continued from Page No. 1)

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.

(b) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Base Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Base Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Base Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Interruptible Demand Credit, and Delivery Voltage Credit hereunder:

Metering Voltage	**Reduction Factor**
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of five (5) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. When the customer increases the electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.

2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required equipment (metering, under-frequency relay, etc.) will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation. Before commencement of service under this rate, the Company shall exercise an interruption for purposes of testing its equipment. The Company shall also have the right to exercise at least one additional interruption each calendar year irrespective of capacity availability or operating conditions. The Company will give the customer notice of the test.

(Continued on Page No. 3)

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE
(Continued from Page No. 2)

Special Provisions: (Continued)

3. The Company may, under the provisions of this rate, at its option, require a special contract with the customer upon the Company's filed contract form.

4. The Company will attempt to minimize interruption hereunder by purchasing power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

5. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

6. Customers taking service under this interruptible rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

7. Service under this rate is not available if all of a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster

8. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 6 of this rate.

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicability:

At the option of the customer, applicable to customers otherwise eligible for service under Rate Schedule IS-2, where the billing demand is 500 kW or more, provided that the total electric requirements at each point of delivery are measured through one meter. For customer accounts established under this rate schedule after June 3, 2003, service is limited to premises at which an interruption of electric service will primarily affect only the customer, its employees, agents, lessees, tenants, or business guests, and will not significantly affect members of the general public, nor interfere with functions performed for the protection of public health or safety. Examples of premises at which service under this rate schedule may not be provided, unless adequate on-site backup generation is available, include, but are not limited to: retail businesses, offices, and governmental facilities open to members of the general public, stores, hotels, motels, convention centers, theme parks, schools, hospitals and health care facilities, designated public shelters, detention and correctional facilities, police and fire stations, and other similar facilities.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments, or b) supply emergency interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ 321.05
Primary Metering Voltage:	$ 476.39
Transmission Metering Voltage:	$ 1,139.69

Demand Charge:

Base Demand Charge:	$ 1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
On-Peak Demand Charge:	$ 1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106
Interruptible Demand Credit:	$ 7.72 per kW of On-Peak Demand

Energy Charge:

Non-Fuel Energy Charge:	1.848¢ per On-Peak kWh 1.607¢ per Off-Peak kWh 1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy used during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 5 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit. In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.37 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday*: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November,

Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established over the current and the eleven previous billing periods, but not less than 500 kW.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Base Demand charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Monthly Max Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges, Interruptible Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.

(Continued on Page No. 3)

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

For customers electing to take service hereunder in lieu of the otherwise applicable Rate Schedule IS-2, the term of service requirements under this optional rate schedule shall be the same as that required under Rate Schedule IS-2 provided, however, at a given location the customer shall have the right during the initial term of service to transfer to the otherwise applicable Rate Schedule IS-2 at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. When the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.

2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required equipment (metering, under frequency relay, etc.) will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation. Before commencement of service under this rate, the Company shall exercise an interruption for purposes of testing its equipment. The Company shall also have the right to exercise at least one additional interruption each calendar year irrespective of capacity available or operating conditions. The Company will give the customer notice of the test.

3. The Company may, under the provisions of this rate, at its option, require a special contract with the customer upon the Company's filed contract form.

4. The Company will attempt to minimize interruption hereunder by purchasing power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

5. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

6. Customers taking service under this interruptible rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

7. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster.

8. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 6 of this rate.

RATE SCHEDULE LS-1
LIGHTING SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer for the sole purpose of lighting roadways or other outdoor land use areas; served from either Company or customer owned fixtures of the type available under this rate schedule. Service hereunder is provided for the sole and exclusive benefit of the customer, and nothing herein or in the contract executed hereunder is intended to benefit any third party or to impose any obligation on the Company to any such third party.

Character of Service:

Continuous dusk to dawn automatically controlled lighting service (i.e. photoelectric cell); alternating current, 60 cycle, single phase, at the Company's standard voltage available.

Limitation of Service:

Availability of certain fixture or pole types at a location may be restricted due to accessibility.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Rate Per Month:

Customer Charge:

Unmetered:	$ 1.63 per line of billing
Metered:	$ 4.69 per line of billing

Energy and Demand Charge:

Non-Fuel Energy Charge:	2.837¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Per Unit Charges:

III. Additional Facilities

BILLING TYPE

Electrical Pole Receptacle [4]

401	**Single**	$3.00 per unit
402	**Double**	$3.90 per unit

Notes to Per Unit Charges:

(1) Restricted to existing installations.
(2) Lumens output and wattage ratings may vary with lamp configuration and/or age
(3) Shown for information only. Energy charges are billed by applying the foregoing energy and demand charges to the total monthly kWh.
(4) Electric use permitted only during the period of October through January, only on poles designated by the Company. Energy charged separately. Customers must notify Company of installation of customer-owned receptacles prior to such installation.
(5) Special applications only.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the sum of the Customer Charge and applicable Fixture, Maintenance and Pole Charges.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Terms of Service:

Service under this rate schedule shall be for a minimum initial term of ten (10) years from the commencement of service and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination. Upon early termination of service under this schedule, the customer shall pay an amount equal to the remaining monthly lease amount for the term of contract including Contribution in Aid of Construction ("CIAC") under Special Provision No.16, applicable Customer Charges and removal cost of the facilities.

Special Provisions:

1. The customer shall execute a contract on the Company's standard filed contract form for service under this rate schedule.

2. Where the Company provides a fixture or pole type other than those listed above, the monthly charges, as applicable shall be computed as follows:

I. Fixture

(a) Fixture Charge:	1.08% of the Company's average installed cost.
(b) Maintenance Charge:	The Company's estimated cost of maintaining fixture.

II. Pole

Pole Charge:	1.08% of installed cost.

3. The customer shall be responsible for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the customer for damage.

4 Maintenance Service for customer-owned fixtures at charges stated hereunder shall be restricted to fixtures being maintained as of November 1, 1992.

(Continued on Page No. 8)

RATE SCHEDULE LS-1
LIGHTING SERVICE
(Continued from Page No. 7)

Special Provisions: (Continued)

5. kWh consumption for Company-owned fixtures shall be estimated in lieu of installing meters. kWh estimates will be made using the following formula:

$$kWh = \frac{\text{Unit Wattage (including ballast losses) x 350 hours per month}}{1{,}000}$$

6. kWh consumption for customer-owned fixtures shall be metered. Installation of customer-owned lighting facilities shall be provided for by the customer. Any costs incurred by the Company to provide for consolidation of existing lighting facilities for the purpose of metering shall be at the customer's expense.

7. No Pole Charge shall be applicable for a fixture installed on a company-owned pole which is utilized for other general electrical distribution purposes.

8. The Company will repair or replace malfunctioning lighting fixtures maintained by the Company in accordance with Section 768.1382, Florida Statutes (2005).

9. For a fixture type and/or pole type restricted to existing installations and requiring major renovation or replacement, the fixture and/or pole shall be replaced by an available similar non-restricted fixture and/or pole and the customer shall commence being billed at its appropriate rate. Where the customer requests the continued use of the same fixture type and/or pole type for appearance reasons, the Company will attempt to provide such fixture and/or pole and the customer shall commence being billed at a rate determined in accordance with Special Provision No. 2 for the cost of the renovated or replaced fixture and/or pole.

10. The customer will be responsible for trimming trees and other vegetation that obstruct the light output from fixture(s) or maintenance access to the facilities.

11. After December 31, 1998, all new leased lighting shall be installed on poles owned by the Company.

12. Alterations to leased lighting facilities requested by the customer after date of installation (i.e. redirect, install shields, etc.), will be billed to the customer in accordance with the Company's policy related to "Work Performed for the Public".

13. Service for street or area lighting is normally provided from existing distribution facilities. Where suitable distribution facilities do not exist, it will be the customer's responsibility to pay for necessary additional facilities. Refer to Section III, paragraph 3.01 of the Company's General Rules and Regulations Governing Electric Service to determine the CIAC owed by the customer.

14. Requests for exchanging facilities, upgrades, relocations, removals etc. are subject to Section III, paragraph 3.05, of the Company's General Rules and Regulations Governing Electric Service.

15. For available LEDs, the customer may opt to make an initial, one-time Contribution in Aid of Construction payment of 50% of the installed cost of fixtures rated greater than 200 Watts and/or poles other than standard wood poles, to reduce the Company's installed cost. If a customer chooses this option, the monthly fixture and/or pole charge shall be computed as the reduced installed cost times the corresponding monthly percentage in 2.I.(a) and/or 2.II above.

16. As an alternative to making an initial one-time CIAC payment to extend distribution facilities to render lighting service, as referenced in Special Provision No. 13, the customer may elect to pay a monthly fee of 1.08% of the calculated CIAC amount.

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month, or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ 138.50
Primary Metering Voltage:	$ 324.09
Transmission Metering Voltage:	$ 1,116.62

Note: Where the Customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $111.67.

2. Supplemental Service Charges:

All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:

$2.64 per kW times the Specified Standby Capacity.

Note: No charge is applicable to a customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:

The charge shall be the greater of:
1. $1.477 per kW times the Specified Standby Capacity or

2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $0.703/kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Energy Charges

Non-Fuel Energy Charge: 1.308¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

(Continued on Page No. 4)

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

D. Delivery Voltage Credit:

When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by $1.28 per kW.

E. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Non-Fuel Energy Charge, and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

F. Fuel Cost Recovery Factor:

Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

G.	**Asset Securitization Charge Factor:**	See Sheet No. 6.105
H.	**Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:**	See Sheet No. 6.106
I.	**Right-of-Way Utilization Fee:**	See Sheet No. 6.106
J.	**Municipal Tax:**	See Sheet No. 6.106
K.	**Sales Tax:**	See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 3 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $1.36 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of December through February,
Monday through Friday*****: 5:00 a.m. to 10:00 a.m.

B. For all calendar months of April through October,
Monday through Friday*****: 6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

(Continued on Page No. 5)

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 4)

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. Customers taking service under this rate schedule who desire to transfer to firm full requirements service will be required to give the Company written notice at least sixty (60) months prior to such transfer.

3. The Company will furnish service under this rate schedule at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

4. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

5. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

6. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

7. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all Company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

8. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

9. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

10. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

11. When an outage of the customer's generating system is caused by an electrical isolation of the customer due to conditions originating on the Company's system, no standby capacity requirement shall be recognized for billing purposes for the standby power utilized during customer generation restart for a period not exceeding eight (8) hours from time of Company electrical restoration.

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, having on-site generating equipment and requesting interruptible standby service. A customer requesting interruptible standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load and (3) is operated for other than emergency and test purposes.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Definitions:

"Standby Electric Service" refers to backup or maintenance service or both.

"Backup Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during an unscheduled outage of the customer's generation.

"Maintenance Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during a scheduled outage of the customer's generation.

"Supplemental Service" means electric energy or capacity supplied by the Company in addition to that which is normally provided by the customer's own generation equipment.

"Otherwise applicable rate schedule" refers to the rate schedule under which the customer would have received service if the customer had no self-generation.

Determination of Standby Service Requirements:

The customer may elect either of the following two options for determination of standby service requirements:

Option A:

1. The customer shall provide the Company within three (3) days of the end of the billing period the following information for each 30-minute time interval of occurrence of an unscheduled or scheduled outage of the customer's generation:

   (a) Amount of load in kW ordinarily supplied by customer's generation.

   (b) Amount of load reduction in kW, if any, as a direct result of customer's generation outage.

(Continued on Page No. 2)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month, or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ 349.56
Primary Metering Voltage:	$ 504.89
Transmission Metering Voltage:	$ 1,168.19

Note: Where the customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $327.08.

2. Supplemental Service Charges:
All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:
$2.63 per kW times the Specified Standby Capacity.
Note: No charge is applicable to a Customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:
The charge shall be the greater of:
1. $1.474 per kW times the Specified Standby Capacity or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $0.702 kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Interruptible Capacity Credit:
The credit shall be the greater of:
1. $1.17 per kW times the Specified Standby Capacity, or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-peak periods times $0.557/kW times the appropriate Billing Month Factor shown in part 3.B. above.

D. Energy Charges:
Non-Fuel Energy Charge: 1.292¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

E. Delivery Voltage Credit:
When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by $1.28 per kW.

(Continued on Page No. 4)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

F. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Interruptible Capacity Credit, Non-Fuel Energy Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

G. Fuel Cost Recovery Factor:
Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

H.	**Asset Securitization Charge Factor:**	See Sheet No. 6.105
I.	**Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:**	See Sheet No. 6.106
J.	**Right-of-Way Utilization Fee:**	See Sheet No. 6.106
K.	**Municipal Tax:**	See Sheet No. 6.106
L.	**Sales Tax:**	See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 4 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $1.35 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of December through February,
Monday through Friday*****: 5:00 a.m. to 10:00 a.m.

B. For all calendar months,
Monday through Friday*****: 6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

Special Provisions:

1. When the customer increases the electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.
2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required interruptible equipment will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation.

(Continued on Page No. 5)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 4)

Special Provisions: (Continued)

3. To minimize the frequency and duration of interruptions hereunder, the Company will attempt to purchase power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

4. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of 1.08% per month of the installed cost of such additional equipment.

5. Customers taking service under this rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least sixty (60) months prior to such transfer. Such notice shall be irrevocable unless the Company or the customer receives a waiver from the Florida Public Service Commission.

6. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance, and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

7. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

8. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

9. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all Company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

10. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

11. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

12. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, having on-site generating equipment and requesting interruptible standby service. A customer requesting interruptible standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load and (3) is operated for other than emergency and test purposes.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Resale service not permitted hereunder. Curtailable service under this rate schedule is not subject to curtailment during any time period for economic reasons. Curtailable service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Definitions:

"Standby Electric Service" refers to backup or maintenance service or both.

"Backup Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during an unscheduled outage of the customer's generation.

"Maintenance Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during a scheduled outage of the customer's generation.

"Supplemental Service" means electric energy or capacity supplied by the Company in addition to that which is normally provided by the customer's own generation equipment.

"Otherwise applicable rate schedule" refers to the rate schedule under which the customer would have received service if the customer had no self-generation.

Determination of Standby Service Requirements:

The customer may elect either of the following two options for determination of standby service requirements:

Option A:

1. The customer shall provide the Company within three (3) days of the end of the billing period the following information for each 30-minute time interval of occurrence of an unscheduled or scheduled outage of the customer's generation:

   (a) Amount of load in kW ordinarily supplied by customer's generation.

   (b) Amount of load reduction in kW, if any, as a direct result of customer's generation outage.

(Continued on Page No. 2)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ 115.93
Primary Metering Voltage:	$ 271.25
Transmission Metering Voltage:	$ 934.55

Note: Where the customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $93.45

.

2. Supplemental Service Charges:
All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:
$2.63 per kW times the Specified Standby Capacity.
Note: No charge is applicable to a customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:
The charge shall be the greater of:
1. $1.474 per kW times the Specified Standby Capacity or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $0.702/kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Curtailable Capacity Credit:
The credit shall be the greater of:
1. $0.877 per kW times the Specified Standby Capacity, or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-peak periods times $0.418/kW times the appropriate Billing Month Factor shown in part 3.B. above.

D. Energy Charges:
Non-Fuel Energy Charge: 1.297¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis listed in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

E. Delivery Voltage Credit:
When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by $1.28 per kW.

(Continued on Page No. 4)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

F. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Interruptible Capacity Credit, Non-Fuel Energy Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

G. Fuel Cost Recovery Factor:
Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

H.	**Asset Securitization Charge Factor:**	See Sheet No. 6.105
I.	**Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:**	See Sheet No. 6.106
J.	**Right-of-Way Utilization Fee:**	See Sheet No. 6.106
K.	**Municipal Tax:**	See Sheet No. 6.106
L.	**Sales Tax:**	See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $1.35 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of December through February,
Monday through Friday*****: 5:00 a.m. to 10:00 a.m.

B. For all calendar months,
Monday through Friday*****: 6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

(Continued on Page No. 5)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 4)

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of 1.08% times the installed cost of such additional equipment.

3. As an essential requirement for receiving curtailable service provided under this rate schedule, the customer shall be strictly responsible for the full curtailment of his standby power requirements upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

5. In the event a customer electing curtailable service has not complied with his curtailment responsibility for any period of requested curtailment during the current billing period, the customer will additionally be billed 125% of the difference in standby rate charges between this rate schedule and that of Rate Schedule SS-1, Firm Standby Service, for each billing period from the current month to the most recent prior billing period in which curtailment was requested, not to exceed a total of twelve (12) billing periods.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

7. Customers taking service under this rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least sixty (60) months prior to such transfer. Such notice shall be irrevocable unless the Company or the customer receives a waiver from the Florida Public Service Commission.

8. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance, and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

9. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

10. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

11. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

12. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

(Continued on Page No. 6)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 5)

Special Provisions: (Continued)

13. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

14. The described procedures herein for determining standby and supplemental requirements may require modification during a period of requested curtailment. In this event all power and energy requirements are considered supplemental to the extent that the total power requirement does not exceed the customer's otherwise maximum 30-minute supplemental demand for the current billing period. Any requirement exceeding this level is considered standby. If this should result in a standby requirement which exceeds the customer's self-generating capability, such excess shall be considered additional supplemental.

15. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

RATE SCHEDULE TS-1
TEMPORARY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To customers for temporary service such as construction, fairs, displays, exhibits, and similar temporary purposes.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three phase at option of the Company, at the Company's standard voltage available.

Limitation of Service:

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Company's applicable General Service rate schedule.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

As provided for in the applicable rate schedule.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of thirty (30) days from the commencement of service and may be extended for thirty- (30) day periods.

Special Provisions:

1. Metering voltage will be at the option of the Company.

2. The Company may under the provisions of this rate, at its option, require a contract with the Customer upon the Company's filed contract form.

3. Where a temporary service extension is required and can be provided by a service drop or connection point to the Company's existing distribution system, the Customer shall pay a service charge of $310.00 for the cost of installing and removing such temporary service extension.

4. Where line work is required, the Customer shall pay, in advance, the estimated cost of installing and removing such facilities as may be required to provide such temporary service, except the cost of any portion of the facilities which will remain as a part of the permanent service. In addition, the Customer shall deposit with the Company, in advance, a cash sum equal to the estimated charge for energy consumed provided, however, that the Company may waive advance payments if the Customer has established, in the sole judgment of the Company, satisfactory credit.

RATE SCHEDULE PPS-1
GENERAL SERVICE – PREMIER POWER SERVICE RIDER

Availability:

Available throughout the entire territory served by the Company.

Applicable:

This Rider is applicable on a voluntary basis to a customer with a minimum measured demand of 50 kW taking service under non-residential Rate Schedules GS-1, GST-1, GSD-1, GSDT-1, GSLM-1, CS-1, CS-2, CS-3, CST-1, CST-2, CST-3, IS-1, IS-2, IST-1, or IST-2 that meets the eligibility requirements herein when the customer contracts with the Company to own, install, operate and maintain equipment on the customer's premises for the primary purpose of providing a back-up supply of electric service in the event normal electric supply is interrupted. The applicable non-residential Rate Schedule with which this Rider is used is modified only as required by the terms hereof.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Monthly Service Payment:

The Monthly Service Payment under this Rider is in addition to the monthly rate determined under the applicable non-residential Rate Schedule and other riders, if applicable, and shall be calculated based on the following formula:

Monthly Service Payment = Capital Cost + Expenses

Where:

Capital Cost equals a carrying cost times the levelized plant investment based upon the estimated installed cost of facilities. The carrying cost includes the cost of capital, reflecting current capital structure and most recent approved return on common equity; income taxes; property taxes; general plant; administrative and general plant-related expenses; and intangible plant. Any replacement cost expected to be incurred during the Contract Period will also be included. Any special equipment installed by the Company that is not necessary to support back-up service to the customer shall not be included in the Monthly Service Payment.

Expenses shall be levelized over the Contract Term and shall include: Company operations and maintenance (O&M) expenses times a carrying cost that is inclusive of administrative and general and labor expenses related to O&M and cash working capital; third-party expenses for operations and maintenance, warranties, or insurance; fuel expense, based upon an estimate of the cost of fuel consumed for normal back-up operation and testing, less a credit based upon the system average cost of fuel and purchased power included in retail tariffs; inventory cost associated with fuel, materials, and supplies times a carrying cost that recovers the cost of capital and income taxes; depreciation expense, adjusted for the estimated salvage value at the end of the Contract Term; deferred income taxes; and customer accounting, customer service and information, program administration, and sales expenses. Any expenses incurred in operating the on-site generation for other than normal back-up operation and testing shall not be included in the Monthly Service Payment.

Installation cost will be recovered over the initial Contract Term. Pricing of capital-related costs and expenses shall be based upon no shorter than 10 years from the equipment's original in-service date and the resulting Monthly Service Payment shall include an upward adjustment for Contract Terms that expire prior to 10 years from this in-service date.

(Continued on Page No. 2)

RATE SCHEDULE PPS-1
GENERAL SERVICE – PREMIER POWER SERVICE RIDER

(Continued from Page No. 1)

Definition of Services:

Services provided under the terms of this Rider shall be provided by on-site equipment supplied by the Company for the purpose of continuing the supply of electricity to the customer's site in the event the normal electric supply is interrupted. In cases where the customer's total electric requirement exceeds the generation capability, the customer shall arrange its electrical requirements to ensure that the electrical requirement to be supplied when normal service is interrupted will not be greater than the generation capacity. The minimum equipment capacity supplied by the Company under this rider shall be not less than 50 kW.

The Company shall have the right to operate the on-site equipment at all times it deems appropriate, including, but not limited to, for the purposes of testing of the equipment to verify that it will operate within required parameters, and dispatching the equipment to assist in meeting system demand or for other system benefits. The equipment and appropriate transfer switching shall be electrically connected on the Company's side of the billing meter; therefore, billing for generation provided during normal back-up operation and testing shall continue to be billed under the applicable non-residential Rate Schedule based solely upon consumption registered on the Company's billing meter.

Service Contract:

The Company and the customer shall execute a Premier Power Service Contract (the "Contract") that will state the amount of the customer's Monthly Service Payment determined in accordance with this Rider, the Contract Term, and other terms and conditions pertinent to providing Premier Power Service.

Eligibility:

In order to be eligible for this Rider, the customer must provide evidence of creditworthiness sufficient to establish reasonable assurance of their ability to meet their financial obligations for the services to be provided under the Contract.

- Entities that have an investment grade senior unsecured credit rating from Moody's Investors Service or S&P Global Ratings will be deemed creditworthy for projects requiring investment by the Company of twenty (20) million dollars or less (Investment grade rating means an unsecured or issuer rating of Baa3 or better from Moody's or BBB- from S&P).
- Entities that have a senior unsecured credit rating of at least Ba2 from Moody's Investors Service or BB by S&P Global Ratings will be deemed creditworthy for projects requiring investment by the Company of five (5) million dollars or less.

Customers with no such rating may demonstrate creditworthiness by submitting their audited financial statements for review by the Company to establish an equivalent credit rating based on a commercially reasonable credit assessment.

Companies not deemed to be creditworthy for a project may establish eligibility by providing credit support in the form of either (i) cash; (ii) bank-issued letter(s) of credit; (iii) a guaranty from a parent company or an affiliated entity meeting the creditworthiness standards of the Company, in each case in a form and from an issuer reasonably acceptable to the Company; or (iv) other security reasonably acceptable to the Company. The amount of security shall not exceed the initial costs incurred by the Company for installation, excluding equipment removable by the Company and suitable for alternative use, plus the estimated cost for the Company to redeploy such equipment for use elsewhere, if applicable. As an alternative form of credit support, the customer and the Company may mutually agree to an accelerated payment schedule commencing prior to completion of installation of the equipment or a payment schedule consisting of larger payments upfront followed by smaller payments, provided that the resulting payment structure will not result in collection by the Company of a return greater than that which would otherwise be reflected in the determination of the payment amount under the Contract.

Minimum Monthly Bill:

The minimum monthly bill shall be the customer's minimum bill under the applicable non-residential Rate Schedule, plus the Monthly Service Payment under this Rider.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this Rider shall be for the term specified in the Contract. In the event of non-payment by the customer where such non-payment is not cured within sixty (60) days of notice of such delinquency by the Company to the customer, the company shall have the right to terminate the Contract, exercise any rights thereunder, and proceed against any credit support provided by the customer in connection with the Contract.

RATE SCHEDULE ED-2
ECONOMIC DEVELOPMENT RIDER

Availability:

Available throughout the entire territory served by the Company. Customers desiring to take service under this tariff must make a written request for service.

Applicable:

To any customer taking firm service, other than residential, for light and power purposes who meet the Qualifying Criteria set forth in this tariff. This tariff provides for an Economic Development Bill Reduction Factor as described herein for new load which is defined as load being established after the date of the original issue of this tariff sheet by a new business or the expansion of an existing business. This rider is not available for retention of existing load or for relocation of existing load within the Company's service territory. Relocating businesses that provide expansion of existing business may qualify as to the expanded load only. This rider is not available for short-term service, construction, temporary service, or renewal of a previously existing service. Customers must execute an Economic Development Service Agreement and such agreement must specify all the Qualifying Criteria that customer expects to meet for this rider to be applicable.

Qualifying Criteria:

To participate in this rider, the customer must meet the following criteria:

a) The minimum qualifying new load must have a minimum load factor of 35% at a single point of delivery and must be:
   1) At least 500 kW; or
   2) At least 350 kW at an existing premise served by the Company that has been unoccupied or dormant, with minimal or no electric usage, for at least ninety (90) days.

b) The new or expanding business must be in a targeted industry as defined by the state of Florida's most current economic development policy.

c) The new or expanding business must also meet at least one of the following two requirements at the project location:
   1) The addition of 25 net new full time equivalent (FTE) jobs in the Company's Florida service area; or
   2) Capital investment of $500,000 or greater and a net increase in FTE jobs in the Company's Florida service area.

d) Customer must provide written documentation attesting that the availability of this rider is a significant factor in the Customer's location/expansion decision.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this tariff is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Otherwise Applicable General Service Tariff:

Service under this rider shall be provided under any of the Company's currently available general service tariffs to be initially determined by mutual agreement of the Company and customer based on the usage characteristics provided by the customer for new load. All provisions, terms and conditions of the otherwise applicable General Service Tariff shall apply.

Rate Per Month

All charges shall be those set forth in the otherwise applicable General Service Tariff with the resulting monthly bill adjusted by the Economic Development Bill Reduction Factor, plus any additional facilities charges as specified in the Economic Development Service Agreement or as otherwise agreed.

Economic Development Bill Reduction Factor:

Beginning with the effective date as declared by the customer and in compliance with this rider, a reduction in the monthly bill will be applied to the total bill for the qualifying new load under this rider (but excluding any charges for additional facilities as specified in the Economic Development Service Agreement or as otherwise agreed), as follows:

Months beginning with and following the effective date declaration	Reduction in monthly bill for qualifying new load
Months 1-12	Up to 30%
Months 13-24	Up to 30%
Months 25-36	Up to 30%
Months 37-48	Up to 30%
Months 49-60	Up to 30%

RATE SCHEDULE ED-2
ECONOMIC DEVELOPMENT RIDER
(Continued from Page No. 1)

Economic Development Bill Reduction Factor: (Continued)

The percentage discount to be applied to the customer's monthly bills will be determined in advance, on or prior to the date of execution of the Economic Development Service Agreement, and will be developed on an individual customer basis given the evaluation of the following criteria as to the new or expanded load:

1. Peak monthly demand;
2. Average monthly load factor;
3. The Company's incremental costs to serve;
4. Number of new FTEs; and
5. Total new capital investment of the customer.

The third criterion, Company's incremental costs to serve the new load, will not take into account the costs for additional facilities that are being covered in full by the customer through the terms of the Economic Development Service Agreement or another agreement between the Company and the customer.

Term of Service:

The customer may request an effective date of this rider which is no later than eighteen (18) months after the Economic Development Service Agreement is approved and signed by the Company. The minimum term of the Economic Development Service Agreement shall be ten (10) years following the customer's effective date, with the bill reductions being available for a maximum period of five (5) years after such effective date.

Penalty for Non-Compliance with Qualifying Criteria or Term of Service:

If at any time during the term of the rider agreement the customer violates the terms and conditions of the rider or the Economic Development Service Agreement, the Company may discontinue the discount provided for under this rider and bill the customer based on the otherwise applicable General Service Tariff. If the customer terminates service prior to the end of the Agreement period, or fails to meet the qualifying criteria agreed to for the term of the Agreement, this will constitute a violation of the terms and conditions of the rider and agreement

Should service under this rider be discontinued by the Company or the customer for said violation, the customer shall be required to repay to the Company the amount of the cumulative discounts received under this rider in accordance with the following schedule .

Number of months beginning with and following the effective date declaration and ending with the date of violation	Required percentage of cumulative economic development bill discounts that must be repaid:
Months 1-60	100%
Months 61-72	80%
Months 73-84	60%
Months 85-96	40%
Months 97-108	20%
Months 109-120	10%

If a change in ownership occurs after execution of the Economic Development Service Agreement, the successor customer may, in the Company's discretion, be allowed to fulfill the balance of the Economic Development Service Agreement and participate in this rider.

RATE SCHEDULE FB-1
Optional – FixedBill Program
(Continued from Page No. 1)

.

Normal Weather: Weather at the 50th weather percentile based on the Company's historical seasonal heating degree-days and cooling degree-days.

Actual Weather: Weather experienced during a historical time period measured using actual heating degree-days and cooling degree-days.

Predicted Weather Normalized Monthly kWh Usage: The customer's predicted monthly usage (kWh) based on Normal Weather.

Predicted Weather Adjusted Total kWh Usage: The customer's predicted total usage (kWh) for the applicable time period based on Actual Weather.

Risk Adder: This adder is used to compensate the Company for the risk associated with weather-related consumption and non-weather related impacts and will not exceed 6%. Through December 31, 2021 in recognition of reduced risk from customers who grant the Company the ability to control different customer owned assets outside of or in addition to applicable Commission-approved DSM programs, the Company will provide up to 2,000 customers $50 in the form of a prepaid credit card in accordance with the terms of the program's Service Agreement.

Usage Adder: This adder is used to compensate the Company for the risk associated with increased usage by customers in their first year while on *FixedBill* not associated with weather. The initial usage adder will be 4% and capped at 6%. This adder will only be applied during the customer's first year on the *FixedBill* program.

Standard Residential Tariff: The Company's RS-1, RST-1, RSL-1 and RSL-2 Rate Schedules, beginning Sheet Nos. 6.120, 6.140, 6.130, and 6.135, respectively.

Terms and Conditions:

1. The customer will enter into a Service Agreement with the Company that will specify the Monthly *FixedBill* Amount that the customer will be required to pay and, as applicable, all requirements associated with allowing control of customer owned assets.

2. The term of the Service Agreement will be for twelve (12) months. The Company will calculate a new Monthly *FixedBill* Amount for the following year, and notify the customer of the new contractual amount before the current 12-month *FixedBill* period expires. The customer will be automatically renewed at the new Monthly *FixedBill* Amount for the following year unless the customer notifies the Company of their intent to be removed from the *FixedBill* program.

3. Removal from the program:

   A. Move from Current Residence.
   If a participating customer moves from their current residence before the 12 month Service Agreement period expires, Applicable Removal Charges will apply.

   B. Delinquent FixedBill Payments.
   If a customer becomes delinquent in a *FixedBill* payment, the Company will follow standard procedures for Standard Residential Tariff customers. If the customer is disconnected for nonpayment, the customer will be removed from the *FixedBill* program and Applicable Removal Charges will apply.

   C. Increased Actual Energy Usage Above Expected Usage (Excess Usage).
   The Company reserves the right to terminate the customer's *FixedBill* program Service Agreement if the customer's total Actual Energy Usage in months three (3) through nine (9) of the contract year exceeds their Predicted Weather Adjusted Total kWh Usage by at least 30% for at least three months. If the customer is removed from the *FixedBill* program due to excessive usage, Applicable Removal Charges will apply. The Company will notify the customer in advance if they are at risk of being removed from the program due to excessive usage.

   D. Customer Voluntary Removal.
   If a customer chooses to leave the *FixedBill* program prior to the end of the 12-month Service Agreement period, the customer will be removed from the *FixedBill* program and Applicable Removal Charges will apply. After the end of each Service Agreement period, eligible customers will automatically renew for the next *FixedBill* Service Agreement period unless the customer indicates their intention to return to the Standard Residential Tariff. If the Standard Residential Tariff election is made prior to the automatic renewal of the *FixedBill* Service Agreement, no Applicable Removal Charges will apply.

(Continued on Page No. 3)

RATE SCHEDULE FCF-1
PUBLIC CHARGING FOR ELECTRIC VEHICLES

Availability:

Available throughout the entire territory where customers charge electric vehicles at certain DEF ("the Company') owned public electric vehicle (EV) fast charging stations ("the stations") where DEF provides charging service and direct billing to the station user.

Applicable:

To any person ("user") who accesses the stations.

Character of Service:

EV charging service will be available at the Company-owned stations, with output power of 50 kW or greater, installed at Company or Host locations. The stations will be accessible to the public for charging.

Limitation of Service:

The user must register an account with the Company's mobile application or network provider, including payment information, prior to charging the EV..

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service". In case of conflict between any provisions of this schedule and said "General Rules and Regulations for Electric Service" the provisions of this rate schedule shall apply.

Rate Per Month:

Energy Charge:	$ 0.33 per kWh
Vehicle Idling Fee:	$ 1.00 per minute

Additional Charges:

Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Terms of Payment:

Charging network fees as determined by the charging station network provider may apply at certain stations. The vehicle idling fee may apply following a ten-minute grace period at certain stations located in close proximity to highway corridors or other highly trafficked areas. The rates applicable to the specific station including the rate per kWh, taxes, and charging network provider and idling fees will be visible to the users via the app and/or display. Users will be notified when the charging session is complete via the display located at the charging dispenser and through the Company's mobile application and will have the ability to obtain a detailed receipt of the charge session.

PART I

DEFINITIONS AND CLASSIFICATIONS

1.01 Definitions:

The following definitions set forth standard interpretations of certain terms used in these Rules and Regulations:

(1)	Company:	Duke Energy Florida, LLC
(2)	Customer:	The user of the Company's electric service.
(3)	Service:	The supply by the Company of electricity to the Customer, including the readiness and availability of electrical energy at the Customer's Point of Delivery at the required voltage and frequency whether or not utilized by the Customer.
(4)	Service Drop:	That portion of the Company's facilities, between the established secondary source and the point of attachment at the service entrance.
(5)	Service Entrance:	Wires and enclosures owned by the Customer and connecting the Customer's installation to the service drop.
(6)	Customer's Installation:	Wires, enclosures, switches, appliances and other apparatus, including the service entrance, forming the Customer's facilities utilizing service for any purpose on the Customer's side of the point of delivery.
(7)	Point of Delivery:	The point of attachment where the Company's facilities are connected to those of the Customer's service entrance. The point of delivery shall be determined by the Company. Generally, the point of delivery for residential customers is the meter. The points of delivery for Multi-Occupancy Buildings and townhouses are established in Section 11. For underground service other than residential, the Customer's service entrance shall include conductors and raceway to a point designated by the Company generally the secondary voltage source closest to the building.
(8)	Connected Load:	The total rated capacity in horsepower (H.P.) and/or kilowatts (kW), and/or kilovolt amperes (kVA), of all electric equipment, appliances, apparatus and other current consuming devices which are connected in and to the Customer's installation and which may utilize service.
(9)	Maximum Demand:	Highest integrated reading of Customer's electrical power requirements measured in kilowatts during the interval of time specified in the Rate Schedules.
(10)	Rate Schedules:	The applicable schedules of rates and charges for service rendered which, from time to time, are on file with and approved by the Florida Public Service Commission having jurisdiction thereover, and under which service is rendered by the Company.

1.02 Service Classifications:

Service is classified for rate application purposes according to one of the following which best describes the Customer's electric service requirements:

(1) Residential: Residential customers have the option of being served under one of the following rate schedules:

A. Residential Service (RS-1): Applicable to customers taking service exclusively for domestic purposes in a single dwelling house, a mobile home, or individually metered single apartment unit or other unit having housekeeping facilities, occupied by one family or household as a residence. The premises of such single dwelling may include an additional apartment with separate housekeeping facilities, a garage, a boat slip, and other separate structures where they are occupied or used solely by the members or servants of such family or household for domestic purposes only.

(Continuing on Next Page)

Residential (Continued):

Also, for energy used in commonly-owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

(a) 100% of the energy is used exclusively for the co-owner's benefit.
(b) None of the energy is used in any endeavor which sells or rents a commodity or provides service for a fee.
(c) Each point of delivery will be separately metered and billed.
(d) A responsible legal entity is established as the Customer to whom the Company can render its bill(s) for said service.

B. Residential Load Management (RSL-1): Applicable to customers eligible for residential service under Rate Schedule RS-1 who elect service under this rate schedule and who utilize any of the following electrical equipment:
1. Water Heater
2. Central Electric Heating System
3. Central Electric Cooling System
4. Swimming Pool Pump

C. Residential Time of Use (RST-1): Applicable at the option of the Customer, to residential customers otherwise eligible for service under Rate Schedule RS-1, provided that all of the electric load requirements on the Customer's premises are metered through one point of delivery.

(2) General Service Non-Demand: Applicable to any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable.

(3) General Service Demand: Applicable to any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable with a measured annual kWh consumption of 24,000 kWh or greater per year.

(4) Lighting Service: Applicable to any customer for the sole purpose of lighting roadways or other outdoor land use areas; served from either Company or Customer owned fixtures of the type available under this rate schedule.

(5) Interruptible General Service: Applicable to any customer, other than residential, for light and power purposes where service may be interrupted by the Company.

(6) Curtailable General Service: Applicable to any customer, other than residential, for light and power purposes where the Customer agrees during a period of requested curtailment to curtail as a minimum the greater of: (a) 25 kW or (b) 25% of their average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection for twelve (12) months).

(7) Standby and Supplemental Services: Applicable to any customer other than residential, having on-site generating equipment and requesting standby and/or supplemental services (firm, interruptible, curtailable). A customer requesting standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load, and (3) is operated for other than emergency and test purposes.

(8) Temporary Service: Applicable to any customer for temporary service such as construction, fairs, displays, exhibits and similar temporary purposes for which service will be in use less than a year.

1.03 Rate Applications:

The Customer shall be billed in accordance with the regular rate schedule applicable to the Customer class for which service is rendered, or the Customer may elect to be billed under any optional rate schedule offering for the class, e.g. time of use. The Company will, upon request, advise any Customer as to the rate schedule most advantageous to their service requirements but does not assume responsibility for its selection in the event of changes in the Customer's requirements. All rate schedules are contained in Section No. VI of the Tariff. A Customer shall, upon request, be furnished a copy of the rate schedule applicable to his service.

PART II

AVAILABILITY AND ESTABLISHMENT OF SERVICE

2.01 Application for Service:

Service may be obtained upon application. Unless otherwise agreed in writing by the Company, and except as provided in Part III hereof, applications will be accepted only upon the condition that the Company shall be under no obligation to render service other than that character of service then available at the proposed Point of Delivery. Any such application or agreement shall be subject to all the provisions of these Rules and Regulations and of the Rate Schedules, and the terms and conditions thereof shall be binding upon the Company as well as upon the Customer. In order to determine whether capacity is available in existing Company equipment to provide satisfactory service to the Customer, or whether the Company must install additional or modified equipment, load data must be submitted with the application for service. Load data should include the anticipated Connected Load and the anticipated Maximum Demand.

2.02 Service Available:

Technical specifications for type and location of service are provided in the "Requirements for Electric Service and Meter Installations" contained in the Appendix.

2.03 Temporary Service:

The Company will, where it has a source of supply readily available, furnish service for temporary installations as provided for in the Company's Rate Schedule TS-1.

2.04 Auxiliary Service:

Auxiliary service is electric service provided to customers in lieu of that which might otherwise be provided by customer-owned generation for which the customer is not otherwise required to take service under the Company's Standby Service tariff. Auxiliary service is available and will be supplied by the Company under the applicable rate schedule. Parallel interconnected operation of customer-owned generation equipment is permissible only if the customer has executed a standard interconnection agreement with the Company in accordance with the Company's filed contract forms. In the absence of an executed interconnection agreement for parallel operation, the customer's facilities shall be so installed and maintained as to prevent operation of his power sources in parallel with those of the Company.

2.05 Premium Distribution Service:

Upon request by a Customer, the Company will install facilities capable of providing automatic delivery transfer to an alternate distribution circuit in the event of an outage of the principal distribution circuit. The Customer shall pay a monthly amount for such facilities in accordance with the specified rate for additional equipment contained in the applicable general service rate schedule under which service is provided.

The Company will determine the alternate circuit for Premium Distribution Service on the basis of the most economic and feasible circuit deemed available by the Company. If the Customer is desirous of a particular alternate circuit other than that deemed by the Company, the Company will give consideration to such request but shall not be required to establish such desired circuit as the alternate circuit. Where construction is necessary to extend the selected alternate circuit to an interconnection point with service on the Customer's property, the Customer shall pay this cost fully as a Contribution-in-Aid-of-Construction to the Company.

The Customer shall also be subject to an additional Monthly Demand Charge for Premium Distribution Service as stated in the applicable general service rate schedule.

PART III

CONTRIBUTION IN AID OF CONSTRUCTION

3.01 Contribution in Aid of Construction for the Installation of New or Upgraded Facilities:

Where an extension to or upgrade of existing facilities at any voltage level (other than a service drop and/or meter) is required to provide service to a Customer, the Company shall calculate under the formulas set forth below whether a contribution in aid of construction (CIAC) is due from the Customer. A CIAC would be due from the Customer, prior to construction of the requested facilities (unless alternative acceptable payment arrangements are made), as a result of expected incremental revenues from the Customer, together with revenues from other prospective customers to be served from such extension or upgrade, not being sufficient to afford a fair and reasonable return on the cost of making such extension or upgrade. The Company shall use its best judgment in estimating the revenue portion of the formulas which shall be based on an annual period ending not more than five years after the extension or upgrade is placed in service. The Company will pay for the cost where justified, in the Company's opinion, by revenues to be secured; however, the Company may require monthly or annual guarantees, cash contributions in aid of construction, and/or advances for construction, when in the Company's opinion, the immediate or potential revenues do not justify the cost of extension. If the installation of facilities is justified based on the Customer's estimates for electric power but there is reasonable doubt as to level of use or length of use of such facilities, the Customer, when mutually agreeable with the Company, may contract for a minimum Demand or monthly payment sufficient to justify the Company's investment. If it is determined that the installation of facilities through an existing underground development is for the Company's benefit, the facilities shall be installed underground at the Company's expense. For all of the formulas below, the costs shall include cost of removal and salvage, if applicable. When performing the calculations required in these formulas, the Company may consider whether it is more cost-effective for the requested installation to be placed overhead or underground; if underground installation is more cost effective, then the Company shall be permitted to utilize the four (4) years expected incremental base energy revenue as a direct offset against the cost of the underground.

(1) Overhead Extension or Upgrade: The following formula shall be used to determine the CIAC owed by the Customer. If the application of this formula results in a negative value for $CIAC_{OH}$, the $CIAC_{OH}$ amount shall be set to zero.

$$CIAC_{OH} = \text{Total estimated work order job cost of installing the facilities , excluding service drops and meters} - \text{Four (4) years expected incremental base energy revenue plus (if applicable) four (4) years expected incremental base demand revenue}$$

(2) (a) Residential Underground Extension or Upgrade: The following formula shall be used to determine the CIAC:

$$CIAC_{UG} = \text{Estimated difference between the cost of providing the line extension or upgrade with underground facilities vs. the cost of providing service using overhead facilities} + CIAC_{OH} \text{ (as above)}$$

For underground residential service, the charges set forth in Part XI, Underground Residential Distribution Policy, provide the portion of the above formula developing the estimated difference in cost using underground facilities vs. overhead facilities.

(Continued on Next Page)

(b) General Service Underground Extension or Upgrade: The following formula shall be used to determine the CIAC:

$CIAC_{UG}$ = Estimated difference between the cost of providing the line extension or upgrade with underground facilities vs. the cost of providing service using overhead facilities + $CIAC_{OH}$ (as above)

The Company will designate the point of delivery and the Customer will provide the service entrance conductors and raceway from the Customer's service equipment to the point of delivery designated by the Company located wholly on the Customer's property. For clarity, the Company does not install underground service for non-residential customers.

The actual or estimated costs applied to the formula in subsections (1) and (2) shall be consistent with the standards of the Company's approved Storm Protection Plan.

(3) Extension for Temporary Service: The Customer shall pay extension costs for temporary service in accordance with Rate Schedule TS-1.

(4) Extension for Street or Area Lighting Service: Service for street or area lighting is normally provided from existing distribution facilities. Where suitable distribution facilities do not exist, the following formula shall be used to determine the CIAC owed by the Customer. If the application of this formula results in a negative value for CIAC, the CIAC amount shall be set to zero.

CIAC = Actual or estimated job cost of new facilities required to provide service excluding lighting facilities — Four (4) years expected incremental base energy revenue

(5) CIAC True-Up:

Within 12 months of the in-service date of the new facility installation or upgrade, an initial end-use Customer that paid CIAC may make a one-time request, in writing, to true-up the CIAC charged by the Company. The Company will true-up CIAC paid to reflect actual construction costs and actual base revenues received at the time the true-up request is made. The revenue portion of the CIAC true-up will be calculated by annualizing the actual base energy and demand revenues received by the Company as of the date of the true-up request and multiplying by four to derive four years expected base revenues. Depending on the true-up results, the initial end-use customer requesting a true-up may be entitled to a refund or charged additional CIAC.

(6) CIAC Prorate:

Within a three year period from the in-service date of the installation of the new or upgraded facilities ("the initial facilities"), the Company will prorate the CIAC paid by the initial end-use customer for the facility installation or upgrade to serve that customer. Prorating will apply to only CIAC payments of $1,500 and above. Customers requiring more than a meter and a service drop for service from the initial facilities (e.g. additional poles or transformers) will be excluded from the CIAC prorate. The initial end-use customer will be charged the full amount of CIAC in accordance with this Part III. Additional customers served by the initial facilities will each pay their prorata share of the CIAC paid by the initial customer. The prorata share will be calculated by first determining the total number of customers involved by adding one (1), representing the initial customer, to the number of additional customers identified by the Company that could be served by the initial facilities. Then each customer's prorata share will be one divided by the total number of customers involved. The Company will refund the prorated collections to the initial end-use customer.

(Continued on Next Page)

3.02 Route and Easement:

For new line extensions, upgrades or service drops, the Company shall select the most economical route, which may be a right of way or easement. Before the Company starts construction, the route chosen must be cleared of all trees, tree stumps and other obstructions by the Customer, at no charge to the Company and be suitable for Company use. The Company will use private property for any such extension or upgrade, once an easement suitable to the Company is granted by the owner of such private property to the Company, without cost, in accordance with the following provisions:

(1) Private Property of Customer: Where more than one pole is located on a customer's property for the sole purpose of supplying service to such customer, an easement for all such poles and for any related facilities, including guys, overhead distribution circuits and overhang, must be furnished by the Customer. The entire length and width of the easement across the Customer's property must be cleared of trees, undergrowth, and other obstructions to access by the Company's vehicles and equipment, prior to installation of the service line by the Company.

(2) Private Property of Third Party: Where, in order to provide service to a Customer, Company facilities are to cross over or be located upon private property not owned by such Customer, or where service to such Customer is to be provided from existing Company facilities so situated, an easement for all such facilities involved, including, but not limited to, poles, guys, overhead distribution circuits and overhang, if any, will be required to be obtained by the Customer prior to such facilities being installed by the Company.

(3) Acquisition, Form and Cost: All such grants shall be obtained by the Customer upon the Company's standard form, properly executed by the grantor, and shall be made without cost to the Company.

3.03 Installation by Customer:

The Customer's installation shall, in its entirety, be installed and maintained in accordance with the requirements of local ordinances pertaining thereto, or of authorities having jurisdiction thereover, or in the absence of such local ordinances or authorities in accordance with the requirements of the National Electrical Safety Code as set forth in Handbook H-43 of the National Bureau of Standards in its present form, or as subsequently revised, amended or superseded; provided, however, that service to any customer over lines and facilities not owned by the Company shall be at the sole option of the Company. Customer installations shall be in accordance with the following provisions:

(1) Inspection by Authorities: The Company recommends that all wiring installations be inspected and approved by an authorized electrical inspector if available; and, where such inspection is required by local ordinance or authority, the Company cannot render service until such inspection has been made and formal notice from the inspecting authority of its approval has been received by the Company.

(2) Inspection by Company: The Company reserves the right to inspect Customer's installation prior to rendering service, and from time to time thereafter; but the Company assumes no responsibility whatsoever for the Customer's installation as a result of any such inspection, and will not be responsible in any way for any defect in Customer's installation, or any part thereof, or for any damage which may result from any such defect.

3.04 Special Service Requirements:

The Company designs and installs its service facilities in accordance with the "Requirements for Electric Service and Meter Installations" contained in the Appendix. Where the Customer requests a more costly service arrangement, such as a remote point of delivery, excess transformer capacity, or any other special requirements, or high demand equipment, such as tankless water heaters, kilns, welders etc., the Company will provide such service if feasible and the Customer shall pay the cost in excess of the estimated cost of the standard design.

3.05 Relocation, Removal, or Modification of Existing Facilities:

When, in the judgment of the Company a change in the use or layout of the Customer's premises makes the relocation, removal, or modification, but not an upgrade of the Company's existing facilities necessary, or when such relocation, removal, or modification is requested by the Customer and is consistent with sound utility practices, the Company will relocate, remove, or modify such facilities in a manner acceptable to the Company. The Customer shall pay the Company for all cost associated with any such relocation, removal, or modification based on an invoice prepared by the Company in accordance with standard estimation procedures, unless the removed facilities are unused and at the end of their useful life, as determined by the Company in its sole discretion. If the relocation, removal, or modification is made at the Customer's request, such payment shall be made in advance. If a requested relocation, removal, or modification involves the conversion of an existing residential overhead service to an underground service lateral, the charges and provisions of Section 11.05 of these Rules shall apply.

PART VII

GUARANTEE DEPOSITS

7.01 Deposit Requirement:

In order to guarantee payment for service rendered, the Customer shall provide the Company with a cash deposit or other acceptable guarantee such as a surety bond, letter of credit, or guarantee letter. For residential customers, the guarantor must be a customer of the Company with a satisfactory payment record. For non-residential customers, the guarantor needs not be a customer of the Company, but must be a bank, or insurance company, or other institution with proven financial capability to furnish such a guarantee. Deposits for existing accounts and new service requests will be calculated in the manner set forth in section 366.05(1)(c)1. & 2., Florida Statutes (2015) (as may be amended from time to time), respectively. Deposits will be recalculated at least on an annual basis. A deposit requirement may be waived for customers who have previously established a satisfactory payment record with the Company (including its affiliated regulated utilities) or meet the Company's requirements for the establishment of credit.

7.02 Refund of Deposit:

After a customer has had continuous service for a period of twenty-three (23) months and established a satisfactory payment record, the Company will refund a residential customer's deposit and at its option either refund or commence applying a higher rate of interest on a non-residential customer's deposit as provided for in Section 25-6.097(5) of the Florida Public Service Commission Rules. A customer is considered to have established a satisfactory payment record, if over the preceding twelve (12) months of service, the customer has not had a disconnection of service for non-payment of bill, had more than three (3) final notices, tampered with the electric meter, or used service in a fraudulent or unauthorized manner. Any deposit, plus accrued interest, being held by the Company upon termination of service will be credited to the Customer's final bill and any remaining balance refunded.

7.03 New or Additional Deposit:

The Company may require upon written notice to the Customer of not less than thirty (30) days a deposit on an existing account in order to secure payment of bills.

7.04 Interest on Deposit:

Interest will accrue on deposit amounts in existence for a continuous period of six (6) months or longer at the minimum rate provided for in Section 25-6.097(5) of the Florida Public Service Commission Rules. Accrued interest will be paid annually either as a credit on the Customer's bill or as a payment upon refund of deposit, or upon final settlement of Customer's account.

PART VIII

BILLING

8.01 Billing Period:

A bill for service will be rendered on a regular monthly cycle as scheduled by the Company. A normal billing month is an interval between scheduled meter reading dates and is approximately thirty (30) days.

8.02 Prorated Monthly Bills:

A normal monthly bill will be prorated (based on actual number of days vs. thirty (30)) if the meter reading date is advanced or postponed more than five (5) days from the scheduled read date.

All other types of bills (including initial, final, or reroute) will be prorated if they cover more or less than a regular monthly billing period (including the five-(5) day reading range). If the billing period is extended more than five (5) days, the Company will not apply the higher tiered rate if the Customer's higher usage is solely attributable to the extended billing period.

8.03 Measurement and Evidence of Consumption:

Power and energy shall be measured for each point of delivery by one meter for each type of service rendered; and the Company's readings and records thereof shall be accepted and received, at all times and places as prima facie evidence of the quantity of electricity used by the Customer at the point of delivery.

(1) Conjunctive Billing: The Company does not permit conjunctive billing. Each point of delivery to the same customer constitutes a separate service, and bills for two (2) or more points of delivery to the same customer shall be calculated separately for each point of delivery; however, where more than one (1) meter is used to measure the same type of service, although only one point of delivery is involved, each such meter shall be calculated and billed separately, as though it were a separate service, until such time as the Customer rearranges his facilities to take all of the same type of service through a single meter.

(2) Unread Meters: When the Company is unable to read a meter due to circumstances beyond the control of the Company, such as inaccessibility of meters because of flood or stormy conditions, the Company may render a minimum or estimated bill.

8.04 Delinquent Bills:

Bills are due when rendered and become delinquent if not paid within twenty (20) days after the date of mailing or delivery. A late payment charge will be applied to accounts that have past due balances, in accordance with the Company's Rate Schedule SC-1. Non-receipt of bills by customer shall not release or diminish the obligation of the Customer with respect to payment thereof on time.

8.05 Vacating or Change of Occupancy:

When a customer vacates a premise served by the Company, or when a change of occupancy therein takes place, the outgoing customer shall notify the Company not less than three (3) days prior to the date of vacating or change, as the case may be; and the outgoing customer shall be held responsible for all electric service used on such premises until such notice is received and service is disconnected, or until application for service at said location has been made by a new customer and accepted by the Company, whichever first occurs.

8.06 Service Charges:

Service Charges shall be made for each establishment or re-establishment of service, and for each returned check, in accordance with the Company's Rate Schedule SC-1.

8.07 Adjustment of Bills:

Adjustment of bills shall be made in accordance with regulations of the Florida Public Service Commission.

(Continued on Next Page)

PART VIII

BILLING
(Continued)

8.08 Net Metering for Customer-Owned Renewable Generation:

For customers with renewable generation that have executed an interconnection agreement with the Company whose customer-owned renewable generation is eligible for net metering, where the purpose is to offset a customer's usage, not purposefully create excess energy by installing renewable generation larger than needed to offset usage and as further defined by FPSC rule 25-6.065, monthly billing will be prepared in the following manner:

(1) At no additional cost to the customer, metering equipment will be installed by the Company capable of measuring the difference between the electricity supplied to the customer from the Company and the renewable electricity generated by the customer and delivered to the Company's electric grid.

(2) Meter readings will be taken monthly on the same cycle as required under the otherwise applicable rate schedule in accordance with normal billing practices.

(3) The Company will charge the customer for energy used by the customer in excess of the generation supplied by customer-owned renewable generation for the entire billing cycle in accordance with the otherwise applicable rate schedule.

(4) During any billing cycle, excess customer-owned renewable generation delivered to the Company's electric grid will be credited to the customer's energy consumption for the next month's billing cycle.

(5) Regardless of whether excess renewable energy is delivered to the Company's electric grid, the customer will be required to pay the greater of

i. the minimum charge as stated in their otherwise applicable rate schedule, or

ii. the applicable monthly customer charge plus the applicable demand charge for the monthly maximum 30-minute demand measured on the company's usage meter during the billing period in accordance with the otherwise applicable rate schedule

(6) For customers whose otherwise applicable rate schedule is a time of use (TOU) rate, the generation supplied by customer-owned renewable generation to the Company will be measured by the distinct TOU periods of that rate schedule and offset customer usage in the current month or subsequent periods using the distinct TOU periods of that rate schedule.

(7) Energy credits produced pursuant to section 4 above will accumulate and be used to offset the customer's energy usage in subsequent months for a period of not more than twelve months. After the end of each calendar year, the Company will credit the customer (on the February bill) for any unused energy credits at an average annual rate based on the COG-1, as-available energy tariff.

(8) Excess renewable generation by the customer of record will be applied only to the service provided at the location of the customer's renewable generation system and will not be applied to other locations or services at the same location that the customer may take from the Company.

(9) When a customer leaves the Company's system, unused credits for excess renewable kWh generated will be credited to the customer at an average annual rate based on the COG-1, as-available energy tariff.

(10) The customer may, at their sole discretion, choose to take service under the Company's standby or supplemental service rate, if available. When a customer elects to take service under a standby or supplemental tariff, any excess renewable generation credited from prior periods in accordance with provision number 4 above, will be considered supplemental energy for billing purposes.

(Continued on Next Page)

PART VIII

BILLING
(Continued)

8.09 Budget Billing Program (Optional):

Residential

A customer may elect to be billed for service hereunder by an alternative-billing program called the "Budget Billing Program." The Budget Billing Program provides the customer the choice between two options:

1. Quarterly Budget Billing Program – The Quarterly Budget Billing Program provides for the Company to bill the customer, commencing with the next full month's bill and for the next two successive months, an amount equal to one-twelfth (1/12) of the cost for all electric service, excluding billings for Rate Schedule LS-1, rendered at the premises during the immediately preceding twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   An updated amount to be billed for each of the next three consecutive months shall be calculated to be the amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the then immediately preceding twelve-month period under the customer's respective rate schedule.

   The customer's bill for each month of subsequent quarterly periods shall be similarly calculated. At the end of the initial 12-month period that the customer's election is in effect, and at the end of each twelve-month period thereafter that the customer's election is in effect, the Company will determine the difference between the cost for actual electric services rendered at the premises under the customer's respective rate schedule and the amounts billed through the budget billing program for those twelve months, and the Company shall add or subtract, as appropriate, one-twelfth (1/12) of that difference to each of the next twelve bills to be sent to the customer.

   If at any time it is apparent that the customer's expected use of services has been over or underestimated, the Company shall have the right to revise the estimate and modify the succeeding billings accordingly. When the billings have been re-estimated, the Company will advise the customer of the revised amount to be paid.

2. Annual Budget Billing Program – This budget billing program provides for the Company to bill the customer, commencing with the next full month's bill and for the next ten (10) successive months, an amount equal to one-twelfth (1/12) of the estimated cost for all electric service, excluding billings for Rate Schedule LS-1, rendered at the premises during the next twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   During the first eleven months the cost of each month's service calculated under the customer's respective rate schedule will be charged to the customer's account, and all payments made by the customer will be credited to this amount. The bill rendered on the twelfth month will include the adjustment for the difference between the actual billing for the first eleven months and the payments made by the customer during the same period.

   If at any time during the first eleven months it is apparent that the customer's expected use of service has been over or under estimated, the Company shall have the right to revise the estimate and modify the succeeding monthly billings accordingly. When the monthly payments have been re-estimated, the Company will advise the customer of the revised amount to be paid.

A customer electing to enroll in the Budget Billing Program without prior usage history at the service location, a calculation based upon the characteristics of the premise. A customer may request termination of the Budget Billing Program at any time. If the customer misses two consecutive monthly Budget Billing Program installments, they will be removed from the program. At removal, the deferred (or accumulated) balance/credit will become due/credited to the next invoice which may also reflect any applicable late payment charges and/or disconnection notice in accordance with standard procedures.

(Continued on Next Page)

PART VIII

BILLING
(Continued)

Non-residential

Any GS-1 or GSD-1 Customer who has no delinquent balances is eligible to participate in the Budget Billing Program described below for GS-1 and GSD-1 rate billings, excluding billings for Rate Schedule LS-1. However, GS-1 or GSD-1 Customers that participate in the following will not be eligible to participate in this Budget Billing Program: Automatic Landlord revert to Owner contracts; Shared Solar; Net Metering; Unmetered Service; Premier Power Service; Summary/Collective Billing. The Budget Billing Program provides the customer the choice between two options:

1. Quarterly Budget Billing Program – The Quarterly Budget Billing Program provides for the Company to bill the customer, commencing with the next full month's bill and for the next two successive months, an amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the immediately preceding twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   An updated amount to be billed for each of the next three consecutive months shall be calculated to be the amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the then immediately preceding twelve-month period under the customer's respective rate schedule.

   The customer's bill for each month of subsequent quarterly periods shall be similarly calculated. At the end of the initial 12-month period that the customer's election is in effect, and at the end of each twelve-month period thereafter that the customer's election is in effect, the Company will determine the difference between the cost for actual electric services rendered at the premises under the customer's respective rate schedule and the amounts billed through the budget billing program for those twelve months, and the Company shall add or subtract, as appropriate, one-twelfth (1/12) of that difference to each of the next twelve bills to be sent to the customer.

   If at any time it is apparent that the customer's expected use of services has been over or underestimated, the Company shall have the right to revise the estimate and modify the succeeding billings accordingly. When the billings have been re-estimated, the Company will advise the customer of the revised amount to be paid.

2. Annual Budget Billing Program – This budget billing program provides for the Company to bill the customer, commencing with the next full month's bill and for the next ten (10) successive months, an amount equal to one-twelfth (1/12) of the estimated cost for all electric service rendered at the premises during the next twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   During the first eleven months the cost of each month's service calculated under the customer's respective rate schedule will be charged to the customer's account, and all payments made by the customer will be credited to this amount. The bill rendered on the twelfth month will include the adjustment for the difference between the actual billing for the first eleven months and the payments made by the customer during the same period.

   If at any time during the first eleven months it is apparent that the customer's expected use of service has been over or under-estimated, the Company shall have the right to revise the estimate and modify the succeeding monthly billings accordingly. When the monthly payments have been re-estimated, the Company will advise the customer of the revised amount to be paid.

A customer electing to enroll in the Budget Billing Program without prior usage history at the service location, a calculation based upon the characteristics of the premise and will default to the quarterly Budget Billing Program option to help establish accurate payment estimation. A Customer may terminate participation in the Budget Billing Program at any time. If the customer misses two consecutive monthly Budget Billing Program installments, they will be removed from the program. At removal, the deferred (or accumulated) balance/credit will become due/credited to the next invoice which may also reflect any applicable late payment charges and/or disconnection notice in accordance with standard procedures.

PART X

DISCONTINUANCE AND WITHHOLDING OF SERVICE

10.01 Grounds for Discontinuance or Withholding of Service:

The Company may refuse or discontinue service to a customer under any of the conditions provided for under Section 25-6.105 of the Rules of the Florida Public Service Commission. The Company may also refuse or discontinue service for the following reasons:

(1) For actions or threats made by a Customer, or anyone on the Customer's premises, which are reasonably perceived by a Company employee as violent or unsafe, after affording the Customer reasonable opportunity to cease from any further act of violence or unsafe condition. However, where the Company believes a dangerous condition exists on the Customer's premises, service may be discontinued without notice.

(2) For residential customers, the Company may withhold service if the Customer fails to provide a form of identification acceptable to the Company, including but not limited to a valid social security number, tax identification number, or driver's license.

(3) For service requested by firms, partnerships, associations, corporations, etc., the Company may withhold service if the Customer fails to provide proof that a duly authorized person is making the application for service and/or if the Customer is not registered with a governmental agency as licensed to do business in Florida.

10.02 Notice of Discontinuance:

The Company will give the Customer as much written notice of discontinuance of service as may be reasonably practical.

10.03 Medically Essential Service:

For purposes of this section, a Medically Essential Service Customer is a residential customer whose electric service is medically essential, as affirmed through the certificate of a doctor of medicine licensed to practice in the State of Florida. Service is "medically essential" if the customer has continuously operating electric-powered medical equipment necessary to sustain the life of or avoid serious medical complications requiring immediate hospitalization of the customer or another permanent resident at the service address. The physician's certificate shall explain briefly and clearly, in non-medical terms, why continuance of electric service is medically essential and shall be consistent with the requirements of the Company's tariff. A customer who is certified as a Medically Essential Service Customer must renew such certification periodically through the procedures outlined above. The company may require certification no more frequently than once every twelve (12) months.

The Company shall provide Medically Essential Service Customers with a limited extension of time, not to exceed thirty (30) days, beyond the date service would normally be subject to disconnection for non-payment of bills (following the requisite notice pursuant to Rule 25-6.105(5) of the Florida Administrative Code). The Company shall provide the Medically Essential Service Customer with written notice specifying the date of disconnection based on the limited extension. The Medically Essential Service Customer shall be responsible for making mutually satisfactory arrangements to ensure payment within this additional extension of time for service provided by the Company and for which payment is past due, or to make other arrangements for meeting the medically essential needs.

No later than 12 noon one (1) day prior to the scheduled disconnection of service of a Medically Essential Service Customer, the Company shall attempt to contact such customer by telephone in order to provide notice of the scheduled disconnect date. If the Medically Essential Service Customer does not have a telephone number listed on the account, or if the utility cannot reach such customer or other adult resident of the premises by telephone by the specified time, a field representative will be sent to the residence to attempt to contact the Medically Essential Service Customer, no later than 4:00 p.m. of the day prior to scheduled disconnection. If contact is not made, however, the Company may leave written notification at the residence advising the Medically Essential Service Customer of the scheduled disconnect date; thereafter, the Company may disconnect service on the specified date. The Company will grant special consideration to a Medically Essential Service Customer in the application of Rule 25-6.097(3) of the Florida Administrative Code.

In the event that a customer is certified as a Medically Essential Service Customer, the customer shall remain solely responsible for any backup equipment and/or power supply and a planned course of action in the event of a power outage. The Company does not assume, and expressly disclaims, any obligation or duty: to monitor the health or condition of the person requiring medically essential service; to insure continuous service; to call, contact, or otherwise advise of service interruptions; or, except as expressly provided by this section, to take any other action (or refrain from any action) that differs from the normal operations of the Company.

10.04 Liability for Discontinuance:

Whenever the Company shall have the right to discontinue service to a customer, such right may be exercised without any liability for loss, damage, or injury resulting directly or indirectly from lack of electric service; and the Company shall be under no obligation or duty to ascertain whether such discontinuance would be likely to result in any such loss, damage, or injury.

10.05 Reconnection:

Service may be reconnected after those conditions which caused service to be discontinued have been corrected. A service charge may be applicable as provided for under Rate Schedule SC-1.

10.06 Customer's Deposit:

Where valid conditions exist, service may be discontinued whether or not the amount of the Customer's deposit is sufficient to cover the Customer's bill; and, where said deposit has been applied toward the settlement of such bill, service will not be reconnected until a satisfactory deposit is restored.

PART XI

UNDERGROUND RESIDENTIAL DISTRIBUTION POLICY

11.01 Definitions:

The following words and terms used under this policy shall have the meaning indicated:

(1) Applicant: Any person, partnership, association, corporation, or governmental agency controlling or responsible for the development of a new subdivision or dwelling unit and applying for the construction of underground electric facilities.

(2) Building: Any structure, and excluding a Townhouse, designed for residential occupancy and containing less than five (5) individual dwelling units.

(3) Commission: Florida Public Service Commission.

(4) Company: Duke Energy Florida, LLC.

(5) Customer Provided and Installed Conduit: Schedule 40 PVC grey electrical grade conduit, purchased by the customer on the open market and installed meeting Company guidelines. Diameter is to be specified by Company based upon the type of conductor.

(6) Direct Burial: A type of construction involving the placing of conductors in the ground without the benefit of conduit or ducts. Other facilities, such as transformers, may be above ground.

(7) Distribution System: Electric service facilities consisting of primary and secondary conductors, service laterals, transformers, and necessary accessories and appurtenances for the furnishing of electric power at utilization voltage.

(8) Feeder Main: A three-phase primary installation which serves as a source for primary laterals and loops through suitable overcurrent devices.

(9) Final Grade: The ultimate elevation of the ground, paved or unpaved, which will prevail in a subdivision or tract of land including drainage ditches and or swales.

(10) Mainline: Portions of the subdivision including primary and secondary voltage conductors but excluding services running to a dwelling.

(11) Mobile Home (Trailer): A non-self propelled vehicle or conveyance, permanently equipped to travel upon the public highways, that is used either temporarily or permanently as a residence or living quarters.

(12) Multiple-Occupancy Building: A structure erected and framed of component structural parts and designed to contain five (5) or more individual dwelling units.

(13) Point of Delivery: The point where the Company's facilities are connected to those of the Customer's service entrance. The point of delivery shall be determined by the Company.

(14) Primary Lateral: That part of the electric distribution system whose function is to conduct electricity at the primary level from the feeder main to the transformers serving the secondary street mains. It usually consists of a single-phase conductor or insulated cable, together with necessary accessory equipment for supporting, terminating and disconnecting from the primary mains by a fusible element.

(15) Service Lateral: The underground service conductors between the street or rear property main, including any risers at a pole or other structure or from transformers, and the first point of connection to the service entrance conductors in a terminal or meter box on the exterior building wall.

(16) Subdivision: The tract of land which is divided into five (5) or more building lots or upon which five (5) or more separate dwelling units are to be located, or the land on which is to be constructed new multiple-occupancy buildings.

(Continued on Next Page)

11.01 Definitions (continued):

(17) Townhouse: A one (1)-family dwelling unit of a group of three (3) or more such units separated only by firewalls. Each townhouse unit shall be constructed upon a separate lot and serviced with separate utilities and shall otherwise be independent of one another.

11.02 GENERAL:

(1) Application:

Underground electric distribution facilities are offered in lieu of overhead facilities in accordance with these Rules and Regulations for:

a) Residential Subdivision and Developments (Part 11.03)
b) New Service Laterals from Overhead Systems (Part 11.04)
c) Replacement of Existing Overhead Service (Part 11.05)
d) Multiple-Occupancy Residential Buildings (Part 11.06)

(2) Early Notification and Coordination:

In order for the Company to provide service when required, it is necessary that the Applicant notify the Company during the early stages of planning major projects. Close coordination is necessary throughout the planning and construction stages by the Company, the architect, the builder, the subcontractors, and the consulting engineer to avoid delays and additional expense. Particular attention must be given to the scheduling of the construction of paved areas and the various sub-grade installations of the several utilities.

(3) Changes to Plans, Layout, or Grade:

The Applicant shall pay for any additional costs imposed on the Company by Applicant including, but not limited to, engineering design, administration and relocation expenses, due to changes made subsequent to the agreement in the subdivision or development layout or final grade.

(4) Underground Installation Not Covered:

Where the Applicant requests or governmental ordinance mandates underground electric facilities for residential subdivisions not falling within the dwelling units per acre density limitation as specified in Part 11.03(2)(a) or for residential developments of less than five (5) building lots and where overhead facilities would otherwise be provided, the Applicant shall pay the Company the estimated differential cost between the underground facilities and the suitable overhead facilities as determined by using the Company's current standard estimating data. The Applicant shall also provide necessary rights of way and easements as given in Section 11.02(7).

(5) Type of System Provided:

The costs quoted in these Rules are for underground residential distribution facilities of standard Company design with above-grade appurtenances. Unless otherwise stated, service provided will be 120/240-volt single phase. If other types of facilities are requested by the Applicant or required by governmental authority, the Applicant will pay the additional costs, if any.

(6) Ownership:

The Company will install, own, and maintain the electric distribution facilities up to the designated point of delivery except as otherwise noted. Any payment made by the Applicant, under the provisions of these Rules will not convey to the Applicant any rights of ownership.

(7) Rights of Way and Easements:

(a) General Requirements: The Company shall construct, own, operate, and maintain distribution lines within the Applicant's subdivision only along easements, public streets, roads and highways which the Company has the legal right to occupy, and on public lands and private property across which rights of way and easements satisfactory to the Company may be obtained without cost or condemnation to the Company.

(Continued on Next Page)

(7) Rights of Way and Easements (Continued):

(c) Scheduling, Clearing, and Grading: Rights of way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstructions, staked to show property lines and final grade, and must be graded to within six (6) inches of final grade by the Applicant before the Company will commence construction, all at no charge to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer locations.

(d) Recorded Public Easements: Where underground distribution facilities are located on private property, wholly within an area covered by a recorded subdivision utility easement, namely a reservation, and recorded plat of an easement for public utility purposes, no other easement is required.

(e) Service Laterals: Where underground service conductors are located on private property and portions not covered by recorded subdivision utility easement are wholly within the private property they service no easement is required.

(f) Other Locations: Where underground distribution facilities are located on private property other than as described in Part 11.02(7)(a) or 11.02(7)(e), easements are required and shall be prepared as outlined in instructions prepared by the Real Estate Department.

(g) Blanket Easements: Where underground primary and secondary distribution facilities for service to a mobile home park or a multiple occupancy project are located on a tract of land having one ownership and the easement area cannot be described without a detailed survey, a blanket easement covering the entire premises may be utilized at the discretion of the Division Engineer.

(8) Damage to Company's Equipment:

The Applicant shall be responsible to ensure that the Company's distribution system, once installed, is not damaged, destroyed, or otherwise disturbed during the construction of the project. This responsibility shall extend not only to those in Applicant's employ, but also to Applicant's subcontractors, and Applicant shall be responsible for the full cost of repairing such damage.

(9) Charges:

The Company shall not be obligated to install any facilities within a subdivision until satisfactory arrangements for the payment of applicable charges, if any, have been completed.

(10) Special Conditions:

The costs quoted in these rules are based on conditions which permit employment of rapid construction techniques. The Applicant shall be responsible for necessary additional hand digging expenses other than what is normally provided by the Company. The Applicant is responsible for clearing, compacting, boulder and large rock removal, stump removal, paving, and addressing other special conditions. Should paving, grass, landscaping or sprinkler systems be installed prior to the construction of the underground distribution facilities, the Applicant shall pay the added costs of trenching and backfilling and be responsible for restoration of property damaged to accommodate the installation of underground facilities.

11.03 UNDERGROUND DISTRIBUTION FACILITIES FOR RESIDENTIAL SUBDIVISIONS AND DEVELOPMENTS.

(1) Availability:

When requested by the Applicant, the Company will provide underground electric distribution facilities in accordance with its standard practices in:

(a) recognized residential subdivisions of five or more building lots;

(b) tracts of land upon which five or more separate dwelling units are to be located;

(c) tracts of land upon which new multiple-occupancy buildings are to be constructed.

For building containing five or more dwelling units, see Part 11.06 of these Rules.

(Continued on Next Page)

(2) Contribution by Applicant (continued):

(c) Credits (not to exceed the "average differential costs" stated in Section 11.03) will be allowed where, by mutual agreement, the Applicant provides trenching and backfilling for the use of the Company's facilities in lieu of a portion of the cash payment described above. These credits, based on the Company's design drawings, are:

Primary and/or Secondary Systems,
for each Foot of Trench.....$3.35

Service Laterals,
for each Foot of Trench.....$3.35

(3) Point of Delivery:

The point of delivery shall be determined by the Company and will be on the front half of the side of the building that is nearest the point at which the underground secondary electric supply is available to the property. The Company will not install a service on the opposite side of the building where the underground secondary electric supply is available to the property. The point of delivery will only be allowed on the rear of the building by special exception. The Applicant shall pay the estimated full cost of service lateral length required in excess of that which would have been needed to reach the Company's designated point of service.

(4) Location of Meter and Socket:

The Applicant shall install a meter socket at the point designated by the Company in accordance with the Company's specifications. Every effort shall be made to locate the meter socket in unobstructed areas in order that the meter can be read without going through fences, etc.

(5) Development of Subdivisions:

The above charges are based on reasonably full use of the land being developed. Where the Company is required to construct underground electric facilities through a section or sections of the subdivision or development where service will not be required for at least two (2) years, the Company may require a deposit from the Applicant before construction is commenced. This deposit, to guarantee performance, will be based on the estimated total cost of such facilities rather than the differential cost. The amount of the deposit, without interest, in excess of any charges for underground service will be returned to the Applicant on a prorata basis at quarterly intervals on the basis of installations to new customers. Any portion of such deposit remaining unrefunded, after five (5) years from the date the Company is first ready to render service from the extension, will be retained by the Company.

(6) Relocation or Removal of Existing Facilities:

If the Company is required to relocate or remove existing overhead and/or underground distribution facilities in the implementation of these Rules, all costs thereof shall be borne exclusively by the Applicant. These costs shall include costs of relocation or removal, the in-place value (less salvage) of the facilities so removed, and any additional costs due to existing landscaping, pavement or unusual conditions.

(7) Other Provisions:

If soil compaction is required by the Governmental or permitting agency in right of way locations where Company trenching is done, an additional charge may be added to the charges set forth in this tariff. The charge will be estimated based on the Governmental or permitting agency's compaction specifications. The Company will not provide trench line soil compaction for the Applicant.

(Continued on Next Page)

11.04 UNDERGROUND SERVICE LATERALS FROM EXISTING SECONDARY ELECTRIC DISTRIBUTION SYSTEMS.

(1) New Underground Service Laterals:

When requested by the Applicant, the Company will install underground service laterals from overhead systems to newly constructed residential buildings containing less than five (5) separate dwelling units.

(2) Contribution by Applicant:

The Applicant shall pay the Company the following average differential cost between an overhead service lateral and an underground service lateral:

For Service Lateral up to 80 feet Duke Supplied and Installed Conduit $641.00
For Service Lateral up to 80 feet Customer Supplied and Installed Conduit.....$339.00

For each foot over 80 feet up to 300 feet Duke Supplied and Installed Conduit .....$0.00 per foot
For each foot over 80 feet up to 300 feet Customer Supplied and Installed Conduit.....$0.00 per foot

Service laterals in excess of 300 feet shall be based on a specific cost estimate.

The provisions of Paragraphs 11.03(3) and 11.03(4) are also applicable.

11.05 UNDERGROUND SERVICE LATERALS REPLACING EXISTING RESIDENTIAL OVERHEAD SERVICES:

Applicability:

When requested by the Applicant, the Company will install underground service laterals from existing overhead lines as replacements for existing overhead services to existing residential buildings containing less than five (5) separate dwelling units.

Rearrangement of Service Entrance:

The Applicant shall be responsible for any necessary rearranging of his existing electric service entrance facilities to accommodate the proposed underground service lateral in accordance with the Company's specifications.

Trenching:

The Applicant shall also provide, at no cost to the Company, a suitable trench or installed conduit and perform the backfilling and any landscaping, pavement, or other suitable repairs. If the Applicant requests the Company to supply the trench or remove any additional equipment other than the Service Lateral, the charge to the Applicant for this work shall be based on a specific cost estimate.

Contribution by Applicant:

The charge excluding trenching costs shall be as follows:

For Service Lateral .....$1,762.00 per service

The Applicant may elect to provide and install conduit meeting current Company construction specifications at no cost to the Company in lieu of an open trench. The charge shall be as follows:

For Service Lateral .....$1,522.00 per service

(Continued on Next Page)

11.06 UNDERGROUND DISTRIBUTION FACILITIES TO MULTIPLE-OCCUPANCY RESIDENTIAL BUILDINGS:

(1) Availability:

Underground electric distribution facilities may be installed within the tract of land upon which multiple-occupancy residential buildings will be constructed.

(2) Contribution by Applicant:

When feeder mains on tracts of land upon which multiple-occupancy buildings will be constructed are deemed necessary by the Company to provide and/or maintain adequate service, an underground installation is requested by the Applicant, or required by a governmental agency having the authority so to do, the Applicant shall contribute the differential costs provided in Section 10.3.2.b) and 10.3.3.c). There will be no contribution from the Applicant with respect to construction of underground distribution facilities other than feeder mains so long as the Company is free to construct such extensions in the most economical manner, and reasonably full use is made of the tract of land upon which the multiple-occupancy buildings will be constructed. Other conditions will require a contribution from the Applicant.

(3) Responsibility of Applicant:

(a) Furnish details and specifications of the proposed building or complex of buildings. The Company will use these in the design of the electric distribution facilities required to render service.

(b) Where the Company determines that the secondary points of delivery are to be located inside the building, the Applicant shall provide:

i. The vault or vaults necessary for the transformers and the associated equipment, including the ventilation equipment.

ii. The necessary raceways or conduit for the Company's supply cables from the vault or vaults to a suitable point five (5) feet outside the building in accordance with the Company's plans and specifications.

iii. Conduits underneath all buildings when required for the Company's supply cables. Such conduits shall extend five (5) feet beyond the edge of the buildings for joining to the Company's facilities.

iv. The service entrance conductors and raceways from the Applicant's service equipment to the designated point of delivery within the vault.

(3) Responsibility of Applicant (Continued):

(c) Where the Company determines that the secondary points of delivery are to be located outside the building, the Applicant shall provide:

i. The transformer enclosure or space for pad-mounted equipment, if required.

ii. The service entrance conductors and raceway from the Applicant’s service equipment to the point of delivery designated by the Company at or near the building, and wholly on the Customer’s property.

(4) Responsibility of the Company:

(a) The Company will:

i. Provide the Applicant with the Company’s plans to supply the proposed building or complex of buildings, and specifications for the facilities to be provided by the Applicant.

ii. Furnish and install the primary or secondary conductors from existing or proposed facilities adjoining the property to the point of delivery.

iii. Furnish and install the necessary transformers and associated equipment located either outside the building or in the vault(s) within the building.

iv. Be solely responsible for the installation, operation, and maintenance of all of its facilities.

(5) Service Voltage:

The Company will supply service at one of the several secondary voltages available as mutually agreed upon between the Applicant and the Company.

PART XII

CHARGES FOR CONVERSION OF EXISTING OVERHEAD TO UNDERGROUND ELECTRIC DISTRIBUTION FACILITIES

12.01 DEFINITIONS:

The following words and terms used under this Part shall have the meaning indicated:

(1)	Applicant:	The Applicant is the person or entity seeking the undergrounding of existing or newly planned electric distribution facilities by the Company. When a developer requests local government development approval, the local government shall not be deemed the Applicant for purposes of these rules.
(2)	Commission:	Florida Public Service Commission.
(3)	Cost Estimate Fee:	A fee charged an Applicant by the Company for the purpose of preparing a cost estimate of the amount required for the Company to construct or convert particular distribution facilities as underground.
(4)	Company:	Duke Energy Florida, LLC
(5)	Distribution Facilities:	All electrical equipment of the Company required to deliver electricity to homes and businesses.
(6)	Facility Charge:	That charge required to be paid by an Applicant for the Company to construct or convert particular distribution facilities as underground.
(7)	Overhead:	Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed above ground on supporting poles.
(8)	Underground:	Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed below ground or on the ground.

12.02 GENERAL:

(1) Application:

Underground electric distribution facilities are offered in lieu of overhead facilities in accordance with these rules.

(2) Applicant Request:

An Applicant shall submit a request in writing for the Company to develop a cost estimate to accomplish the undergrounding of particular electric facilities. The request shall be accompanied by an appropriate fee and shall specify the following information:

(a) the area(s) being sought to be undergrounded;

(b) a list of all electric customers affected;

(c) an estimated time frame for undergrounding to be accomplished;

(d) details of any construction by the Applicant; and

(e) any other pertinent information which the Applicant possesses that may aid the Company in preparing an appropriate cost estimate.

(Continued on Next Page)

12.03 INSTALLATIONS NOT COVERED:

The following types of electrical installations are not addressed in these rules:

(A) Distribution lines, new or existing, in urban commercial area, urban residential area, rural residential area, or existing subdivisions will not be considered for undergrounding if sufficient permits or easements cannot be obtained. The request will not be considered unless all customers on both sides of the road or street who are served by the supply system to be undergrounded are included in the proposed conversion.

(B) Distribution lines in new residential subdivisions. These installations are covered under "Rules of the Florida Public Service Commission", Chapter 25-6, Part V, "Rules for Residential Electric Underground Extensions", and the Company's "General Rules and Regulations Governing Electric Service", Part XI.

(C) Individuals applying for undergrounding of service laterals from existing overhead lines. These applications will be covered by rules referenced in 12.03(B) above.

(D) Electrical distribution circuits serving street or area lighting. Requests for undergrounding circuits of this category will be treated on an individual basis.

12.04 COST ESTIMATE FEES:

(1) Non-Binding Cost Estimate Fee:

The Company will provide a non-binding cost estimate related to the request at no cost to the Applicant. Such estimate shall not have any guarantee as to its accuracy and shall not be binding upon the Company.

(2) Binding Cost Estimate Fee

The following schedule of fees shall apply to the Applicant for engineering design time to establish a binding cost estimate by the Company for the request. Such fee shall be recognized as a credit in the Facility Charge determination if the Applicant enters into a construction contract within 180 days from date of receipt of the binding cost estimate. At the discretion of the Company, the time from submittal of the cost estimate to entering a contract may be extended beyond 180 days. A major scope change by the Applicant may require a new fee amount.

SCHEDULE OF BINDING COST ESTIMATE FEES

Facility Classification	Fee
Urban Commercial	$4,234 per mile
Urban Residential	$3,476 per mile
Rural Residential	$2,549 per mile
Low Density Subdivision	$ 15 per lot
High Density Subdivision	$ 13 per lot

(Continued on Next Page)

12.05 CONSTRUCTION CONTRACT:

(1) GENERAL:

Upon acceptance by the Applicant of the binding cost estimate, the Applicant shall execute a contract with the Company to perform the construction of the underground distribution facilities. The contract shall specify the type and character of system to be provided; establish the Facility Charge to be paid by Applicant prior to commencement of construction; specify details of construction to be performed by Applicant, if any; and address any other pertinent terms and conditions including those described in Part (4) below.

(2) FACILITY CHARGE:

Charge = Remaining net book value of existing overhead facilities to be removed;

plus, removal cost of existing overhead facilities;

minus, salvage value of existing overhead facilities;

plus, estimated construction cost of underground facilities including underground service laterals to residential customers meters or point of delivery for general service customers;

minus, estimated construction cost of overhead facilities including overhead service drops to customers' meters;

minus, qualifying binding cost estimate fee.

plus/minus, the net present value of the lifecycle operational costs differential including storm restoration.

The actual or estimated costs applied to the facility charge shall be consistent with the standards of the Company's approved Storm Protection Plan.

3) CONSTRUCTION BY APPLICANT:

If agreed upon by both the Applicant and the Company, the Applicant may construct or install portions of the underground system as long as such work meets the Company's engineering and construction standards. The Company will own and maintain the completed distribution facilities upon accepting the system as operational. The type of system provided will be determined by the Company's standards.

Any facilities provided by the Applicant will be inspected by Company inspectors prior to acceptance. Any deficiencies discovered as a result of these inspections will be corrected by the Applicant at Applicant's sole expense, including the costs incurred by performing the inspections. Corrections must be made in a timely manner by the Applicant, otherwise the Company will undertake the correction and bill the Applicant for all costs of such correction. These costs shall be added to the original binding estimate.

(Continued on Next Page)

(4) OTHER TERMS AND CONDITIONS

(a) Easements:

Before the initiation of any project to provide underground electric distribution facilities pursuant to an Underground Facilities Conversions Agreement, the Applicant shall provide the Company, at no cost to the Company, all easements utilizing Company approved language and forms, including legal descriptions of such easements and all survey work associated with producing legal descriptions of such easements, specified as necessary by the Company to accommodate the requested underground facilities along with an opinion of title that the easements are valid. Failure to provide the easements in the manner set forth above within 180 days after the delivery of the binding cost estimate to the Applicant shall result in the expiration of the binding cost estimate, the return of any CIAC paid, and the termination of any Underground Facilities Conversions Agreement entered into between the Applicant and the Company.

(b) Scheduling, Clearing, and Grading:

Rights-of-way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstruction; staked to show property lines and final grade; and graded to within six (6) inches of final grade by the Applicant before the Company commences construction; all at no cost to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer, pullbox, and switch locations.

(c) Restoration:

All removal and restoration of buildings, roads, driveways, sidewalks, patios, fences, ditches, landscaping, sprinkler systems, and other utilities, etc., shall be the full responsibility of the Applicant and shall cause no cost to the Company. Removal of all construction debris not belonging to the Company shall be the responsibility of the Applicant.

(d) Other Joint Users on the Company Poles:

Prior to construction, the Applicant must make arrangements with any other joint users of the Company's poles to remove their facilities at no cost to the Company. The Applicant shall produce, if requested by the Company, executed agreements with all joint users guaranteeing this requirement. During construction, the Company will undertake coordination efforts directly with the joint users where required for removal of their facilities.

(e) Affected Electric Customers:

Prior to construction, the Applicant must make arrangements with all affected Company customers to prepare their premises and service entrance in a timely manner for underground service. All customers affected by the undergrounding request must agree to accept underground service. These customers' conversions will be at no cost to the Company. During construction, the Company will undertake coordination efforts directly with affected customers for their transfer to underground service.

(f) Damage to the Company's Underground Facilities:

The Applicant shall be responsible to ensure the Company's distribution facilities are not damaged, destroyed, or otherwise disturbed during construction. This responsibility shall extend not only to those in Applicant’s employ, but also to Applicant’s subcontractors, and Applicant shall be responsible for the full cost of repairing such damage.

(Continued on Next Page)

(4) Governmental Undergrounding Fee

(a) The Company will bill a monthly Governmental Undergrounding Fee to electric customers located in the Underground Assessment Area established by the local government. The Governmental Undergrounding Fee shall be based on a uniform percentage of customers' total net charges for electric service calculated to produce the Annual Recovery Amount, net of regulatory assessment fees, if any. Except as provided in Paragraph 2(a) of this Section 12.06, the total Governmental Undergrounding Fee billed to a customer's account (irrespective of the number of Underground Assessment Areas in which the customer may be located) shall not exceed the lesser of (i) 15 percent of the customer's total net electric service charges, or (ii) a maximum monthly amount of $30 for residential customers and $50 for each 5,000 kilowatt-hour increment of consumption for non-residential customers. The maximum monthly amount shall apply to each line of billing in the case of a customer receiving a single bill for multiple service points, and to each occupancy unit in the case of a master metered customer.

(b) The application of a Governmental Undergrounding Fee based on a higher percentage or maximum monthly amount than specified in Paragraph 4(a) of this Section 12.06 shall require approval of the Florida Public Service Commission.

(c) The Governmental Undergrounding Fee shall be recalculated for each 12-month period during its effectiveness following the initial annual period. The recalculation shall be based on the Company's most current projections for the upcoming period, and shall include a true-up adjustment based on the difference between projected and actual recovery for the prior 12-month period.

(5) Optional Utility Financing

At the option of the local government, the Company may provide financing for the Facility Charge and Governmental Cost of the undergrounding project, subject to any limitation on the funds made available for such purpose at the Company's discretion. Upon request, the Company will advise the local government at the time the binding cost estimate is presented pursuant to Paragraph 12.04(2) of this Part XII whether sufficient funds are available at that time to finance the cost of the undergrounding project. The interest rate applicable to such optional financing will be determined by the Company commensurate with normal risk considerations such as the credit worthiness of the local government, the total cost subject to financing, the expected duration of the undergrounding project, and any other identifiable risks associated with financing the project.

(6) Customer Notification

At least 30 days prior to the execution of a Local Government Underground Cost Recovery Contract pursuant to Subsection (7) of this Section 12.06, the local government shall mail a notice to each electric customer located within the proposed Underground Assessment Area stating its intention to recover the cost of the underground conversion project in question through a Governmental Undergrounding Fee on the customer's electric bill. The notice shall include, at a minimum, (i) a description of the underground conversion project, (ii) an estimate of the Governmental Undergrounding Fee (as a percentage of total net electric charges) and the maximum monthly amount, (iii) the month in which billing of the Fee is expected to commence, (iv) the number of years over which the Fee is to be imposed, and (v) a postage-prepaid form on which the customer may submit comments to the local government.

(7) Underground Cost Recovery Contract

The local government shall enter into a contract with the Company, the form of which has been approved by the Florida Public Service Commission or its staff, establishing the specific terms and conditions for underground capital cost recovery consistent with the provisions of this Section 12.06.

ECON DEV	Economic Development Rider Service Agreement	7.500

Company will prepare a workpaper showing the calculation of the Governmental Undergrounding Fee (attached hereto as Attachment C and incorporated herein by its reference).

2. The parties agree that if the Local Government desires to apply a Governmental Undergrounding Fee based on a higher percentage or maximum monthly amount than specified in paragraph (D)(1) above, then the parties shall jointly petition the Florida Public Service Commission for approval of such increased amount. Absent such approval, the amounts for the Governmental Undergrounding Fee shall not be set above those maximum amounts.

3. The Governmental Undergrounding Fee shall be recalculated for each twelve (12) month period during its effectiveness following the initial annual period. The recalculation shall be based on the Company's most current projections for the upcoming period, and shall include a true-up adjustment based on the difference between projected and actual recovery for the prior twelve (12) month period. The first annual true-up period for this Contract shall begin with the first billing cycle for the month following the implementation of the billing for the Governmental Undergrounding Fee.

4. No later than the twentieth (20^{th}) day of the following month, the Company shall pay the Local Government the aggregated total Governmental Undergrounding Fee that the Company has collected from each customer in the Underground Assessment Area. The monthly payment shall be made by wire transfer. Any monthly payment or any portion thereof made twenty (20) calendar days after the due date without good cause shall be subject to interest at the 30-day commercial paper rate per annum.

E. Customer Notification:

1. At least thirty (30) calendar days before the execution of this Contract, the Local Government shall mail a notice to each electric customer located within the proposed Underground Assessment Area stating the Local Government's intention to recover the cost of the underground Conversion project in question through a Governmental Undergrounding Fee on the customer's electric bill. The notice shall include, at a minimum: (i) a description of the underground Conversion project; (ii) an estimate of the Governmental Undergrounding Fee (as a percentage of total net electric charges) and the maximum monthly amount; (iii) the month in which billing of the Governmental Undergrounding Fee is expected to commence; (iv) the number of years over which the Governmental Undergrounding Fee is to be imposed; and (v) a postage-prepaid form on which the customer may submit comments to the Local Government. The actual notice sent to the customers is attached to this Contract as Attachment D.

2. The Local Government warrants and represents that it has timely completed the obligation referenced in the above paragraph by timely mailing the requisite notice to all required customers.

3. The Local Government recognizes that the Company will direct any and all questions from customers regarding this Contract and the creation of the Underground Assessment Area to the Local Government, specifically _____ (insert name of person or department).

F. Assignment:

The Local Government shall not assign, delegate or otherwise dispose of all or any portion of the Contract (including any benefits or obligations hereunder) without the prior written consent of the Company. Upon prior written notice and with the consent of Company (such consent not to be unreasonably withheld), the Local Government may assign the Contract. The Company, in Company's sole discretion, may require any Company approved Local Government assignee to execute a new contract and agree to all the requirements of the new contract prior to approval of the assignment request. Any attempted assignment or delegation without the Company's prior written consent shall be ineffective and void. The terms and conditions of this Contract shall be binding upon and inure to the benefit of any and all successors and/or assigns of the Company. The terms and conditions of this Contract shall be binding upon and inure to the benefit of any and all successors and/or approved assigns of the Local Government. Notwithstanding any provision herein, the Agreement shall not confer or be construed in any manner to confer, directly or indirectly, any rights, privileges, benefits, and/or remedies, upon any parties other than the parties hereto and their respective successors and/or permitted assigns.

(Continued on next page)

G. Miscellaneous:

1. In executing this Contract, the Company does not, nor should it be construed to extend its credit or financial support for the benefit of any third parties lending money to or having other transactions with the Local Government or any assignee of this Contract.
2. This Contract shall be governed by and construed and enforced in accordance with the laws, rules and regulations of the State of Florida and the Tariff as may be modified, revised, supplemented, changed, or amended from time to time. In the event of any conflict between the terms of this Contract and the provisions of the Tariff, the provisions of the Tariff and any applicable Florida Public Service Commission rules shall control, as hereafter revised, amended, or supplemented.
3. The Tariff and associated technical terms and abbreviations, general rules and regulations and standard electric service requirements, as may be applicable, are incorporated by reference.
4. This Contract contains the entire agreement of the Company and Local Government relating to the subject matter herein and supersedes all previous and contemporaneous agreements, understandings, usages of trade, courses of dealing or representations, either written or oral, heretofore in effect between the Company and the Local Government.
5. This Contract may only be modified by a written agreement signed by both the Company and the Local Government expressly modifying the Contract. All provisions of the Contract providing for indemnification or limitation of or protection against liability shall survive the termination, cancellation, or expiration of the Contract.
6. This Contract shall terminate when the Company has fully collected the Government Cost and the Facility Charge from customers located in the Underground Assessment Area.

IN WITNESS WHEREOF, the Local Government has executed this Contract the day and year first written above.

REVERT TO OWNER AGREEMENT

The undersigned hereby agrees to participate in and authorizes Duke Energy Florida, LLC ("Duke Energy") to enroll the below specified properties in the Duke Energy Revert to Owner Program (the "RTO Program") subject to the terms and conditions set forth in this Revert to Owner Agreement (the "RTO Agreement").

1. **Property Owner(s), Authorized Representative and Account Information**.

   Legal Name of Owner(s) ("Owner"):

   _____

   Authorized Representative of Owner: _____. If different from Owner, please attach power of attorney or other authorization to act on behalf of Owner. Hereinafter Owner and its authorized representative may be collectively referred to as the "Customer."

   Account name to revert to during periods of non-tenancy (the "RTO Account"):

   _____

   Mailing Address: _____

   Federal Tax ID: _____ or Social Security #_____

   Contact Name_____ Contact Phone _____

   Email Address: _____

2. **Program Description.** For properties that have been enrolled in the RTO Program, when a resident of an enrolled property requests disconnection of electric service to the unit, service to the unit will not be disconnected. Instead, Duke Energy will read the meter and automatically transfer the account to the Customer's RTO Account specified above; provided however, the service will not be automatically transferred to the RTO Account under any of the following circumstances:

   a. if service to the premises has been disconnected for nonpayment of a bill or for violation of Duke Energy's Terms of Service (as defined below);
   b. if an inspection is required by local government;
   c. if improper changes are made to the electrical wiring at the premises or if Duke Energy's meter or other equipment serving the premises has been tampered with; or
   d. If Duke Energy determines in its reasonable discretion that the premises or the use of electricity at the premises in in violation of Duke Energy's Terms of Service.

3. **Obligation of Customer.** The Customer shall be responsible for all electric energy used on the premises of an enrolled property at all times during which the account has reverted to the RTO Account specified in this RTO Agreement, subject to and in accordance with Duke Energy's Terms of Service for the applicable account.

4. **Enrolled Addresses**. Each of these property addresses: _____ will be enrolled addresses and will revert to the RTO Account pursuant to the terms of the RTO Program.

5. **Management of Enrolled Properties**. The Customer shall be responsible for keeping the property list in the RTO Agreement up to date, including by adding new properties or removing properties that are no longer subject to the RTO Program due to sale or any other reason. Adjustments to the property list may be made by owner or its designated property manager through an on-line self-service tool (the "Landlord Experience") or by contacting a Customer Care Specialist. An email address is required to participate in the RTO Program.

(Continued on next page)

6. **Terms of Service; Governing Law**. This Agreement is subject to the applicable rate schedules and the terms and conditions for electric service (the "Terms of Service") filed by Duke Energy with the Florida Public Service Commission (the "Commission") and other applicable rules, laws and regulations issued by the Commission or any federal, state or local governmental entity with jurisdiction over Duke Energy and the subject matter hereof (collectively, the "Governing Law"). In the event of any conflict between any term of this RTO Agreement and any applicable Governing Law, the Governing Law will prevail.

7. **Terms and Conditions.** This RTO Agreement shall be subject to the Terms and Conditions attached hereto as Exhibit "A" or any replacement thereto, which is incorporated herein by reference.

8. **Term.** This RTO Agreement shall be effective when signed by Customer and submitted to Duke Energy and shall remain in effect until terminated by Customer or Duke Energy in writing. Customer or Duke Energy may terminate this Agreement at any time by providing thirty (30) days written notice to the other party. The failure of Customer to recertify any enrolled address on a periodic (biennial) basis in accordance with the Terms and Conditions or as requested by Duke Energy from time to time may result in the removal of one or more enrolled addresses as determined by Duke Energy in a commercially reasonable manner.

9. **Representations and Warranties**. As of the date hereof and during the term of this RTO Agreement the undersigned Customer represents and warrants the following:
    a. such party has the capacity, authority, and power to execute, deliver, and perform under this RTO Agreement;
    b. this RTO Agreement constitutes legal, valid, and binding obligations enforceable against the Customer;
    c. the person who executes this RTO Agreement on behalf of Customer has full and complete authority to execute and bind the Owner to this RTO Agreement as an authorized representative of the Owner;
    d. Customer is acting on its own behalf and has made its own independent decision to bind itself under this RTO Agreement; and,
    e. Customer has completely read, fully understands, and voluntarily accepts every provision of this RTO Agreement.

10. **Electronic Signature**. By either signing and submitting this agreement, or by clicking "Accept Terms and Conditions" within the online enrollment process, the Customer hereby acknowledges and agrees that this RTO Agreement shall be deemed to be fully executed. Customer acknowledges and agrees that Customer's electronically applied and/or transmitted signatures shall have the same effect as manually applied or transmitted signatures.

Exhibit A

Terms and Conditions:

The Customer shall provide the Company with a valid email address to be eligible to participate in the RTO Program.

A self-service, online tool (the "Landlord Experience") will be provided by Duke Energy for use by Customers to enroll and manage properties participating in the RTO Program. The Customer is encouraged to use the Landlord Experience to enroll, manage and update its properties participating in the RTO Program; provided however, the Customer may request the assistance of Duke Energy's customer service representatives by contacting Duke Energy at the number specified in this RTO Agreement.

The Customer agrees to use the same Customer name on all enrolled accounts and to provide Duke Energy with a complete mailing address for each served premises. The Customer agrees to keep all account information current, which includes, but is not limited to, the items contained herein.

The Customer shall be obligated to pay any security deposit required under the Terms of Service including without limitation, in the event that a property enrolled in the RTO Program has been disconnected for non-payment while active in the Customer's name. All security deposits may be applied to amounts owed to Duke Energy or returned to Customer in accordance with the Terms and Service.

When a tenant requests a disconnect of service, Duke Energy will obtain a meter reading and automatically transfer the service from the tenant's name to the Customer's RTO Account. When a tenant requests a connect of service, Duke Energy will obtain a meter reading and transfer the service from the Customer's RTO Account to the tenant's name.

The Customer is responsible for recertifying the enrolled properties that it desires to continue in the RTO Program every 24 months from the date of the first enrollment. Failure of Customer to recertify any enrolled property within 24 months of its initial enrollment or recertification, may result in Duke Energy removing the un-recertified properties from the RTO Program. Provided however, removal of the un-recertified properties from the RTO Program does not terminate the service at the property; therefore, the Customer will still be responsible for charges while the property is active in the name of the Customer

Nothing stated herein shall be deemed to modify, rescind or alter in any way any agreement or contract for electric service or other agreement between Duke Energy and Customer which shall remain in full force and effect according to their respective terms.

Duke Energy reserves all rights under its Terms of Service or any applicable Governing Law, including without limitation, the right to disconnect service to Customer following proper notice, in the event Customer fails to timely remit payment for electric service, fraudulently obtains electric service or otherwise violates any applicable Governing Law, Commission rule or order or the Terms of Service.

Customer's failure to comply with any of the conditions of this RTO Agreement may result in the termination of this RTO Agreement and the immediate removal of all of Customer's enrolled accounts from the RTO Program as determined by Duke Energy in its reasonable discretion. Customer will be sent written notification of any such termination to the mailing address or email address specified in this RTO Agreement or any updated address provided by Customer to Duke Energy in writing.

This Lighting Service Agreement is hereby entered into this <<DAY>> day of <<MONTH>>, 20 <<YY>>, between Duke Energy Florida (hereinafter called the "Company") and << Customer Name >> (hereinafter referred to as the "Customer") for lighting service at the above location(s), once signed by the Customer and an authorized Duke Representative. The Customer agrees to receive and pay for lighting service from the Company in accordance with the rates, terms and provisions of the Company's Rate Schedule LS-1 and Service Regulations, or its successor, as the same is on file with the Florida Public Service Commission (FPSC) and as may be amended and subsequently filed with the FPSC.

To the extent there is any conflict between this Agreement and the Lighting Service Rate Schedule, the Lighting Service Rate Schedule shall control. In the event of termination by the Customer during the initial term of this agreement (identified below) under this rate schedule or upon early termination of service under this schedule, the customer agrees to pay remaining terms of this agreement as delegated by the FPSC.

The customer shall be responsible for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the customer for damage. The Company shall not be obligated to provide the service during any such interruption, suspension or failure, and Duke shall not be liable for any damage or loss resulting therefrom. The Company will replace or maintain the fixture during regular daytime working hours following notification by the Customer.

The date of *initiation* of service shall be defined as the date the first light(s) is energized or billing is transferred and shall continue hereafter until terminated. It is further agreed that The Company reserves the right to discontinue service and remove the fixtures from the Customers premise if the Customer violates any of the terms of the Service Regulations, Rate Schedule or this Agreement.

Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

THE CUSTOMER AGREES:

1. To purchase from the Company all of the electric energy used for the operation of the Lighting System.

2. To be responsible for paying, when due, all bills rendered by the Company pursuant to the Company's currently effective Lighting Rate Schedule LS-1, or its successor, for facilities and service provided in accordance with this Contract.

3. To be responsible for trimming trees that may either obstruct the light output from fixture(s) or that obstruct maintenance access to the facilities.

IT IS MUTUALLY AGREED THAT:

4. Requests for exchanging facilities, upgrades, relocations, etc. are subject to Section III, paragraph 3.05, of the Company's General Rules and Regulations Governing Electric Service.

5. The Company does not guarantee continuous lighting service and will not be liable for damages for any interruption, deficiency or failure of service, and reserves the right to interrupt service at any time for necessary repairs to lines or equipment. Nothing in this Contract is intended to benefit any third party or to impose any obligation on the Company to any such third party.

6. Installation shall be made only when, in the judgment of the Company, the location and the type of the facilities are, and will continue to be, easily and economically accessible to the Company's equipment and personnel for both construction and maintenance. In the event the Customer or its contractor, subcontractor or other agent changes the grading, which requires the Company to move its facilities or otherwise incur costs to ensure compliance with applicable code requirements, Customer shall compensate the Company for all such costs incurred by the Company to comply with any applicable code requirements. In the event Customer fails to pay the Company within 30 days of the completion of such work, Customer shall pay the Company any amounts owing the Company, including interest and any attorneys and other fees and costs the Company incurs to collect any amounts owed to the Company.

7. Modification of the facilities provided by the Company under this Contract may only be made through the execution of a written amendment to this Contract.

(Continued in Next Page)

8. The Company will, at the request of the Customer, relocate the lighting facilities covered by this Agreement, if provided sufficient rights-of-way or easements to do so. The Customer shall be responsible for the payment of all costs associated with any such Customer-requested relocation of the Company's lighting facilities.

9. The Company may, at any time, substitute for any luminaire/lamp installed hereunder another luminaire/lamp which shall be of at least equal illuminating capacity and efficiency.

10. The Customer agrees to take responsibility for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the Customer for damage.

11. The Company will repair or replace malfunctioning lighting fixtures maintained by the Company in accordance with Section 768.1382, Florida Statutes (2005).

12. This Contract shall be for a term of ten (10) years from the date of initiation of service. The date of initiation of service shall be defined as the date the first lights are energized.

13. Should the Customer fail to pay any bills due and rendered pursuant to this Contract or otherwise fail to perform the obligations contained in this Contract, said obligations being material and going to the essence of this Contract, the Company may cease to supply electric energy or service until the Customer has paid the bills due and rendered or has fully cured such other breach of this Contract. Service charges associated with the reconnection of service after disconnection for nonpayment or violation of Company or Commission Rules may be assessed for each lighting installation on an account. Any failure of the Company to exercise its rights hereunder shall not be a waiver of its rights. It is understood, however, that such discontinuance of the supplying of electric energy or service shall not constitute a breach of this Contract by the Company, nor shall it relieve the Customer of the obligation to perform any of the terms and conditions of this Contract.

14. If the Customer no longer wishes to receive service under this schedule, the Customer may terminate the Contract by giving the Company at least sixty (60) days advance written notice to the Company. Upon early termination of service, the Customer shall pay an amount equal to the remaining monthly customer charges, remaining Contribution in Aid of Construction ("CIAC"), if applicable, and remaining pole and fixture lease amounts for the term of the contract. The Customer will be responsible for the cost of removing the facilities.

15. In the event of the sale of the real property upon which the facilities are installed, or if the Customer's obligations under this Contract are to be assigned to a third party, upon the written consent of the Company , this Contract may be assigned by the Customer to the Purchaser or to the third party. No assignment shall relieve the Customer from its obligations hereunder until such obligations have been assumed by the Purchaser or third party and agreed to by the Company.

16. This Contract supersedes all previous contracts or representations, either written, oral or otherwise between the Customer and the Company with respect to the facilities referenced herein and constitutes the entire Contract between the parties. This Contract does not create any rights or provide any remedies to third parties or create any additional duty, obligation or undertakings by the Company to third parties.

17. This Contract shall inure to the benefit of, and be binding upon the successors and assigns of the Customer and the Company.

18. This Contract is subject to the Company's Tariff for Retail Service, or as they may be hereafter revised, amended or supplemented. In the event of any conflict between the terms of this Contract and the provisions of the Company's Tariff for Retail Services, the provisions of the Company's Tariff for Retail Service and FPSC Rules shall control, or as they may be hereafter revised, amended or supplemented.

(Continued in Next Page)

19. The obligation to furnish or purchase service shall be excused at any time that either party is prevented from complying with this Contract by strikes, lockouts, fires, riots, acts of God, the public enemy, governmental or court actions, lightning, hurricanes, storms, floods, inclement weather that necessitates extraordinary measures and expense to construct facilities and/or maintain operations, or by any other cause or causes not under the control of the party thus prevented from compliance, and the Company shall not have the obligation to furnish service if it is prevented from complying with this Contract by reason of any partial, temporary or entire shut-down of service which, in the sole opinion of the Company, is reasonably necessary for the purpose of repairing or making more efficient all or any part of its generating, transmission, distribution or other electrical equipment.

20. In no event shall the Company, its parent corporation, affiliate corporations, officers, directors, employees, agents, and contractors or subcontractors be liable to the Customer, its employees, agents or representatives, for any incidental, indirect, special, consequential, exemplary, punitive or multiple damages resulting from any claim or cause of action, whether brought in contract, tort (including, but not limited to, negligence or strict liability), or any other legal theory.

PREMIER POWER SERVICE CONTRACT

The undersigned (hereinafter "the Customer") hereby applies to Duke Energy Florida, LLC (hereinafter "the Company") for backup electric services to the Customer's _____ (hereinafter "the Customer's Facility") located in _____ County, Florida, to be provided by on-site equipment installed, owned, operated and maintained by the Company for the purpose of continuing the supply of electricity to the Customer's Facility in the event the Customer's normal electric supply is interrupted and assisting the Company in meeting peak demands on the Company's system during periods of critical capacity conditions or for other system benefits (hereinafter "the Services"). The Services shall be rendered in accordance with the terms of the Company's Premier Power Service Rider, Rate Schedule PPS-1 (hereinafter "the PPS Rider," which is hereby incorporated into this Contract by this reference), as approved or subsequently revised by the Florida Public Service Commission, which is hereby incorporated into this Contract by this reference (a copy of the currently effective PPS Rider is attached hereto), and the following terms and conditions:

1. **Effective Date**
This Contract shall become effective upon the acceptance hereof by the Company, evidenced by the signature of its authorized representative appearing below, which, in conjunction with the PPS Rider and, subject to the terms of this Contract, the technical specifications described in the Company's proposal letter dated _____, 20__, shall constitute the entire agreement between the Customer and the Company with respect to provision of the Services. In the event of any conflict between the Company's proposal letter and the PPS Rider, in conjunction with this Contract, the PPS Rider, in conjunction with this Contract shall prevail.

2. **Eligibility**
The Customer must provide evidence of creditworthiness sufficient to establish reasonable assurance of their ability to meet their financial obligations for the services provided in this Contract as specified in the PPS Rider. In the event that the Customer does not provide such evidence of creditworthiness, or does not provide an alternative form of credit support as specified by the PPS Rider, the Customer is not eligible for the services provided in this Contract.

3. **Term of Contract**
The term of this Contract is from _____, 20___, or from the date the Services are first provided hereunder, whichever is later and continuing until _____, months after the date services are first provided.

4. **Customer Payments**
The Customer's Monthly Service Payment determined in accordance with the PPS Rider shall be $_____, exclusive of present or future federal, state, municipal or other sales, use, gross receipts, or property tax, or similar charge with respect to the Services, which the Customer shall also pay. If the Customer fails to pay any amount owed the Company hereunder when due, such past due amounts shall accrue interest at the rate of 18% per annum or the maximum legal rate, whichever is lower. Further if the Customer fails to make any undisputed payment owed the Company hereunder within five (5) business days of receiving written notice from the Company that such payment is past due, the Company may suspend the Services to the Customer. In the event that the Customer fails to pay any past due amounts for a period of sixty (60) days, the Company shall have the right to access and remove the facilities at the Customer's expense. In such a circumstance, the Customer shall be responsible for paying a Termination Fee as more fully described in Section 8 below. Additionally, the Customer shall be liable to the Company for any attorney fees or other costs incurred in collection of this payment or any other amount due under this Contract. The Company shall have the right to proceed against any credit support provided by the Customer in connection with the Contract if the Customer fails to meet its obligations under this Section 4.The Customer's obligations under this Section 4 shall survive the termination or cancellation of this Contract.

5. **Provision of Services and Installation Schedule**
The Company shall furnish labor, supervision, equipment, materials and transportation reasonably necessary to provide the Services. The Company shall be entitled to rely on the accuracy of any information provided by the Customer, which information is warranted by the Customer to be accurate and correct. Such information shall include, but is not limited to, the information the Customer is required to provide as described in Section 5 below. In the event of any unforeseen difficulties in performance of the Services due to conditions at the work site or due to the inaccuracy of any information relied upon by the Company, the Customer shall be liable and reimburse the Company for any increased costs or expenses incurred by the Company as a result of such difficulties, and the Monthly Service Payment, the Company's proposal letter, and Contract Term shall be equitably adjusted to compensate Company for any additional or increased work or time the Company may be required to incur. The Company shall exercise commercially reasonable efforts to commence the Services. The completion schedule for providing the Services shall be equitably adjusted to compensate the Company for any such unanticipated delays or delays to the installation or startup of the facilities for any reasons beyond the fault and neglect of the Company.

(Continued on next page)

6. Customer Responsibilities

The Customer shall provide a location on its premises for installation of the Company's facilities, any necessary access to the work site, as well as a reasonable lay-down area to perform the Services. Further, the Customer shall, so long as is necessary to provide the Services, provide access to the Company, upon reasonable notice to Customer (except in the case of an emergency, declared by the Company, in its sole discretion, in which case the Customer agrees that the Company has permission to access the Company's facilities without any prior notice to the Customer), for operation, maintenance and repair of the Company's facilities. Accordingly, the Customer shall be obligated, at its sole expense, to keep the premises on which the Company's facilities are located free and clear of anything that may impair the operation, maintenance and repair of such facilities or cause damage to the Company's facilities. In the event that the Customer fails to keep the premises on which the Company's facilities are located free and clear as described herein, the Company shall provide notice to the Customer of the Customer's failure to do so. If the Customer has not fully satisfied its obligation as described herein within five (5) business days of its receipt of such notice, the Company may either (i) suspend the Services to the Customer or (ii) clear the premises on which the Company's facilities are located on of anything that may impair the operation, maintenance and repair of such facilities. In the event that the Company chooses option (ii) above, the Customer shall be liable and reimburse the Company for all costs associated with the work performed.

Any delays or additional cost incurred by Company because of inadequate access to the work site shall be grounds for an equitable adjustment in the schedule and the Monthly Service Payment. The Company shall have the right to suspend the Services or adjust the schedule accordingly in the event that there is inadequate access to the work site, or if any required information is not promptly provided, or in the event that the safety of any person or property might be jeopardized by continuing with the Services. The Customer shall provide, at no cost to the Company, any plans, specifications, drawings or information that may be necessary or useful in the performance of the Services. The Customer will ensure that all Occupational Safety and Health Act requirements are adhered to for the area where any Company equipment in support of the Services is to be based. In the event of damage to Company owned equipment that is caused by the Customer or the Customer's agents, or any other cause not due to the fault or neglect of the Company the Customer agrees to pay all repair or replacement costs associated with the damage.

7. Permits and Regulatory Requirements

Other than acquiring its general business license, which the Company shall obtain and maintain, the Customer shall be responsible for obtaining any license or permit required of the Company in the Company's name to enable it to provide the Services. The Customer assumes the risk and responsibility for such compliance (including any changes to such requirements), and for securing such permits, licenses, and approvals from the proper authorities, and for paying any associated costs or fees should compliance with any laws,

rules, regulations, or ordinances of any federal, state, or local authority, or of any agency thereof (including, but not limited to, certification to do business as a foreign corporation) require any changes in the Services; or should any permits, licenses, or approvals of plans and specifications for the Services or should any permits, licenses, or approvals for the installation or use thereof be required.

8. Installed Equipment

The Customer agrees that any equipment installed on the Customer's premises for the express purpose of providing the Services is and will remain the sole property of the Company until such time as the Customer may wish to exercise its purchase rights set forth in Section 9 below. The Company reserves the right to modify or upgrade equipment as the Company deems necessary, in its sole discretion, for the continued supply of these Services. If equipment modifications or upgrades are requested by the Customer, however, any such modifications or upgrades will be at the Customer's expense.

9. Early Termination of Contract

The Customer has the right to terminate this Contract before the entire Contract Term has expired, provided that the Customer a) notifies the Company in writing a minimum of 60 days prior to termination of the Services and b) pays a Termination Fee. The Termination Fee will be calculated by taking the sum of the Customer's payments remaining in the Contract Term, adding an estimated removal cost, and subtracting therefrom the sum of avoided costs, including but not limited to maintenance costs, if any, and the estimated salvage value as reasonably determined by the Company. In the event of any termination of this Contract before the end of the Contract Term, the Company shall also be compensated for all Services provided to Customer prior to the effective date of termination, and for all costs reasonable incurred by the Company in preparation for the providing of Services prior to the effective date of any termination of this Contract or any termination of Services being provided pursuant to this Contract. If the Customer fails to maintain necessary credit support, if any, Company shall have the right to terminate the Contract, exercise any rights thereunder, and proceed against any credit support provided by the Customer in connection with the Contract.

10. End of Contract

At the end of the Contract Term the Customer shall have the option to a) renew the terms of this Contract for an agreed upon period at an agreed upon price between the Company and the Customer, b) purchase equipment, if any, that has been installed on Customer's premises at an agreed upon price, or c) terminate this Contract which will require removal of any equipment owned and installed by the Company for the purpose of providing the Services. If the Company does not receive Customer's written confirmation as to which option is being selected within 60 days prior to the end of the Contract Term or if options (a) or (b) are selected but the parties have failed to reach agreement upon the renewal term or the price to be paid, Customer will be deemed to have selected option (c) to terminate.

(Continued on next page)

11. Warranty

The Company warrants that Services shall be performed in accordance with generally accepted industry practices. THE WARRANTY SET FORTH ABOVE IS EXCLUSIVE, AND NO OTHER WARRANTY OR REMEDY OF ANY KIND, WHETHER STATUTORY, WRITTEN, ORAL, EXPRESS, OR IMPLIED, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, OR WARRANTIES ARISING FROM COURSE OF DEALING OR USAGE OF TRADE, SHALL APPLY.

The Customer warrants that the premises on which the Company's facilities are to be located is suitable for the location of such facilities. The Customer further warrants that the placing of such facilities on such premises complies with all laws, rules, regulations, ordinances, zoning requirements or any other federal, state or local governmental requirements.

12. Limitation of Liability and Indemnification

Notwithstanding anything herein to the contrary, neither the Company nor its employees, its subcontractors or suppliers shall be liable for any direct, indirect, general, special, incidental, exemplary, or consequential loss or damage of any nature arising out of their performance or non-performance hereunder. Further, notwithstanding anything herein to the contrary, in no event shall the Company's liability arising out of or in connection with the performance or non-performance of the Services exceed the Customer's payments received by the Company pursuant to Section 3 above. The provisions of this Section 11 shall apply whether such liability arises in contract, tort (Including negligence), strict liability or otherwise.

The Customer shall arrange its electrical requirements to ensure that the electrical requirement to be supplied when normal service is interrupted will not be greater than the generation capacity. Accordingly, in no event shall the Company be liable for any claims, damages, cost, expenses or causes of action arising out of the failure of the Customer to so arrange its electrical requirements. Further, the Customer shall indemnify, defend and hold harmless the Company from any claims, liabilities, obligations, damages, costs and expenses (including, but not limited to, reasonable attorney's fees) or causes of action of whatsoever kind or nature for injury or death to any person and for damage to or destruction of property, to the extent resulting from the failure of the Customer to so arrange its electrical requirements.

13. Force Majeure

Except for the Customer's obligation to pay the Company any sum of money owed the Company hereunder, neither party shall be liable for its failure to perform hereunder if such failure is due to any act or circumstance beyond the reasonable control, and not due to the fault or neglect of, of the party claiming the event of force majeure including, but not limited to the following acts or circumstances: (i) act(s) of God, (ii) war or wars, (iii) government regulation by a governmental authority having jurisdiction (including, but not limited to, any law, rule, order, proclamation, regulation, ordinance, demand, or requirement of any governmental agency), (iv) act(s) or threatened act(s) of terror, including, but not limited to any acts by organized groups of terrorists or any acts of a public enemy (v) disaster(s) (including, but not limited to, hurricane, tornado, tropical storm, earthquake, or major storm), (vi) any pandemic, epidemic, pestilence, plague, or outbreak, (vii) strike, lockout, or industrial disputes, (viii) civil disorder, riot, or disturbance of the peace, (ix) any third party act for which the party who fails to perform is not responsible, or (x) any other condition or circumstance, whether similar to or different from the foregoing (it being agreed that the foregoing enumeration shall not limit or be characteristic of such conditions or circumstances) beyond the reasonable control and fault of the party claiming the force majeure event.

In the event that either party is rendered unable, wholly or in part, by reason of an event of force majeure to perform any obligations set forth in the Contract, other than the Customer's obligation to pay a sum of money owed hereunder to the Company, then such party shall give the other party written notice and reasonably full particulars of such event as soon as practicable after the occurrence thereof, and thereafter, the obligations of both parties shall be suspended to the extent and for the period of such force majeure condition and such cause shall be remedied with all reasonable dispatch. Settlement of strikes and lockouts shall be entirely within the discretion of the party affected and the requirement that any event of force majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes or lockouts by acceding to the demands of the parties directly or indirectly involved in such strikes or lockouts when such course is inadvisable in the discretion of the party having such difficulty.

To the extent the force majeure event causes a delay or an increase in costs or expenses to the Company, the Customer shall be liable to the Company for all increased costs and expenses incurred by the Company as a result of such force majeure event. In no event shall the Company be responsible for any damages arising out of any failure to perform or delay arising as a result of such force majeure event.

14. Non-Waiver

The failure of either party to insist upon the performance of any term or condition of this Contract or to exercise any right hereunder on one or more occasions shall not constitute a wavier or relinquishment of its right to demand future performance of such term or condition, or to exercise such right in the future.

15. Regulatory Authority and Governing Law

The Services provided under this Contract are subject to the regulatory authority of the Florida Public Service Commission (hereinafter "the FPSC"), and shall also be governed by the laws of the State of Florida. This Contract is subject to changes or substitutions, either in whole or in part, made from time to time by order of the FPSC, and each party to this Contract reserves the right to seek approval of such changes or substitutions, in accordance with law, from the FPSC. Unless specified otherwise, any such changes or substitutions shall become effective immediately and shall nullify all prior provisions in conflict therewith.

(Continued on next page)

16. Dispute Resolution

The Company and the Customer shall endeavor to resolve any claim or other matter in question between the parties to this Contract arising out of or related in any way to this Contract by negotiation or mutual agreement. The Florida Public Service Commission and/or a court of competent jurisdiction in the State of Florida only, as may be applicable under controlling law, shall decide any unresolved claim or other matter in question between the parties to this Contract arising out of or related in any way to this Contract, with the Florida Public Service Commission and/or such court having sole and exclusive jurisdiction over any such matters. In no event will any such claim be submitted to arbitration, or to a court in any other jurisdiction, without the express written consent of both Parties.

17. Entire Agreement

The Contract constitutes the entire understanding between the Company and the Customer relating to the subject matter hereof, superseding any prior or contemporaneous agreements or understanding between the parties. The parties shall not be bound by or be liable for any statement, prior negotiation, correspondence, representation, promise, draft agreements, inducement or understanding of any kind or nature not set forth or provided for herein. No prior course of dealing, usage of trade or course of performance shall be used to supplement or explain any term, condition, or instruction used in this Contract.

18. Modification

No statements or agreements, oral or written, made prior to the date hereof, shall vary or modify the written terms set forth herein and neither party shall claim any amendment, modification or release from any provision hereof by reason of a course of action or mutual agreement unless such agreement is in writing, signed by both parties and specifically states it is an amendment to this Contract.

19. Severability

In the event any provision, or any part or portion of any provision of this Contract shall be deemed or defined by any law or order any court or any governmental agency, or regulatory body having jurisdiction over either party, or held or declared by a court of competent jurisdiction to be unlawful, invalid, void or otherwise unenforceable, the rights and obligations of the parties shall be reduced or abated only to the extent required to remove or cure such illegal or unenforceable portion, so long as the Contract is not affected in a manner or to the extent which would render it economically, technically, materially, or commercially infeasible to either party.

IN WITNESS WHEREOF, the parties have duly executed this Contract.

DUKE ENERGY FLORIDA, LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 1 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (10kw or less)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 1 system(s), 10 kilowatts or less in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall not be required to pay any application fee for this Tier 1 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741.

6. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

7. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

8. The Company recommends that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than one hundred thousand dollars ($100,000) to the extent permitted by law. For government entities, proof of self-insurance consistent with law shall satisfy this requirement.

9. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of 10kw or less.

(Continued on Next Page)

10. The Company may isolate the Customer's system from the distribution grid using the manual disconnect switch, if available, or by disconnecting the meter without prior notice to the Customer. To the extent practical, however, prior notice shall be given. The system will be reconnected as soon as practical once the conditions causing the disconnection cease to exist. Conditions which may require the disconnection of the Customer's system are:

    (a) Company utility system emergencies or maintenance requirements.
    (b) Hazardous conditions existing on the Company's utility system due to the operation of the Customer's generation or protective equipment as determined by the Company.
    (c) Adverse electrical effects (such as power quality problems) on the electrical equipment of the company's other electric consumers caused by the Customer's generation as determined by the Company.

    In the event the Company disconnects the Customer's system without prior notice, the Company will leave a door hanger notifying the customer of the disconnection including an explanation of the conditions requiring such action.

11. The Customer, to the extent permitted by law without waiving or limiting any defenses of sovereign immunity, shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer. Nothing herein shall be intended to serve as a waiver or limitation of Customer's sovereign immunity defenses as allowed by law.

12. Prior to connection and parallel operation of the Customer's generation system with the Company's electric system, the Customer shall provide 10 days notice and permit the Company, if it should so choose, to inspect the system and its component equipment and the documents necessary to insure compliance with various sections of this Agreement and to have personnel present on the in-service date of the Customer's generation system equipment and protective apparatus.

13. In no event shall any statement, representation, or lack thereof, either express or implied, by the Company, relieve the Customer of exclusive responsibility for the Customer's generation system. Specifically, any company inspection of the Customer's system shall not be construed as confirming or endorsing the Customer's system design or its operating or maintenance procedures nor as a warranty or guarantee as to the safety, reliability, or durability of the Customer's equipment. The Company's inspection, acceptance, or its failure to inspect shall not be deemed an endorsement of any of the Customer's equipment or procedures.

14. The Company will install metering equipment on the Customer's premises capable of measuring any excess kilowatt-hours produced by the Customer's system and delivered to the Company's electric system. The cost of the meter, installation, maintenance, and any costs of reading and billing associated with this meter equipment shall be borne by the Company. The value of such excess generation shall be reflected on the Customer's bill based on the Company's applicable net metering for customer-owned renewable generation tariff approved by the Florida Public Service Commission.

15. In the event the Company elects to install a manual disconnect switch, it shall be at the Company's expense. The Company installed disconnect switch shall be the visible load break type to provide a separation point between the AC power output of the Customer-owned renewable generator and any Customer wiring connected to the Company's system. The disconnect switch shall be mounted separate from, but adjacent to the Company's meter socket. The Customer shall ensure that such disconnect switch shall remain readily accessible to the Company and be capable of being locked in the open position with a single Company utility lock.

16. On termination of services pursuant to this Agreement, the Company shall remove any additional metering equipment related to this Agreement. At the Customer's expense, within 10 working days following the termination, the Customer shall permanently isolate the generation system and any associated equipment from the Company's electric supply system, and notify the Company that the isolation is complete.

Inspection and On-going Compliance:

17. The Company will provide the Customer with as much notice as reasonably possible, either in writing, e-mail, facsimile or by phone as to when the Company may conduct inspections and/or document review. Upon reasonable notice, the Company shall have access to the Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed by this Interconnection Agreement or, if necessary, to meet the Company's legal obligation to provide service to its Customers. At any time without notice in the event of emergency or hazardous conditions, the Company shall have access to the customers premise to operate a manual disconnect switch or disconnect the meter.

Address: _____
City: _____, Zip Code: _____
_____
Daytime Phone: _____ Fax: _____ Email: _____
Proposed Installation Date: _____

D. Hardware and Installation Compliance

1. The system hardware is in compliance with *Underwriters Laboratories (UL) 1741, and IEEE 1547 standards for utility interconnected inverters.*

Signed (Contractor): _____ Date: _____
Name (Print): _____ Company: _____

E. Owner Acknowledgment

The system has been installed to my satisfaction and I have been given system warranty information, and an operation manual. Also, I have been thoroughly instructed in the operation and maintenance of the system.

Signed (Owner): _____Date: _____

F. Electrical Code Inspection

Satisfies Code Requirements
Inspector Name (Print): _____
Inspector Signature: _____ Date: _____

G. Duke Energy Florida, Inc. Approval

Satisfies DEF Interconnection Requirements

DUKE ENERGY FLORIDA, LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 2 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (>10kw, <= 100kw)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 2 system(s), more than 10 kilowatts or less than or equal to 100 kilowatts in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall pay an application fee of $240 for this Tier 2 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741.

6. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

7. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

8. The Company requires that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than one million dollars ($1,000,000) to the extent permitted by law. The Customer shall provide the Company proof of continuing insurance coverage on an annual basis. For government entities, the policy coverage shall not exceed the entity's maximum liability established by law. Proof of self-insurance consistent with law shall satisfy this requirement.

9. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of greater than10kw up to 100kw.

(Continued on Next Page)

10. The Company may isolate the Customer's system from the distribution grid using the manual disconnect switch without prior notice to the Customer. To the extent practical, however, prior notice shall be given. The system will be reconnected as soon as practical once the conditions causing the disconnection cease to exist. Conditions which may require the disconnection of the Customer's system are:
    (a) Company utility system emergencies or maintenance requirements.
    (b) Hazardous conditions existing on the Company's utility system due to the operation of the Customer's generation or protective equipment as determined by the Company.
    (c) Adverse electrical effects (such as power quality problems) on the electrical equipment of the company's other electric consumers caused by the Customer's generation as determined by the Company.
    (d) Failure of the Customer to maintain the required insurance coverage.

    In the event the Company disconnects the Customer's system without prior notice, the Company will leave a door hanger notifying the customer of the disconnection including an explanation of the conditions requiring such action.
11. The Customer, to the extent permitted by law without waiving or limiting any defenses of sovereign immunity, shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer. Nothing herein shall be intended to serve as a waiver of limitation of Customer's sovereign immunity defenses as allowed by law.
12. Prior to connection and parallel operation of the Customer's generation system with the Company's electric system, the Customer shall provide 10 days notice and permit the Company, if it should so choose, to inspect the system and its component equipment and the documents necessary to insure compliance with various sections of this Agreement and to have personnel present on the in-service date of the Customer's generation system equipment and protective apparatus.
13. In no event shall any statement, representation, or lack thereof, either express or implied, by the Company, relieve the Customer of exclusive responsibility for the Customer's generation system. Specifically, any company inspection of the Customer's system shall not be construed as confirming or endorsing the Customer's system design or its operating or maintenance procedures nor as a warranty or guarantee as to the safety, reliability, or durability of the Customer's equipment. The Company's inspection, acceptance, or its failure to inspect shall not be deemed an endorsement of any of the Customer's equipment or procedures.
14. The Company will install metering equipment on the Customer's premises capable of measuring any excess kilowatt-hours produced by the Customer's system and delivered to the Company's electric system. The cost of the meter, installation, maintenance, and any costs of reading and billing associated with this meter equipment shall be borne by the Company. The value of such excess generation shall be reflected on the Customer's bill based on the Company's applicable net metering for customer-owned renewable generation tariff approved by the Florida Public Service Commission.
15. The Customer must install a manual AC load break disconnect switch at their expense which shall be mounted separate from, but adjacent to the Company's meter socket. The Customer shall ensure that such disconnect switch shall remain readily accessible to the Company and be capable of being locked in the open position with a single Company utility lock.
16. On termination of services pursuant to this Agreement, the Company shall remove any additional metering equipment related to this Agreement. At the Customer's expense, within 10 working days following the termination, the Customer shall permanently isolate the generation system and any associated equipment from the Company's electric supply system, and notify the Company that the isolation is complete.

Inspection and On-going Compliance:

17. The Company will provide the Customer with as much notice as reasonably possible, either in writing, e-mail, facsimile or by phone as to when the Company may conduct inspections and/or document review. Upon reasonable notice, the Company shall have access to the Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed by this Interconnection Agreement or, if necessary, to meet the Company's legal obligation to provide service to its Customers. At any time without notice in the event of emergency or hazardous conditions, the Company shall have access to the customers premise to operate the manual disconnect switch.

Modifications/Additions to Customer-owned Renewable Generation:

18. If the Customer-owned renewable generation system is subsequently modified in order to increase its Gross power rating, the Customer must notify the Company by submitting a new application specifying the modification at least thirty days prior to making the modification.

(Continued on Next Page)

DUKE ENERGY FLORIDA, LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 3 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (>100kw, <= 2mw)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 3 system(s), more than 100 kilowatts or less than or equal to 2 megawatts in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall pay an application fee of $750 for this Tier 3 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

6. The Company requires that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than two million dollars ($2,000,000). The Customer shall provide the Company proof of continuing insurance coverage on an annual basis to the extent permitted by law. For government entities, the policy coverage shall not exceed the entity's maximum liability established by law. Proof of self-insurance consistent with law shall satisfy this requirement.

7. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of greater than100kw up to 2mw.

(Continued on Next Page)

8. The Company may isolate the Customer's system from the distribution grid using the manual disconnect switch without prior notice to the Customer. To the extent practical, however, prior notice shall be given. The system will be reconnected as soon as practical once the conditions causing the disconnection cease to exist. Conditions which may require the disconnection of the Customer's system are:
   (a) Company utility system emergencies or maintenance requirements.
   (b) Hazardous conditions existing on the Company's utility system due to the operation of the Customer's generation or protective equipment as determined by the Company.
   (c) Adverse electrical effects (such as power quality problems) on the electrical equipment of the company's other electric consumers caused by the Customer's generation as determined by the Company.
   (d) Failure of the Customer to maintain the required insurance coverage.

   In the event the Company disconnects the Customer's system without prior notice, the Company will leave a door hanger notifying the customer of the disconnection including an explanation of the conditions requiring such action.
9. The Customer, to the extent permitted by law without waiving or limiting any defenses of sovereign immunity, shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer. Nothing herein shall be intended to serve as a waiver of limitation of Customer's sovereign immunity defenses as allowed by law.
10. Prior to connection and parallel operation of the Customer's generation system with the Company's electric system, the Customer shall provide 10 days notice and permit the Company, if it should so choose, to inspect the system and its component equipment and the documents necessary to insure compliance with various sections of this Agreement and to have personnel present on the in-service date of the Customer's generation system equipment and protective apparatus.
11. In no event shall any statement, representation, or lack thereof, either express or implied, by the Company, relieve the Customer of exclusive responsibility for the Customer's generation system. Specifically, any company inspection of the Customer's system shall not be construed as confirming or endorsing the Customer's system design or its operating or maintenance procedures nor as a warranty or guarantee as to the safety, reliability, or durability of the Customer's equipment. The Company's inspection, acceptance, or its failure to inspect shall not be deemed an endorsement of any of the Customer's equipment or procedures.
12. The Company will install metering equipment on the Customer's premises capable of measuring any excess kilowatt-hours produced by the Customer's system and delivered to the Company's electric system. The cost of the meter, installation, maintenance, and any costs of reading and billing associated with this meter equipment shall be borne by the Company. DUKE ENERGY FLORIDA, LLC
ECONOMIC DEVELOPMENT RIDER

Service Agreement

For a New Establishment or an Existing Establishment with Expanding Load

_____
CUSTOMER NAME

_____ _____
ADDRESS TYPE OF BUSINESS

The Customer hereto agrees as follows:

1. To create _____ full - time jobs or new capital investment of $ _____ and a net increase of full - time jobs.

2. That the quantity of new or expanded load shall be _____ KW of demand with a _____ % load factor.

3. Type of business and expected hours of operation are _____ _____.

4. To initiate service under this rider on _____, _____, and terminate service under this rider on _____, _____. This shall constitute a period of 5 years.

5. In case of early termination by the Customer, or an early discontinuation by the Company for a violation of the terms and conditions of this rider, the Customer shall be required to repay Duke Energy Florida, LLC the cumulative discounts received to date under this rider plus interest.

6. If a change in ownership occurs after the Customer contracts for service under this rider, the successor Customer may be allowed to fulfill the balance of the contract under rider ED-2 and continue the schedule of rate reductions.

7. All terms of Rate Schedule ED-2, Economic Development Rider, apply to this agreement and are incorporated by reference herein.

By signing below, I hereby attest that the availability of this rider is a significant factor in this Customer's location / expansion decision.

DUKE ENERGY® FLORIDA

RATE SCHEDULE BA-1
BILLING ADJUSTMENTS
(Continued from Page 1)

(3) Capacity Cost Recovery Factor:

The Capacity Cost Recovery (CCR) Factors applicable to the Energy Charge under the Company's various rate schedules are normally determined annually by the Florida Public Service Commission for the billing months of January through December. This factor is designed to recover the cost of capacity payments made by the Company for off-system capacity and is adjusted to reflect changes in these costs from one period to the next. For time of use demand rates the CCR charge will be included in the base demand only.

(4) Environmental Cost Recovery Clause Factor:

The Environmental Cost Recovery Clause (ECRC) Factors applicable to the Energy Charge under the Company's various rate schedules are normally determined annually by the Florida Public Service Commission for the billing months of January through December. This factor is designed to recover environmental compliance costs incurred by the Company and is adjusted to reflect changes in these costs from one period to the next.

(5) Asset Securitization Charge Factor:

The Asset Securitization Charge (ASC) Factors applicable to the Energy Charge under the Company's various rate schedules represent a Nuclear Asset-Recovery Charge approved in a financing order issued to the Company by the Florida Public Service Commission and are adjusted at least semi-annually to ensure timely payment of principal, interest and financing costs of nuclear asset-recovery bonds from the effective date of the ASC until the nuclear asset-recovery bonds have been paid in full or legally discharged and the financing costs have been fully recovered. As approved by the Commission, a Special Purpose Entity (SPE) has been created and is the owner of all rights to the Nuclear Asset-Recovery Charge. The Company shall act as the SPE's collection agent or servicer for the Nuclear Asset-Recovery Charge. The Nuclear Asset-Recovery Charge shall be paid by all existing or future customers receiving transmission or distribution service from the Company or its successors or assignees under Commission-approved rate schedules or under special contracts, even if the customer elects to purchase electricity from alternative electric suppliers following a fundamental change in regulation of public utilities in this state.

(6) Storm Cost Recovery Surcharge Factor:

In accordance with a Florida Public Service Commission ruling, the Storm Cost Recovery Surcharge (SCRS) factor is applicable to the Energy Charge under the Company's various rate schedules for the billing months of March 2020 through February 2021. This surcharge is designed to recover storm-related costs incurred by the Company related to Hurricane Dorian and Tropical Storm Nestor in 2019.

Gross Receipts Tax Factor:

In accordance with Section 203.01(1)(a)1 of the Florida Statutes, a factor of 2.5641% is applicable to electric sales charges for collection of the state Gross Receipts Tax.

Regulatory Assessment Fee Factor:

In accordance with Section 350.113 of the Florida Statutes and Rule 25-6.0131, F.A.C., a factor of 0.072% is applicable to electric sales charges for collection of the Regulatory Assessment Fee.

Right-of-Way Utilization Fee:

A Right-of-Way Utilization Fee is applied to the charges for electric service (exclusive of any Municipal, County, or State Sales Tax) provided to customers within the jurisdictional limits of each municipal or county governmental body or any unit of special-purpose government or other entity with authority requiring the payment of a franchise fee, tax, charge, or other imposition whether in money, service, or other things of value for utilization of rights-of-way for location of Company distribution or transmission facilities. The Right-of-Way Utilization Fee shall be determined in a negotiated agreement (i.e., franchise and other agreements) in a manner which reflects the Company's payments to a governmental body or other entity with authority plus the appropriate Gross Receipts Taxes and Regulatory Assessment Fees resulting from such additional revenue. The Right-of-Way Utilization Fee is added to the charges for electric service prior to the application of any appropriate taxes.

Municipal Tax:

A Municipal Tax is applied to the charge for electric service provided to customers within the jurisdictional limits of each municipal or other governmental body imposing a utility tax on such service. The Municipal Tax shall be determined in accordance with the governmental body's utility tax ordinance, and the amount collected by the Company from the Municipal Tax shall be remitted to the governmental body in the manner required by law. No Municipal Tax shall apply to fuel charges in excess of 0.699¢/kWh.

Sales Tax:

A State Sales Tax is applied to the charge for electric service provided to all non-residential customers and equipment rental provided to all customers (unless a qualified sales tax exemption status is on record with the Company). The State Sales Tax shall be determined in accordance with the State's sales tax laws. The amount collected by the Company shall be remitted to the State in the manner required by law. In those counties that have enacted a County Discretionary Sales Surtax, such tax shall be applied and paid in a like manner. An additional tax factor is applied to the charge for electric service consistent with the applicability of State Sales Tax as described in this paragraph, in accordance with Section 203.01(1)(a)3 and (b)4 of the Florida Statutes.

(Continued on Page No. 3)

RATE SCHEDULES SC-1
SERVICE CHARGES

Establishment of Service:

A service charge shall be made for each establishment or re-establishment of service. This charge shall apply to each new service connection, service reconnection and transfer of account from one occupant to another. It shall also apply to reconnections after disconnection for non-payment or violation of Company or Florida Public Service Commission (Commission) Rules. If there is an involuntary transfer upon death, service charges that would otherwise be required for establishment or re-establishment of service will be waived.

1. A charge of $~~61.00~~58.00 will be made for initial establishment of service to a premise.

2. A charge of $~~28.00~~12.00 will be made for each subsequent re-establishment of service to said premise.

3. A charge of $~~10.00~~4.00 will be made for each subsequent re-establishment of service to said premise where the customer has executed and has on file a Revert to Owner~~Leave Service Active (LSA)~~ agreement for rental properties~~units of a multi-family rental housing complex situated on a contiguous property and having an on-site manager.~~ .

4. A charge of $~~40.00~~13.00 will be made for the reconnection of service after disconnection for nonpayment or violation of Company or Commission Rules where such reconnection is performed during normal working hours (M-F, 7AM-7PM). For reconnection of lighting service, the Company may assess this charge for each lighting installation on an account.

5. A charge of $~~50.00~~14.00 will be made for the reconnection of service for nonpayment or violation of Company or Commission Rules where such reconnection is performed outside of normal working hours. For reconnection of lighting service, the Company may assess this charge for each lighting installation on an account.

Late Payment Charge:

Charges for services due and rendered which are unpaid as of the past due date are subject to a Late Payment Charge of the greater of $5.00 or 1.5%, except the accounts of federal, state, and local governmental entities, agencies, and instrumentalities. A Late Payment Charge shall be applied to the accounts of federal, state, and local governmental entities, agencies and instrumentalities at a rate no greater than allowed, and in a manner permitted, by applicable law.

Returned Check Charge:

A service charge as allowed by Florida Statute 68.065 shall be added to the Customer's bill for electric service for each check or draft dishonored by the bank upon which it is drawn. Termination of service shall not be made for failure to pay the returned check charge.

Waiver Clause for Above Charges:

The Company shall have the discretion to waive any of the foregoing charges that would otherwise apply to customers as a consequence of significant damage to their premises caused by a natural disaster, or during periods of declared emergencies, or other similar conditions for which an emergency has been declared by a governmental body authorized to make such a declaration.

Investigation of Unauthorized Use Charge:

The Customer shall be assessed a charge by the Company for reimbursement of all investigative expenses related to a premise for which the Customer has undertaken unauthorized use of service and the Company has not elected to seek full recovery by prosecution under the law. The charge shall ~~not~~ be ~~less than~~ $200~~75~~.00 for residential customers and $1,000.00 for all other customers, and such charge may be assessed in lieu of proof of actual expenses incurred. In addition to this charge, the Customer is responsible for any damages to the Company's facilities, correction of measured consumption, and/or any other service charges which may be applicable.

RATE SCHEDULE RS-1
RESIDENTIAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To residential customers taking service exclusively for domestic purposes in a single dwelling house, a mobile home, or individually metered single apartment unit or other unit having housekeeping facilities, occupied by one family or household as a residence. The premises of such single dwelling may include an additional apartment with separate housekeeping facilities, as well as a garage, a boat slip, and other separate structures where they are occupied or used solely by the members or servants of such family or household for domestic purposes only. Also, for energy used in commonly-owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

1. 100% of the energy is used exclusively for the co-owner's benefit.
2. None of the energy is used in any endeavor which sells or rents a commodity or provides service for a fee.
3. Each point of delivery is separately metered and billed.
4. A responsible legal entity is established as the customer to whom the Company can render its bill(s) for said service.

Character of Service:

Continuous service, alternating current, 60 cycles per second, single-phase or three-phase, at the Company's standard available distribution voltage. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge: $ ~~11.40~~12.45

~~**Demand and Energy**~~**Energy and Demand Charges:**

Non-Fuel Energy Charges:

(1) For the calendar months of December through February:

First 1,000 kWh	~~6.271~~7.623¢ per kWh
All additional kWh	~~7.986~~8.773¢ per kWh

(2) For the calendar months of March through November:

First 1,000 kWh	6.587¢ per kWh
All additional kWh	7.474¢ per kWh

Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Off-Peak Electric Vehicle (EV) Charging Credit:

Residential customers on this rate schedule and other residential customers that are not on a time-of-use rate schedule, have an EV charger at their residence, and are participating in the Off-Peak EV Charging Program in compliance with its terms are eligible to receive an off-peak EV charging credit of $10 per month.

The designated off-peak periods for the EV charging credit, expressed in terms of prevailing clock time shall be as follows:

For all calendar months, Monday through Friday:	10:00 a.m. to 6:00 p.m. and
	9:00 p.m. to 5:00 a.m.

Customers must use the EV charger only during designated off-peak periods during the billing period; provided, however, that customers may have, at most, 2 occasions of opt-out charging in a billing period and still receive the EV off-peak charging credit in that billing period. An occasion of opt-out charging is defined as charging outside of the designated off-peak periods for 15 minutes or more at 3kW capacity or above.

~~**Additional Charges:**~~

(Continued from Page No. 1)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The Minimum Monthly Bill shall be ~~the Customer Charge~~$30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges and excluding the off-peak EV charging credit, are less than the minimum monthly bill amount.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at company-designated locations.

Term of Service:

From billing period to billing period, until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company rules.

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT

Availability:

Available only within the range of the Company's Load Management System.
Available to customers whose premises have active load management devices installed prior to June 30, 2007.
Available to customers whose premises have load management devices installed after June 30, 2007 that have and are willing to submit to load control of, at a minimum, central electric cooling and heating systems.

Applicable:

To customers eligible for Residential Service under Rate Schedule RS-1 ~~or RSS-1~~ having a minimum average monthly usage of 600 kWh (based on the most recent 12 months, or, where not available, a projection for 12 months), and utilizing any of the following electrical equipment:

1. Water Heater
2. Central Electric Heating System
3. Central Electric Cooling System
4. Swimming Pool Pump

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Service to the electrical equipment specified above may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

For new service requests after June 30, 2007 customers with a central electric heating system that is a heat pump will be installed on Interruption Schedule S. All other new service requests will be installed on Interruption Schedule B. Interruption Schedule C shall be at the option of the customer.

For new service requests after April 1, 1995, and before June 30, 2007, customers who select the swimming pool pump schedule must also select at least one other schedule.

An installation of an alternative thermal storage heating system under Special Provision No. 7 of this rate schedule is not available after April 1, 1995.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:	$ ~~11.40~~12.45
Energy and Demand Charges:	
Non-Fuel Energy Charges:	
(1) For the calendar months of December through February	
First 1,000 kWh	~~6.271~~7.623¢ per kWh
All additional kWh	~~7.986~~8.773¢ per kWh
(2) For the calendar months of March through November:	
First 1,000 kWh	6.587¢ per kWh
All additional kWh	7.474¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT
(Continued from Page No. 1)

Load Management Monthly Credit Amounts:[1,2]

Interruptible Equipment	Interruption Schedule				
	A	B	C	D	S
Water Heater	-	-	$3.50	-	-
Central Heating System[3]	$2.00	$8.00	-	-	$8.00
Central Heating System w/Thermal Storage[3]	-	-	-	$8.00	-
Central Cooling System[4]	$1.00	$5.00	-	-	$5.00
Swimming Pool Pump	-	-	$2.50	-	-

Any customer with a heat pump not taking service under Schedule S who requests a change under this tariff will be required to take service under Schedule S.
Premises taking service under this tariff and controlled by load management devices will remain on the existing schedule until such time as the current customer affirmatively requests a change.
See also Special Provisions 10 and 11 below for further customer optional adjustments to the above credits.

Notes: (1) Load Management credits shall not exceed 40% of the Non-Fuel Energy Charge associated with kWh billed in excess of 600 kWh per month.

(2) Premises that have load management devices installed prior to June 30, 2007 may remain on the existing schedule until such time as the customer requests a change under this tariff. When a change is requested, customers may take service only under Schedule B or Schedule S if the customer has a heat pump. Customers may also opt for Schedule C if taking service under another Schedule. Customers whose premises have load management devices installed after June 30, 2007 will be subject to the Limitations of Service above.

(3) For the billing months of November through March only.

(4) For the billing months of April through October only.

Interruption Schedules:

Schedule A — Equipment interruptions to achieve an effective equipment duty cycle of approximately 66% during control periods within the Company's designated Peak Periods.

Schedule B — Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods.

Schedule C — Equipment may be interrupted continuously, not to exceed 300 minutes, and during the Company's designated Peak Periods. Where a thermal storage system has been installed hereunder, additional interruptions to the water heater will be made during periods of charging thermal storage system.

Schedule D — The regular heating system may be interrupted continuously and alternative heating provided by means of a thermal storage system installed hereunder.

Schedule S — Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods. Heat pump back-up strip may be interrupted continuously, not to exceed 300 minutes, during the Company's designated Peak. When the heat pump back-up strip is being interrupted, the heat pump will not be interrupted.

Peak Periods:

The Peak Periods expressed in terms of prevailing clock time shall be, but are not limited to these as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February, All Days: ~~6:00 a.m. to 11:00 a.m., and 6:00 p.m. to 11:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~, All Days: ~~1:00 p.m. to 11:00 p.m.~~6:00 p.m. to 9:00 p.m.

Terms and Conditions:

(Continued on Page No. 3)

All terms and conditions of Rate Schedule RS-1, Residential Service, (i.e. Fuel Charges and other Billing Adjustments, Minimum Monthly Bill, Terms of Payment, Term of Service and Average Billing Plan), shall apply to service under this rate schedule.

(Continued on Page No. 3)

RATE SCHEDULE RSL-1
RESIDENTIAL LOAD MANAGEMENT
(Continued from Page No. 2)

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment.

3. The Company shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons, such as, excessive installation costs, insufficient load, oversized equipment or abnormal utilization of equipment, including but not limited to, vacation or other limited occupancy residences or qualifying common use facilities.

4. Multiple units of any electrical equipment specified above must all be installed with load management devices to qualify for the credit attributable to that equipment type at that premise.

5. The limitation on interruptible schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

6. If the Company determines that the load management devices have been tampered with or disconnected without notice, or the customer's Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for all prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

7. Billing under this Rate Schedule will commence with the first complete billing period following installation of the load management devices. A customer may change interruption schedules or the selection of electrical equipment installed with load management devices or transfer to another rate schedule by notifying the Company forty-five days in advance. However, in the event of any revision to the interruption schedules which may affect customer, the Customer shall be allowed ninety days from the effective date of the revision to change schedules or equipment or transfer to another rate schedule. If a customer transfers to another rate schedule they are not eligible for service under this rate schedule for 12 months from the date of transfer.

8. If the Company determines that the effect of equipment interruptions has been offset by the customer's use of supplementary or alternative electrical equipment, or if access cannot be obtained by the Company to inspect, maintain, or remove load management devices, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six months.

9. Effective 8/31/07, for customers at premises taking service under Interruption Schedule B or S, and C for electric water heating, for which the premise at any time received the solar thermal water heating incentive, the monthly credit amount will be 25% of the above credit values for Interruption Schedules B, S and C, except for the pool pump. The pool pump credit amount will be at 100%.

~~10. Effective 8/31/07 through 12/31/15, a customer may elect to have all their credits contributed to the Duke Energy Florida "Photovoltaics for Schools" green program. No partial contributions will be allowed. This program installs photovoltaic panels on schools as funds become available.~~

RATE SCHEDULE RSL-2
RESIDENTIAL LOAD MANAGEMENT – WINTER ONLY

Availability:

Available only within the range of the Company's Load Management System.

Applicable:

To customers eligible for Residential Service under Rate Schedule RS-1 ~~or RSS-1~~ having a minimum average monthly usage of 600 kWh for the months of ~~November~~ December through ~~March~~February (based on the most recent billings, where not available, a projection for those months) and utilizing **both** electric water heater and central electric heating systems.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Service to the electrical equipment specified above may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Water Heater and Central Heating System	$11.50

Notes: (1) Load management credit shall not exceed 40% of the Non-Fuel Energy Charge associated with kWh billed in excess of 600 kWh/month.

(2) For billing months of November through March only.

Appliance Interruption Schedule:

Heating — Equipment interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the Company's designated Peak Periods. Heat pump back-up strip may be interrupted continuously, not to exceed 300 minutes, during the Company's designated Peak. When the heat pump back-up strip is being interrupted, the heat pump will not be interrupted.

Water Heater — Equipment may be interrupted continuously, not to exceed 300 minutes, and during the Company's designated Peak Periods.

(Continued on Page No. 2)

RATE SCHEDULE RSL-2
RESIDENTIAL LOAD MANAGEMENT – WINTER ONLY
(Continued from Page No. 1)

Peak Periods:

The Peak Periods expressed in terms of prevailing clock time shall be, but are not limited to these as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~ February - All Days: ~~6:00~~5:00 a.m. to ~~11:00~~10:00 a.m., and 6:00 p.m. to ~~11:00~~9:00 p.m.

Terms and Conditions:

All terms and conditions of Rate Schedule RS-1, Residential Service (i.e. Non-Winter Energy and Demand Charges, Fuel Charges and other Billing Adjustments, Minimum Monthly Bill, Terms of Payment, Term of Service and Budget Billing Plan), shall apply to service under this rate schedule.

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment.

3. The Company shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons, such as, excessive installation costs, insufficient load, oversized equipment, or abnormal utilization of equipment, including but not limited to, vacation or other limited occupancy residences or qualifying common use facilities.

4. Multiple units of any electrical equipment specified above must all be installed with load management devices to qualify for the credit attributable to that equipment at that premise.

5. The limitation on interruptible schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

6. If the Company determines that the load management devices have been tampered with or disconnected without notice, or the customer's Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty (30) consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for all prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

7. Billing under this Rate Schedule will commence with the first complete billing period following installation of the load management devices. A customer may transfer to another rate schedule by notifying the Company forty-five (45) days in advance. If a customer transfers to another rate schedule they are not eligible for service under this rate schedule for 12 months from the date of transfer.

8. If the Company determines that the effect of equipment interruptions has been offset by the customer's use of supplementary or alternative electrical equipment, or if access cannot be obtained by the Company to inspect, maintain, or remove load management devices, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six (6) months.

~~9. Effective through 12/31/15, a customer may elect to have all their credits contributed to the Duke Energy Florida "Photovoltaics for Schools" green program. No partial contributions will be allowed. This program installs photovoltaic panels on schools as funds become available.~~

RATE SCHEDULE RST-1
RESIDENTIAL SERVICE
OPTIONAL TIME OF USE RATE
~~(Closed to New Customers as of 02/10/10)~~

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of residential customers otherwise eligible for service under Rate Schedule RS-1, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single phase, at the Company's standard distribution secondary voltage available. Three-phase service, if available, will be supplied only under the conditions set forth in the Company's booklet "Requirements for Electric Service and Meter Installations."

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Rate Per Month:

Customer Charge: $ ~~21.08~~12.45

Energy and Demand Charges:

Non-Fuel Energy Charges:	~~19.363~~8.818¢ per On-Peak kWh
	~~1.075~~7.308¢ per Off-Peak kWh
	4.237¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy used during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Rating Periods:

(a) **On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday *: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

***** The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) **Super-Off-Peak Periods** - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,
Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(~~c~~b) **Off-Peak Periods -** The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE RST-1
RESIDENTIAL SERVICE
OPTIONAL TIME OF USE RATE
~~(Closed to New Customers as of 02/10/10)~~

(Continued from Page No. 1)

~~Additional Charges:~~

~~Fuel Cost Recovery Factor: See Sheet No. 6.105~~
~~Asset Securitization Charge Factor: See Sheet No. 6.105~~
~~Gross Receipts Tax Factor: See Sheet No. 6.106~~
~~Right-of-Way Utilization Fee: See Sheet No. 6.106~~
~~Municipal Tax: See Sheet No. 6.106~~
~~Sales Tax: See Sheet No. 6.106~~

Minimum Monthly Bill:

The minimum monthly bill shall be ~~the Customer Charge~~$30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) consecutive months.

Special Provisions:

1. All service rendered under this rate schedule shall be measured by metering equipment capable of determining energy use during specified hourly periods.

2. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

3. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

~~4. Customers at their option may elect to receive a lower monthly Customer Charge by making a Contribution in Aid of Construction (CIAC) equal to the additional installed cost of a time of use meter. As of the effective date of this rate schedule, the CIAC required is $90.00. For customers electing this option, the Customer Charge shall be the Customer Charge contained in Rate Schedule RS-1.~~

RATE SCHEDULE GS-1
GENERAL SERVICE – NON-DEMAND
(Closed to New Customers as of 01/01/2022)

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Unmetered Account:	$ ~~8.53~~8.74
Secondary Metering Voltage:	$ ~~15.09~~15.47
Primary Metering Voltage:	$ ~~190.81~~195.60
Transmission Metering Voltage:	$ ~~941.15~~964.77

Energy and Demand Charges:

Non-Fuel Energy Charge:	~~6.810~~7.073¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Energy Charge included in the Rate per Month section of this rate schedule shall be increased by ~~0.930~~1.339¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above standard distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE GS-1
GENERAL SERVICE – NON-DEMAND
(Closed to New Customers as of 01/01/2022)
(Continued from Page No. 1)

Minimum Monthly Bill:

The minimum monthly bill shall be ~~the Customer Charge~~$30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Where special equipment to serve the customer is required, the Company may require an additional specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of twelve (12) months from commencement of service and shall continue thereafter until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules

~~Customers taking service under another Company rate schedule who elect to transfer to this rate must remain on this rate for a minimum term of twelve (12) months.~~Customers who change service characteristics (i.e. metering voltage level, delivery voltage level, load requirements, etc.) will be allowed to remain on the rate.

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

3. For fixed wattage and/or automatically controlled loads, the kWh consumption may, at the option of the Company, be estimated in lieu of installing meters.

RATE SCHEDULE GST-1
GENERAL SERVICE – NON-DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of non-residential customers otherwise eligible for service under Rate Schedule GSD-1, provided that all of the electric load requirements on the Customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or Resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~24.75~~15.47
Primary Metering Voltage:	$ ~~200.50~~195.60
Transmission Metering Voltage:	$ ~~950.81~~964.77

Energy and Demand Charge:

Non-Fuel Energy Charge:	~~19.331~~8.878¢ per On-Peak kWh
	~~1.048~~8.243¢ per Off-Peak kWh
	4.692¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Charges included in the Rate per Month section of this rate schedule shall be increased by ~~0.930~~1.339¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

(a) **On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday *: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) **Super-Off-Peak Periods** - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,
Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(Continued on Page No. 2)

RATE SCHEDULE GST-1
GENERAL SERVICE – NON-DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods: (Continued)

(b) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy and Demand Charges hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No, 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be ~~the Customer Charge~~$30. Customer bills will only be subject to the minimum monthly bill if the total electric service charges (customer charge, energy and demand charge, fuel cost recovery factor, and asset securitization charge factor) related to this rate schedule, excluding taxes and other additional charges, are less than the minimum monthly bill amount.

Where special equipment to serve the customer is required, the Company may require an additional specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electric load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

3. All service rendered under this rate schedule shall be measured by metering equipment capable of determining energy use during specified hourly periods.

4. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

5. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

~~6. Customers, at their option, may elect to receive a lower monthly Customer Charge by making a Contribution in Aid of Construction (CIAC) equal to the additional installed cost of a time of use meter. The CIAC required is $132.00. For customers electing this option, the Customer Charge shall be the applicable Customer Charge contained in Rate Schedule GS-1.~~

RATE SCHEDULE GS-2
GENERAL SERVICE – NON-DEMAND
100% LOAD FACTOR USAGE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, with fixed wattage loads operating continuously throughout the billing period (such as traffic signals, cable TV amplifiers and gas transmission substations).

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Unmetered Account:	$ ~~8.53~~9.01
Metered Account:	$ ~~15.09~~15.94

Energy and Demand Charges:

Non-Fuel Energy Charge:	~~2.583~~2.728¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Non-Fuel Energy Charge included in the Rate per Month section of this rate schedule shall be increased by ~~0.188~~0.237¢ per kWh for the cost of reserving capacity in the alternate distribution circuit.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

(Continued on Page No. 2)

RATE SCHEDULE GS-2
GENERAL SERVICE – NON-DEMAND
100% LOAD FACTOR USAGE
(Continued from Page No. 1)

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

From billing period to billing period, until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules.

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

3. The calculated kWh usage at each unmetered point shall be determined by operating test or utilization of manufacturer's rating and specifications. The monthly operation shall be based on a standard of 730 hours. For cable TV amplifiers or similar equipment, the input wattage used to calculate kWh usage shall be:

$$\text{Input Wattage} = \frac{\text{Output Amperage x Output Voltage}}{\text{Manufacturer's Rated Efficiency}}$$

where, such above values are established by the Manufacturer.

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable~~ with a measured annual kWh consumption of 24,000 kWh or greater per year~~.

Character of Service:

Continuous service, alternating current, 60 cycle, singe-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~15.09~~15.94
Primary Metering Voltage:	$ ~~190.81~~201.54
Transmission Metering Voltage:	$ ~~941.15~~994.07

Demand Charge: $ ~~6.38~~6.73 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Energy Charge:

Non-Fuel Energy Charge: ~~2.844~~2.955¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period.

(Continued on Page No. 2)

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND
(Continued from Page No. 1)

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credits:

For Distribution Primary Delivery Voltage:	$~~1.19~~1.28 per kW of Billing Demand
For Transmission Delivery Voltage below 230kV:	$~~5.95~~5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.~~For customers with measured demands of 1,000 kW or more for three (3) or more months out of the twelve (12) consecutive months ending with the current billing period, bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of twelve (12) months from commencement of service and shall continue thereafter until receipt of notice by the Company from the customer to disconnect, or upon disconnect by the Company under Florida Public Service Commission or Company Rules.

Customers taking service under another Company rate schedule who elect to transfer to this rate must remain on this rate for a minimum term of twelve (12) months.

(Continued on Page No. 3)

RATE SCHEDULE GSD-1
GENERAL SERVICE - DEMAND
(Continued from Page No. 2)

Term of Service: (Continued)

Where special equipment to serve the customer is required, the Company may require a specified term of service contract.

Special Provisions:

1. The Company may, under the provisions of this rate schedule, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month times the installed cost of such additional equipment.

RATE SCHEDULE GSDT-1
GENERAL SERVICE - DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of the customer, otherwise eligible for service under Rate Schedule GSD-1, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or Resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~24.75~~15.94
Primary Metering Voltage:	$ ~~200.50~~201.54
Transmission Metering Voltage:	$ ~~950.81~~994.07

Demand Charges:

Base Demand Charge:	$ ~~1.58~~2.20 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.18 per kW of Mid-Peak Demand
~~Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:~~	~~See Sheet No. 6.105 and 6.106~~
On-Peak Demand Charge:	$ ~~4.73~~1.16 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand	See Sheet No. 6.105 and 6.106

Energy Charges:

Non-Fuel Energy Charge:	~~6.190~~3.210¢ per On-Peak kWh
	~~1.037~~2.694¢ per Off-Peak kWh
	1.672¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE GSDT-1
GENERAL SERVICE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday *: ~~6:00 a.m. to 10:00 a.m. and~~ ~~6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,
Every day, including weekends and holidays: 12:00 a.m. (midnight) to 6:00 a.m

(~~b~~c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established ~~during the current billing period~~over the current and eleven previous billing periods.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

~~(b)~~(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credits:

For Distribution Primary Delivery Voltage: $~~1.19~~1.28 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage below 230 kV: $~~5.95~~5.17 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV: $7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the applicable following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.~~For customers with metered demands of 1,000 kW or more for three (3) or more months out of the twelve (12) consecutive months ending with the current billing period, bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds numerically .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

(Continued on Page No. 3)

RATE SCHEDULE GSDT-1
GENERAL SERVICE - DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge.

Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

The term of service requirements under this optional rate schedule shall be the same as that required under the standard rate schedule which would otherwise be applicable; provided, however, customers who elect to take service hereunder at a given location shall have the right during the initial term of service to transfer to the otherwise applicable standard rate schedule at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate schedule at the location for a minimum term of twelve (12) months.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

3. All service rendered under this rate schedule shall be measured by the metering equipment capable of determining energy use during specified hourly periods.

4. Application for service hereunder will be accepted by the Company on a first-come, first-served basis. Required metering equipment will be installed accordingly, subject to availability.

5. Service under this rate schedule shall commence with the first full billing period following the date of meter installation.

~~6. For customers who made, prior to May 1, 2002, a Contribution in Aid of Construction (CIAC) equal to the additional installed cost of a time of use meter, the Customer Charge shall be the applicable Customer Charge contained in Rate Schedule GSD-1.~~

RATE SCHEDULE GSLM-1
GENERAL SERVICE - LOAD MANAGEMENT
(Closed to New Customers as of 07/20/2000)

Availability:

Available only within the range of the Company's Load Management System.

Applicable:

To customers who are eligible for service under Rate Schedules GS-1, GST-1, GSD-1, or GSDT-1, excluding those customers served under the General Service transition rates, and who elect service under this rate schedule and have electric space cooling equipment suitable for interruptible operation. Also applicable to those customers who have any of the following electrical equipment installed on permanent residential structures and utilized for domestic (household) purposes: (1) water heater(s), (2) central electric heating system(s), (3) central electric cooling system(s), and/or (4) swimming pool pump(s).

Limitation of Service:

Service to specified electrical equipment may be interrupted at the option of the Company by means of load management devices installed on the customer's premises.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

The rates and all other terms and conditions of Company Rate Schedules GS-1, GST-1, GSD-1 or GSDT-1 (whichever shall otherwise be applicable) shall be applicable to service under this rate schedule, subject to the following:

LOAD MANAGEMENT MONTHLY CREDIT AMOUNT

Interruptible Equipment	Interruption Schedule	Credit Based on Installed Capacity[1]	Applicable Billing Months
Electric Space Cooling[3]	A	$ 0.26 Per kW	~~April~~ March thru ~~October~~November
Electric Space Cooling[3]	B	$ 0.56 Per kW	~~April~~ March thru ~~October~~November
Domestically Utilized Equipment[2,3]	[Availability, Schedules and Credits of the otherwise applicable Rate Schedule RSL-1or RSL-2 shall apply]		

Notes:

(1) Credit shall not exceed 50% of the Non-Fuel Energy and Demand Charges; nor, for otherwise applicable Rate Schedule GSDT-1, shall the credit exceed the On-Peak and Base Demand Charges.

(2) Equipment includes water heaters, central heating systems, central cooling systems and swimming pool pumps when such equipment is installed on permanent residential structures and utilized for domestic purposes.

(3) Restricted to existing customers as of July 20, 2000.

Interruption Schedules:

Schedule A Interruptions to achieve an effective equipment duty cycle of approximately 66% during control periods within the designated Peak Periods.

Schedule B Interruptions to achieve an effective equipment duty cycle of approximately 45% during control periods within the designated Peak Periods.

(Continued on Page No. 2)

RATE SCHEDULE GSLM-1
GENERAL SERVICE – LOAD MANAGEMENT
(Continued from Page No. 1)

Peak Periods:

The designated Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February,
All Days: ~~6:00 a.m. to 11:00 a.m., and~~ ~~6:00 p.m. to 11:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~,
All Days: ~~1:00 p.m. to 11:00 p.m~~6:00 p.m. to 9:00 p.m..

Special Provisions:

1. The Company shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test and remove load management devices on the electrical equipment specified above.

2. Prior to the installation of load management devices, the Company may inspect the customer's electrical equipment to ensure good repair and working condition, but the Company shall not be responsible for the repair or maintenance of the electrical equipment. The Company may, at its option, require a commercial energy audit as a prerequisite to receiving service under this rate. The audit may be used to establish or confirm equipment capacity, operating hours, or to determine the ability of the Company to control electric demand.

3. The Company shall not be required to install load management devices on electrical equipment, which would not be economically justified, for reasons such as excessive installation costs, oversized equipment or abnormal utilization of equipment, including operating hours which are not considered within the designated Peak Periods.

4. If the Company determines that equipment operating schedules and/or business hours have reduced the ability of the Company to control electric demand during the above designated peak periods, then service under this rate will be discontinued.

5. Where multiple units (including standby or multi-stage) of space conditioning equipment are used to heat or cool a building, all of these units must be equipped with load management devices and normally must be controlled on the same interruption cycle.

6. Billing under this rate schedule will commence with the first complete billing period following installation of the load management devices. During the first year of service, a customer may transfer to another rate schedule by notifying the Company forty-five (45) days in advance. After the first year of service, the customer may transfer to another rate schedule by notifying the Company twelve (12) months in advance. However, in the event of any revision to the interruption schedules which may affect customer, the customer shall be allowed ninety (90) days from the effective date of the revision to change schedules or equipment or transfer to another rate schedule.

7. The limitations on Interruptible Schedules shall not apply during critical capacity conditions on the Company's system; nor shall limitations apply at times the Company requires additional generating resources to maintain firm power sales commitments or supply emergency interchange service to another utility for its firm load obligations only. The Company may also exercise equipment interruptions at any time for purposes of testing and performance evaluation of its Load Management System.

8. If the Company determines that the load management devices have been tampered with or disconnected without notice or customer Wi-Fi network for use by Company's load management devices has been unavailable for a period of thirty (30) consecutive days and the customer has been unresponsive to the Company's attempts to reconnect, the Company may discontinue service under this rate schedule and bill for prior load management credits received by the customer, plus applicable investigative charges. The Company shall not impose any additional charges when events that caused the disruption were out of the customer's control.

9. If the Company determines that the effect of equipment interruptions have been offset by the customer's use of supplementary or alternative electrical equipment, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not in excess of six (6) months.

10. For purposes of determining eligible credits related to domestically utilized equipment, the customer shall provide the Company actual occupancy rates of permanent residential structures containing each type of equipment for the previous winter (~~November~~ December through ~~March~~February) and summer (~~April~~ March through ~~October~~November) periods. Credits for the current billing period shall apply to the number of items of each installed type of equipment multiplied by the corresponding previous seasonal period's occupancy rate.

RATE SCHEDULE GSLM-2
GENERAL SERVICE LOAD MANAGEMENT – STANDBY GENERATION

Availability:

Available only within the range of the Company's radio switch communications capability.

Applicable:

To customers who are eligible for service under Rate Schedules GS-1, GST-1, GSD-1, or GSDT-1 who have standby generation that will allow facility demand reduction at the request of the Company. The customer's Standby Generation Capacity calculation must be at least 50 kW in order to remain eligible for the rate. Customers cannot be on this rate schedule and also the General Service Load Management (GSLM-1) rate schedule. Not applicable to Net Metering customers. Customers cannot use the standby generation for peak shaving. Available only to those customers whose standby generation equipment is compliant with all applicable federal, state, and local codes and rules.

Limitation of Service:

Operation of the customer's equipment will occur at the Company's request. Requests by the Company for the customer to reduce facility demand by operation of their standby generation can occur at any time. Power to the facility from the Company will normally remain as back up power for the standby generation. The Customer will be given fifteen (15) minutes to initiate the demand reduction before the capacity calculation (see Definitions) is impacted.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

The rates and all other terms and conditions of Company Rate Schedules GS-1, GST-1, GSD-1 or GSDT-1 (whichever shall otherwise be applicable) shall be applicable to service under this rate schedule, subject to the following:

GSLM-2 MONTHLY CREDIT AMOUNT
STANDBY GENERATION

	Credit	Cumulative Fiscal Year Hours
	$~~4.84~~6.61 x ***C*** + $~~0.50~~0.10 x kWh monthly	All CRH

Immediately upon going on the rate, the customer's Capacity (***C***) is set to a value equivalent to the load the customer's standby generator carries during testing observed by the Customer and a Company representative. The ***C*** will remain at that value until the equipment is requested to run by the Company. The ***C*** for that month and subsequent months will be a calculated value based upon the following formula:

$$C = \frac{\text{kWh annual}}{[\text{CAH} - (\#\text{ of Requests} \times \tfrac{1}{4}\text{ hour})]}$$

Definitions:

kWh annual = Actual measured kWh generated by the standby generator during the previous twelve (12) months during Company control periods (rolling total).

CAH = Cumulative hours requested by the Company for the standby generation to operate for the previous twelve (12) months (rolling total).

CRH = Cumulative standby generator running hours during request periods of the Company for the current fiscal year (the fiscal year begins on the month the customer goes on the GSLM-2 rate).

# of Requests = The cumulative number of times the Company has requested the standby generation to be operated for the previous twelve (12) months (rolling total).

kWh monthly = Actual measured kWh generated by the standby generator for the current month during Company control periods.

(Continued on Page No. 2)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes where the billing demand is 500 kW or more, and where the customer agrees to curtail 25% or more of their average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection for twelve (12) months).

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Curtailable service under this rate schedule is not subject to curtailment during any time period for economic reasons. Curtailable service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during such periods to maintain service to curtailable loads except under the conditions set forth in Special Provision No. 6 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~82.78~~87.44
Primary Metering Voltage:	$ ~~229.84~~242.77
Transmission Metering Voltage:	$ ~~857.81~~906.04

Demand Charge: $ ~~10.23~~10.81 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ ~~8.77~~7.72 per kW of ~~Load Factor Adjusted~~Contracted On-Peak Demand Capability

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge: ~~1.868~~1.973¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday*: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.

Determination of ~~Load Factor Adjusted Demand~~Contracted On-Peak Demand Capability:

The Contracted On-Peak Demand Capability shall be the lesser of the Contracted Curtailable Demand and the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.~~The Load Factor Adjusted Demand shall be the difference, if any, between the maximum 30-minute kW demand established during the current billing period and the contract Non-Curtailable Demand determined in accordance with Special Provision No. 2 of this rate, multiplied by the customer's billing load factor (ratio of billing kWh to maximum 30-minute kW demand, multiplied by the number of hours in the billing period). In no event shall the Curtailable Demand be less than zero.~~

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$~~1.19~~1.28 per kW of Billing Demand
For Transmission Delivery Voltage below 230 kV:	$~~5.95~~5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing the resulting power factor actually established at the time of maximum demand during the current month.~~Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

(Continued on Page No. 3)

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of two (2) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

(Continued on Page No. 3)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 2)

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. Under the provisions of this rate, the Company will require a contract with the customer upon the Company's filed standard contract Form No. 2. An initial Non-Curtailable Demand shall be specified in the contract and shall be based on specifications for power requirements supplied to the Company. (Note: the initial contract Non-Curtailable Demand cannot be set any greater than 75% of the customer's average monthly billing demand in accordance with the Applicable Clause of this rate schedule). Contracted Curtailable Demand shall be the difference between the customer's average monthly billing demand and the Non-Curtailable Demand. The contract Non-Curtailable Demand shall be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer shall establish a new contract Non-Curtailable Demand.

   (b) If the customer establishes a demand higher than the contract Non-Curtailable demand during any period of requested curtailment in the billing period, such higher demand shall become the contract Non-Curtailable Demand effective with the next billing period. In addition. Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand lower than the contract Non-Curtailable demand during all periods of requested curtailment in the billing period, such lower demand upon request by the customer shall become the contract Non-Curtailable Demand effective with the next billing period.

   (d) If the customer's contract Non-Curtailable Demand exceeds 75% of the customer's average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection of twelve (12) months), the contract Non-Curtailable Demand shall be set equal to 75% of the customer's average monthly billing demand effective with the current billing period. A re-establishment of the customer's contract Non-Curtailable Demand under this condition shall supersede any other establishment.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of his power requirements to no more than his contract Non-Curtailable Demand upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. A customer will be deemed to have complied with his curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment does not exceed his contract Non-Curtailable Demand.

5. If the maximum 30-minute kW demand established during a requested curtailment in the billing period exceeds the customer's contract Non-Curtailable Demand, the customer will be billed the following additional charge for all billing periods from the most recent prior billing period of requested curtailment through the current billing period, not to exceed a total of twelve (12) billing periods:

   1.25 times the difference in Demand and Energy Charges which would result under Rate Schedule GSD-1 and those Demand and Energy Charges calculated under this rate schedule plus the difference between ECCR, CCR and ECRC of this rate schedule and GSD-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

(Continued on Page No. 4)

RATE SCHEDULE CS-2
CURTAILABLE GENERAL SERVICE
(Continued from Page No. 3)

Special Provisions: (Continued)

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. ~~Any energy associated with curtailable loads used during these periods will be subject to the additional charges set forth in the second paragraph of this provision. Customers may avoid these higher charges by curtailing their usage during such periods to no more than their established Non-Curtailable Demand pursuant to the third paragraph of these provisions.~~

   ~~In the event a customer elects not to curtail, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor, and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh, for all consumption above the customer's Non-Curtailable Demand during the period for which curtailment would have otherwise been requested. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CST-2, CS-3, CST-3, SS-2 and SS-3 during the corresponding calendar month. If, for any reason during such period, the customer is notified that the energy purchased from outside sources is no longer available, the terms of this Special Provision will cease to apply and curtailments to no more than the customer's Non-Curtailable Demand will be required for the remainder of such period.~~

   ~~In the event a customer elects to curtail irrespective of the availability of additional energy purchased by the Company and does not exceed his Non-Curtailable Demand during the period for which curtailment would have otherwise been requested, the customer will incur no responsibility for the payment of any additional cost of such energy.~~

7. If the customer increases his power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of ~~1.67~~1.08% times the installed cost of such additional equipment.

9. Customers taking service under this curtailable rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

10. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster.

11. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods ~~proceeding~~ preceding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 9 of this rate.

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, for light and power purposes where the billing demand is 2,000 kW or more (based on most recent twelve (12) months or, where not available, projected billing demand for twelve (12) months), and where the customer agrees to curtail its demand by a fixed contractual amount of not less than 2,000 kW upon request of the Company in accordance with the provisions of this rate schedule.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. Service under this rate schedule is not subject to curtailment for economic reasons. ~~The Company will not make off-system purchases during such curtailment periods to maintain service hereunder except as set forth in Special Provision No. 6 below.~~

Service under this rate is subject to the "General Rules and Regulations Governing Electric Service" contained in Section IV of the Company's currently effective and filed retail tariff.

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~82.78~~87.44
Primary Metering Voltage:	$ ~~229.84~~242.77
Transmission Metering Voltage:	$ ~~857.81~~906.04

Demand Charge: $ ~~10.23~~10.81 per kW of Billing Demand

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ ~~8.77~~7.72 per kW of Fixed Curtailable Demand

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge: ~~1.868~~1.973¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where the customer receives Premium Distribution Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer, including, all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Determination of Billing Demand:

The billing demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 2,000 kW.

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$~~1.19~~1.28 per kW of Billing Demand
For Transmission Delivery Voltage:	$~~5.95~~5.17 per kW of Billing Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Billing Demand

(Continued on Page No. 3)

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
(Continued from Page No. 1)

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor Adjustment:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing the resulting power factor actually established at the time of maximum demand during the current month. ~~Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of two (2) years from the commencement of service and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. As a condition for service under this rate schedule, a customer is required to enter into a contract with the Company on the Company's filed standard contract Form No. 2. An initial Fixed Curtailable Demand of at least 2,000 kW shall be specified in the contract, which may be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer may establish a new Fixed Curtailable Demand.

   (b) If the customer fails to reduce load by the Fixed Curtailable Demand for the duration of any period of requested curtailment, the lowest measured load reduction achieved during such period shall become the Fixed Curtailable Demand effective with the next billing period following the period of requested curtailment. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand reduction larger than the Fixed Curtailable Demand for the duration of each period of requested curtailment occurring within a billing period, upon request by the customer, the lowest of the demand reductions achieved during each such period shall become the Fixed Curtailable Demand effective with the next billing period.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of its load by at least the Fixed Curtailable Demand upon each curtailment request from the Company. Such

(Continued on Page No. 3)

requests will be made during those periods specified under Limitation of Service above. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of such limitations.

(Continued on Page No. 3)

RATE SCHEDULE CS-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
(Continued from Page No. 2)

Special Provisions: (Continued)

4. A customer will be deemed to have complied with its curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment is lower than what the customer's maximum 30-minute kW demand would otherwise have been during the period of requested curtailment by at least the Fixed Curtailable Demand defined in Special Provision No. 2. This will be determined by the Company using the customer's load data of similar day, time and weather conditions where a curtailment was not requested.

5. If a customer has not complied with its curtailment responsibility during a period of requested curtailment, the customer will be billed the following additional charge for all billing periods following the previous period of requested curtailment through the billing period in which such non-compliance occurred, not to exceed a total of twelve (12) billing periods:

   125% of the difference in Demand and Energy Charges which would have resulted under Rate Schedule GSD-1 and those Demand and Energy Charges calculated under this rate schedule, plus the difference between ECCR, CCR and ECRC of this rate schedule and GSD-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. ~~Any energy associated with curtailable loads used during these periods will be subject to the additional charges set forth in the second paragraph of this provision. Customers may avoid these higher charges by curtailing their usage during such periods at least their Fixed Curtailable Demand pursuant to the third paragraph of these provisions.~~

   ~~In the event a customer elects not to curtail, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor, and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh, for all consumption above the customer's Non-Curtailable Demand during the period for which curtailment would have otherwise been requested. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CS-2, CST-2, CST-3, SS-2, and SS-3 during the corresponding calendar month. If, for any reason during such period, the customer is notified that the energy purchased from outside sources is no longer available, the terms of this Special Provision will cease to apply and curtailments to at least the customer's Fixed Curtailable Demand will be required for the remainder of such period.~~

   ~~In the event a customer elects to curtail irrespective of the availability of additional energy purchased by the Company and curtails by at least its Fixed Curtailable Demand during the period for which curtailment would have otherwise been requested, the customer will incur no responsibility for the payment of the additional cost of such energy.~~

7. If the customer increases its power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of ~~1.67~~1.08% times the installed cost of such additional equipment.

9. Customers taking non-firm service under this rate schedule who desire to transfer to a rate schedule providing firm service will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the notice.

10. Service under this rate is not available if all or a part of the customer's load serves a facility designated by an appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

At the option of customers otherwise eligible for service under Rate Schedule CS-2, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Curtailable service under this rate schedule is not subject to curtailment during any time period for economic reasons. Curtailable service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during such periods to maintain service to curtailable loads except under the conditions set forth in Special Provision No. 6 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~82.78~~87.44
Primary Metering Voltage:	$ ~~229.84~~242.77
Transmission Metering Voltage:	$ ~~857.81~~906.04

Demand Charges:

Base Demand Charge:	$ ~~1.53~~1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
~~Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:~~	~~See Sheet No. 6.105 and 6.106~~
On-Peak Demand Charge:	$ ~~8.63~~1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106
Curtailable Demand Credit:	$ ~~8.77~~7.72 per kW of ~~Load Factor Adjusted Demand~~Contracted On-Peak Demand Capability

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge:	~~3.430~~1.848¢ per On-Peak kWh ~~1.031~~1.607¢ per Off-Peak kWh 1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

(Continued on Page No. 2)

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday *: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

(2) For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:
For the calendar months of March through November,
Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(~~b~~c) ~~Off-Peak Periods~~ - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(~~b~~c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

Determination of ~~Load Factor Adjusted Demand~~Contracted On-Peak Demand Capability:

The Contracted On-Peak Demand Capability shall be the lesser of the Contracted Curtailable Demand and the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.~~The Load Factor Adjusted Demand shall be the difference, if any, between the maximum 30-minute kW demand established during the current billing period and the contract Non-Curtailable Demand determined in accordance with Special Provision No. 2 of this rate, multiplied by the customer's billing load factor (ratio of billing kWh to maximum 30-minute kW demand, multiplied by the number of hours in the billing period). In no event shall the Curtailable Demand be less than zero.~~

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage: $~~1.19~~1.28 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage below 230 kV: $~~5.95~~5.17 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV: $7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges, Curtailable Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

(Continued on Page No. 3)

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during the current month.~~Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

~~**Additional Charges:**~~

~~Fuel Cost Recovery Factor:~~	~~See Sheet No. 6.105~~
~~Asset Securitization Charge Factor:~~	~~See Sheet No. 6.105~~
~~Gross Receipts Tax Factor:~~	~~See Sheet No. 6.106~~

(Continued on Page No. 3)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges: ~~**(Continued)**~~

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge ~~and the Demand Charge for the current billing period~~. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

For customers electing to take service hereunder in lieu of the otherwise applicable Rate Schedule CS-2, the term of service requirements under this optional rate schedule shall be the same as that required under Rate Schedule CS-2 provided, however, at a given location the customer shall have the right during the initial term of service to transfer to the otherwise applicable Rate Schedule CS-2 at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

2. Under the provisions of this rate, the Company will require a contract with the customer upon the Company's filed standard contract Form No. 2. An initial Non-Curtailable Demand shall be specified in the contract and shall be based on specifications for power requirements supplied to the Company. (Note: the initial contract Non-Curtailable Demand cannot be set any greater than 75% of the customer's average monthly billing demand in accordance with the Applicable Clause of Rate Schedule CS-2). Contracted Curtailable Demand shall be the difference between the customer's average monthly billing demand and the Non-Curtailable Demand. The contract Non-Curtailable Demand shall be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer shall establish a new contract Non-Curtailable Demand.

   (b) If the customer establishes a demand higher than the contract Non-Curtailable demand during any period of requested curtailment in the billing period, such higher demand shall become the contract Non-Curtailable Demand effective with the next billing period. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand lower than the contract Non-Curtailable Demand during all periods of requested curtailment in the billing period, such lower demand upon request by the customer shall become the contract Non-Curtailable Demand effective with the next billing period.

(Continued on Page No. 4)

RATE SCHEDULE CST-2
CURTAILABLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 3)

Special Provisions: (Continued)

(d) If the customer's contract Non-Curtailable Demand exceeds 75% of the customer's average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection of twelve (12) months), the contract Non-Curtailable Demand shall be set equal to 75% of the customer's average monthly billing demand effective with the current billing period. A re-establishment of the customer's contract Non-Curtailable Demand under this condition shall supersede any other establishment.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of his power requirements to no more than his contract Non-Curtailable Demand upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. A customer will be deemed to have complied with his curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment does not exceed his contract Non-Curtailment Demand.

5. If the maximum 30-minute kW demand established during a requested curtailment in the billing period exceeds the customer's contract Non-Curtailable Demand, the customer will be billed the following additional charge for all billing periods from the most recent prior billing period of requested curtailment through the current billing period, not to exceed a total of twelve (12) billing periods:

   1.25 times the difference in Demand and Energy Charges which would result under Rate Schedule GSDT-1 and those Demand and Energy Charges calculated under this rate schedule plus the difference between ECCR, CCR and ECRC of this rate schedule and GSDT-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases~~. Any energy associated with curtailable loads used during these periods will be subject to additional charges set forth in the second paragraph of this provision. Customers may avoid these higher charges by curtailing their usage during such periods to no more than their established Non-Curtailable Demand pursuant to the third paragraph of these provisions.~~

   ~~In the event a customer elects not to curtail, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh, for all consumption above the customer's Non-Curtailable Demand during the period for which curtailment would have otherwise been requested. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CS-2, CS-3, CST-3 SS-2, and SS-3 during the corresponding calendar month. If, for any reason during such period, the customer is notified that the energy purchased from outside sources is no longer available, the terms of this Special Provision will cease to apply and curtailments to no more than the customer's Non-Curtailable Demand will be required for the remainder of such period.~~

   ~~In the event a customer elects to curtail irrespective of the availability of additional energy purchased by the Company and does not exceed his Non-Curtailable Demand during the period for which curtailment would have otherwise been requested, the customer will incur no responsibility for the payment of any additional cost of such purchased energy.~~

7. If the customer increases their power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install, and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of ~~1.67~~1.08% times the installed cost of such additional equipment.

9. Customers taking service under this curtailable rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

10. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use at a public shelter during periods of emergency or natural disaster.

11. Any customer who established a Base billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 9 of this rate.

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer otherwise eligible for service under Rate Schedule CS-3, provided that all of the electric load requirements on the customer's premises are metered through one point of delivery.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate schedule is subject to curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments, or b) supply emergency interchange service to another utility for its firm load obligations only. Service under this rate schedule is not subject to curtailment for economic reasons. ~~The Company will not make off-system purchases during such curtailment periods to maintain service hereunder except as set forth in Special Provision No. 6 below.~~

Service under this rate is subject to the "General Rules and Regulations Governing Electric Service" contained in Section IV of the Company's currently effective and filed retail tariff.

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~82.78~~87.44
Primary Metering Voltage:	$ ~~229.84~~242.77
Transmission Metering Voltage:	$ ~~857.81~~906.04

Demand Charges:

Base Demand Charge:	$ ~~1.53~~1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
~~Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:~~	~~See Sheet No. 6.105 and 6.106~~
On-Peak Demand Charge:	$ ~~8.63~~1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106

Curtailable Demand Credit: $ ~~8.77~~7.72 per kW of Fixed Curtailable Demand

Plus an additional event incentive of 25¢ times the difference in kWh usage during the 30 minutes preceding the curtailment event and the average 30 minute actual kWh usage during the curtailment event.

Energy Charge:

Non-Fuel Energy Charge:	~~3.430~~1.848¢ per On-Peak kWh
	~~1.031~~1.607¢ per Off-Peak kWh
	1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy use during On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where the customer receives Premium Distribution Service, the customer shall pay a monthly charge determined under Special Provision No. 8 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including, all line costs necessary to connect to an alternate distribution circuit.

In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

(Continued on Page No. 2)

~~**Rating Periods:**~~

~~**On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:~~

~~For the calendar months of November through March,~~
~~Monday through Friday*: 6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~

~~For the calendar months of April through October,~~
~~Monday through Friday*: 12:00 Noon to 9:00 p.m.~~

~~* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas. In the event the holiday occurs on a Saturday or Sunday, the following Monday shall be excluded from the On-Peak Periods.~~

~~**Off-Peak Periods** - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth in (a) above.~~

(Continued on Page No. 2)

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday *: 5:00 a.m. to 10:00 a.m.
(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November,
Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(c) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demand:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established over the current and the eleven previous billing periods, but not less than 2,000 kW.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.~~The Base Demand for billing purposes shall be the maximum 30-minute kW demand established during the current billing period, but not less than 2,000 kW.~~

~~The On-Peak Demand for billing purposes shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.~~

Delivery Voltage Credit:

When a customer takes service under this rate schedule at a delivery voltage above standard distribution secondary voltage, the Base Demand Charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage: $ ~~1.19~~28 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage below 230 kV: $ ~~5.95~~5.17 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV: $ 7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Curtailable Demand Credit, and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor Adjustment:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during

(Continued on Page No. 3)

the current month.~~Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

~~Additional Charges:~~

~~Fuel Cost Recovery Factor:~~	~~See Sheet No. 6.105~~
~~Asset Securitization Charge Factor:~~	~~See Sheet No. 6.105~~
~~Gross Receipts Tax Factor:~~	~~See Sheet No. 6.106~~
~~Right-of-Way Utilization:~~	~~See Sheet No. 6.106~~
~~Municipal Tax:~~	~~See Sheet No. 6.106~~
~~Sales Tax:~~	~~See Sheet No. 6.106~~

~~Minimum Monthly Bill:~~

~~The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.~~

~~Terms of Payment:~~

~~Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.~~

~~Term of Service:~~

~~Service under this rate schedule shall be for a minimum initial term of two (2) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.~~

~~Special Provisions:~~

~~1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.~~

(Continued on Page No. 3)

`RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of two (2) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

~~**Special Provisions: (Continued)**~~

2. As a condition for service under this rate schedule, a customer is required to enter into a contract with the Company on the Company's filed standard contract Form No. 2. An initial Fixed Curtailable Demand of at least 2,000 kW shall be specified in the contract, which may be re-established under the following conditions:

   (a) If a change in the customer's power requirements occurs, the Company and the customer may establish a new Fixed Curtailable Demand of at least 2,000 kW.

   (b) If the customer fails to reduce load by the Fixed Curtailable Demand for the duration of any period of requested curtailment, the lowest measured load reduction achieved during such period, but not less than 2,000 kW, shall become the Fixed Curtailable Demand effective with the next billing period following the period of requested curtailment. In addition, Special Provision No. 5 is applicable.

   (c) If the customer establishes a demand reduction larger than the Fixed Curtailable Demand for the duration of each period of requested curtailment occurring within a billing period, upon request by the customer, the lowest of the demand reductions achieved during each such period shall become the Fixed Curtailable Demand effective with the next billing period.

3. As an essential requirement for receiving the Curtailable Demand Credit provided under this rate schedule, a customer shall be strictly responsible for the curtailment of its load by at least the Fixed Curtailable Demand upon each curtailment request from the Company. Such requests will be made during those periods specified under Limitation of Service above. The Company shall also have the right to request at least one additional curtailment each calendar year irrespective of such limitations.

4. A customer will be deemed to have complied with its curtailment responsibility if the maximum 30-minute kW demand established during each period of requested curtailment is lower than what the customer's maximum 30-minute kW demand would otherwise have been during the period of requested curtailment by at least the Fixed Curtailable Demand defined in Special Provision No. 2. This will be determined by the Company using customer's load data of similar day, time and weather conditions where a curtailment was not requested.

5. If a customer has not complied with its curtailment responsibility during a period of requested curtailment, the customer will be billed the following additional charge for all billing periods following the previous period of requested curtailment through the billing period in which such non-compliance occurred, not to exceed a total of twelve (12) billing periods:

   125% of the difference in Demand and Energy Charges which would have resulted under Rate Schedule GSDT-1 and those Demand and Energy Charges calculated under this rate schedule, plus the difference between ECCR, CCR and ECRC of this rate schedule and GSDT-1. This calculation shall be exclusive of any additional charges rendered under Special Provision No. 6 of this rate schedule.

(Continued on Page No. 4)

~~6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. Any energy associated with curtailable loads used during these periods will be subject to the additional charges set forth in the second paragraph of this provision. Customers may avoid these higher charges by curtailing their usage during such periods to at least their Fixed Curtailable Demand pursuant to the third paragraph of these provisions.~~

~~In the event a customer elects not to curtail, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh, for all consumption above the customer's Non-Curtailable Demand during the period for which curtailment would have otherwise been requested. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CS-2, CST-2, CS-3, SS-2 and SS-3 during the corresponding calendar month. If, for any reason during such period, the customer is notified that the energy purchased from outside sources is no longer available, the terms of this Special Provision will cease to apply and curtailments to at least the customer's Fixed Curtailable Demand will be required for the remainder of such period.~~

~~In the event a customer elects to curtail irrespective of the availability of additional energy purchased by the Company and curtails by at least its Fixed Curtailable Demand during the period for which curtailment would have otherwise been requested, the customer will incur no responsibility for the payment of the additional cost of such energy.~~

~~7. If the customer increases its power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.~~

(Continued on Page No. 4)

RATE SCHEDULE CST-3
CURTAILABLE GENERAL SERVICE – FIXED CURTAILABLE DEMAND
OPTIONAL TIME OF USE RATE
(Continued from Page No. 3)

Special Provisions: (Continued)

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.

7. If the customer increases its power requirements in any manner which requires the Company to install additional facilities for the specific use of the customer, a new Term of Service may be required at the Company's option.

8. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of ~~1.67~~1.08% times the installed cost of such additional equipment.

9. Customers taking non-firm service under this rate schedule who desire to transfer to a rate schedule providing firm service will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the notice.

10. Service under this rate is not available if all or a part of the customer's load serves a facility designated by an appropriate governmental agency for use at a public shelter during periods of emergency or natural disaster.

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicability:

Applicable to customers, other than residential, for light and power purposes where the billing demand is 500 kW or more, and where service may be interrupted by the Company. For customer accounts established under this rate schedule after June 3, 2003, service is limited to premises at which an interruption of electric service will primarily affect only the customer, its employees, agents, lessees, tenants or business guests, and will not significantly affect members of the general public, nor interfere with functions performed for the protection of public health or safety. Examples of premises at which service under this rate schedule may not be provided, unless adequate on-site backup generation is available, include, but are not limited to: retail businesses, offices, and governmental facilities open to members of the general public, stores, hotels, motels, convention centers, theme parks, schools, hospitals and health care facilities, designated public shelters, detention and correctional facilities, police and fire stations, and other similar facilities.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency Interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during such periods to maintain service to interruptible loads except under the conditions set forth in Special Provision No. 4 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~303.96~~321.05
Primary Metering Voltage:	$ ~~451.03~~476.39
Transmission Metering Voltage:	$ ~~1,079.02~~1,139.69
Demand Charge:	$ ~~8.67~~8.95 per kW of ~~Billing~~ Base Demand
Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:	See Sheet No. 6.105 and 6.106
Interruptible Demand Credit:	$ ~~11.70~~7.72 per kW of ~~Load Factor Adjusted~~On-Peak Demand
Energy Charge:	
Non-Fuel Energy Charge:	~~1.252~~1.298¢ per kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 5 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition, the Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.37~~1.45 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February, Monday through Friday*:	5:00 a.m. to 10:00 a.m.
(2) For all calendar months, Monday through Friday*:	6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

(Continued on Page No. 2)

~~**Determination of Billing Demand:**~~

~~The Billing Demand shall be the maximum 30-minute kW demand established during the billing period, but not less than 500 kW.~~

~~**Determination of Load Factor Adjusted Demand:**~~

~~The Load Factor Adjusted Demand shall be the product of the maximum 30-minute kW demand established during the current billing period and the customer's billing load factor (ratio of billing kWh to maximum 30-minute kW demand times the number of hours in the billing period).~~

~~**Delivery Voltage Credit:**~~

~~When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand charge hereunder shall be subject to the following credit:~~

~~For Distribution Primary Delivery Voltage:~~	~~$1.19 per kW of Billing Demand~~
~~For Transmission Delivery Voltage:~~	~~$5.95 per kW of Billing Demand~~

(Continued on Page No. 2)

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE
(Continued from Page No. 1)

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established during the current billing period, but not less than 500 kW.

(b) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Demand charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage:	$1.28 per kW of Base Demand
For Transmission Delivery Voltage below 230 kV:	$5.17 per kW of Base Demand
For Transmission Delivery Voltage at or above 230 kV:	$7.04 per kW of Base Demand

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charge, Interruptible Demand Credit, and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

Bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds, numerically, .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be for a minimum initial term of five (5) years from the commencement of service, and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination.

Special Provisions:

1. When the customer increases the electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.

2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required equipment (metering, under-frequency relay, etc.) will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation. Before commencement of service under this rate, the Company shall exercise an interruption for purposes of testing its equipment. The Company shall also have the right to exercise at least one additional interruption each calendar year irrespective of capacity availability or operating conditions. The Company will give the customer notice of the test.

(Continued on Page No. 3)

~~3. The Company may, under the provisions of this rate, at its option, require a special contract with the customer upon the Company's filed contract form.~~

~~4. The Company will attempt to minimize interruption hereunder by purchasing power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. When the Company is successful in making such purchases, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor, and Fuel Cost Recovery Factor), provided hereunder based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IST-2, CS-2, CST-2, CS-3, CST-3, SS-2 and SS-3 during the corresponding calendar month.~~

(Continued on Page No. 3)

RATE SCHEDULE IS-2
INTERRUPTIBLE GENERAL SERVICE
(Continued from Page No. 2)

Special Provisions: (Continued)

3. The Company may, under the provisions of this rate, at its option, require a special contract with the customer upon the Company's filed contract form.

4. The Company will attempt to minimize interruption hereunder by purchasing power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases.~~In the event a customer elects to interrupt irrespective of the availability of additional energy purchased by the Company during the period for which interruption would have otherwise occurred, the customer will incur no responsibility for the payment of any additional cost of such energy.~~

5. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

6. Customers taking service under this interruptible rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

7. Service under this rate is not available if all of a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster

8. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 6 of this rate.

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE

Availability:

Available throughout the entire territory served by the Company.

Applicability:

At the option of the customer, applicable to customers otherwise eligible for service under Rate Schedule IS-2, where the billing demand is 500 kW or more, provided that the total electric requirements at each point of delivery are measured through one meter. For customer accounts established under this rate schedule after June 3, 2003, service is limited to premises at which an interruption of electric service will primarily affect only the customer, its employees, agents, lessees, tenants, or business guests, and will not significantly affect members of the general public, nor interfere with functions performed for the protection of public health or safety. Examples of premises at which service under this rate schedule may not be provided, unless adequate on-site backup generation is available, include, but are not limited to: retail businesses, offices, and governmental facilities open to members of the general public, stores, hotels, motels, convention centers, theme parks, schools, hospitals and health care facilities, designated public shelters, detention and correctional facilities, police and fire stations, and other similar facilities.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Standby or resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments, or b) supply emergency interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during periods to maintain service to interruptible loads except under the conditions set forth in Special Provision No. 4 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Customer Charge:

Secondary Metering Voltage:	$ ~~303.96~~321.05
Primary Metering Voltage:	$ ~~451.03~~476.39
Transmission Metering Voltage:	$ ~~1,079.02~~1,139.69

Demand Charge:

Base Demand Charge:	$ ~~1.37~~1.55 per kW of Base Demand
Mid-Peak Demand Charge:	$ 4.54 per kW of Mid-Peak Demand
~~Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*:~~	~~See Sheet No. 6.105 and 6.106~~
On-Peak Demand Charge:	$ ~~7.57~~1.26 per kW of On-Peak Demand
Plus the Cost Recovery Factors on a $/kW basis in Rate Schedule BA-1, *Billing Adjustments*, using Monthly Max Demand:	See Sheet No. 6.105 and 6.106
Interruptible Demand Credit:	$ ~~11.70~~7.72 per kW of ~~Load Factor Adjusted~~On-Peak Demand

Energy Charge:

Non-Fuel Energy Charge:	~~1.753~~1.848¢ per On-Peak kWh
	~~1.023~~1.607¢ per Off-Peak kWh
	1.011¢ per Super-Off-Peak kWh
Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments,* except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

The On-Peak rate shall apply to energy used during designated On-Peak Periods. The Super-Off-Peak rate shall apply to energy used during the designated Super-Off-Peak Periods. The Off-Peak rate shall apply to all other energy use.

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 5 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit. In addition, the Base Demand Charge included in the Rate per Month section of this rate schedule shall be increased by $1.37 per kW for the cost of reserving capacity in the alternate distribution circuit.

~~**Rating Periods:**~~

~~**(a) On-Peak Periods** - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:~~

~~(1) For the calendar months of November through March,~~

(Continued on Page No. 2)

~~Monday through Friday*: 6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~

~~(2) For the calendar months of April through October,~~
~~Monday through Friday*: 12:00 Noon to 9:00 p.m.~~

~~* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.~~

(Continued on Page No. 2)

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 1)

Rating Periods:

(a) On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

(1) For the calendar months of December through February,
Monday through Friday*: 5:00 a.m. to 10:00 a.m.

(2) For all calendar months,
Monday through Friday*: 6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.~~**Rating Periods: (Continued)**~~

(b) Super-Off-Peak Periods - The designated Super-Off-Peak Periods expressed in terms of prevailing clock time shall be as follows:

For the calendar months of March through November,
Every day, including weekends and holidays 12:00 a.m. (midnight) to 6:00 a.m.

(~~c~~b) Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak and Super-Off-Peak Periods set forth in (a) and (b) above.

Determination of Billing Demands:

The billing demands shall be the following:

(a) The Base Demand shall be the maximum 30-minute kW demand established ~~during the current billing period~~over the current and the eleven previous billing periods, but not less than 500 kW.

(b) The Mid-Peak Demand shall be the maximum 30-minute kW demand established during the designated On-Peak or Off-Peak Periods during the current billing period.

(~~b~~c) The On-Peak Demand shall be the maximum 30-minute kW demand established during designated On-Peak Periods during the current billing period.

(d) The Monthly Max Demand shall be the maximum 30-minute kW demand established during the current billing period.

~~**Determination of Load Factor Adjusted Demand:**~~

~~The Load Factor Adjusted Demand shall be the product of the maximum 30-minute kW demand established during the current billing period and the customer's billing load factor (ratio of billing kWh to maximum 30-minute kW demand times the number of hours in the billing period).~~

Delivery Voltage Credit:

When a customer takes service under this rate at a delivery voltage above standard distribution secondary voltage, the Base Demand charge hereunder shall be subject to the following credit:

For Distribution Primary Delivery Voltage: $~~1.19~~1.28 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage below 230 kV: $~~5.95~~5.17 per kW of ~~Billing~~ Monthly Max Demand
For Transmission Delivery Voltage at or above 230 kV: $7.04 per kW of Monthly Max Demand

Note: In no event shall the total of the Demand Charges hereunder, after application of the above credit, be an amount less than zero.

Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Non-Fuel Energy Charge, Demand Charges, Interruptible Demand Credit and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

Power Factor:

If a customer's power factor at the time of maximum demand in the current billing period is less than 85%, the Company may adjust the Base Demand by multiplying by 85% and dividing by the resulting power factor actually established at the time of maximum demand during

(Continued on Page No. 3)

the current month.~~For customers with measured demands of 1,000 kW or more for three (3) or more months out of the twelve (12) consecutive months ending with the current billing period, bills computed under the above rate per month charges will be increased 36¢ for each KVAR by which the reactive demand exceeds numerically, .62 times the measured kW demand, and will be decreased 36¢ for each KVAR by which the reactive demand is less than, numerically, .62 times the measured kW demand.~~

~~**Additional Charges:**~~

~~Fuel Cost Recovery Factor:~~	~~See Sheet No. 6.105~~
~~Asset Securitization Charge Factor:~~	~~See Sheet No. 6.105~~
~~Gross Receipts Tax Factor:~~	~~See Sheet No. 6.106~~
~~Right-of-Way Utilization Fee:~~	~~See Sheet No. 6.106~~
~~Municipal Tax:~~	~~See Sheet No. 6.106~~
~~Sales Tax:~~	~~See Sheet No. 6.106~~

~~**Minimum Monthly Bill:**~~

~~The minimum monthly bill shall be the Customer Charge and the Demand Charge for the current billing period. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.~~

~~**Terms of Payment:**~~

~~Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.~~

(Continued on Page No. 3)

RATE SCHEDULE IST-2
INTERRUPTIBLE GENERAL SERVICE
OPTIONAL TIME OF USE RATE
(Continued from Page No. 2)

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge. Where special equipment to serve the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

For customers electing to take service hereunder in lieu of the otherwise applicable Rate Schedule IS-2, the term of service requirements under this optional rate schedule shall be the same as that required under Rate Schedule IS-2 provided, however, at a given location the customer shall have the right during the initial term of service to transfer to the otherwise applicable Rate Schedule IS-2 at any time. It is further provided, however, that any such customer who subsequently re-elects to take service hereunder at the same location shall be required to remain on the optional rate at that location for a minimum term of twelve (12) months.

Special Provisions:

1. When the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.

2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required equipment (metering, under frequency relay, etc.) will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation. Before commencement of service under this rate, the Company shall exercise an interruption for purposes of testing its equipment. The Company shall also have the right to exercise at least one additional interruption each calendar year irrespective of capacity available or operating conditions. The Company will give the customer notice of the test.

3. The Company may, under the provisions of this rate, at its option, require a special contract with the customer upon the Company's filed contract form.

4. The Company will attempt to minimize interruption hereunder by purchasing power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. ~~When the Company is successful in making such purchases, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1,CS-1, CST-1, IS-2, CS-2, CST-2, CS-3, CST-3, SS-2, and SS-3 during the corresponding calendar month.~~

~~In the event a customer elects to interrupt irrespective of the availability of additional energy purchased by the Company during the period for which interruption would have otherwise occurred, the customer will incur no responsibility for the payment of any additional cost of such energy.~~

5. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

6. Customers taking service under this interruptible rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least thirty-six (36) months prior to such transfer. Such notice shall be irrevocable unless the Company and the customer shall mutually agree to void the revocation.

7. Service under this rate is not available if all or a part of the customer's load is designated by the appropriate governmental agency for use as a public shelter during periods of emergency or natural disaster.

8. Any customer who established a billing demand of less than 500 kW in any of the 12 billing periods proceeding May 1, 2002, shall be advised by the Company that the minimum billing demand of 500 kW would not apply in the event the customer exercises Special Provision No. 6 of this rate.

RATE SCHEDULE LS-1
LIGHTING SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer for the sole purpose of lighting roadways or other outdoor land use areas; served from either Company or customer owned fixtures of the type available under this rate schedule. Service hereunder is provided for the sole and exclusive benefit of the customer, and nothing herein or in the contract executed hereunder is intended to benefit any third party or to impose any obligation on the Company to any such third party.

Character of Service:

Continuous dusk to dawn automatically controlled lighting service (i.e. photoelectric cell); alternating current, 60 cycle, single phase, at the Company's standard voltage available.

Limitation of Service:

Availability of certain fixture or pole types at a location may be restricted due to accessibility.

Standby or resale service not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Rate Per Month:

Customer Charge:

Unmetered:	$ ~~1.54~~1.63 per line of billing
Metered:	$ ~~4.45~~4.69 per line of billing

Energy and Demand Charge:

Non-Fuel Energy Charge:	~~2.686~~2.837¢ per kWh
Plus the Cost Recovery Factors listed in Rate Schedule BA-1, *Billing Adjustments,* except the Fuel Cost Recovery Factor and Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106

III. Additional Facilities

BILLING TYPE

Electrical Pole Receptacle [4]

401	**Single**	$3.00 per unit
402	**Double**	$3.90 per unit

Notes to Per Unit Charges:

(1) Restricted to existing installations.
(2) Lumens output and wattage ratings may vary with lamp configuration and/or age
(3) Shown for information only. Energy charges are billed by applying the foregoing energy and demand charges to the total monthly kWh.
(4) Electric use permitted only during the period of October through January, only on poles designated by the Company. Energy charged separately. Customers must notify Company of installation of customer-owned receptacles prior to such installation.
(5) Special applications only.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

The minimum monthly bill shall be the sum of the Customer Charge and applicable Fixture, Maintenance and Pole Charges.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Terms of Service:

Service under this rate schedule shall be for a minimum initial term of ten (10) years from the commencement of service and shall continue thereafter until terminated by either party by written notice sixty (60) days prior to termination. Upon early termination of service under this schedule, the customer shall pay an amount equal to the remaining monthly lease amount for the term of contract including Contribution in Aid of Construction ("CIAC") under Special Provision No.16, applicable Customer Charges and removal cost of the facilities.

Special Provisions:

1. The customer shall execute a contract on the Company's standard filed contract form for service under this rate schedule.

2. Where the Company provides a fixture or pole type other than those listed above, the monthly charges, as applicable shall be computed as follows:

I. Fixture
(a) Fixture Charge: ~~1.59~~1.08% of the Company's average installed cost.
(b) Maintenance Charge: The Company's estimated cost of maintaining fixture.

II. Pole
Pole Charge: ~~1.82~~1.08% of installed cost.

3. The customer shall be responsible for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the customer for damage.

4 Maintenance Service for customer-owned fixtures at charges stated hereunder shall be restricted to fixtures being maintained as of November 1, 1992.

(Continued on Page No. 8)

RATE SCHEDULE LS-1
LIGHTING SERVICE
(Continued from Page No. 7)

Special Provisions: (Continued)

5. kWh consumption for Company-owned fixtures shall be estimated in lieu of installing meters. kWh estimates will be made using the following formula:

$$kWh = \frac{\text{Unit Wattage (including ballast losses) x 350 hours per month}}{1{,}000}$$

6. kWh consumption for customer-owned fixtures shall be metered. Installation of customer-owned lighting facilities shall be provided for by the customer. Any costs incurred by the Company to provide for consolidation of existing lighting facilities for the purpose of metering shall be at the customer's expense.

7. No Pole Charge shall be applicable for a fixture installed on a company-owned pole which is utilized for other general electrical distribution purposes.

8. The Company will repair or replace malfunctioning lighting fixtures maintained by the Company in accordance with Section 768.1382, Florida Statutes (2005).

9. For a fixture type and/or pole type restricted to existing installations and requiring major renovation or replacement, the fixture and/or pole shall be replaced by an available similar non-restricted fixture and/or pole and the customer shall commence being billed at its appropriate rate. Where the customer requests the continued use of the same fixture type and/or pole type for appearance reasons, the Company will attempt to provide such fixture and/or pole and the customer shall commence being billed at a rate determined in accordance with Special Provision No. 2 for the cost of the renovated or replaced fixture and/or pole.

10. The customer will be responsible for trimming trees and other vegetation that obstruct the light output from fixture(s) or maintenance access to the facilities.

11. After December 31, 1998, all new leased lighting shall be installed on poles owned by the Company.

12. Alterations to leased lighting facilities requested by the customer after date of installation (i.e. redirect, install shields, etc.), will be billed to the customer in accordance with the Company's policy related to "Work Performed for the Public".

13. Service for street or area lighting is normally provided from existing distribution facilities. Where suitable distribution facilities do not exist, it will be the customer's responsibility to pay for necessary additional facilities. Refer to Section III, paragraph 3.01 of the Company's General Rules and Regulations Governing Electric Service to determine the CIAC owed by the customer.

14. Requests for exchanging facilities, upgrades, relocations, removals etc. are subject to Section III, paragraph 3.05, of the Company's General Rules and Regulations Governing Electric Service.

15. For available LEDs, the customer may opt to make an initial, one-time Contribution in Aid of Construction payment of 50% of the installed cost of fixtures rated greater than 200 Watts and/or poles other than standard wood poles, to reduce the Company's installed cost. If a customer chooses this option, the monthly fixture and/or pole charge shall be computed as the reduced installed cost times the corresponding monthly percentage in 2.I.(a) and/or 2.II above.

16. As an alternative to making an initial one-time CIAC payment to extend distribution facilities to render lighting service, as referenced in Special Provision No. 13, the customer may elect to pay a monthly fee of ~~1.59~~1.08% of the calculated CIAC amount.

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month, or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ ~~131.13~~138.50
Primary Metering Voltage:	$ ~~306.84~~324.09
Transmission Metering Voltage:	$ ~~1,057.17~~1,116.62

Note: Where the Customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $~~105.73~~111.67.

2. Supplemental Service Charges:

All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:

$~~2.50~~2.64 per kW times the Specified Standby Capacity.

Note: No charge is applicable to a customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:

The charge shall be the greater of:
1. $~~1.398~~1.477 per kW times the Specified Standby Capacity or

2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $~~0.665~~0.703/kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Energy Charges

Non-Fuel Energy Charge: ~~1.238~~1.308¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

(Continued on Page No. 4)

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

D. Delivery Voltage Credit:

When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by ~~1.19¢~~$1.28 per kW.

E. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Non-Fuel Energy Charge, and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

F. Fuel Cost Recovery Factor:

Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

G. Asset Securitization Charge Factor: See Sheet No. 6.105

H. Gross Receipts Tax Factor & Regulatory Assessment Fee Factor: See Sheet No. 6.106

I. Right-of-Way Utilization Fee: See Sheet No. 6.106

J. Municipal Tax: See Sheet No. 6.106

K. Sales Tax: See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 3 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.28~~1.36 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday*: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

B. For ~~the~~ all calendar months of April through October,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

(Continued on Page No. 5)

RATE SCHEDULE SS-1
FIRM STANDBY SERVICE
(Continued from Page No. 4)

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. Customers taking service under this rate schedule who desire to transfer to firm full requirements service will be required to give the Company written notice at least sixty (60) months prior to such transfer.

3. The Company will furnish service under this rate schedule at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

4. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

5. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

6. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

7. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all Company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

8. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

9. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

10. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

11. When an outage of the customer's generating system is caused by an electrical isolation of the customer due to conditions originating on the Company's system, no standby capacity requirement shall be recognized for billing purposes for the standby power utilized during customer generation restart for a period not exceeding eight (8) hours from time of Company electrical restoration.

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, having on-site generating equipment and requesting interruptible standby service. A customer requesting interruptible standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load and (3) is operated for other than emergency and test purposes.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during such periods to maintain service to interruptible loads except under the conditions set forth in Special Provision No. 3 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Definitions:

"Standby Electric Service" refers to backup or maintenance service or both.

"Backup Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during an unscheduled outage of the customer's generation.

"Maintenance Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during a scheduled outage of the customer's generation.

"Supplemental Service" means electric energy or capacity supplied by the Company in addition to that which is normally provided by the customer's own generation equipment.

"Otherwise applicable rate schedule" refers to the rate schedule under which the customer would have received service if the customer had no self-generation.

Determination of Standby Service Requirements:

The customer may elect either of the following two options for determination of standby service requirements:

Option A:

1. The customer shall provide the Company within three (3) days of the end of the billing period the following information for each 30-minute time interval of occurrence of an unscheduled or scheduled outage of the customer's generation:

   (a) Amount of load in kW ordinarily supplied by customer's generation.

   (b) Amount of load reduction in kW, if any, as a direct result of customer's generation outage.

(Continued on Page No. 2)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month, or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ ~~330.95~~349.56
Primary Metering Voltage:	$ ~~478.01~~504.89
Transmission Metering Voltage:	$ ~~1,105.99~~1,168.19

Note: Where the customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $~~309.67~~327.08.

2. Supplemental Service Charges:
All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:
$~~2.49~~2.63 per kW times the Specified Standby Capacity.
Note: No charge is applicable to a Customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:
The charge shall be the greater of:
1. $~~1.396~~1.474 per kW times the Specified Standby Capacity or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $~~0.664~~0.702 kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Interruptible Capacity Credit:
The credit shall be the greater of:
1. $1.17 per kW times the Specified Standby Capacity, or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-peak periods times $0.557/kW times the appropriate Billing Month Factor shown in part 3.B. above.

D. Energy Charges:
Non-Fuel Energy Charge: ~~1.223~~1.292¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

E. Delivery Voltage Credit:
When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by ~~1.19¢~~$1.28 per kW.

(Continued on Page No. 4)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

F. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Interruptible Capacity Credit, Non-Fuel Energy Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

G. Fuel Cost Recovery Factor:
Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

H. Asset Securitization Charge Factor: See Sheet No. 6.105
I. Gross Receipts Tax Factor & Regulatory Assessment Fee Factor: See Sheet No. 6.106
J. Right-of-Way Utilization Fee: See Sheet No. 6.106
K. Municipal Tax: See Sheet No. 6.106
L. Sales Tax: See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 4 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.27~~1.35 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday*: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

B. For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

Special Provisions:

1. When the customer increases the electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required under this rate at the option of the Company.
2. Customers taking service under another Company rate schedule who elect to transfer to this rate will be accepted by the Company on a first-come, first-served basis. Required interruptible equipment will be installed accordingly, subject to availability. Service under this rate schedule shall commence with the first full billing period following the date of equipment installation.

(Continued on Page No. 5)

RATE SCHEDULE SS-2
INTERRUPTIBLE STANDBY SERVICE
(Continued from Page No. 4)

Special Provisions: (Continued)

3. To minimize the frequency and duration of interruptions hereunder, the Company will attempt to purchase power and energy from other sources during periods of normal interruption. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. ~~When the Company is successful in making such purchases, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor, and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CS-2, CST-2, CS-3, CST-3 and SS-3 during the corresponding calendar month.~~

   ~~In the event a customer elects to interrupt irrespective of the availability of additional energy purchased by the Company during the period for which interruption would have otherwise occurred, the customer will incur no responsibility for the payment of any additional cost of such energy.~~

4. The Company will furnish service under this rate at a single voltage. Equipment to supply additional voltages or additional facilities for the use of the customer shall be furnished and maintained by the customer. The customer may request the Company to furnish such additional equipment, and the Company, at its sole option, may furnish, install, and maintain such additional equipment, charging the customer for the use thereof at the rate of ~~1.67~~1.08% per month of the installed cost of such additional equipment.

5. Customers taking service under this rate schedule who desire to transfer to a non-interruptible rate schedule will be required to give the Company written notice at least sixty (60) months prior to such transfer. Such notice shall be irrevocable unless the Company or the customer receives a waiver from the Florida Public Service Commission.

6. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance, and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

7. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

8. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

9. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all Company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

10. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

11. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

12. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To any customer, other than residential, having on-site generating equipment and requesting interruptible standby service. A customer requesting interruptible standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load and (3) is operated for other than emergency and test purposes.

Character of Service:

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

Limitation of Service:

Resale service not permitted hereunder. ~~Interruptible~~ Curtailable service under this rate schedule is not subject to ~~interruption~~ curtailment during any time period for economic reasons. ~~Interruptible~~ Curtailable service under this rate schedule is subject to ~~interruption~~ curtailment during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments or b) supply emergency interchange service to another utility for its firm load obligations only. ~~The Company will not make off-system purchases during such periods to maintain service to interruptible loads except under the conditions set forth in Special Provision No. 3 of this rate schedule.~~

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Definitions:

"Standby Electric Service" refers to backup or maintenance service or both.

"Backup Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during an unscheduled outage of the customer's generation.

"Maintenance Service" means electric energy or capacity supplied by the Company to replace energy or capacity ordinarily generated by a customer's own generation equipment during a scheduled outage of the customer's generation.

"Supplemental Service" means electric energy or capacity supplied by the Company in addition to that which is normally provided by the customer's own generation equipment.

"Otherwise applicable rate schedule" refers to the rate schedule under which the customer would have received service if the customer had no self-generation.

Determination of Standby Service Requirements:

The customer may elect either of the following two options for determination of standby service requirements:

Option A:

1. The customer shall provide the Company within three (3) days of the end of the billing period the following information for each 30-minute time interval of occurrence of an unscheduled or scheduled outage of the customer's generation:

   (a) Amount of load in kW ordinarily supplied by customer's generation.

   (b) Amount of load reduction in kW, if any, as a direct result of customer's generation outage.

(Continued on Page No. 2)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 2)

Determination of Specified Standby Capacity:

1. Initially, the customer and the Company shall mutually agree upon a maximum amount of standby capacity in kW to be supplied by the Company. This shall be termed for billing purposes as the "Specified Standby Capacity".

2. Where a bona fide change in the customer's standby capacity requirement occurs, the Company and the customer shall establish a new Specified Standby Capacity.

3. The Specified Standby Capacity for the current billing period shall be the greater of: (1) the mutually agreed upon Specified Standby Capacity, (2) the maximum 30-minute kW standby power requirement established in the current billing month or (3) the maximum 30-minute kW standby power requirement established in any of the twenty-three (23) preceding billing months.

Rate Per Month:

1. Customer Charge:

Secondary Metering Voltage:	$ ~~109.75~~115.93
Primary Metering Voltage:	$ ~~256.81~~271.25
Transmission Metering Voltage:	$ ~~884.80~~934.55

Note: Where the customer has paid the costs of metering equipment pursuant to a Cogeneration Agreement, the Customer Charge shall be $~~88.48~~93.45

.

2. Supplemental Service Charges:
All supplemental power requirements shall be billed in accordance with the demand and energy charges of the otherwise applicable rate schedule.

3. Standby Service Charges:

A. Distribution Capacity:
$~~2.49~~2.63 per kW times the Specified Standby Capacity.
Note: No charge is applicable to a customer who has provided all the facilities for interconnection to the Company's transmission system.

B. Generation & Transmission Capacity:
The charge shall be the greater of:
1. $~~1.396~~1.474 per kW times the Specified Standby Capacity or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-Peak Periods times $~~0.664~~0.702/kW times the appropriate following monthly factor:

Billing Month	Factor
March, April, May, October	0.80
June, September, November, December	1.00
January, February, July, August	1.20

Plus the Cost Recovery Factors on a $/ kW basis in Rate Schedule BA-1, *Billing Adjustments*: See Sheet No. 6.105 and 6.106

C. Curtailable Capacity Credit:
The credit shall be the greater of:
1. $0.877 per kW times the Specified Standby Capacity, or
2. The sum of the daily maximum 30-minute kW demand of actual standby use occurring during On-peak periods times $0.418/kW times the appropriate Billing Month Factor shown in part 3.B. above.

D. Energy Charges:
Non-Fuel Energy Charge: ~~1.228~~1.297¢ per kWh

Plus the Cost Recovery Factors on a ¢/ kWh basis listed in Rate Schedule BA-1, *Billing Adjustments*, except for the Fuel Cost Recovery Factor and Asset Securitization Charge Factor: See Sheet No. 6.105 and 6.106

E. Delivery Voltage Credit:
When a customer takes service under this rate at a distribution primary delivery voltage, the Distribution Capacity Charge hereunder will be reduced by ~~1.19¢~~$1.28 per kW.

(Continued on Page No. 4)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 3)

Rate Per Month: (Continued)

3. Standby Service Charges: (Continued)

F. Metering Voltage Adjustment:

Metering voltage will be at the option of the Company. When the Company meters at a voltage above distribution secondary, the appropriate following reduction factor shall apply to the Distribution Capacity Charge, Generation & Transmission Capacity Charge, Interruptible Capacity Credit, Non-Fuel Energy Charge and Delivery Voltage Credit hereunder:

Metering Voltage	Reduction Factor
Distribution Primary	1.0%
Transmission	2.0%

G. Fuel Cost Recovery Factor:
Time of Use Fuel Charges of applicable metering voltage provided on Tariff Sheet No. 6.105.

H. Asset Securitization Charge Factor: See Sheet No. 6.105
I. Gross Receipts Tax Factor & Regulatory Assessment Fee Factor: See Sheet No. 6.106
J. Right-of-Way Utilization Fee: See Sheet No. 6.106
K. Municipal Tax: See Sheet No. 6.106
L. Sales Tax: See Sheet No. 6.106

Premium Distribution Service Charge:

Where Premium Distribution Service has been established after 12/15/98 in accordance with Subpart 2.05, General Rules and Regulations Governing Electric Service, the customer shall pay a monthly charge determined under Special Provision No. 2 of this rate schedule for the costs of all additional equipment, or the customer's allocated share thereof, installed to accomplish automatic delivery transfer including all line costs necessary to connect to an alternate distribution circuit.

In addition the Distribution Capacity Charge included in the Rate per Month section of this rate schedule shall be increased by $~~1.27~~1.35 per kW for the cost of reserving capacity in the alternate distribution circuit.

Rating Periods:

1. On-Peak Periods - The designated On-Peak Periods expressed in terms of prevailing clock time shall be as follows:

A. For the calendar months of ~~November~~ December through ~~March~~February,
Monday through Friday*: ~~6:00 a.m. to 10:00 a.m. and 6:00 p.m. to 10:00 p.m.~~5:00 a.m. to 10:00 a.m.

B. For ~~the~~ all calendar months ~~of April through October~~,
Monday through Friday*: ~~12:00 Noon~~6:00 p.m. to 9:00 p.m.

* The following general holidays shall be excluded from the On-Peak Periods: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas. In the event the holiday occurs on a Saturday or Sunday, the adjacent weekday shall be excluded from the On-Peak Periods.

2. Off-Peak Periods - The designated Off-Peak Periods shall be all periods other than the designated On-Peak Periods set forth above.

Minimum Monthly Bill:

The minimum monthly bill shall be the Customer Charge and the Capacity Charges for Standby Service. Where Special Equipment to service the customer is required, the Company may require a specified minimum charge.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate schedule shall be under the same terms as that specified in the otherwise applicable rate schedule.

(Continued on Page No. 5)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 4)

Special Provisions:

1. The Company may, under the provisions of this rate, require a contract with the customer upon the Company's filed contract form. Whenever the customer increases his electrical load, which increase requires the Company to increase facilities installed for the specific use of the customer, a new Term of Service may be required.

2. The Company will furnish service under this rate at a single voltage. Any equipment to supply additional voltages or any additional facilities for the use of the customer shall be furnished and maintained by the customer. At its option, the Company may furnish, install and maintain such additional equipment upon request of the customer, in which event an additional monthly charge will be made at the rate of ~~1.67~~1.08% times the installed cost of such additional equipment.

3. As an essential requirement for receiving curtailable service provided under this rate schedule, the customer shall be strictly responsible for the full curtailment of his standby power requirements upon each request of the Company. Such requests will normally be made during periods of capacity shortages on the Company's system; however, other operating contingencies may result in such requests at other times. The Company shall also have the right to request one additional curtailment each calendar year irrespective of capacity availability or operating conditions.

4. As used in this rate schedule, the term "period of requested curtailment" shall mean a period for which the Company has requested curtailment and for which energy purchased from sources outside the Company's system, pursuant to Special Provision No. 6, is not available. If such energy can be purchased, the terms of Special Provision No. 6 will apply and a period of requested curtailment will not be deemed to exist while such energy remains available.

5. In the event a customer electing curtailable service has not complied with his curtailment responsibility for any period of requested curtailment during the current billing period, the customer will additionally be billed 125% of the difference in standby rate charges between this rate schedule and that of Rate Schedule SS-1, Firm Standby Service, for each billing period from the current month to the most recent prior billing period in which curtailment was requested, not to exceed a total of twelve (12) billing periods.

6. To minimize the frequency and duration of curtailments requested under this rate schedule, the Company will attempt to purchase additional energy, if available, from sources outside the Company's system during periods for which curtailment would otherwise be requested. The Company will also attempt to notify any customer, desirous of such notice, in advance when such purchases are imminent or as soon as practical thereafter where advance notice is not feasible. Similar notification will be provided upon termination of such purchases. ~~Any energy used hereunder during these periods will be subject to the additional charges set forth in the second paragraph of this provision. Customers may avoid these higher charges by curtailing their usage during such periods.~~

   ~~In the event a customer elects not to curtail, the customer will be required to pay an additional charge, in lieu of the otherwise applicable energy charges (Non-Fuel Energy Charge, Capacity Cost Recovery Factor, and Fuel Cost Recovery Factor), provided hereunder, based on the customer's proportionate share of the higher cost of such purchased energy, plus 3.0 mills per kWh, for all consumption hereunder during the period for which curtailment would have otherwise been requested. The cost of such purchased energy shall be based on the average cost of all purchased power and energy provided under this rate schedule and under similar provisions in Rate Schedules IS-1, IST-1, CS-1, CST-1, IS-2, IST-2, CS-2, CST-2, CS-3, CST-3 and SS-2 during the corresponding calendar month. If, for any reason during such period, the customer is notified that the energy purchased from outside sources is no longer available, the terms of this Special Provision will cease to apply and curtailment will be required for the remainder of such period.~~

   ~~In the event a customer elects to curtail irrespective of the availability of additional energy purchased by the Company and does not exceed his Non-Curtailable Demand during the period for which curtailment would have otherwise been requested, the customer will incur no responsibility for the payment of any additional cost of such energy.~~

7. Customers taking service under this rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least sixty (60) months prior to such transfer. Such notice shall be irrevocable unless the Company or the customer receives a waiver from the Florida Public Service Commission.

8. The customer shall allow the Company to install time recording metering on the electrical output of all customer-owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance, and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.

9. Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.

10. Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.

(Continued on Page No. 6)

11. In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all company-supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.

12. For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.

(Continued on Page No. 6)

RATE SCHEDULE SS-3
CURTAILABLE STANDBY SERVICE
(Continued from Page No. 5)

Special Provisions: (Continued)

~~7.~~1. ~~Customers taking service under this rate schedule who desire to transfer to a firm rate schedule will be required to give the Company written notice at least sixty (60) months prior to such transfer. Such notice shall be irrevocable unless the Company or the customer receives a waiver from the Florida Public Service Commission.~~

~~8.~~1. ~~The customer shall allow the Company to install time recording metering on the electrical output of all customer owned generation equipment. The permitted metering location(s) must be accessible to Company personnel for testing, inspection, maintenance, and retrieval of recording generation output data. The customer shall reimburse the Company for the installed cost of the metering and be charged 0.50% per month of the installed cost of the metering equipment for operation and maintenance of the equipment by the Company.~~

~~9.~~1. ~~Where the Company and the customer agree that the customer's service requirements are totally standby or totally supplemental, the Company shall bill the customer accordingly and not require metering of the customer's generation output.~~

~~10.~~1. ~~Upon commencement of service under this rate schedule, if the customer does not make an election of either Option A or Option B under the Determination of Standby Service Requirements, Option B will be applied. A customer may exercise the election of Option A one time.~~

~~11.~~1. ~~In the event the customer electing Option A does not provide outage information to the Company within three (3) days of the end of the billing period, the Company shall render a bill based on all company supplied power being supplemental service. If the customer provides outage information for the current billing period prior to the end of the next billing period, the Company shall issue a revised billing and assess the customer an additional Customer Charge.~~

~~12.~~1. ~~For determination of standby service requirements under Option A, the customer should maintain accurate generation performance records available for review by the Company for verifying outage information utilized in the billing procedure. The customer shall cooperate with the Company in providing additional information the Company deems necessary to validate appropriate billing determinants. If the Company deems that insufficient outage information is being provided by the customer for appropriate determination of standby service requirements under Option A, the Company will subsequently require that this determination be performed under Option B.~~

13. For an amount of load reduction directly resulting from an outage of the customer's generation to be recognized in the determination of standby service requirements, the customer must satisfactorily demonstrate this capability initially and be subject to periodic verification upon request by the Company.

14. The described procedures herein for determining standby and supplemental requirements may require modification during a period of requested curtailment. In this event all power and energy requirements are considered supplemental to the extent that the total power requirement does not exceed the customer's otherwise maximum 30-minute supplemental demand for the current billing period. Any requirement exceeding this level is considered standby. If this should result in a standby requirement which exceeds the customer's self-generating capability, such excess shall be considered additional supplemental.

15. If the actual maximum 30-minute standby power supplied by the Company exceeds the prior billing month's Specified Standby Capacity, the customer shall be billed on the excess amount for previous billings rendered up to twelve (12) months under the rate schedule for (1) distribution capacity and (2) generation and transmission capacity, at a rate of 125% of the corresponding standby service charges.

RATE SCHEDULE TS-1
TEMPORARY SERVICE

Availability:

Available throughout the entire territory served by the Company.

Applicable:

To customers for temporary service such as construction, fairs, displays, exhibits, and similar temporary purposes.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three phase at option of the Company, at the Company's standard voltage available.

Limitation of Service:

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Rate Per Month:

Company's applicable General Service rate schedule.

Additional Charges:

Fuel Cost Recovery Factor:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105
Gross Receipts Tax Factor & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Minimum Monthly Bill:

As provided for in the applicable rate schedule.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on bill at Company-designated locations.

Term of Service:

Service under this rate shall be for a minimum initial term of thirty (30) days from the commencement of service and may be extended for thirty- (30) day periods.

Special Provisions:

1. Metering voltage will be at the option of the Company.

2. The Company may under the provisions of this rate, at its option, require a contract with the Customer upon the Company's filed contract form.

3. Where a temporary service extension is required and can be provided by a service drop or connection point to the Company's existing distribution system, the Customer shall pay a service charge of $~~227~~310.00 for the cost of installing and removing such temporary service extension.

4. Where line work is required, the Customer shall pay, in advance, the estimated cost of installing and removing such facilities as may be required to provide such temporary service, except the cost of any portion of the facilities which will remain as a part of the permanent service. In addition, the Customer shall deposit with the Company, in advance, a cash sum equal to the estimated charge for energy consumed provided, however, that the Company may waive advance payments if the Customer has established, in the sole judgment of the Company, satisfactory credit.

RATE SCHEDULE PPS-1
GENERAL SERVICE – PREMIER POWER SERVICE RIDER

Availability:

Available throughout the entire territory served by the Company.

Applicable:

This Rider is applicable on a voluntary basis to a customer with a minimum measured demand of 50 kW taking service under non-residential Rate Schedules GS-1, GST-1, GSD-1, GSDT-1, GSLM-1, CS-1, CS-2, CS-3, CST-1, CST-2, CST-3, IS-1, IS-2, IST-1, or IST-2 that meets the eligibility requirements herein when the customer contracts with the Company to own, install, operate and maintain ~~generation~~ equipment on the customer's premises for the primary purpose of providing a back-up supply of electric service in the event normal electric supply is interrupted. The applicable non-residential Rate Schedule with which this Rider is used is modified only as required by the terms hereof.

Character of Service:

Continuous service, alternating current, 60 cycle, single-phase or three-phase, at the Company's standard distribution voltage available.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations Governing Electric Service."

Monthly Service Payment:

The Monthly Service Payment under this Rider is in addition to the monthly rate determined under the applicable non-residential Rate Schedule and other riders, if applicable, and shall be calculated based on the following formula:

Monthly Service Payment = Capital Cost + Expenses

Where:

Capital Cost equals a carrying cost times the levelized plant investment based upon the estimated installed cost of facilities. The carrying cost includes the cost of capital, reflecting current capital structure and most recent approved return on common equity; income taxes; property taxes; general plant; administrative and general plant-related expenses; and intangible plant. Any replacement cost expected to be incurred during the Contract Period will also be included. Any special equipment installed by the Company that is not necessary to support back-up service to the customer shall not be included in the Monthly Service Payment.

Expenses shall be levelized over the Contract Term and shall include: Company operations and maintenance (O&M) expenses times a carrying cost that is inclusive of administrative and general and labor expenses related to O&M and cash working capital; third-party expenses for operations and maintenance, warranties, or insurance; fuel expense, based upon an estimate of the cost of fuel consumed for normal back-up operation and testing, less a credit based upon the system average cost of fuel and purchased power included in retail tariffs; inventory cost associated with fuel, materials, and supplies times a carrying cost that recovers the cost of capital and income taxes; depreciation expense, adjusted for the estimated salvage value at the end of the Contract Term; deferred income taxes; and customer accounting, customer service and information, program administration, and sales expenses. Any expenses incurred in operating the on-site generation for other than normal back-up operation and testing shall not be included in the Monthly Service Payment.

Installation cost will be recovered over the initial Contract Term. Pricing of capital-related costs and expenses shall be based upon no shorter than 10 years from the equipment's original in-service date and the resulting Monthly Service Payment shall include an upward adjustment for Contract Terms that expire prior to 10 years from this in-service date.

(Continued on Page No. 2)

RATE SCHEDULE PPS-1
GENERAL SERVICE – PREMIER POWER SERVICE RIDER

(Continued from Page No. 1)

Definition of Services:

Services provided under the terms of this Rider shall be provided by ~~an~~ on-site equipment~~generator~~ supplied by the Company for the purpose of continuing the supply of electricity to the customer's site in the event the normal electric supply is interrupted. In cases where the customer's total electric requirement exceeds the generation capability, the customer shall arrange its electrical requirements to ensure that the electrical requirement to be supplied when normal service is interrupted will not be greater than the generation capacity. The minimum equipment~~generator~~ capacity supplied by the Company under this rider shall be not less than 50 kW.

The Company shall have the right to operate the on-site equipment~~generator~~ at all times it deems appropriate, including, but not limited to, for the purposes of testing of the equipment~~generator~~ to verify that it will operate within required parameters, and dispatching the equipment~~generator~~ to assist in meeting system demand or for other system benefits. The equipment~~generator~~ and appropriate transfer switching shall be electrically connected on the Company's side of the billing meter; therefore, billing for generation provided during normal back-up operation and testing shall continue to be billed under the applicable non-residential Rate Schedule based solely upon consumption registered on the Company's billing meter.

Service Contract:

The Company and the customer shall execute a Premier Power Service Contract (the "Contract") that will state the amount of the customer's Monthly Service Payment determined in accordance with this Rider, the Contract Term, and other terms and conditions pertinent to providing Premier Power Service.

Eligibility:

In order to be eligible for this Rider, the customer must provide evidence of creditworthiness sufficient to establish reasonable assurance of their ability to meet their financial obligations for the services to be provided under the Contract.

- Entities that have an investment grade senior unsecured credit rating from Moody's Investors Service or S&P Global Ratings will be deemed creditworthy for projects requiring investment by the Company of twenty (20) million dollars or less (Investment grade rating means an unsecured or issuer rating of Baa3 or better from Moody's or BBB- from S&P).
- Entities that have a senior unsecured credit rating of at least Ba2 from Moody's Investors Service or BB by S&P Global Ratings will be deemed creditworthy for projects requiring investment by the Company of five (5) million dollars or less.

Customers with no such rating may demonstrate creditworthiness by submitting their audited financial statements for review by the Company to establish an equivalent credit rating based on a commercially reasonable credit assessment.

Companies not deemed to be creditworthy for a project may establish eligibility by providing credit support in the form of either (i) cash; (ii) bank-issued letter(s) of credit; (iii) a guaranty from a parent company or an affiliated entity meeting the creditworthiness standards of the Company, in each case in a form and from an issuer reasonably acceptable to the Company; or (iv) other security reasonably acceptable to the Company. The amount of security shall not exceed the initial costs incurred by the Company for installation, excluding equipment removable by the Company and suitable for alternative use, plus the estimated cost for the Company to redeploy such equipment for use elsewhere, if applicable. As an alternative form of credit support, the customer and the Company may mutually agree to an accelerated payment schedule commencing prior to completion of installation of the equipment or a payment schedule consisting of larger payments upfront followed by smaller payments, provided that the resulting payment structure will not result in collection by the Company of a return greater than that which would otherwise be reflected in the determination of the payment amount under the Contract.

Minimum Monthly Bill:

The minimum monthly bill shall be the customer's minimum bill under the applicable non-residential Rate Schedule, plus the Monthly Service Payment under this Rider.

Terms of Payment:

Bills rendered hereunder are payable within the time limit specified on the bill at Company-designated locations.

Term of Service:

Service under this Rider shall be for the term specified in the ~~Premier Power Service~~ Contract. In the event of non-payment by the customer where such non-payment is not cured within sixty (60) days of notice of such delinquency by the Company to the customer, the company shall have the right to terminate the Contract, exercise any rights thereunder, and proceed against any credit support provided by the customer in connection with the Contract.

~~**Service Contract:**~~

~~The Company and the customer shall execute a Premier Power Service Contract that will state the amount of the customer's Monthly Service Payment determined in accordance with this Rider, the Contract Term, and other terms and conditions pertinent to providing~~

~~Premier Power Service.~~

RATE SCHEDULE ED-2
ECONOMIC DEVELOPMENT RIDER

Availability:

Available throughout the entire territory served by the Company. Customers desiring to take service under this tariff must make a written request for service.

Applicable:

To any customer taking firm service, other than residential, for light and power purposes who meet the Qualifying Criteria set forth in this tariff. This tariff provides for an Economic Development Bill Reduction Factor as described herein for new load which is defined as load being established after the date of the original issue of this tariff sheet by a new business or the expansion of an existing business. This rider is not available for retention of existing load or for relocation of existing load within the Company's service territory. Relocating businesses that provide expansion of existing business may qualify as to the expanded load only. This rider is not available for short-term service, construction, temporary service, or renewal of a previously existing service. Customers must execute an Economic Development Service Agreement and such agreement must specify all the Qualifying Criteria that customer expects to meet for this rider to be applicable.

Qualifying Criteria:

To participate in this rider, the customer must meet the following criteria:

a) The minimum qualifying new load must have a minimum load factor of 35% at a single point of delivery and must be:
   1) At least 500 kW; or
   2) At least 350 kW at an existing premise served by the Company that has been unoccupied or dormant, with minimal or no electric usage, for at least ninety (90) days.

b) The new or expanding business must be in a targeted industry as defined by the state of Florida's most current economic development policy.

c) The new or expanding business must also meet at least one of the following two requirements at the project location:
   1) The addition of 25 net new full time equivalent (FTE) jobs in the Company's Florida service area; or
   2) Capital investment of $500,000 or greater and a net increase in FTE jobs in the Company's Florida service area.

d) Customer must provide written documentation attesting that the availability of this rider is a significant factor in the Customer's location/expansion decision.

Limitation of Service:

Standby or resale service is not permitted hereunder. Service under this tariff is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

Otherwise Applicable General Service Tariff:

Service under this rider shall be provided under any of the Company's currently available general service tariffs to be initially determined by mutual agreement of the Company and customer based on the usage characteristics provided by the customer for new load. All provisions, terms and conditions of the otherwise applicable General Service Tariff shall apply.

Rate Per Month

All charges shall be those set forth in the otherwise applicable General Service Tariff with the resulting monthly bill adjusted by the Economic Development Bill Reduction Factor, plus any additional facilities charges as specified in the Economic Development Service Agreement or as otherwise agreed.

Economic Development Bill Reduction Factor:

Beginning with the effective date as declared by the customer and in compliance with this rider, a reduction in the monthly bill will be applied to the total bill for the qualifying new load under this rider (but excluding any charges for additional facilities as specified in the Economic Development Service Agreement or as otherwise agreed), as follows:

Months beginning with and following the effective date declaration	Reduction in monthly bill for qualifying new load
Months 1-12	Up to 30%
Months 13-24	Up to 30%
Months 25-36	Up to 30%
Months 37-48	Up to 30%
Months 49-60	Up to 30%

RATE SCHEDULE ED-2
ECONOMIC DEVELOPMENT RIDER
(Continued from Page No. 1)

Economic Development Bill Reduction Factor: (Continued)

The percentage discount to be applied to the customer's monthly bills will be determined in advance, on or prior to the date of execution of the Economic Development Service Agreement, and will be developed on an individual customer basis given the evaluation of the following criteria as to the new or expanded load:

1. Peak monthly demand;
2. Average monthly load factor;
3. The Company's incremental costs to serve;
4. Number of new FTEs; and
5. Total new capital investment of the customer.

The third criterion, Company's incremental costs to serve the new load, will not take into account the costs for additional facilities that are being covered in full by the customer through the terms of the Economic Development Service Agreement or another agreement between the Company and the customer.

Term of Service:

The customer may request an effective date of this rider which is no later than eighteen (18) months after the Economic Development Service Agreement is approved and signed by the Company. The minimum term of the Economic Development Service Agreement shall be ten (10) years following the customer's effective date, with the bill reductions being available for a maximum period of five (5) years after such effective date.

Penalty for Non-Compliance with Qualifying Criteria or Term of Service:

If at any time during the term of the rider agreement the customer violates the terms and conditions of the rider or the Economic Development Service Agreement, the Company may discontinue the discount provided for under this rider and bill the customer based on the otherwise applicable General Service Tariff. If the customer terminates service prior to the end of the Agreement period, or fails to meet the qualifying criteria agreed to for the term of the Agreement, this will constitute a violation of the terms and conditions of the rider and agreement

Should service under this rider be discontinued by the Company or the customer for said violation, the customer shall be required to repay to the Company the amount of the cumulative discounts received under this rider in accordance with the following schedule .

Number of months beginning with and following the effective date declaration and ending with the date of violation	Required percentage of cumulative economic development bill discounts that must be repaid:
Months 1-60	100%
Months 61-72	80%
Months 73-84	60%
Months 85-96	40%
Months 97-108	20%
Months 109-120	10%

If a change in ownership occurs after execution of the Economic Development Service Agreement, the successor customer may, in the Company's discretion, be allowed to fulfill the balance of the Economic Development Service Agreement and participate in this rider.

RATE SCHEDULE FB-1
Optional – FixedBill Program
(Continued from Page No. 1)

.

Normal Weather: Weather at the 50th weather percentile based on the Company's historical seasonal heating degree-days and cooling degree-days.

Actual Weather: Weather experienced during a historical time period measured using actual heating degree-days and cooling degree-days.

Predicted Weather Normalized Monthly kWh Usage: The customer's predicted monthly usage (kWh) based on Normal Weather.

Predicted Weather Adjusted Total kWh Usage: The customer's predicted total usage (kWh) for the applicable time period based on Actual Weather.

Risk Adder: This adder is used to compensate the Company for the risk associated with weather-related consumption and non-weather related impacts and will not exceed 6%. Through December 31, 2021 in recognition of reduced risk from customers who grant the Company the ability to control different customer owned assets outside of or in addition to applicable Commission-approved DSM programs, the Company will provide up to 2,000 customers $50 in the form of a prepaid credit card in accordance with the terms of the program's Service Agreement.

Usage Adder: This adder is used to compensate the Company for the risk associated with increased usage by customers in their first year while on *FixedBill* not associated with weather. The initial usage adder will be 4% and capped at 6%. This adder will only be applied during the customer's first year on the *FixedBill* program.

Standard Residential Tariff: The Company's RS-1, RST-1, RSL-1 and RSL-2 Rate Schedules, beginning Sheet Nos. 6.120, 6.140, 6.130, and 6.135, respectively.

Terms and Conditions:

1. The customer will enter into a Service Agreement with the Company that will specify the Monthly *FixedBill* Amount that the customer will be required to pay and, as applicable, all requirements associated with allowing control of customer owned assets.

2. The term of the Service Agreement will be for twelve (12) months. The Company will calculate a new Monthly *FixedBill* Amount for the following year, and notify the customer of the new contractual amount before the current 12-month *FixedBill* period expires. The customer will be automatically renewed at the new Monthly *FixedBill* Amount for the following year unless the customer notifies the Company of their intent to be removed from the *FixedBill* program.

3. Removal from the program:

   A. Move from Current Residence.
   If a participating customer moves from their current residence before the 12 month Service Agreement period expires, Applicable Removal Charges will apply.

   B. Delinquent FixedBill Payments.
   If a customer becomes delinquent in a *FixedBill* payment, the Company will follow standard procedures for Standard Residential Tariff customers. If the customer is disconnected for nonpayment, the customer will be removed from the *FixedBill* program and Applicable Removal Charges will apply.

   C. Increased Actual Energy Usage Above Expected Usage (Excess Usage).
   The Company reserves the right to terminate the customer's *FixedBill* program Service Agreement if the customer's total Actual Energy Usage in months three (3) through nine (9) of the contract year exceeds their Predicted Weather Adjusted Total kWh Usage by at least 30% for at least three months. If the customer is removed from the *FixedBill* program due to excessive usage, Applicable Removal Charges will apply. The Company will notify the customer in advance if they are at risk of being removed from the program due to excessive usage.

   D. Customer Voluntary Removal.
   If a customer chooses to leave the *FixedBill* program prior to the end of the 12-month Service Agreement period, the customer will be removed from the *FixedBill* program and Applicable Removal Charges will apply. After the end of each Service Agreement period, eligible customers will automatically renew for the next *FixedBill* Service Agreement period unless the customer indicates their intention to return to the Standard Residential Tariff. If the Standard Residential Tariff election is made prior to the automatic renewal of the *FixedBill* Service Agreement, no Applicable Removal Charges will apply.

(Continued on Page No. 3)

RATE SCHEDULE FCF-1
PUBLIC CHARGING FOR ELECTRIC VEHICLES

Availability:

Available throughout the entire territory where customers charge electric vehicles at certain DEF ("the Company') owned public electric vehicle (EV) fast charging stations ("the stations") where DEF provides charging service and direct billing to the station user.

Applicable:

To any person ("user") who accesses the stations.

Character of Service:

EV charging service will be available at the Company-owned stations, with output power of 50 kW or greater, installed at Company or Host locations. The stations will be accessible to the public for charging.

Limitation of Service:

The user must register an account with the Company's mobile application or network provider, including payment information, prior to charging the EV..

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service". In case of conflict between any provisions of this schedule and said "General Rules and Regulations for Electric Service" the provisions of this rate schedule shall apply.

Rate Per Month:

Energy Charge:	$ 0.33 per kWh
Vehicle Idling Fee:	$ 1.00 per minute

Additional Charges:

Gross Receipts Tax & Regulatory Assessment Fee Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fee:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

Terms of Payment:

Charging network fees as determined by the charging station network provider may apply at certain stations. The vehicle idling fee may apply following a ten-minute grace period at certain stations located in close proximity to highway corridors or other highly trafficked areas. The rates applicable to the specific station including the rate per kWh, taxes, and charging network provider and idling fees will be visible to the users via the app and/or display. Users will be notified when the charging session is complete via the display located at the charging dispenser and through the Company's mobile application and will have the ability to obtain a detailed receipt of the charge session.

PART I

DEFINITIONS AND CLASSIFICATIONS

1.01 Definitions:

The following definitions set forth standard interpretations of certain terms used in these Rules and Regulations:

(1) Company: Duke Energy Florida, LLC~~Inc.~~

(2) Customer: The user of the Company's electric service.

(3) Service: The supply by the Company of electricity to the Customer, including the readiness and availability of electrical energy at the Customer's Point of Delivery at the required voltage and frequency whether or not utilized by the Customer.

(4) Service Drop: That portion of the Company's facilities, between the established secondary source~~pole or underground cable~~ and the point of attachment at the service entrance~~, which brings the service from the Company's supply lines to the Customer.~~.

(5) Service Entrance: Wires and enclosures owned by the Customer and connecting the Customer's installation to the service drop.

(6) Customer's Installation: Wires, enclosures, switches, appliances and other apparatus, including the service entrance, forming the Customer's facilities utilizing service for any purpose on the Customer's side of the point of delivery.

(7) Point of Delivery: The point of attachment where the Company's facilities are ~~service drop is~~ connected to those of the Customer's ~~service entrance.~~ The point of delivery shall be determined by the Company. Generally, the point of delivery for residential customers is the meter. The points of delivery for Multi-Occupancy Buildings and townhouses are established in Section 11. For underground service other than residential, the Customer's service entrance shall include conductors and raceway to a point designated by the Company generally the secondary voltage source~~pad-mount transformer~~ closest to the building.

(8) Connected Load: The total rated capacity in horsepower (H.P.) and/or kilowatts (kW), and/or kilovolt amperes (kVA), of all electric equipment, appliances, apparatus and other current consuming devices which are connected in and to the Customer's installation and which may utilize service.

(9) Maximum Demand: Highest integrated reading of Customer's electrical power requirements measured in kilowatts during the interval of time specified in the Rate Schedules.

~~(10) Temporary Service: The supply of electricity by the Company to the Customer for construction purposes; or for fairs, displays, exhibits and similar services; and for other services which will be in use for less than a year.~~

(10~~1~~) Rate Schedules: The applicable schedules of rates and charges for service rendered which, from time to time, are on file with and approved by the Florida Public Service Commission having jurisdiction thereover, and under which service is rendered by the Company.

1.02 Service Classifications:

Service is classified for rate application purposes according to one of the following which best describes the Customer's electric service requirements:

(1) Residential: Residential customers have the option of being served under one of the following rate schedules:

A. Residential Service (RS-1): Applicable to ~~residential~~ customers taking service exclusively for domestic purposes in a single dwelling house, a mobile home, or individually metered single apartment unit or other unit having housekeeping facilities, occupied by one family or household as a residence. The premises of such single dwelling may include an additional apartment with separate housekeeping facilities, ~~as well as~~ a garage, a boat slip, and other separate structures where they are occupied or used solely by the members or servants of such family or household for domestic purposes only.

(Continuing on Next Page)

Residential (Continued):

Also, for energy used in commonly-owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

(a) 100% of the energy is used exclusively for the co-owner's benefit.
(b) None of the energy is used in any endeavor which sells or rents a commodity or provides service for a fee.
(c) Each point of delivery will be separately metered and billed.
(d) A responsible legal entity is established as the Customer to whom the Company can render its bill(s) for said service.

B. Residential Load Management (RSL-1): Applicable to customers eligible for residential service under Rate Schedule RS-1 who elect service under this rate schedule and who utilize any of the following electrical equipment:
1. Water Heater
2. Central Electric Heating System
3. Central Electric Cooling System
4. Swimming Pool Pump

C. Residential Time of Use (RST-1): Applicable at the option of the Customer, to residential customers otherwise eligible for service under Rate Schedule RS-1, provided that all of the electric load requirements on the Customer's premises are metered through one point of delivery.

(2) General Service Non-Demand: Applicable to any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable.

(3) General Service Demand: Applicable to any customer, other than residential, for light and power purposes for which no other rate schedule is specifically applicable with a measured annual kWh consumption of 24,000 kWh or greater per year.

(4) Lighting Service: Applicable to any customer for the sole purpose of lighting roadways or other outdoor land use areas; served from either Company or Customer owned fixtures of the type available under this rate schedule.

(5) Interruptible General Service: Applicable to any customer, other than residential, for light and power purposes where service may be interrupted by the Company.

(6) Curtailable General Service: Applicable to any customer, other than residential, for light and power purposes where the Customer agrees during a period of requested curtailment to curtail as a minimum the greater of: (a) 25 kW or (b) 25% of their average monthly billing demand (based on the most recent twelve (12) months or, where not available, a projection for twelve (12) months).

(7) Standby and Supplemental Services: Applicable to any customer other than residential, having on-site generating equipment and requesting standby and/or supplemental services (firm, interruptible, curtailable). A customer requesting standby service is required to take service under this rate schedule if his total generating capability: (1) exceeds 100 kW, (2) supplies at least 20% of his total electrical load, and (3) is operated for other than emergency and test purposes.

(8) Temporary Service: Applicable to any customer for temporary service such as construction, fairs, displays, exhibits and similar temporary purposes for which service will be in use less than a year.

1.03 Rate Applications:

The Customer shall be billed in accordance with the regular rate schedule applicable to the Customer class for which service is rendered, or the Customer may elect to be billed under any optional rate schedule offering for the class, e.g. time of use. The Company will, upon request, advise any Customer as to the rate schedule most advantageous to their~~his~~ service requirements but does not assume responsibility for its selection in the event of changes in the Customer's requirements. All rate schedules are contained in Section No. VI of the Tariff ~~and are available for inspection at any Company office~~. A Customer shall, upon request, be furnished a copy of the rate schedule applicable to his service.

PART II

AVAILABILITY AND ESTABLISHMENT OF SERVICE

2.01 Application for Service:

Service may be obtained upon application.~~Information may be obtained at the nearest Company office as to the availability of service at the location where it is desired, and application for such service should be made by the Customer at such office at the earliest possible time so that details for furnishing service may be determined.~~ Unless otherwise agreed in writing by the Company, and except as provided in Part III hereof, applications will be accepted only upon the condition that the Company shall be under no obligation to render service other than that character of service then available at the proposed Point of Delivery. Any such application or agreement shall be subject to all the provisions of these Rules and Regulations and of the Rate Schedules, and the terms and conditions thereof shall be binding upon the Company as well as upon the Customer. In order to determine whether ~~insure that~~ capacity is available in existing Company equipment to provide satisfactory service to the Customer, or whether the Company must install additional or modified equipment, load data must be submitted with the application for service. Load data should include the anticipated Connected Load and the anticipated Maximum Demand.

2.02 Service Available:

Technical specifications for type and location of service are provided in the "Requirements for Electric Service and Meter Installations" contained in the Appendix.

2.03 Temporary Service:

The Company will, where it has a source of supply readily available, furnish service for temporary installations as provided for in the Company's Rate Schedule TS-1.

2.04 Auxiliary Service:

Auxiliary service is electric service provided to customers in lieu of that which might otherwise be provided by customer-owned generation for which the customer is not otherwise required to take service under the Company's Standby Service tariff. Auxiliary service is available and will be supplied by the Company under the applicable rate schedule. Parallel interconnected operation of customer-owned generation equipment is permissible only if the customer has executed a standard interconnection agreement with the Company in accordance with the Company's filed contract forms. In the absence of an executed interconnection agreement for parallel operation, the customer's facilities shall be so installed and maintained as to prevent operation of his power sources in parallel with those of the Company.

2.05 Premium Distribution Service:

Upon request by a Customer, the Company will install facilities capable of providing automatic delivery transfer to an alternate distribution circuit in the event of an outage of the principal distribution circuit. The Customer shall pay a monthly amount for such facilities in accordance with the specified rate for additional equipment contained in the applicable general service rate schedule under which service is provided.

The Company will determine the alternate circuit for Premium Distribution Service on the basis of the most economic and feasible circuit deemed available by the Company. If the Customer is desirous of a particular alternate circuit other than that deemed by the Company, the Company will give consideration to such request but shall not be required to establish such desired circuit as the alternate circuit. Where construction is necessary to extend the selected alternate circuit to an interconnection point with service on the Customer's property, the Customer shall pay this cost fully as a Contribution-in-Aid-of-Construction to the Company.

The Customer shall also be subject to an additional Monthly Demand Charge for Premium Distribution Service as stated in the applicable general service rate schedule.

PART III

CONTRIBUTION IN AID OF CONSTRUCTION

3.01 Contribution in Aid of Construction for the Installation of New or Upgraded Facilities:

Where an extension to or upgrade of existing facilities at any voltage level (other than a service drop and/or meter) is required to provide service to a Customer, the Company shall calculate under the formulas set forth below whether a contribution in aid of construction (CIAC) is due from the Customer. A CIAC would be due from the Customer, prior to construction of the requested facilities (unless alternative acceptable payment arrangements are made), as a result of expected incremental revenues from the Customer, together with revenues from other prospective customers to be served from such extension or upgrade, not being sufficient to afford a fair and reasonable return on the cost of making such extension or upgrade. The Company shall use its best judgment in estimating the revenue portion of the formulas which shall be based on an annual period ending not more than five years after the extension or upgrade is placed in service. The Company will pay for the cost where justified, in the Company's opinion, by revenues to be secured; however, the Company may require monthly or annual guarantees, cash contributions in aid of construction, and/or advances for construction, when in the Company's opinion, the immediate or potential revenues do not justify the cost of extension. If the installation of facilities is justified based on the Customer's estimates for electric power but there is reasonable doubt as to level of use or length of use of such facilities, the Customer, when mutually agreeable with the Company, may contract for a minimum Demand or monthly payment sufficient to justify the Company's investment. If it is determined that the installation of facilities through an existing underground development is for the Company's benefit, the facilities shall be installed underground at the Company's expense. For all of the formulas below, the costs shall include cost of removal and salvage, if applicable. When performing the calculations required in these formulas, the Company may consider whether it is more cost-effective for the requested installation to be placed overhead or underground; if underground installation is more cost effective, then the Company shall be permitted to utilize the four (4) years expected incremental base energy revenue as a direct offset against the cost of the underground.

(1) Overhead Extension or Upgrade: The following formula shall be used to determine the CIAC owed by the Customer. If the application of this formula results in a negative value for $CIAC_{OH}$, the $CIAC_{OH}$ amount shall be set to zero.

~~For residential and general service non-demand customers, the CIAC shall be calculated as follows:~~

$$CIAC_{OH} = \text{Total}\sout{\text{Actual or}}\ \text{estimated work order job cost of installing the facilities}\ \sout{\text{for new poles and conductors and appropriate fixtures required to provide service}}\text{, excluding service drops and meters} - \text{Four (4) years expected incremental base energy revenue plus (if applicable) four (4) years expected incremental base demand revenue}$$

~~For general service demand customers, the CIAC shall be calculated as follows:~~

$$\sout{CIAC_{OH} = \text{Actual or estimated job cost for new poles and conductors and appropriate fixtures required to provide service, excluding service drops, and meters} - \text{Four (4) years expected incremental base energy revenue plus Four (4) years expected incremental base demand revenue}}$$

(2) (a) Residential Underground Extension or Upgrade: The following formula shall be used to determine the CIAC:

(Continued on Next Page)

$CIAC_{UG}$ = Estimated difference between the cost of providing the line extension or upgrade~~, including not only the line extension or upgrade itself but also the transformer, the service drop, and other necessary fixtures~~ , with underground facilities vs. the cost of providing service using overhead facilities + $CIAC_{OH}$ (as above)

For underground residential service, the charges set forth in Part XI, Underground Residential Distribution Policy, provide the portion of the above formula developing the estimated difference in cost using underground facilities vs. overhead facilities.

(Continued on Next Page)

(b) General Service Underground Extension or Upgrade: The following formula shall be used to determine the CIAC:

$CIAC_{UG}$ = Estimated difference between the cost of providing the line extension or upgrade~~, including not only the line extension or upgrade itself but also the transformer and other necessary fixtures, excluding the service drop,~~ with underground facilities vs. the cost of providing service using overhead facilities + $CIAC_{OH}$ (as above)

The Company will designate the point of delivery and the Customer will provide the service entrance conductors and raceway from the Customer's service equipment to the point of delivery designated by the Company located wholly on the Customer's property~~at or near the building~~. For clarity, the Company does not install underground service for non-residential customers.

The actual or estimated costs applied to the formula in subsections (1) and (2) shall be consistent with the standards of the Company's approved Storm Protection Plan.

(3) Extension for Temporary Service: The Customer shall pay extension costs for temporary service in accordance with Rate Schedule TS-1.

(4) Extension for Street or Area Lighting Service: Service for street or area lighting is normally provided from existing distribution facilities. Where suitable distribution facilities do not exist, the following formula shall be used to determine the CIAC owed by the Customer. If the application of this formula results in a negative value for CIAC, the CIAC amount shall be set to zero.

CIAC = Actual or estimated job cost of new facilities required to provide service excluding lighting facilities — Four (4) years expected incremental base energy revenue

(5) CIAC True-Up:

Within 12 months of the in-service date of the new facility installation or upgrade, an initial end-use Customer that paid CIAC may make a one-time request, in writing, to true-up the CIAC charged by the Company. The Company will true-up CIAC paid to reflect actual construction costs and actual base revenues received at the time the true-up request is made. The revenue portion of the CIAC true-up will be calculated by annualizing the actual base energy and demand revenues received by the Company as of the date of the true-up request and multiplying by four to derive four years expected base revenues. Depending on the true-up results, the initial end-use customer requesting a true-up may be entitled to a refund or charged additional CIAC.

(6) CIAC Prorate:

Within a three year period from the in-service date of the installation of the new or upgraded facilities ("the initial facilities"), the Company will prorate the CIAC paid by the initial end-use customer for the facility installation or upgrade to serve that customer. Prorating will apply to only CIAC payments of $1,500 and above. Customers requiring more than a meter and a service drop for service from the initial facilities (e.g. additional poles or transformers) will be excluded from the CIAC prorate. The initial end-use customer will be charged the full amount of CIAC in accordance with this Part III. Additional customers served by the initial facilities will each pay their prorata share of the CIAC paid by the initial customer. The prorata share will be calculated by first determining the total number of customers involved by adding one (1), representing the initial customer, to the number of additional customers identified by the Company that could be served by the initial facilities. Then each customer's prorata share will be one divided by the total number of customers involved. The Company will refund the prorated collections to the initial end-use customer.

(Continued on Next Page)

3.02 Route and Easement:

For new line extensions, upgrades or service drops, the Company shall select the most economical route, which may be a right of way or easement. Before the Company starts construction, the route chosen must be cleared of all trees, tree stumps and other obstructions by the ~~applicant~~Customer, at no charge to the Company and be suitable for Company use. The Company will use private property for any such extension or upgrade, once an easement suitable to the Company is granted by the owner of such private property to the Company, without cost, in accordance with the following provisions:

(1) Private Property of Customer: Where more than one pole is located on a customer's property for the sole purpose of supplying service to such customer, an easement for all such poles and for any related facilities, including guys, overhead distribution circuits and overhang, must be furnished by the Customer. The entire length and width of the easement across the Customer's property must be cleared of trees, undergrowth, and other obstructions to access by the Company's vehicles and equipment, prior to installation of the service line by the Company.

(2) Private Property of Third Party: Where, in order to provide service to a Customer, Company facilities are to cross over or be located upon private property not owned by such Customer, or where service to such Customer is to be provided from existing Company facilities so situated, an easement for all such facilities involved, including, but not limited to, poles, guys, overhead distribution circuits and overhang, if any, will be required to be obtained by the Customer prior to such facilities being installed by the Company.

(3) Acquisition, Form and Cost: All such grants shall be obtained by the Customer upon the Company's standard form, properly executed by the grantor, and shall be made without cost to the Company.

3.03 Installation by Customer:

The Customer's installation shall, in its entirety, be installed and maintained in accordance with the requirements of local ordinances pertaining thereto, or of authorities having jurisdiction thereover, or in the absence of such local ordinances or authorities in accordance with the requirements of the National Electrical Safety Code as set forth in Handbook H-43 of the National Bureau of Standards in its present form, or as subsequently revised, amended or superseded; provided, however, that service to any customer over lines and facilities not owned by the Company shall be at the sole option of the Company. Customer installations shall be in accordance with the following provisions:

(1) Inspection by Authorities: The Company recommends that all wiring installations be inspected and approved by an authorized electrical inspector if available; and, where such inspection is required by local ordinance or authority, the Company cannot render service until such inspection has been made and formal notice from the inspecting authority of its approval has been received by the Company.

(2) Inspection by Company: The Company reserves the right to inspect Customer's installation prior to rendering service, and from time to time thereafter; but the Company assumes no responsibility whatsoever for the Customer's installation as a result of any such inspection, and will not be responsible in any way for any defect in Customer's installation, or any part thereof, or for any damage which may result from any such defect.

3.04 Special Service Requirements:

The Company designs and installs its service facilities in accordance with the "Requirements for Electric Service and Meter Installations" contained in the Appendix. Where the Customer requests a more costly service arrangement, such as a remote point of delivery, excess transformer capacity, or any other special requirements, or high demand equipment, such as tankless water heaters, kilns, welders etc., ~~T~~the Company will provide such service if feasible and the Customer shall pay the cost in excess of the estimated cost of the standard design.

3.05 Relocation, Removal, or Modification of Existing Facilities:

When, in the judgment of the Company a change in the use or layout of the Customer's premises makes the relocation, removal, or modification, but not an upgrade of the Company's existing facilities necessary, or when such relocation, removal, or modification is requested by the Customer and is consistent with sound utility practices, the Company will relocate, remove, or modify such facilities in a manner acceptable to the Company. The Customer shall ~~,~~pay the Company ~~,~~for all cost associated with any such relocation, removal, or modification based on an invoice prepared by the Company in accordance with standard estimation procedures, unless the removed facilities are unused and at the end of their useful life, as determined by the Company in its sole discretion. ~~and i~~If the relocation, removal, or modification is made at the Customer's request, such payment shall be made in advance. If a requested relocation, removal, or modification involves the conversion of an existing residential overhead service to an underground service lateral, the charges and provisions of Section 11.05 of these Rules shall apply.

PART VII

GUARANTEE DEPOSITS

7.01 Deposit Requirement:

In order to guarantee payment for service rendered, the Customer shall provide the Company with a cash deposit or other acceptable guarantee such as a surety bond, letter of credit, or guarantee letter. For residential customers, the guarantor must be a customer of the Company with a satisfactory payment record. For non-residential customers, the guarantor needs not be a customer of the Company, but must be a bank, or insurance company, or other institution with proven financial capability to furnish such a guarantee. Deposits for existing accounts and new service requests will be calculated in the manner set forth in section 366.05(1)(c)1. & 2., Florida Statutes (2015) (as may be amended from time to time), respectively. Deposits will be recalculated at least on an annual basis. A deposit requirement may be waived for customers who have previously established a satisfactory payment record with the Company (including its affiliated regulated utilities) or meet the Company's requirements for the establishment of credit.

7.02 Refund of Deposit:

After a customer has had continuous service for a period of twenty-three (23) months and established a satisfactory payment record, the Company will refund a residential customer's deposit and at its option either refund or commence applying a higher rate of interest on a non-residential customer's deposit as provided for in Section 25-6.097(5) of the Florida Public Service Commission Rules. A customer is considered to have established a satisfactory payment record, if over the preceding twelve (12) months of service, the customer has not had a disconnection of service for non-payment of bill, ~~made payment with a dishonored check,~~ had more than three (3) final notices~~one (1) late payment notice~~, tampered with the electric meter, or used service in a fraudulent or unauthorized manner. Any deposit, plus accrued interest, being held by the Company upon termination of service will be credited to the Customer's final bill and any remaining balance refunded.

7.03 New or Additional Deposit:

The Company may require upon written notice to the Customer of not less than thirty (30) days a deposit on an existing account in order to secure payment of~~-~~ bills.

7.04 Interest on Deposit:

Interest will accrue on deposit amounts in existence for a continuous period of six (6) months or longer at the minimum rate provided for in Section 25-6.097(5) of the Florida Public Service Commission Rules. Accrued interest will be paid annually either as a credit on the Customer's ~~June~~ bill or as a payment upon refund of deposit, or upon final settlement of Customer's account.

PART VIII

BILLING

8.01 Billing Period:

A bill for service will be rendered on a regular monthly cycle as scheduled by the Company. A normal billing month is an interval between scheduled meter reading dates and is approximately thirty (30) days.

8.02 Prorated Monthly Bills:

A normal monthly bill will be prorated (based on actual number of days vs. thirty (30)) if the meter reading date is advanced or postponed more than five (5) days from the scheduled read date.

All other types of bills (including initial, final, or reroute) will be prorated if they cover more or less than a regular monthly billing period (including the five-(5) day reading range). If the billing period is extended more than five (5) days, the Company will not apply the higher tiered rate if the Customer's higher usage is solely attributable to the extended billing period.

8.03 Measurement and Evidence of Consumption:

Power and energy shall be measured for each point of delivery by one meter for each type of service rendered; and the Company's readings and records thereof shall be accepted and received, at all times and places as prima facie evidence of the quantity of electricity used by the Customer at the point of delivery.

(1) Conjunctive Billing: The Company does not permit conjunctive billing. Each point of delivery to the same customer constitutes a separate service, and bills for two (2) or more points of delivery to the same customer shall be calculated separately for each point of delivery; however, where more than one (1) meter is used to measure the same type of service, although only one point of delivery is involved, each such meter shall be calculated and billed separately, as though it were a separate service, until such time as the Customer rearranges his facilities to take all of the same type of service through a single meter.

(2) Unread Meters: When the Company is unable to read a meter due to circumstances beyond the control of the Company, such as inaccessibility of meters because of flood or stormy conditions, the Company may render a minimum or estimated bill.

8.04 Delinquent Bills:

Bills are due when rendered and become delinquent if not paid within twenty (20) days after the date of mailing or delivery. A late payment charge will be applied to accounts that have past due balances, in accordance with the Company's Rate Schedule SC-1. Non-receipt of bills by customer shall not release or diminish the obligation of the Customer with respect to payment thereof on time.

8.05 Vacating or Change of Occupancy:

When a customer vacates a premise served by the Company, or when a change of occupancy therein takes place, the outgoing customer shall notify ~~the nearest office of~~ the Company not less than three (3) days prior to the date of vacating or change, as the case may be; and the outgoing customer shall be held responsible for all electric service used on such premises until such notice is received and service is disconnected, or until application for service at said location has been made by a new customer and accepted by the Company, whichever first occurs.

8.06 Service Charges:

Service Charges shall be made for each establishment or re-establishment of service, and for each returned check, in accordance with the Company's Rate Schedule SC-1.

8.07 Adjustment of Bills:

Adjustment of bills shall be made in accordance with regulations of the Florida Public Service Commission.

(Continued on Next Page)

PART VIII

BILLING
(Continued)

8.08 Net Metering for Customer-Owned Renewable Generation:

For customers with renewable generation ~~equipment~~ that have executed an interconnection agreement with the Company whose customer-owned renewable generation is eligible for net metering, where the purpose is to offset a customer's usage, not purposefully create excess energy by installing renewable generation larger than needed to offset usage and as further ~~as~~ defined by FPSC rule 25-6.065, monthly billing will be prepared in the following manner:

(1) At no additional cost to the customer, metering equipment will be installed by the Company capable of measuring the difference between the electricity supplied to the customer from the Company and the renewable electricity generated by the customer and delivered to the Company's electric grid.

(2) Meter readings will be taken monthly on the same cycle as required under the otherwise applicable rate schedule in accordance with normal billing practices.

(3) The Company will charge the customer for energy used by the customer in excess of the generation supplied by customer-owned renewable generation for the entire billing cycle in accordance with the otherwise applicable rate schedule.

(4) During any billing cycle, excess customer-owned renewable generation delivered to the Company's electric grid will be credited to the customer's energy consumption for the next month's billing cycle.

(5) Regardless of whether excess renewable energy is delivered to the Company's electric grid, the customer will be required to pay the greater of

i. the minimum charge as stated in their otherwise applicable rate schedule, or

ii. the applicable monthly customer charge plus the applicable demand charge for the monthly maximum 30-minute demand measured on the company's usage meter during the billing period in accordance with the otherwise applicable rate schedule

(6) For customers whose otherwise applicable rate schedule is a time of use (TOU) rate, the generation supplied by customer-owned renewable generation to the Company will be measured by the distinct TOU periods of that rate schedule and offset customer usage in the current month or subsequent periods using the distinct TOU periods of that rate schedule.

(7) Energy credits produced pursuant to section 4 above will accumulate and be used to offset the customer's energy usage in subsequent months for a period of not more than twelve months. After the end of each calendar year, the Company will credit the customer (on the February bill) for any unused energy credits at an average annual rate based on the COG-1, as-available energy tariff.

(8) Excess renewable generation by the customer of record ~~energy consumption~~ will be applied only to the service provided at the location of the customer's renewable generation system and will not be applied to other locations or services at the same location that the customer may take from the Company.

(9) When a customer leaves the Company's system, unused credits for excess renewable kWh generated will be credited to the customer at an average annual rate based on the COG-1, as-available energy tariff.

(10) The customer may, at their sole discretion, choose to take service under the Company's standby or supplemental service rate, if available. When a customer elects to take service under a standby or supplemental tariff, any excess renewable generation ~~consumption~~ credited from prior periods in accordance with provision number 4 above, will be considered supplemental energy for billing purposes.

(Continued on Next Page)

PART VIII

BILLING
(Continued)

8.09 Budget Billing ~~Plan~~ Program (Optional):

Residential

A customer may elect to be billed for service hereunder by an alternative-billing ~~plan~~program called the "Budget Billing ~~Plan~~Program." The Budget Billing Program provides the customer the choice between two options: ~~This billing plan provides for payments on an averaged monthly installment basis rather than payments on an actual monthly usage basis.~~

1. Quarterly Budget Billing Program – The Quarterly Budget Billing Program provides for the Company to bill the customer, commencing with the next full month's bill and for the next two successive months, an amount equal to one-twelfth (1/12) of the cost for all electric service, excluding billings for Rate Schedule LS-1, rendered at the premises during the immediately preceding twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   An updated amount to be billed for each of the next three consecutive months shall be calculated to be the amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the then immediately preceding twelve-month period under the customer's respective rate schedule.

   The customer's bill for each month of subsequent quarterly periods shall be similarly calculated. At the end of the initial 12-month period that the customer's election is in effect, and at the end of each twelve-month period thereafter that the customer's election is in effect, the Company will determine the difference between the cost for actual electric services rendered at the premises under the customer's respective rate schedule and the amounts billed through the budget billing program for those twelve months, and the Company shall add or subtract, as appropriate, one-twelfth (1/12) of that difference to each of the next twelve bills to be sent to the customer.

   If at any time it is apparent that the customer's expected use of services has been over or underestimated, the Company shall have the right to revise the estimate and modify the succeeding billings accordingly. When the billings have been re-estimated, the Company will advise the customer of the revised amount to be paid.

2. Annual Budget Billing Program – This budget billing program provides for the Company to bill the customer, commencing with the next full month's bill and for the next ten (10) successive months, an amount equal to one-twelfth (1/12) of the estimated cost for all electric service, excluding billings for Rate Schedule LS-1, rendered at the premises during the next twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   During the first eleven months the cost of each month's service calculated under the customer's respective rate schedule will be charged to the customer's account, and all payments made by the customer will be credited to this amount. The bill rendered on the twelfth month will include the adjustment for the difference between the actual billing for the first eleven months and the payments made by the customer during the same period.

   If at any time during the first eleven months it is apparent that the customer's expected use of service has been over or under estimated, the Company shall have the right to revise the estimate and modify the succeeding monthly billings accordingly. When the monthly payments have been re-estimated, the Company will advise the customer of the revised amount to be paid.

~~Under the Budget Billing Plan, the monthly billing is determined as follows:~~

~~1. The Annual Base Amount is calculated using the most recent twelve (12) months' billings for the premise and then averaged and rounded to the nearest whole dollar (Monthly Budget Billing Amount). If the customer has not resided at the premise for twelve (12) months, the Annual Base Amount will be determined by the customer's available monthly billings plus the previous occupant's billings. If the premise is new, a twelve (12) month estimated billing would be used.~~

(Continued on Next Page)

~~2. The Monthly Budget Billing Amount is recalculated every third month using the most recent Annual Base Amount plus any deferred balances (the difference in prior billings made under the Budget Billing Plan and that of actual charges).~~

$$\text{Monthly Budget Billing Amount} = \frac{\text{12 Month Summation Actual or Est. Annual Base}}{12} + \text{Deferred Balance}$$

~~If the difference between the newly calculated Monthly Budget Billing Amount and the current Monthly Budget Billing Amount is greater than $5 or 10%, then the Monthly Billing Amount will be re-established at the newly calculated amount (rounded to the nearest whole dollar).~~

~~1. At the customer's option (in lieu of carrying the deferred balance forward in the recalculation of the Monthly Budget Billing Amount) any deferred balance that is outstanding at the customer's annual review may be settled either through being applied to the customer's next bill (if a credit balance) or direct payment to the Company (if a debit balance).~~

A customer electing to enroll in the Budget Billing Program without prior usage history at the service location, a calculation based upon the characteristics of the premise. A customer may request termination of the Budget Billing ~~Plan~~ Program at any time. ~~The Company may terminate application of the Plan to any Customer whose balance due becomes sixty (60) days delinquent. Upon termination of the Plan or disconnection of service, the Customer must settle the account in full. Once the Customer has terminated, he or she may not rejoin the plan for twelve (12) months.~~ If the customer misses two consecutive monthly Budget Billing Program installments, they will be removed from the program. At removal, the deferred (or accumulated) balance/credit will become due/credited to the next invoice which may also reflect any applicable late payment charges and/or disconnection notice in accordance with standard procedures.

~~**Non-residential**~~

~~Any GS-1 or GSD-1 Customer who has~~

- ~~no delinquent balances;~~
- ~~has been at the same location for 12 consecutive months with the Company;~~
- ~~not had more than one (1) late payment notice during the preceding 12 months;~~
- ~~not made a payment with a dishonored check during the preceding 12 months;~~
- ~~not had a disconnection of service for nonpayment of bill during preceding 12 months;~~
- ~~the total required deposit; and~~
- ~~met the Company's requirements for the establishment of credit~~

(Continued on Next Page)

PART VIII

BILLING
(Continued)

Non-residential

Any GS-1 or GSD-1 Customer who has no delinquent balances is eligible to participate in the Budget Billing Program described below for GS-1 and GSD-1 rate billings, excluding billings for Rate Schedule LS-1. However, GS-1 or GSD-1 Customers that participate in the following will not be eligible to participate in this Budget Billing Program: Automatic Landlord revert to Owner contracts; Shared Solar; Net Metering; Unmetered Service; Premier Power Service; Summary/Collective Billing. The Budget Billing Program provides the customer the choice between two options:

1. Quarterly Budget Billing Program – The Quarterly Budget Billing Program provides for the Company to bill the customer, commencing with the next full month's bill and for the next two successive months, an amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the immediately preceding twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   An updated amount to be billed for each of the next three consecutive months shall be calculated to be the amount equal to one-twelfth (1/12) of the cost for all electric service rendered at the premises during the then immediately preceding twelve-month period under the customer's respective rate schedule.

   The customer's bill for each month of subsequent quarterly periods shall be similarly calculated. At the end of the initial 12-month period that the customer's election is in effect, and at the end of each twelve-month period thereafter that the customer's election is in effect, the Company will determine the difference between the cost for actual electric services rendered at the premises under the customer's respective rate schedule and the amounts billed through the budget billing program for those twelve months, and the Company shall add or subtract, as appropriate, one-twelfth (1/12) of that difference to each of the next twelve bills to be sent to the customer.

   If at any time it is apparent that the customer's expected use of services has been over or underestimated, the Company shall have the right to revise the estimate and modify the succeeding billings accordingly. When the billings have been re-estimated, the Company will advise the customer of the revised amount to be paid.

2. Annual Budget Billing Program – This budget billing program provides for the Company to bill the customer, commencing with the next full month's bill and for the next ten (10) successive months, an amount equal to one-twelfth (1/12) of the estimated cost for all electric service rendered at the premises during the next twelve-month period while factoring in any previously accumulated credit or balance under the customer's respective rate schedule.

   During the first eleven months the cost of each month's service calculated under the customer's respective rate schedule will be charged to the customer's account, and all payments made by the customer will be credited to this amount. The bill rendered on the twelfth month will include the adjustment for the difference between the actual billing for the first eleven months and the payments made by the customer during the same period.

   If at any time during the first eleven months it is apparent that the customer's expected use of service has been over or under-estimated, the Company shall have the right to revise the estimate and modify the succeeding monthly billings accordingly. When the monthly payments have been re-estimated, the Company will advise the customer of the revised amount to be paid.

~~is eligible to participate in the Budget Billing Plan described below for GS-1 and GSD-1 rate billings. However, GS-1 or GSD-1 Customers that participate in the Premier Power Service Rider and/or Summary Billing will not be eligible to participate in this Budget Billing Plan.~~ A customer electing to enroll in the Budget Billing Program without prior usage history at the service location, a calculation based upon the characteristics of the premise and will default to the quarterly Budget Billing Program option to help establish accurate payment estimation. A Customer may terminate participation in the Budget Billing ~~Plan~~ Program at any time. ~~and may be terminated from the Budget Billing Plan by Duke Energy Florida, LLC if the Customer becomes subject to collection action on this service account. Once a Customer's participation in the Budget Billing Plan has terminated he/she may not rejoin the~~

~~Budget Billing Plan for twelve (12) months following the date of termination.~~ If the customer misses two consecutive monthly Budget Billing Program installments, they will be removed from the program. At removal, the deferred (or accumulated) balance/credit will become due/credited to the next invoice which may also reflect any applicable late payment charges and/or disconnection notice in accordance with standard procedures.

~~This billing plan provides for payments on an averaged monthly installment basis rather than payments on an actual monthly usage basis.~~

~~Under the Budget Billing Plan, the monthly billing is determined as follows:~~

~~1. The Annual Base Amount is calculated using the most recent twelve (12) months' billings for the premise and then averaged and rounded to the nearest whole dollar (Monthly Budget Billing Amount).~~
~~2. The Monthly Budget Billing Amount is recalculated every third month using the most recent Annual Base Amount plus any deferred balances (the difference in prior billings made under the Budget Billing Plan and that of actual charges).~~

$$\text{Monthly Budget Billing Amount} = \frac{\text{12 Month Summation Actual or Est. Annual Base}}{12} + \text{Deferred Balance}$$

~~If the difference between the newly calculated Monthly Budget Billing Amount and the current Monthly Budget Billing Amount is greater than 10% then the Monthly Billing Amount will be re-established at the newly calculated amount (rounded to the nearest whole dollar).~~
~~3. At the customer's option (in lieu of carrying the deferred balance forward in the recalculation of the Monthly Budget Billing Amount) any deferred balance that is outstanding at the customer's annual review may be settled either through being applied to the customer's next bill (if a credit balance) or direct payment to the Company (if a debit balance).~~

~~A customer may request termination of the Budget Billing Plan at any time. The Company may terminate application of the Plan to any Customer whose balance due becomes fourteen (14) calendar days delinquent. Termination of any one account for delinquency may subject all other Customer's participating accounts to termination of the plan. Upon termination of the Plan or disconnection of service, the Customer must settle the account in full. Once the Customer has terminated, he or she may not rejoin the plan for twelve (12) months.~~

PART X

DISCONTINUANCE AND WITHHOLDING OF SERVICE

10.01 Grounds for Discontinuance or Withholding of Service:

The Company may refuse or discontinue service to a customer under any of the conditions provided for under Section 25-6.105 of the Rules of the Florida Public Service Commission. The Company may also refuse or discontinue service for the following reasons:

(1) For actions or threats made by a Customer, or anyone on the Customer's premises, which are reasonably perceived by a Company employee as violent or unsafe, after affording the Customer reasonable opportunity to cease from any further act of violence or unsafe condition. However, where the Company believes a dangerous condition exists on the Customer's premises, service may be discontinued without notice.

(2) For residential customers, the Company may withhold service if the Customer fails to provide a form of identification acceptable to the Company, including but not limited to a valid social security number, tax identification number, or driver's license.

(3) For service requested by firms, partnerships, associations, corporations, etc., the Company may withhold service if the Customer fails to provide proof that a duly authorized person is making the application for service and/or if the Customer is not registered with a governmental agency as licensed to do business in Florida.

10.02 Notice of Discontinuance:

The Company will give the Customer as much written notice of discontinuance of service as may be reasonably practical.

10.03 Medically Essential Service:

For purposes of this section, a Medically Essential Service Customer is a residential customer whose electric service is medically essential, as affirmed through the certificate of a doctor of medicine licensed to practice in the State of Florida. Service is "medically essential" if the customer has continuously operating electric-powered medical equipment necessary to sustain the life of or avoid serious medical complications requiring immediate hospitalization of the customer or another permanent resident at the service address. The physician's certificate shall explain briefly and clearly, in non-medical terms, why continuance of electric service is medically essential and shall be consistent with the requirements of the Company's tariff. A customer who is certified as a Medically Essential Service Customer must renew such certification periodically through the procedures outlined above. The company may require certification no more frequently than once every twelve (12) months.

The Company shall provide Medically Essential Service Customers with a limited extension of time, not to exceed thirty (30) days, beyond the date service would normally be subject to disconnection for non-payment of bills (following the requisite notice pursuant to Rule 25-6.105(5) of the Florida Administrative Code). The Company shall provide the Medically Essential Service Customer with written notice specifying the date of disconnection based on the limited extension. The Medically Essential Service Customer shall be responsible for making mutually satisfactory arrangements to ensure payment within this additional extension of time for service provided by the Company and for which payment is past due, or to make other arrangements for meeting the medically essential needs.

No later than 12 noon one (1) day prior to the scheduled disconnection of service of a Medically Essential Service Customer, the Company shall attempt to contact such customer by telephone in order to provide notice of the scheduled disconnect date. If the Medically Essential Service Customer does not have a telephone number listed on the account, or if the utility cannot reach such customer or other adult resident of the premises by telephone by the specified time, a field representative will be sent to the residence to attempt to contact the Medically Essential Service Customer, no later than 4:00 p.m. of the day prior to scheduled disconnection. If contact is not made, however, the Company may leave written notification at the residence advising the Medically Essential Service Customer of the scheduled disconnect date; thereafter, the Company may disconnect service on the specified date. The Company will grant special consideration to a Medically Essential Service Customer in the application of Rule 25-6.097(3) of the Florida Administrative Code.

In the event that a customer is certified as a Medically Essential Service Customer, the customer shall remain solely responsible for any backup equipment and/or power supply and a planned course of action in the event of a power outage. The Company does not assume, and expressly disclaims, any obligation or duty: to monitor the health or condition of the person requiring medically essential service; to insure continuous service; to call, contact, or otherwise advise of service interruptions; or, except as expressly provided by this section, to take any other action (or refrain from any action) that differs from the normal operations of the Company.

10.04 Liability for Discontinuance:

Whenever the Company shall have the right to discontinue service to a customer, such right may be exercised without any liability for loss, damage, or injury resulting directly or indirectly from lack of electric service; and the Company shall be under no obligation or duty to ascertain whether such discontinuance would be likely to result in any such loss, damage, or injury.

10.05 Reconnection:

Service may be reconnected after those conditions which caused service to be discontinued have been corrected. A service charge may be applicable as provided for under Rate Schedule SC-1.

10.06 Customer's Deposit:

Where valid conditions exist, service may be discontinued whether or not the amount of the Customer's deposit is sufficient to cover the Customer's bill; and, where said deposit has been applied toward the settlement of such bill, service will not be reconnected until a satisfactory deposit is restored.

~~**10.04 Liability for Discontinuance:**~~

~~Whenever the Company shall have the right to discontinue service to a customer, such right may be exercised without any liability for loss, damage, or injury resulting directly or indirectly from lack of electric service; and the Company shall be under no obligation or duty to ascertain whether such discontinuance would be likely to result in any such loss, damage, or injury.~~

~~**10.05 Reconnection:**~~

~~Service may be reconnected after those conditions which caused service to be discontinued have been corrected. A service charge may be applicable as provided for under Rate Schedule SC-1.~~

~~**10.06 Customer's Deposit:**~~

~~Where valid conditions exist, service may be discontinued whether or not the amount of the Customer's deposit is sufficient to cover the Customer's bill; and, where said deposit has been applied toward the settlement of such bill, service will not be reconnected until a satisfactory deposit is restored.~~

PART XI

UNDERGROUND RESIDENTIAL DISTRIBUTION POLICY

11.01 Definitions:

The following words and terms used under this policy shall have the meaning indicated:

(1) Applicant: Any person, partnership, association, corporation, or governmental agency controlling or responsible for the development of a new subdivision or dwelling unit and applying for the construction of underground electric facilities.

(2) Building: Any structure, ~~within subdivision~~and excluding a Townhouse, designed for residential occupancy and containing less than five (5) individual dwelling units.

(3) Commission: Florida Public Service Commission.

(4) Company: Duke Energy Florida, LLC.

(5) Customer Provided and Installed Conduit: Schedule 40 PVC grey electrical grade conduit, purchased by the customer on the open market and installed meeting Company~~Duke Energy~~ guidelines. Diameter is to be specified by Company~~Duke Energy~~ based upon the type of conductor.

(6) Direct Burial: A type of construction involving the placing of conductors in the ground without the benefit of conduit or ducts. Other facilities, such as transformers, may be above ground.

(7) Distribution System: Electric service facilities consisting of primary and secondary conductors, service laterals, transformers, and necessary accessories and appurtenances for the furnishing of electric power at utilization voltage.

(8) Feeder Main: A three-phase primary installation which serves as a source for primary laterals and loops through suitable overcurrent devices.

(9) Final Grade: The ultimate elevation of the ground, paved or unpaved, which will prevail in a subdivision or tract of land including drainage ditches and or swales.

(10~~9~~) Mainline: Portions of the subdivision including primary and secondary voltage conductors but excluding services running to a dwelling.

(11~~0~~) Mobile Home (Trailer): A non-self propelled vehicle or conveyance, permanently equipped to travel upon the public highways, that is used either temporarily or permanently as a residence or living quarters.

(12~~1~~) Multiple-Occupancy Building: A structure erected and framed of component structural parts and designed to contain five (5) or more individual dwelling units.

(13~~2~~) Point of Delivery: The point where the Company's facilities~~wires or apparatus~~ are connected to those of the Customer's service entrance. The point of delivery shall be determined by the Company.

(14~~3~~) Primary Lateral: That part of the electric distribution system whose function is to conduct electricity at the primary level from the feeder main to the transformers serving the secondary street mains. It usually consists of a single-phase conductor or insulated cable, together with necessary accessory equipment for supporting, terminating and disconnecting from the primary mains by a fusible element.

(15~~4~~) Service Lateral: The underground service conductors between the street or rear property main, including any risers at a pole or other structure or from transformers, and the first point of connection to the service entrance conductors in a terminal or meter box on the exterior building wall.

(16~~5~~) Subdivision: The tract of land which is divided into five (5) or more building lots or upon which five (5) or more separate dwelling units are to be located, or the land on which is to be constructed new multiple-occupancy buildings.

(Continued on Next Page)

~~(17~~6) ~~Townhouse: A one (1) family dwelling unit of a group of three (3) or more such units separated only by firewalls. Each townhouse unit shall be constructed upon a separate lot and serviced with separate utilities and shall otherwise be independent of one another.~~

(Continued on Next Page)

11.01 Definitions (continued):

(17) Townhouse: A one (1)-family dwelling unit of a group of three (3) or more such units separated only by firewalls. Each townhouse unit shall be constructed upon a separate lot and serviced with separate utilities and shall otherwise be independent of one another.

11.02 GENERAL:

(1) Application:

Underground electric distribution facilities are offered in lieu of overhead facilities in accordance with these Rules and Regulations for:

a) Residential Subdivision and Developments (Part 11.03)
b) New Service Laterals from Overhead Systems (Part 11.04)
c) Replacement of Existing Overhead Service (Part 11.05)
d) Multiple-Occupancy Residential Buildings (Part 11.06)

(2) Early Notification and Coordination:

In order for the Company to provide service when required, it is necessary that the Applicant notify the Company during the early stages of planning major projects. Close coordination is necessary throughout the planning and construction stages by the Company, the architect, the builder, the subcontractors, and the consulting engineer to avoid delays and additional expense. Particular attention must be given to the scheduling of the construction of paved areas and the various sub-grade installations of the several utilities.

(3) Changes to Plans, Layout, or Grade:

The Applicant shall pay for any additional costs imposed ~~ncurred~~ on ~~by~~ the Company by Applicant including, but not limited to, engineering design, administration and relocation expenses, due to changes made subsequent to the agreement ~~by the Applicant~~ in the subdivision or development layout or final grade. ~~as originally agreed upon between the Applicant and Company.~~

(4) Underground Installation Not Covered:

Where the Applicant requests or governmental ordinance mandates underground electric facilities for residential subdivisions not falling within the dwelling units per acre density limitation as specified in Part 11.03(2)(a) or for residential developments of less than five (5) building lots and where overhead facilities would otherwise be provided, the Applicant shall pay the Company the estimated differential cost between the underground facilities and the suitable overhead facilities as determined by using the Company's current standard estimating data. The Applicant shall also provide necessary rights of way and easements as given in Section 11.02(7).

(5) Type of System Provided:

The costs quoted in these Rules are for underground residential distribution facilities of standard Company design with ~~direct-buried cable and~~ above-grade appurtenances. Unless otherwise stated, service provided will be 120/240-volt single phase. If other types of facilities are requested by the Applicant or required by governmental authority, the Applicant will pay the additional costs, if any.

(6) Ownership:

The Company will install, own, and maintain the electric distribution facilities up to the designated point of delivery except as otherwise noted. Any payment made by the Applicant, under the provisions of these Rules will not convey to the Applicant any rights of ownership.

(7) Rights of Way and Easements:

(a) General Requirements: The Company shall construct, own, operate, and maintain distribution lines within the Applicant's subdivision only along easements, public streets, roads and highways which the Company has the legal right to occupy, and on public lands and private property across which rights of way and easements satisfactory to the Company may be obtained without cost or condemnation to the Company.

~~(b) Scheduling, Clearing, and Grading: Rights of way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service~~

(Continued on Next Page)

~~requirements and must be cleared of trees, tree stumps, paving and other obstructions, staked to show property lines and final grade, and must be graded to within six (6) inches of final grade by the Applicant before the Company will commence construction, all at no charge to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer locations.~~

(Continued on Next Page)

(7) Rights of Way and Easements (Continued):

(c) Scheduling, Clearing, and Grading: Rights of way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstructions, staked to show property lines and final grade, and must be graded to within six (6) inches of final grade by the Applicant before the Company will commence construction, all at no charge to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer locations.~~Public Rights of Way: Where underground distribution facilities are located in dedicated road or street right-of-way, no easement is required.~~

(d) Recorded Public Easements: Where underground distribution facilities are located on private property, wholly within an area covered by a recorded subdivision utility easement, namely a reservation, and recorded plat of an easement for public utility purposes, no other easement is required.

(e) Service Laterals: Where underground service conductors are located on private property and portions not covered by recorded subdivision utility easement are wholly within the private property they service no easement is required.

(f) Other Locations: Where underground distribution facilities are located on private property other than as described in Part 11.02(7)(a) or 11.02(7)(e), easements are required and shall be prepared as outlined in instructions prepared by the Real Estate Department.

(g) Blanket Easements: Where underground primary and secondary distribution facilities for service to a mobile home park or a multiple occupancy project are located on a tract of land having one ownership and the easement area cannot be described without a detailed survey, a blanket easement covering the entire premises may be utilized at the discretion of the Division Engineer.

(8) Damage to Company's Equipment:

The Applicant shall be responsible to ensure that the Company's distribution system, once installed, is not damaged, destroyed, or otherwise disturbed during the construction of the project. This responsibility shall extend not only to those in ~~his~~Applicant's employ, but also to Applicant's~~his~~ subcontractors, and ~~he~~Applicant shall be responsible for the full cost of repairing such damage.

(9) Charges:

The Company shall not be obligated to install any facilities within a subdivision until satisfactory arrangements for the payment of applicable charges, if any, have been completed.

(10) Special Conditions:

The costs quoted in these rules are based on conditions which permit employment of rapid construction techniques. The Applicant shall be responsible for necessary additional hand digging expenses other than what is normally provided by the Company. The Applicant is responsible for clearing, compacting, boulder and large rock removal, stump removal, paving, and addressing other special conditions. Should paving, grass, landscaping or sprinkler systems be installed prior to the construction of the underground distribution facilities, the Applicant shall pay the added costs of trenching and backfilling and be responsible for restoration of property damaged to accommodate the installation of underground facilities.

11.03 UNDERGROUND DISTRIBUTION FACILITIES FOR RESIDENTIAL SUBDIVISIONS AND DEVELOPMENTS.

(1) Availability:

When requested by the Applicant, the Company will provide underground electric distribution facilities in accordance with its standard practices in:

(a) recognized residential subdivisions of five or more building lots;

(b) tracts of land upon which five or more separate dwelling units are to be located;

(c) tracts of land upon which new multiple-occupancy buildings are to be constructed.

For building containing five or more dwelling units, see Part 11.06 of these Rules.

(Continued on Next Page)

(2) Contribution by Applicant (continued):

(c) Credits (not to exceed the "average differential costs" stated in Section 11.03~~above~~) will be allowed where, by mutual agreement, the Applicant provides trenching and backfilling for the use of the Company's facilities in lieu of a portion of the cash payment described above. These credits, based on the Company's design drawings, are:

Primary and/or Secondary Systems,
for each Foot of Trench.....$3.35

Service Laterals,
for each Foot of Trench.....$3.35

(3) Point of Delivery:

The point of delivery shall be determined by the Company and will be on the front half of the side of the building that is nearest the point at which the underground secondary electric supply is available to the property. The Company will not install a service on the opposite side of the building where the underground secondary electric supply is available to the property. The point of delivery will only be allowed on the rear of the building by special exception. The Applicant shall pay the estimated full cost of service lateral length required in excess of that which would have been needed to reach the Company's designated point of service.

(4) Location of Meter and Socket:

The Applicant shall install a meter socket at the point designated by the Company in accordance with the Company's specifications. Every effort shall be made to locate the meter socket in unobstructed areas in order that the meter can be read without going through fences, etc.

(5) Development of Subdivisions:

The above charges are based on reasonably full use of the land being developed. Where the Company is required to construct underground electric facilities through a section or sections of the subdivision or development where service will not be required for at least two (2) years, the Company may require a deposit from the Applicant before construction is commenced. This deposit, to guarantee performance, will be based on the estimated total cost of such facilities rather than the differential cost. The amount of the deposit, without interest, in excess of any charges for underground service will be returned to the Applicant on a prorata basis at quarterly intervals on the basis of installations to new customers. Any portion of such deposit remaining unrefunded, after five (5) years from the date the Company is first ready to render service from the extension, will be retained by the ~~c~~Company.

(6) Relocation or Removal of Existing Facilities:

If the Company is required to relocate or remove existing overhead and/or underground distribution facilities in the implementation of these Rules, all costs thereof shall be borne exclusively by the Applicant. These costs shall include costs of relocation or removal, the in-place value (less salvage) of the facilities so removed, and any additional costs due to existing landscaping, pavement or unusual conditions.

(7) Other Provisions:

If soil compaction is required by the Governmental or permitting agency ~~Applicant at~~ in right of way locations where Company trenching is done, an additional charge may be added to the charges set forth in this tariff. The charge will be estimated based on the Governmental or permitting agency's~~Applicant's~~ compaction specifications. The Company will not provide trench line soil compaction for the Applicant.

(Continued on Next Page)

11.04 UNDERGROUND SERVICE LATERALS FROM EXISTING SECONDARY ELECTRIC DISTRIBUTION SYSTEMS.

(1) New Underground Service Laterals:

When requested by the Applicant, the Company will install underground service laterals from overhead systems to newly constructed residential buildings containing less than five (5) separate dwelling units.

(2) Contribution by Applicant:

~~(a)~~ The Applicant shall pay the Company the following average differential cost between an overhead~~existing secondary~~ service lateral and an underground service lateral:

For Service Lateral up to 80 feet Duke Supplied and Installed Conduit $641.00
For Service Lateral up to 80 feet Customer Supplied and Installed Conduit.....$339.00

For each foot over 80 feet up to 300 feet Duke Supplied and Installed Conduit .....$0.00 per foot
For each foot over 80 feet up to 300 feet Customer Supplied and Installed Conduit.....$0.00 per foot

Service laterals in excess of 300 feet shall be based on a specific cost estimate.

~~(b) Credits will be allowed where, by mutual agreement, the Applicant provides trenching and backfilling in accordance with the Company specifications and for the use of the Company facilities, in lieu of a portion of the cash payment described above. These credits, based on the Company's design drawings, are as follows:~~

~~For each Foot of Trench $3.35~~

The provisions of Paragraphs 11.03(3) and 11.03(4) are also applicable.

11.05 UNDERGROUND SERVICE LATERALS REPLACING EXISTING RESIDENTIAL OVERHEAD SERVICES:

Applicability:

When requested by the Applicant, the Company will install underground service laterals from existing overhead lines as replacements for existing overhead services to existing residential buildings containing less than five (5) separate dwelling units.

Rearrangement of Service Entrance:

The Applicant shall be responsible for any necessary rearranging of his existing electric service entrance facilities to accommodate the proposed underground service lateral in accordance with the Company's specifications.

Trenching:

The Applicant shall also provide, at no cost to the Company, a suitable trench or installed conduit and perform the backfilling and any landscaping, pavement, or other suitable repairs. If the Applicant requests the Company to supply the trench or remove any additional equipment other than the Service Lateral, the charge to the Applicant for this work shall be based on a specific cost estimate.

Contribution by Applicant:

The charge excluding trenching costs shall be as follows:

For Service Lateral .....$1,762.00 per service

The Applicant may elect to provide and install conduit meeting current Company~~Duke Energy~~ construction specifications at no cost to the Company~~Duke Energy~~ in lieu of an open trench. The charge shall be as follows:

For Service Lateral .....$1,522.00 per service

(Continued on Next Page)

11.06 UNDERGROUND DISTRIBUTION FACILITIES TO MULTIPLE-OCCUPANCY RESIDENTIAL BUILDINGS:

(1) Availability:

Underground electric distribution facilities may be installed within the tract of land upon which multiple-occupancy residential buildings ~~containing five (5) or more separate dwelling units~~ will be constructed.

(2) Contribution by Applicant:

When feeder mains on tracts of land upon which multiple-occupancy buildings will be constructed are deemed necessary by the Company to provide and/or maintain adequate service, an underground installation is requested by the Applicant, or required by a governmental agency having the authority so to do, the Applicant shall contribute the differential costs provided in Section 10.3.2.b) and 10.3.3.c). There will be no contribution from the Applicant with respect to construction of underground distribution facilities other than feeder mains so long as the Company is free to construct such~~the~~ extensions in the most economical manner, and reasonably full use is made of the tract of land upon which the multiple-occupancy buildings will be constructed. Other conditions will require a contribution from the Applicant.

(3) Responsibility of Applicant:

(a) Furnish details and specifications of the proposed building or complex of buildings. The Company will use these in the design of the electric distribution facilities required to render service.

(b) Where the Company determines that the secondary points of delivery ~~transformers~~ are to be located inside the building, the Applicant shall provide:

i. The vault or vaults necessary for the transformers and the associated equipment, including the ventilation equipment.

ii. The necessary raceways or conduit for the Company's supply cables from the vault or vaults to a suitable point five (5) feet outside the building in accordance with the Company's plans and specifications.

iii. Conduits underneath all buildings when required for the Company's supply cables. Such conduits shall extend five (5) feet beyond the edge of the buildings for joining to the Company's facilities.

iv. The service entrance conductors and raceways from the Applicant's service equipment to the designated point of delivery within the vault.

(3) Responsibility of Applicant (Continued):

(c) Where the Company determines that the secondary points of delivery ~~transformers~~ are to be located outside the building, the Applicant shall provide:

i. The transformer enclosure or space for pad-mounted equipment, if required.

ii. The service entrance conductors and raceway from the Applicant's service equipment to the point of delivery designated by the Company at or near the building, and wholly on the Customer's property.

(4) Responsibility of the Company:

(a) The Company will:

i. Provide the Applicant with the Company's plans to supply the proposed building or complex of buildings, and specifications for the facilities to be provided by the Applicant.

ii. Furnish and install the primary or secondary conductors from existing or proposed facilities adjoining the property to the point of delivery.

iii. Furnish and install the necessary transformers and associated equipment located either outside the building or in the vault(s) within the building.

iv. Be solely responsible for the installation, operation, and maintenance of all of its facilities.

(5) Service Voltage:

The Company will supply service at one of the several secondary voltages available as mutually agreed upon between the Applicant and the Company.

PART XII

CHARGES FOR CONVERSION OF EXISTING OVERHEAD TO UNDERGROUND ELECTRIC DISTRIBUTION FACILITIES

12.01 DEFINITIONS:

The following words and terms used under this Part shall have the meaning indicated:

(1)	Applicant:	The Applicant is the person or entity seeking the undergrounding of existing or newly planned electric distribution facilities by the Company. When a developer requests local government development approval, the local government shall not be deemed the Applicant for purposes of these rules.
(2)	Commission:	Florida Public Service Commission.
(3)	Cost Estimate Fee:	A fee charged an Applicant by the Company for the purpose of preparing a cost estimate of the amount required for the Company to construct or convert particular distribution facilities as underground.
(4)	Company:	Duke Energy Florida, LLC~~Inc.~~
(5)	Distribution Facilities:	All electrical equipment of the Company required to deliver electricity to homes and businesses.
(6)	Facility Charge:	That charge required to be paid by an Applicant for the Company to construct or convert particular distribution facilities as underground.
(7)	Overhead:	Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed above ground on supporting poles.
(8)	Underground:	Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed below ground or on the ground.

12.02 GENERAL:

(1) Application:

Underground electric distribution facilities are offered in lieu of overhead facilities in accordance with these rules.

(2) Applicant Request:

An Applicant shall submit a request in writing for the Company to develop a cost estimate to accomplish the undergrounding of particular electric facilities. The request shall be accompanied by an appropriate fee and shall specify the following information:

(a) the area(s) being sought to be undergrounded;

(b) a list of all electric customers affected;

(c) an estimated time frame for undergrounding to be accomplished;

(d) details of any construction by the Applicant; and

(e) any other pertinent information which the Applicant possesses that may aid the Company in preparing an appropriate cost estimate.

(Continued on Next Page)

12.03 INSTALLATIONS NOT COVERED:

The following types of electrical installations are not addressed in these rules:

(A) Distribution lines, new or existing, in urban commercial area, urban residential area, rural residential area, or existing subdivisions will not be considered for undergrounding if sufficient permits or easements cannot be obtained. The request will not be considered unless all customers on both sides of the road or street who are served by the supply system to be undergrounded are included in the proposed conversion.

(B) Distribution lines in new residential subdivisions. These installations are covered under "Rules of the Florida Public Service Commission", Chapter 25-6, Part V, "Rules for Residential Electric Underground Extensions", and the Company's "General Rules and Regulations Governing Electric Service", Part XI.

(C) Individuals applying for undergrounding of service laterals from existing overhead lines. These applications will be covered by rules referenced in 12.03(B~~b~~) above.

(D) Electrical distribution circuits serving street or area lighting. Requests for undergrounding circuits of this category will be treated on an individual basis.

12.04 COST ESTIMATE FEES:

(1) Non-Binding Cost Estimate Fee:

The Company will provide a non-binding cost estimate related to the request at no cost to the Applicant. Such estimate shall not have any guarantee as to its accuracy and shall not be binding upon the Company.

(2) Binding Cost Estimate Fee

The following schedule of fees shall apply to the Applicant for engineering design time to establish a binding cost estimate by the Company for the request. Such fee shall be recognized as a credit in the Facility Charge determination if the Applicant enters into a construction contract within 180 days from date of receipt of the binding cost estimate. At the discretion of the Company, the time from submittal of the cost estimate to entering a contract may be extended beyond 180 days. A major scope change by the Applicant may require a new fee amount.

SCHEDULE OF BINDING COST ESTIMATE FEES

Facility Classification	Fee
Urban Commercial	$4,234 per mile
Urban Residential	$3,476 per mile
Rural Residential	$2,549 per mile
Low Density Subdivision	$ 15 per lot
High Density Subdivision	$ 13 per lot

(Continued on Next Page)

12.05 CONSTRUCTION CONTRACT:

(1) GENERAL:

Upon acceptance by the Applicant of the binding cost estimate, the Applicant shall execute a contract with the Company to perform the construction of the underground distribution facilities. The contract shall specify the type and character of system to be provided; establish the Facility Charge to be paid by Applicant prior to commencement of construction; specify details of construction to be performed by Applicant, if any; and address any other pertinent terms and conditions including those described in Part (4) below.

(2) FACILITY CHARGE:

Charge = Remaining net book value of existing overhead facilities to be removed;

plus, removal cost of existing overhead facilities;

minus, salvage value of existing overhead facilities;

plus, estimated construction cost of underground facilities including underground service laterals to residential customers meters or point of delivery for general service customers;

minus, estimated construction cost of overhead facilities including overhead service drops to customers' meters;

minus, qualifying binding cost estimate fee.

plus/minus, the net present value of the lifecycle operational costs differential including storm restoration.

The actual or estimated costs applied to the facility charge shall be consistent with the standards of the Company's approved Storm Protection Plan.

3) CONSTRUCTION BY APPLICANT:

If agreed upon by both the Applicant and the Company, the Applicant may construct or install portions of the underground system as long as such work meets the Company's engineering and construction standards. The Company will own and maintain the completed distribution facilities upon accepting the system as operational. The type of system provided will be determined by the Company's standards.

Any facilities provided by the Applicant will be inspected by Company inspectors prior to acceptance. Any deficiencies discovered as a result of these inspections will be corrected by the Applicant at Applicant's~~his~~ sole expense, including the costs incurred by performing the inspections. Corrections must be made in a timely manner by the Applicant, otherwise the Company will undertake the correction and bill the Applicant for all costs of such correction. These costs shall be added~~itional~~ to the original binding estimate.

(Continued on Next Page)

(4) OTHER TERMS AND CONDITIONS

(a) Easements:

Before the initiation of any project to provide underground electric distribution facilities pursuant to an Underground Facilities Conversions Agreement, the Applicant shall provide the Company, at no cost to the Company, all easements utilizing Company approved language and forms, including legal descriptions of such easements and all survey work associated with producing legal descriptions of such easements, specified as necessary by the Company to accommodate the requested underground facilities along with an opinion of title that the easements are valid. Failure to provide the easements in the manner set forth above within 180 days after the delivery of the binding cost estimate to the Applicant shall result in the expiration of the binding cost estimate, the return of any CIAC paid, and the termination of any Underground Facilities Conversions Agreement entered into between the Applicant and the Company.

(b) Scheduling, Clearing, and Grading:

Rights-of-way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstruction; staked to show property lines and final grade; and graded to within six (6) inches of final grade by the Applicant before the Company commences construction; all at no cost to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer, pullbox, and switch locations.

(c) Restoration:

All removal and restoration of buildings, roads, driveways, sidewalks, patios, fences, ditches, landscaping, sprinkler systems, and other utilities, etc., shall be the full responsibility of the Applicant and shall cause no cost to the Company. Removal of all construction debris not belonging to the Company shall be the responsibility of the Applicant.

(d) Other Joint Users on the Company Poles:

Prior to construction, the Applicant must make arrangements with any other joint users of the Company's poles to remove their facilities at no cost to the Company. The Applicant shall produce, if requested by the Company, executed agreements with all joint users guaranteeing this requirement. During construction, the Company will undertake coordination efforts directly with the joint users where required for removal of their facilities.

(e) Affected Electric Customers:

Prior to construction, the Applicant must make arrangements with all affected Company customers to prepare their premises and service entrance in a timely manner for underground service. All customers affected by the undergrounding request must agree to accept underground service. These customers' conversions will be at no cost to the Company. During construction, the Company will undertake coordination efforts directly with affected customers for their transfer to underground service.

(f) Damage to the Company's Underground Facilities:

The Applicant shall be responsible to ensure the Company's distribution facilities are not damaged, destroyed, or otherwise disturbed during construction. This responsibility shall extend not only to those in Applicant's~~his~~ employ, but also to ~~his~~Applicant's subcontractors, and ~~he~~Applicant shall be responsible for the full cost of repairing such damage.

(Continued on Next Page)

(4) Governmental Undergrounding Fee

(a) The Company will bill a monthly Governmental Undergrounding Fee to electric customers located in the Underground Assessment Area established by the local government. The Governmental Undergrounding Fee shall be based on a uniform percentage of customers' total net charges for electric service calculated to produce the Annual Recovery Amount, net of regulatory assessment fees, if any. Except as provided in Paragraph 2(a) of this Section 12.06, the total Governmental Undergrounding Fee billed to a customer's account (irrespective of the number of Underground Assessment Areas in which the customer may be located) shall not exceed the lesser of (i) 15 percent of the customer's total net electric service charges, or (ii) a maximum monthly amount of $30 for residential customers and $50 for each 5,000 kilowatt-hour increment of consumption for non-residential customers. The maximum monthly amount shall apply to each line of billing in the case of a customer receiving a single bill for multiple service points, and to each occupancy unit in the case of a master metered customer.

(b) The application of a Governmental Undergrounding Fee based on a higher percentage or maximum monthly amount than specified in Paragraph 4(a) of this Section 12.06 shall require approval of the Florida Public Service Commission.

(c) The Governmental Undergrounding Fee shall be recalculated for each 12-month period during its effectiveness following the initial annual period. The recalculation shall be based on the Company's most current projections for the upcoming period, and shall include a true-up adjustment based on the difference between projected and actual recovery for the prior 12-month period.

(5) Optional Utility Financing

At the option of the local government, the Company may~~will~~ provide financing for the Facility Charge and Governmental Cost of the undergrounding project, subject to any limitation on the funds made available for such purpose at the Company's discretion. Upon request, the Company will advise the local government at the time the binding cost estimate is presented pursuant to Paragraph 12.04(2) of this Part XII whether sufficient funds are available at that time to finance the cost of the undergrounding project. The interest rate applicable to such optional financing will be determined by the Company commensurate with normal risk considerations such as the credit worthiness of the local government, the total cost subject to financing, the expected duration of the undergrounding project, and any other identifiable risks associated with financing the project.

(6) Customer Notification

At least 30 days prior to the execution of a Local Government Underground Cost Recovery Contract pursuant to Subsection (7) of this Section 12.06, the local government shall mail a notice to each electric customer located within the proposed Underground Assessment Area stating its intention to recover the cost of the underground conversion project in question through a Governmental Undergrounding Fee on the customer's electric bill. The notice shall include, at a minimum, (i) a description of the underground conversion project, (ii) an estimate of the Governmental Undergrounding Fee (as a percentage of total net electric charges) and the maximum monthly amount, (iii) the month in which billing of the Fee is expected to commence, (iv) the number of years over which the Fee is to be imposed, and (v) a postage-prepaid form on which the customer may submit comments to the local government.

(7) Underground Cost Recovery Contract

The local government shall enter into a contract with the Company, the form of which has been approved by the Florida Public Service Commission or its staff, establishing the specific terms and conditions for underground capital cost recovery consistent with the provisions of this Section 12.06.

Company will prepare a workpaper showing the calculation of the Governmental Undergrounding Fee (attached hereto as Attachment C and incorporated herein by its reference).

2. The parties agree that if the Local Government desires to apply a Governmental Undergrounding Fee based on a higher percentage or maximum monthly amount than specified in paragraph (D)(1) above, then the parties shall jointly petition the Florida Public Service Commission for approval of such increased amount. Absent such approval, the amounts for the Governmental Undergrounding Fee shall not be set above those maximum amounts.

3. The Governmental Undergrounding Fee shall be recalculated for each twelve (12) month period during its effectiveness following the initial annual period. The recalculation shall be based on the Company's most current projections for the upcoming period, and shall include a true-up adjustment based on the difference between projected and actual recovery for the prior twelve (12) month period. The first annual true-up period for this Contract shall begin with the first billing cycle for the month following the implementation of the billing for the Governmental Undergrounding Fee.

4. No later than the twentieth (20th) day of the following month, the Company shall pay the Local Government the aggregated total Governmental Undergrounding Fee that the Company has collected from each customer in the Underground Assessment Area. The monthly payment shall be made by wire transfer. Any monthly payment or any portion thereof made twenty (20) calendar days after the due date without good cause shall be subject to interest at the 30-day commercial paper rate per annum.

E. Customer Notification:

1. At least thirty (30) calendar days before the execution of this Contract, the Local Government shall mail a notice to each electric customer located within the proposed Underground Assessment Area stating the Local Government's intention to recover the cost of the underground Conversion project in question through a Governmental Undergrounding Fee on the customer's electric bill. The notice shall include, at a minimum: (i) a description of the underground Conversion project; (ii) an estimate of the Governmental Undergrounding Fee (as a percentage of total net electric charges) and the maximum monthly amount; (iii) the month in which billing of the Governmental Undergrounding Fee is expected to commence; (iv) the number of years over which the Governmental Undergrounding Fee is to be imposed; and (v) a postage-prepaid form on which the customer may submit comments to the Local Government. The actual notice sent to the customers is attached to this Contract as Attachment D.

2. The Local Government warrants and represents that it has timely completed the obligation referenced in the above paragraph by timely mailing the requisite notice to all required customers.

3. The Local Government recognizes that the Company will direct any and all questions from customers regarding this Contract and the creation of the Underground Assessment Area to the Local Government, specifically _____ (insert name of person or department).

F. Assignment:

The Local Government shall not assign, delegate or otherwise dispose of all or any portion of the Contract (including any benefits or obligations hereunder) without the prior written consent of the Company. Upon prior written notice and with the consent of Company (such consent not to be unreasonably withheld), the Local Government may assign the Contract. The Company, in Company's sole discretion, may require any Company approved Local Government assignee to execute a new contract and agree to all the requirements of the new contract prior to approval of the assignment request. Any attempted assignment or delegation without the Company's prior written consent shall be ineffective and void. The terms and conditions of this Contract shall be binding upon and inure to the benefit of any and all successors and/or assigns of the Company. The terms and conditions of this Contract shall be binding upon and inure to the benefit of any and all successors and/or approved assigns of the Local Government. Notwithstanding any provision herein, the Agreement shall not confer or be construed in any manner to confer, directly or indirectly, any rights, privileges, benefits, and/or remedies, upon any parties other than the parties hereto and their respective successors and/or permitted assigns.

(Continued on next page)

~~C. Miscellaneous:~~

~~1. In executing this Contract, the Company does not, nor should it be construed to extend its credit or financial support for the benefit of any third parties lending money to or having other transactions with the Local Government or any assignee of this Contract.~~

(Continued on next page)

G. Miscellaneous:

1. In executing this Contract, the Company does not, nor should it be construed to extend its credit or financial support for the benefit of any third parties lending money to or having other transactions with the Local Government or any assignee of this Contract.
2. This Contract shall be governed by and construed and enforced in accordance with the laws, rules and regulations of the State of Florida and the Tariff as may be modified, revised, supplemented, changed, or amended from time to time. In the event of any conflict between the terms of this Contract and the provisions of the Tariff, the provisions of the Tariff and any applicable Florida Public Service Commission rules shall control, as hereafter revised, amended, or supplemented.
3. The Tariff and associated technical terms and abbreviations, general rules and regulations and standard electric service requirements, as may be applicable, are incorporated by reference.
4. This Contract contains the entire agreement of the Company and Local Government relating to the subject matter herein and supersedes all previous and contemporaneous agreements, understandings, usages of trade, courses of dealing or representations, either written or oral, heretofore in effect between the Company and the Local Government.
5. This Contract may only be modified by a written agreement signed by both the Company and the Local Government expressly modifying the Contract. All provisions of the Contract providing for indemnification or limitation of or protection against liability shall survive the termination, cancellation, or expiration of the Contract.
6. This Contract shall terminate when the Company has fully collected the Government Cost and the Facility Charge from customers located in the Underground Assessment Area.

IN WITNESS WHEREOF, the Local Government has executed this Contract the day and year first written above.

~~DUKE ENERGY FLORIDA, INC.~~
~~LEAVE SERVICE ACTIVE~~REVERT TO OWNER AGREEMENT

The undersigned hereby agrees to participate in and authorizes Duke Energy Florida, LLC ("Duke Energy") to enroll the below specified properties in the Duke Energy Revert to Owner Program (the "RTO Program") subject to the terms and conditions set forth in this Revert to Owner Agreement (the "RTO Agreement").

1. **Property Owner(s), Authorized Representative and Account Information**.

Legal Name of Owner(s) ("Owner"):

Authorized Representative of Owner: . If different from Owner, please attach power of attorney or other authorization to act on behalf of Owner. Hereinafter Owner and its authorized representative may be collectively referred to as the "Customer."

Account name to revert to during periods of non-tenancy (the "RTO Account"):

Mailing Address:

Federal Tax ID: or Social Security #

Contact Name Contact Phone

Email Address:

2. **Program Description.** For properties that have been enrolled in the RTO Program, when a resident of an enrolled property requests disconnection of electric service to the unit, service to the unit will not be disconnected. Instead, Duke Energy will read the meter and automatically transfer the account to the Customer's RTO Account specified above; provided however, the service will not be automatically transferred to the RTO Account under any of the following circumstances:

a. if service to the premises has been disconnected for nonpayment of a bill or for violation of Duke Energy's Terms of Service (as defined below);
b. if an inspection is required by local government;
c. if improper changes are made to the electrical wiring at the premises or if Duke Energy's meter or other equipment serving the premises has been tampered with; or
d. If Duke Energy determines in its reasonable discretion that the premises or the use of electricity at the premises in in violation of Duke Energy's Terms of Service.

~~1.~~ **Obligation of Customer.** The Customer shall be responsible for all electric energy used on the premises of an enrolled property at all times during which the account has reverted to the RTO Account specified in this RTO Agreement, subject to and in accordance with Duke ~~**This Agreement is made by and between Duke Energy Florida, Inc. (the "Company") and ("Customer") and outlines the terms and conditions of the Leave Service Active Program.**~~

~~2.~~

~~3. The Company agrees to furnish electric energy to the premises of the Customer located at and to permit the use of such energy by the Customer and the Customer's tenants occupying rental units on the Customer's premises.~~

~~4.~~

~~5. The Customer agrees to be responsible for all electric energy used on the premises when such rental units are not~~

(Continued on next page)

being served in the name of a responsible tenant. The Customer agrees to use the same Customer name on all accounts and to provide the Company with a complete mailing address. The Customer agrees to keep all account information current, which includes, but is not limited to, the items contained herein.

6.

7. When a tenant requests a disconnect of service, the Company will obtain a meter reading and automatically transfer the service from the tenant's name to the Customer's name. When a tenant requests a reconnect of service, The Company will obtain a meter reading and transfer the service from the Customer's name to the tenant's name.

8.

9. The Leave Service Active Agreement is subject to the rules, regulations, and rate schedules for electric service on file with the Florida Public Service Commission (FPSC), and other applicable rules and laws, if any, as presently effective or as amended in the future. Unless expressly modified herein, the terms and conditions of existing Contract(s) for Electric Power Service and other Agreement(s), if any, between the "Company" and Customer shall remain in full force and effect. This Agreement shall remain in effect until appropriately terminated by either party. Thirty (30) days prior written notification of termination is required, unless otherwise stated herein. This Agreement does not prevent the "Company" from disconnecting service following proper notice, in accordance with applicable rules and regulations, in the event Customer fails to timely remit payment for electric service, fraudulently obtains electricity or otherwise violates Florida law or FPSC rules which justify said action.

10.

11. The signatories to this Agreement swear and affirm that the entity which on behalf of whom they are executing this Agreement have conferred upon them all pertinent rights to legally bind the entity to perform the covenants of this Agreement.

12.

13. The continuance of the Leave Service Active Program is subject to the above conditions. Failure to comply with any of the conditions of this Agreement, within the sole discretion of The Company can result in the immediate removal of all of Customer's accounts from the program. Customer will be sent written notification to the mailing address in the event of program termination.

14.

15. In witness hereof, the parties hereto have caused the Agreement to be executed by their duly authorized representatives.

16.

20. By (Signature) By (Signature)

21. Title: Title:

22. Date: Date:

3. Energy's Terms of Service for the applicable account.

4. **Enrolled Addresses**. Each of these property addresses: _____ will be enrolled addresses and will revert to the RTO Account pursuant to the terms of the RTO Program.

5. **Management of Enrolled Properties**. The Customer shall be responsible for keeping the property list in the RTO Agreement up to date, including by adding new properties or removing properties that are no longer subject to the RTO Program due to sale or any other reason. Adjustments to the property list may be made by owner or its designated property manager through an on-line self-service tool (the "Landlord Experience") or by contacting a Customer Care Specialist. An email address is required to participate in the RTO Program.

(Continued on next page)

6. **Terms of Service; Governing Law**. This Agreement is subject to the applicable rate schedules and the terms and conditions for electric service (the "Terms of Service") filed by Duke Energy with the Florida Public Service Commission (the "Commission") and other applicable rules, laws and regulations issued by the Commission or any federal, state or local governmental entity with jurisdiction over Duke Energy and the subject matter hereof (collectively, the "Governing Law"). In the event of any conflict between any term of this RTO Agreement and any applicable Governing Law, the Governing Law will prevail.

7. **Terms and Conditions.** This RTO Agreement shall be subject to the Terms and Conditions attached hereto as Exhibit "A" or any replacement thereto, which is incorporated herein by reference.

8. **Term.** This RTO Agreement shall be effective when signed by Customer and submitted to Duke Energy and shall remain in effect until terminated by Customer or Duke Energy in writing. Customer or Duke Energy may terminate this Agreement at any time by providing thirty (30) days written notice to the other party. The failure of Customer to recertify any enrolled address on a periodic (biennial) basis in accordance with the Terms and Conditions or as requested by Duke Energy from time to time may result in the removal of one or more enrolled addresses as determined by Duke Energy in a commercially reasonable manner.

9. **Representations and Warranties**. As of the date hereof and during the term of this RTO Agreement the undersigned Customer represents and warrants the following:
   a. such party has the capacity, authority, and power to execute, deliver, and perform under this RTO Agreement;
   b. this RTO Agreement constitutes legal, valid, and binding obligations enforceable against the Customer;
   c. the person who executes this RTO Agreement on behalf of Customer has full and complete authority to execute and bind the Owner to this RTO Agreement as an authorized representative of the Owner;
   d. Customer is acting on its own behalf and has made its own independent decision to bind itself under this RTO Agreement; and,
   e. Customer has completely read, fully understands, and voluntarily accepts every provision of this RTO Agreement.

10. **Electronic Signature**. By either signing and submitting this agreement, or by clicking "Accept Terms and Conditions" within the online enrollment process, the Customer hereby acknowledges and agrees that this RTO Agreement shall be deemed to be fully executed. Customer acknowledges and agrees that Customer's electronically applied and/or transmitted signatures shall have the same effect as manually applied or transmitted signatures.

Exhibit A
Terms and Conditions:

The Customer shall provide the Company with a valid email address to be eligible to participate in the RTO Program.

A self-service, online tool (the "Landlord Experience") will be provided by Duke Energy for use by Customers to enroll and manage properties participating in the RTO Program. The Customer is encouraged to use the Landlord Experience to enroll, manage and update its properties participating in the RTO Program; provided however, the Customer may request the assistance of Duke Energy's customer service representatives by contacting Duke Energy at the number specified in this RTO Agreement.

The Customer agrees to use the same Customer name on all enrolled accounts and to provide Duke Energy with a complete mailing address for each served premises. The Customer agrees to keep all account information current, which includes, but is not limited to, the items contained herein.

The Customer shall be obligated to pay any security deposit required under the Terms of Service including without limitation, in the event that a property enrolled in the RTO Program has been disconnected for non-payment while active in the Customer's name. All security deposits may be applied to amounts owed to Duke Energy or returned to Customer in accordance with the Terms and Service.

When a tenant requests a disconnect of service, Duke Energy will obtain a meter reading and automatically transfer the service from the tenant's name to the Customer's RTO Account. When a tenant requests a connect of service, Duke Energy will obtain a meter reading and transfer the service from the Customer's RTO Account to the tenant's name.

The Customer is responsible for recertifying the enrolled properties that it desires to continue in the RTO Program every 24 months from the date of the first enrollment. Failure of Customer to recertify any enrolled property within 24 months of its initial enrollment or recertification, may result in Duke Energy removing the un-recertified properties from the RTO Program. Provided however, removal of the un-recertified properties from the RTO Program does not terminate the service at the property; therefore, the Customer will still be responsible for charges while the property is active in the name of the Customer

Nothing stated herein shall be deemed to modify, rescind or alter in any way any agreement or contract for electric service or other agreement between Duke Energy and Customer which shall remain in full force and effect according to their respective terms.

Duke Energy reserves all rights under its Terms of Service or any applicable Governing Law, including without limitation, the right to disconnect service to Customer following proper notice, in the event Customer fails to timely remit payment for electric service, fraudulently obtains electric service or otherwise violates any applicable Governing Law, Commission rule or order or the Terms of Service.

Customer's failure to comply with any of the conditions of this RTO Agreement may result in the termination of this RTO Agreement and the immediate removal of all of Customer's enrolled accounts from the RTO Program as determined by Duke Energy in its reasonable discretion. Customer will be sent written notification of any such termination to the mailing address or email address specified in this RTO Agreement or any updated address provided by Customer to Duke Energy in writing.

This Lighting Service Agreement is hereby entered into this <<DAY>> day of <<MONTH>>, 20 <<YY>>, between Duke Energy Florida (hereinafter called the "Company") and << Customer Name >> (hereinafter referred to as the "Customer") for lighting service at the above location(s), once signed by the Customer and an authorized Duke Representative. The Customer agrees to receive and pay for lighting service from the Company in accordance with the rates, terms and provisions of the Company's Rate Schedule LS-1 and Service Regulations, or its successor, as the same is on file with the Florida Public Service Commission (FPSC) and as may be amended and subsequently filed with the FPSC.

To the extent there is any conflict between this Agreement and the Lighting Service Rate Schedule, the Lighting Service Rate Schedule shall control. In the event of termination by the Customer during the initial term of this agreement (identified below) under this rate schedule or upon early termination of service under this schedule, the customer agrees to pay remaining terms of this agreement as delegated by the FPSC.

The customer shall be responsible for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the customer for damage. The Company shall not be obligated to provide the service during any such interruption, suspension or failure, and Duke shall not be liable for any damage or loss resulting therefrom. The Company will replace or maintain the fixture during regular daytime working hours following notification by the Customer.

The date of *initiation* of service shall be defined as the date the first light(s) is energized or billing is transferred and shall continue hereafter until terminated. It is further agreed that The Company reserves the right to discontinue service and remove the fixtures from the Customers premise if the Customer violates any of the terms of the Service Regulations, Rate Schedule or this Agreement.

Rate per Month:

The monthly charges consist of the items below. These charges may be adjusted subject to review and approval by the Florida Public Service Commission.

Customer Charge	
Pole Charge	
Light Fixture Charge	
Light Fixture Maintenance Charge	
Energy and Demand Charge:	
Non-fuel Energy Charge	
Plus the Cost Recovery Factors listed in	
Rate Schedule BA-1, Billing Adjustments**,	
except the Fuel Cost Recovery Factor and	
Asset Securitization Charge Factor:	See Sheet No. 6.105 and 6.106
Fuel Cost Recovery Factor **:	See Sheet No. 6.105
Asset Securitization Charge Factor:	See Sheet No. 6.105

***Charges are normally revised on an annual basis.*

Additional Charges:

Certain additional charges may also apply to the installation.

Gross Receipts Tax Factor:	See Sheet No. 6.106
Right-of-Way Utilization Fees:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

THE CUSTOMER AGREES:

1. To purchase from the Company all of the electric energy used for the operation of the Lighting System.

2. To be responsible for paying, when due, all bills rendered by the Company pursuant to the Company's currently effective Lighting Rate Schedule LS-1, or its successor, for facilities and service provided in accordance with this Contract.

3. To be responsible for trimming trees that may either obstruct the light output from fixture(s) or that obstruct maintenance access to the facilities.

IT IS MUTUALLY AGREED THAT:

4. Requests for exchanging facilities, upgrades, relocations, etc. are subject to Section III, paragraph 3.05, of the Company's General Rules and Regulations Governing Electric Service.

5. The Company does not guarantee continuous lighting service and will not be liable for damages for any interruption, deficiency or failure of service, and reserves the right to interrupt service at any time for necessary repairs to lines or equipment. Nothing in this Contract is intended to benefit any third party or to impose any obligation on the Company to any such third party.

6. Installation shall be made only when, in the judgment of the Company, the location and the type of the facilities are, and will continue to be, easily and economically accessible to the Company's equipment and personnel for both construction and maintenance. In the event the Customer or its contractor, subcontractor or other agent changes the grading, which requires the Company to move its facilities or otherwise incur costs to ensure compliance with applicable code requirements, Customer shall compensate the Company for all such costs incurred by the Company to comply with any applicable code requirements. In the event Customer fails to pay the Company within 30 days of the completion of such work, Customer shall pay the Company any amounts owing the Company, including interest and any attorneys and other fees and costs the Company incurs to collect any amounts owed to the Company.

7. Modification of the facilities provided by the Company under this Contract may only be made through the execution of a written amendment to this Contract.

Right-of-Way Utilization Fees:	See Sheet No. 6.106
Municipal Tax:	See Sheet No. 6.106
Sales Tax:	See Sheet No. 6.106

THE CUSTOMER AGREES:

~~8.~~1. To purchase from the Company all of the electric energy used for the operation of the Lighting System.

~~9.~~2. To be responsible for paying, when due, all bills rendered by the Company pursuant to the Company's currently effective Lighting Rate Schedule LS-1, or its successor, for facilities and service provided in accordance with this Contract.

~~10.~~3. To be responsible for trimming trees that may either obstruct the light output from fixture(s) or that obstruct maintenance access to the facilities.

IT IS MUTUALLY AGREED THAT:

~~11.~~4. Requests for exchanging facilities, upgrades, relocations, etc. are subject to Section III, paragraph 3.05, of the Company's General Rules and Regulations Governing Electric Service.

~~12.~~5. The Company does not guarantee continuous lighting service and will not be liable for damages for any interruption, deficiency or failure of service, and reserves the right to interrupt service at any time for necessary repairs to lines or equipment. Nothing in this Contract is intended to benefit any third party or to impose any obligation on the Company to any such third party.

~~13.~~6. Installation shall be made only when, in the judgment of the Company, the location and the type of the facilities are, and will continue to be, easily and economically accessible to the Company's equipment and personnel for both construction and maintenance. In the event the Customer or its contractor, subcontractor or other agent changes the grading, which requires the Company to move its facilities or otherwise incur costs to ensure compliance with applicable code requirements, Customer shall compensate the Company for all such costs incurred by the Company to comply with any applicable code requirements. In the event Customer fails to pay the Company within 30 days of the completion of such work, Customer shall pay the Company any amounts owing the Company, including interest and any attorneys and other fees and costs the Company incurs to collect any amounts owed to the Company.

~~14.~~7. Modification of the facilities provided by the Company under this Contract may only be made through the execution of a written amendment to this Contract.

(Continued in Next Page)

~~15.~~8. The Company will, at the request of the Customer, relocate the lighting facilities covered by this Agreement, if provided sufficient rights-of-way or easements to do so. The Customer shall be responsible for the payment of all costs associated with any such Customer-requested relocation of the Company's lighting facilities.

~~16.~~9. The Company may, at any time, substitute for any luminaire/lamp installed hereunder another luminaire/lamp which shall be of at least equal illuminating capacity and efficiency.

~~17.~~10. The Customer agrees to take responsibility for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the Customer for damage.

~~18.~~11. The Company will repair or replace malfunctioning lighting fixtures maintained by the Company in accordance with Section 768.1382, Florida Statutes (2005).

~~19.~~12. This Contract shall be for a term of ten (10) years from the date of initiation of service. The date of initiation of service shall be defined as the date the first lights are energized.

~~20.~~13. Should the Customer fail to pay any bills due and rendered pursuant to this Contract or otherwise fail to perform the obligations contained in this Contract, said obligations being material and going to the essence of this Contract, the Company may cease to supply electric energy or service until the Customer has paid the bills due and rendered or has fully cured such other breach of this Contract. Service charges associated with the reconnection of service after disconnection for nonpayment or violation of Company or Commission Rules may be assessed for each lighting installation on an account. Any failure of the Company to exercise its rights hereunder shall not be a waiver of its rights. It is understood, however, that such discontinuance of the supplying of electric energy or service shall not constitute a breach of this Contract by the Company, nor shall it relieve the Customer of the obligation to perform any of the terms and conditions of this Contract.

~~21.~~14. If the Customer no longer wishes to receive service under this schedule, the Customer may terminate the Contract by giving the Company at least sixty (60) days advance written notice to the Company. Upon early termination of service, the Customer shall pay an amount equal to the remaining monthly customer charges, remaining Contribution in Aid of Construction ("CIAC"), if applicable, and remaining pole and fixture lease amounts for the term of the contract. The Customer will be responsible for the cost of removing the facilities.

~~22.~~15. In the event of the sale of the real property upon which the facilities are installed, or if the Customer's obligations under this Contract are to be assigned to a third party, upon the written consent of the Company , this Contract may be assigned by the Customer to the Purchaser or to the third party. No assignment shall relieve the Customer from its obligations hereunder until such obligations have been assumed by the Purchaser or third party and agreed to by the Company.

~~23.~~16. This Contract supersedes all previous contracts or representations, either written, oral or otherwise between the Customer and the Company with respect to the facilities referenced herein and constitutes the entire Contract between the parties. This Contract does not create any rights or provide any remedies to third parties or create any additional duty, obligation or undertakings by the Company to third parties.

~~24.~~17. This Contract shall inure to the benefit of, and be binding upon the successors and assigns of the Customer and the Company.

~~25.~~18. This Contract is subject to the Company's Tariff for Retail Service, or as they may be hereafter revised, amended or supplemented. In the event of any conflict between the terms of this Contract and the provisions of the Company's Tariff for Retail Services, the provisions of the Company's Tariff for Retail Service and FPSC Rules shall control, or as they may be hereafter revised, amended or supplemented.

(Continued in Next Page)

~~26.~~19. The obligation to furnish or purchase service shall be excused at any time that either party is prevented from complying with this Contract by strikes, lockouts, fires, riots, acts of God, the public enemy, governmental or court actions, lightning, hurricanes, storms, floods, inclement weather that necessitates extraordinary measures and expense to construct facilities and/or maintain operations, or by any other cause or causes not under the control of the party thus prevented from compliance, and the Company shall not have the obligation to furnish service if it is prevented from complying with this Contract by reason of any partial, temporary or entire shut-down of service which, in the sole opinion of the Company, is reasonably necessary for the purpose of repairing or making more efficient all or any part of its generating, transmission, distribution or other electrical equipment.

~~27.~~20. In no event shall the Company, its parent corporation, affiliate corporations, officers, directors, employees, agents, and contractors or subcontractors be liable to the Customer, its employees, agents or representatives, for any incidental, indirect, special, consequential, exemplary, punitive or multiple damages resulting from any claim or cause of action, whether brought in contract, tort (including, but not limited to, negligence or strict liability), or any other legal theory.

~~28. The Company will, at the request of the Customer, relocate the lighting facilities covered by this Agreement, if provided sufficient rights-of-way or easements to do so. The Customer shall be responsible for the payment of all costs associated with any such Customer-requested relocation of the Company's lighting facilities.~~

~~29. The Company may, at any time, substitute for any luminaire/lamp installed hereunder another luminaire/lamp which shall be of at least equal illuminating capacity and efficiency.~~

~~30. The Customer agrees to take responsibility for the cost incurred to repair or replace any fixture or pole which has been willfully damaged. The Company shall not be required to make such repair or replacement prior to payment by the Customer for damage.~~

~~31. The Company will repair or replace malfunctioning lighting fixtures maintained by the Company in accordance with Section 768.1382, Florida Statutes (2005).~~

~~32. This Contract shall be for a term of ten (10) years from the date of initiation of service. The date of initiation of service shall be defined as the date the first lights are energized.~~

~~33. Should the Customer fail to pay any bills due and rendered pursuant to this Contract or otherwise fail to perform the obligations contained in this Contract, said obligations being material and going to the essence of this Contract, the Company may cease to supply electric energy or service until the Customer has paid the bills due and rendered or has fully cured such other breach of this Contract. Service charges associated with the reconnection of service after disconnection for nonpayment or violation of Company or Commission Rules may be assessed for each lighting installation on an account. Any failure of the Company to exercise its rights hereunder shall not be a waiver of its rights. It is understood, however, that such discontinuance of the supplying of electric energy or service shall not constitute a breach of this Contract by the Company, nor shall it relieve the Customer of the obligation to perform any of the terms and conditions of this Contract.~~

~~34. If the Customer no longer wishes to receive service under this schedule, the Customer may terminate the Contract by giving the Company at least sixty (60) days advance written notice to the Company. Upon early termination of service, the Customer shall pay an amount equal to the remaining monthly customer charges, remaining Contribution in Aid of Construction ("CIAC"), if applicable, and remaining pole and fixture lease amounts for the term of the contract. The Customer will be responsible for the cost of removing the facilities.~~

~~35. In the event of the sale of the real property upon which the facilities are installed, or if the Customer's obligations under this Contract are to be assigned to a third party, upon the written consent of the Company , this Contract may be assigned by the Customer to the Purchaser or to the third party. No assignment shall relieve the Customer from its obligations hereunder until such obligations have been assumed by the Purchaser or third party and agreed to by the Company.~~

~~36. This Contract supersedes all previous contracts or representations, either written, oral or otherwise between the Customer and the Company with respect to the facilities referenced herein and constitutes the entire Contract between the parties. This Contract does not create any rights or provide any remedies to third parties or create any additional duty, obligation or undertakings by the Company to third parties.~~

(Continued in Next Page)

~~37. This Contract shall inure to the benefit of, and be binding upon the successors and assigns of the Customer and the Company.~~

~~38. This Contract is subject to the Company's Tariff for Retail Service, or as they may be hereafter revised, amended or supplemented. In the event of any conflict between the terms of this Contract and the provisions of the Company's Tariff for Retail Services, the provisions of the Company's Tariff for Retail Service and FPSC Rules shall control, or as they may be hereafter revised, amended or supplemented.~~

(Continued in Next Page)

39. The obligation to furnish or purchase service shall be excused at any time that either party is prevented from complying with this Contract by strikes, lockouts, fires, riots, acts of God, the public enemy, governmental or court actions, lightning, hurricanes, storms, floods, inclement weather that necessitates extraordinary measures and expense to construct facilities and/or maintain operations, or by any other cause or causes not under the control of the party thus prevented from compliance, and the Company shall not have the obligation to furnish service if it is prevented from complying with this Contract by reason of any partial, temporary or entire shut-down of service which, in the sole opinion of the Company, is reasonably necessary for the purpose of repairing or making more efficient all or any part of its generating, transmission, distribution or other electrical equipment.

40. In no event shall the Company, its parent corporation, affiliate corporations, officers, directors, employees, agents, and contractors or subcontractors be liable to the Customer, its employees, agents or representatives, for any incidental, indirect, special, consequential, exemplary, punitive or multiple damages resulting from any claim or cause of action, whether brought in contract, tort (including, but not limited to, negligence or strict liability), or any other legal theory.

IN WITNESS WHEREOF, the parties hereby caused this Contract to be executed by their duly authorized representatives to be effective as of the day and year first written above.

Title: _____ Title: _____

PREMIER POWER SERVICE CONTRACT

The undersigned (hereinafter "the Customer") hereby applies to Duke Energy Florida, ~~Inc~~LLC~~.~~ (hereinafter "the Company") for backup electric services to the Customer's _____ (hereinafter "the Customer's Facility") located in _____ County, Florida, to be provided by ~~an~~ on-site equipment~~generator~~ installed, owned, operated and maintained by the Company for the purpose of continuing the supply of electricity to the Customer's Facility in the event the Customer's normal electric supply is interrupted and assisting the Company in meeting peak demands on the Company's system during periods of critical capacity conditions or for other system benefits (hereinafter "the Services"). The Services shall be rendered in accordance with the terms of the Company's Premier Power Service Rider, Rate Schedule PPS-1 (hereinafter "the PPS Rider," which is hereby incorporated into this Contract by this reference), as approved or subsequently revised by the Florida Public Service Commission, which is hereby incorporated into this Contract by this reference (a copy of the currently effective PPS Rider is attached hereto), and the following terms and conditions:

1. **Effective Date**
This Contract shall become effective upon the acceptance hereof by the Company, evidenced by the signature of its authorized representative appearing below, which, in conjunction with the PPS Rider and, subject to the terms of this Contract, the technical specifications described in the Company's proposal letter dated _____, 20__, shall constitute the entire agreement between the Customer and the Company with respect to provision of the Services. In the event of any conflict between the Company's proposal letter and the PPS Rider, in conjunction with this Contract, the PPS Rider, in conjunction with this Contract shall prevail.

2. **Eligibility**
The Customer must provide evidence of creditworthiness sufficient to establish reasonable assurance of their ability to meet their financial obligations for the services provided in this Contract as specified in the PPS Rider. In the event that the Customer does not provide such evidence of creditworthiness, or does not provide an alternative form of credit support as specified by the PPS Rider, the Customer is not eligible for the services provided in this Contract.

~~2~~3. **Term of Contract**
The term of this Contract is from _____, 20___, or from the date the Services are first provided hereunder, whichever is later and continuing until _____, months after the date services are first provided.

~~3~~4. **Customer Payments**
The Customer's Monthly Service Payment determined in accordance with the PPS Rider shall be $_____, exclusive of present or future federal, state, municipal or other sales, use, gross receipts, or property tax, or similar charge with respect to the Services, which the Customer shall also pay. If the Customer fails to pay any amount owed the Company hereunder when due, such past due amounts shall accrue interest at the rate of 18% per annum or the maximum legal rate, whichever is lower. Further if the Customer fails to make any undisputed payment owed the Company hereunder within five (5) business days of receiving written notice from the Company that such payment is past due, the Company may suspend the Services to the Customer. In the event that the Customer fails to pay any past due amounts for a period of sixty (60) days, the Company shall have the right to access and remove the facilities at the Customer's expense. In such a circumstance, the Customer shall be responsible for paying a Termination Fee as more fully described in Section 8 below. Additionally, the Customer shall be liable to the Company for any attorney fees or other costs incurred in collection of this payment or any other amount due under this Contract. The Company shall have the right to proceed against any credit support provided by the Customer in connection with the Contract if the Customer fails to meet its obligations under this Section 4.The Customer's obligations under this Section ~~4~~3 shall survive the termination or cancellation of this Contract.

~~4~~5. **Provision of Services and Installation Schedule**
The Company shall furnish labor, supervision, equipment, materials and transportation reasonably necessary to provide the Services. The Company shall be entitled to rely on the accuracy of any information provided by the Customer, which information is warranted by the Customer to be accurate and correct. Such information shall include, but is not limited to, the information the Customer is required to provide as described in Section 5 below. In the event of any unforeseen difficulties in performance of the Services due to conditions at the work site or due to the inaccuracy of any information relied upon by the Company, the Customer shall be liable and reimburse the Company for any increased costs or expenses incurred by the Company as a result of such difficulties, and the Monthly Service Payment, the Company's proposal letter, and Contract Term shall be equitably adjusted to compensate Company for any additional or increased work or time the Company may be required to incur. The Company shall exercise commercially reasonable efforts to commence the Services. The completion schedule for providing the Services shall be equitably adjusted to compensate the Company for any such unanticipated delays or delays to the installation or startup of the facilities for any reasons beyond the fault and neglect of the Company.

(Continued on next page)

~~5~~6. Customer Responsibilities

The Customer shall provide a location on its premises for installation of the Company's facilities, any necessary access to the work site, as well as a reasonable lay-down area to perform the Services. Further, the Customer shall, so long as is necessary to provide the Services, provide access to the Company, upon reasonable notice to Customer (except in the case of an emergency, declared by the Company, in its sole discretion, in which case the Customer agrees that the Company has permission to access the Company's facilities without any prior notice to the Customer), for operation, maintenance and repair of the Company's facilities. Accordingly, the Customer shall be obligated, at its sole expense, to keep the premises on which the Company's facilities are located free and clear of anything that may impair the operation, maintenance and repair of such facilities or cause damage to the Company's facilities. In the event that the Customer fails to keep the premises on which the Company's facilities are located free and clear as described herein, the Company shall provide notice to the Customer of the Customer's failure to do so. If the Customer has not fully satisfied its obligation as described herein within five (5) business days of its receipt of such notice, the Company may either (i) suspend the Services to the Customer or (ii) clear the premises on which the Company's facilities are located on of anything that may impair the operation, maintenance and repair of such facilities. In the event that the Company chooses option (ii) above, the Customer shall be liable and reimburse the Company for all costs associated with the work performed.

Any delays or additional cost incurred by Company because of inadequate access to the work site shall be grounds for an equitable adjustment in the schedule and the Monthly Service Payment. The Company shall have the right to suspend the Services or adjust the schedule accordingly in the event that there is inadequate access to the work site, or if any required information is not promptly provided, or in the event that the safety of any person or property might be jeopardized by continuing with the Services. The Customer shall provide, at no cost to the Company, any plans, specifications, drawings or information that may be necessary or useful in the performance of the Services. The Customer will ensure that all Occupational Safety and Health Act requirements are adhered to for the area where any Company equipment in support of the Services is to be based. In the event of damage to Company owned equipment that is caused by the Customer or the Customer's agents, or any other cause not due to the fault or neglect of the Company the Customer agrees to pay all repair or replacement costs associated with the damage.

~~6~~7. Permits and Regulatory Requirements

Other than acquiring its general business license, which the Company shall obtain and maintain, the Customer shall be responsible for obtaining any license or permit required of the Company in the Company's name to enable it to provide the Services. The Customer assumes the risk and responsibility for such compliance (including any changes to such requirements), and for securing such permits, licenses, and approvals from the proper authorities, and for paying any associated costs or fees should compliance with any laws,

rules, regulations, or ordinances of any federal, state, or local authority, or of any agency thereof (including, but not limited to, certification to do business as a foreign corporation) require any changes in the Services; or should any permits, licenses, or approvals of plans and specifications for the Services or should any permits, licenses, or approvals for the installation or use thereof be required.

~~7~~8. Installed Equipment

The Customer agrees that any equipment installed on the Customer's premises for the express purpose of providing the Services is and will remain the sole property of the Company until such time as the Customer may wish to exercise its purchase rights set forth in Section 9 below. The Company reserves the right to modify or upgrade equipment as the Company deems necessary, in its sole discretion, for the continued supply of these Services. If equipment modifications or upgrades are requested by the Customer, however, any such modifications or upgrades will be at the Customer's expense.

~~8~~9. Early Termination of Contract

The Customer has the right to terminate this Contract before the entire Contract Term has expired, provided that the Customer a) notifies the Company in writing a minimum of 60 days prior to termination of the Services and b) pays a Termination Fee. The Termination Fee will be calculated by taking the sum of the Customer's payments remaining in the Contract Term, adding an estimated removal cost, and subtracting therefrom the sum of avoided costs, including but not limited to maintenance costs, if any, and the estimated salvage value as reasonably determined by the Company. In the event of any termination of this Contract before the end of the Contract Term, the Company shall also be compensated for all Services provided to Customer prior to the effective date of termination, and for all costs reasonable incurred by the Company in preparation for the providing of Services prior to the effective date of any termination of this Contract or any termination of Services being provided pursuant to this Contract. If the Customer fails to maintain necessary credit support, if any, Company shall have the right to terminate the Contract, exercise any rights thereunder, and proceed against any credit support provided by the Customer in connection with the Contract.

~~9~~10. End of Contract

At the end of the Contract Term the Customer shall have the option to a) renew the terms of this Contract for an agreed upon period at an agreed upon price between the Company and the Customer, b) purchase equipment, if any, that has been installed on Customer's premises at an agreed upon price, or c) terminate this Contract which will require removal of any equipment owned and installed by the Company for the purpose of providing the Services. If the Company does not receive Customer's written confirmation as to which option is being selected within 60 days prior to the end of the Contract Term or if options (a) or (b) are selected but the parties have failed to reach agreement upon the renewal term or the price to be paid, Customer will be deemed to have selected option (c) to terminate.

(Continued on next page)

~~10~~11. **Warranty**

The Company warrants that Services shall be performed in accordance with generally accepted industry practices. THE WARRANTY SET FORTH ABOVE IS EXCLUSIVE, AND NO OTHER WARRANTY OR REMEDY OF ANY KIND, WHETHER STATUTORY, WRITTEN, ORAL, EXPRESS, OR IMPLIED, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, OR WARRANTIES ARISING FROM COURSE OF DEALING OR USAGE OF TRADE, SHALL APPLY.

The Customer warrants that the premises on which the Company's facilities are to be located is suitable for the location of such facilities. The Customer further warrants that the placing of such facilities on such premises complies with all laws, rules, regulations, ordinances, zoning requirements or any other federal, state or local governmental requirements.

~~11~~12. **Limitation of Liability and Indemnification**

Notwithstanding anything herein to the contrary, neither the Company nor its employees, its subcontractors or suppliers shall be liable for any direct, indirect, general, special, incidental, exemplary, or consequential loss or damage of any nature arising out of their performance or non-performance hereunder. Further, notwithstanding anything herein to the contrary, in no event shall the Company's liability arising out of or in connection with the performance or non-performance of the Services exceed the Customer's payments received by the Company pursuant to Section 3 above. The provisions of this Section 11 shall apply whether such liability arises in contract, tort (Including negligence), strict liability or otherwise.

The Customer shall arrange its electrical requirements to ensure that the electrical requirement to be supplied when normal service is interrupted will not be greater than the generation capacity. Accordingly, in no event shall the Company be liable for any claims, damages, cost, expenses or causes of action arising out of the failure of the Customer to so arrange its electrical requirements. Further, the Customer shall indemnify, defend and hold harmless the Company from any claims, liabilities, obligations, damages, costs and expenses (including, but not limited to, reasonable attorney's fees) or causes of action of whatsoever kind or nature for injury or death to any person and for damage to or destruction of property, to the extent resulting from the failure of the Customer to so arrange its electrical requirements.

~~12~~13. **Force Majeure**

Except for the Customer's obligation to pay the Company any sum of money owed the Company hereunder, neither party shall be liable for its failure to perform hereunder if such failure is due to any act or circumstance beyond the reasonable control, and not due to the fault or neglect of, of the party claiming the event of force majeure including, but not limited to the following acts or circumstances: (i) act(s) of God, (ii) war or wars, (iii) government regulation by a governmental authority having jurisdiction (including, but not limited to, any law, rule, order, proclamation, regulation, ordinance, demand, or requirement of any governmental agency), (iv) act(s) or threatened act(s) of terror, including, but not limited to any acts by organized groups of terrorists or any acts of a public enemy (v) disaster(s) (including, but not limited to, hurricane, tornado, tropical storm, earthquake, or major storm), (vi) any pandemic, epidemic, pestilence, plague, or outbreak, (vii) strike, lockout, or industrial disputes, (viii) civil disorder, riot, or disturbance of the peace, (ix) any third party act for which the party who fails to perform is not responsible, or (x) any other condition or circumstance, whether similar to or different from the foregoing (it being agreed that the foregoing enumeration shall not limit or be characteristic of such conditions or circumstances) beyond the reasonable control and fault of the party claiming the force majeure event.

In the event that either party is rendered unable, wholly or in part, by reason of an event of force majeure to perform any obligations set forth in the Contract, other than the Customer's obligation to pay a sum of money owed hereunder to the Company, then such party shall give the other party written notice and reasonably full particulars of such event as soon as practicable after the occurrence thereof, and thereafter, the obligations of both parties shall be suspended to the extent and for the period of such force majeure condition and such cause shall be remedied with all reasonable dispatch. Settlement of strikes and lockouts shall be entirely within the discretion of the party affected and the requirement that any event of force majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes or lockouts by acceding to the demands of the parties directly or indirectly involved in such strikes or lockouts when such course is inadvisable in the discretion of the party having such difficulty.

To the extent the force majeure event causes a delay or an increase in costs or expenses to the Company, the Customer shall be liable to the Company for all increased costs and expenses incurred by the Company as a result of such force majeure event. In no event shall the Company be responsible for any damages arising out of any failure to perform or delay arising as a result of such force majeure event.

~~13~~14. **Non-Waiver**

The failure of either party to insist upon the performance of any term or condition of this Contract or to exercise any right hereunder on one or more occasions shall not constitute a wavier or relinquishment of its right to demand future performance of such term or condition, or to exercise such right in the future.

~~14~~15. **Regulatory Authority and Governing Law**

The Services provided under this Contract are subject to the regulatory authority of the Florida Public Service Commission (hereinafter "the FPSC"), and shall also be governed by the laws of the State of Florida. This Contract is subject to changes or substitutions, either in whole or in part, made from time to time by order of the FPSC, and each party to this Contract reserves the right to seek approval of such changes or substitutions, in accordance with law, from the FPSC. Unless specified otherwise, any such changes or substitutions shall become effective immediately and shall nullify all prior provisions in conflict therewith.

(Continued on next page)

~~15~~16. **Dispute Resolution**

The Company and the Customer shall endeavor to resolve any claim or other matter in question between the parties to this Contract arising out of or related in any way to this Contract by negotiation or mutual agreement. The Florida Public Service Commission and/or a court of competent jurisdiction in the State of Florida only, as may be applicable under controlling law, shall decide any unresolved claim or other matter in question between the parties to this Contract arising out of or related in any way to this Contract, with the Florida Public Service Commission and/or such court having sole and exclusive jurisdiction over any such matters. In no event will any such claim be submitted to arbitration, or to a court in any other jurisdiction, without the express written consent of both Parties.

~~16~~17. **Entire Agreement**

The Contract constitutes the entire understanding between the Company and the Customer relating to the subject matter hereof, superseding any prior or contemporaneous agreements or understanding between the parties. The parties shall not be bound by or be liable for any statement, prior negotiation, correspondence, representation, promise, draft agreements, inducement or understanding of any kind or nature not set forth or provided for herein. No prior course of dealing, usage of trade or course of performance shall be used to supplement or explain any term, condition, or instruction used in this Contract.

~~17~~18. **Modification**

No statements or agreements, oral or written, made prior to the date hereof, shall vary or modify the written terms set forth herein and neither party shall claim any amendment, modification or release from any provision hereof by reason of a course of action or mutual agreement unless such agreement is in writing, signed by both parties and specifically states it is an amendment to this Contract.

~~18~~19. **Severability**

In the event any provision, or any part or portion of any provision of this Contract shall be deemed or defined by any law or order any court or any governmental agency, or regulatory body having jurisdiction over either party, or held or declared by a court of competent jurisdiction to be unlawful, invalid, void or otherwise unenforceable, the rights and obligations of the parties shall be reduced or abated only to the extent required to remove or cure such illegal or unenforceable portion, so long as the Contract is not affected in a manner or to the extent which would render it economically, technically, materially, or commercially infeasible to either party.

IN WITNESS WHEREOF, the parties have duly executed this Contract.

Date: _____	Date: _____

DUKE ENERGY FLORIDA, ~~INC.~~LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 1 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (10kw or less)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, ~~Inc.~~LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 1 system(s), 10 kilowatts or less in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall not be required to pay any application fee for this Tier 1 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own~~www.progress-energy.com/florida/home/renewable-energy/interconnect.page~~.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741.

6. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

7. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

8. The Company recommends that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than one hundred thousand dollars ($100,000) to the extent permitted by law. For government entities, proof of self-insurance consistent with law shall satisfy this requirement.

9. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of 10kw or less.

(Continued on Next Page)

10. The Company may isolate the Customer's system from the distribution grid using the manual disconnect switch, if available, or by disconnecting the meter without prior notice to the Customer. To the extent practical, however, prior notice shall be given. The system will be reconnected as soon as practical once the conditions causing the disconnection cease to exist. Conditions which may require the disconnection of the Customer's system are:

    (a) Company utility system emergencies or maintenance requirements.
    (b) Hazardous conditions existing on the Company's utility system due to the operation of the Customer's generation or protective equipment as determined by the Company.
    (c) Adverse electrical effects (such as power quality problems) on the electrical equipment of the company's other electric consumers caused by the Customer's generation as determined by the Company.

    In the event the Company disconnects the Customer's system without prior notice, the Company will leave a door hanger notifying the customer of the disconnection including an explanation of the conditions requiring such action.

11. The Customer, to the extent permitted by law without waiving or limiting any defenses of sovereign immunity, shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer. Nothing herein shall be intended to serve as a waiver or limitation of Customer's sovereign immunity defenses as allowed by law.

12. Prior to connection and parallel operation of the Customer's generation system with the Company's electric system, the Customer shall provide 10 days notice and permit the Company, if it should so choose, to inspect the system and its component equipment and the documents necessary to insure compliance with various sections of this Agreement and to have personnel present on the in-service date of the Customer's generation system equipment and protective apparatus.

13. In no event shall any statement, representation, or lack thereof, either express or implied, by the Company, relieve the Customer of exclusive responsibility for the Customer's generation system. Specifically, any company inspection of the Customer's system shall not be construed as confirming or endorsing the Customer's system design or its operating or maintenance procedures nor as a warranty or guarantee as to the safety, reliability, or durability of the Customer's equipment. The Company's inspection, acceptance, or its failure to inspect shall not be deemed an endorsement of any of the Customer's equipment or procedures.

14. The Company will install metering equipment on the Customer's premises capable of measuring any excess kilowatt-hours produced by the Customer's system and delivered to the Company's electric system. The cost of the meter, installation, maintenance, and any costs of reading and billing associated with this meter equipment shall be borne by the Company. The value of such excess generation shall be reflected on the Customer's bill based on the Company's applicable net metering for customer-owned renewable generation tariff approved by the Florida Public Service Commission. ~~This tariff can be found at the Company's website~~ www.progress-energy.com/florida/home/renewable-energy/interconnect.page.

15. In the event the Company elects to install a manual disconnect switch, it shall be at the Company's expense. The Company installed disconnect switch shall be the visible load break type to provide a separation point between the AC power output of the Customer-owned renewable generator and any Customer wiring connected to the Company's system. The disconnect switch shall be mounted separate from, but adjacent to the Company's meter socket. The Customer shall ensure that such disconnect switch shall remain readily accessible to the Company and be capable of being locked in the open position with a single Company utility lock.

16. On termination of services pursuant to this Agreement, the Company shall remove any additional metering equipment related to this Agreement. At the Customer's expense, within 10 working days following the termination, the Customer shall permanently isolate the generation system and any associated equipment from the Company's electric supply system, and notify the Company that the isolation is complete.

Inspection and On-going Compliance:

17. The Company will provide the Customer with as much notice as reasonably possible, either in writing, e-mail, facsimile or by phone as to when the Company may conduct inspections and/or document review. Upon reasonable notice, the Company shall have access to the Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed by this Interconnection Agreement or, if necessary, to meet the Company's legal obligation to provide service to its Customers. At any time without notice in the event of emergency or hazardous conditions, the Company shall have access to the customers premise to operate a manual disconnect switch or disconnect the meter.

INTERCONNECTION OF CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS TO DUKE ENERGY FLORIDA, INC ELECTRIC GRID APPLICATION AND COMPLIANCE FORM

FOR TIER 1 SYSTEMS (10 KW or less)

A. Applicant Information

Name: _____ DEF Account No.: _____
Mailing Address: _____
City: _____ Zip Code: _____
Street Address (if different): _____
Daytime Phone: _____ Fax: _____ Email: _____

B. System Information

System 1 Information (please check):Wind____ Solar_____ Other(please state type) _____
System Name/Model: _____ System Capacity: _____watts (DC)
List Manufacturer/Model for:
Generator/modules: _____ Inverter: _____ Batteries □ Yes □ No
Total Battery Capacity kW DC:_____ Manufacturer Names and Model #:_____
System Location: _____ Inverter Location: _____
Permission to monitor? □ Yes □ No

System 2 Information (please check): Wind____ Solar_____ Other(please state type) _____
System Name/Model: _____ System Capacity: _____watts (DC)
List Manufacturer/Model for:
Generator/modules: _____ Inverter: _____ Batteries □ Yes □ No
Total Battery Capacity kW DC:_____ Manufacturer Names and Model #:_____
System Location: _____ Inverter Location: _____
Permission to monitor? □ Yes □ No

C. Installation Contractor Information

Installation Contractor: _____, FL License No.: _____
Address: _____
City: _____, Zip Code: _____
_____
Daytime Phone: _____ Fax: _____ Email: _____
Proposed Installation Date: _____

D. Hardware and Installation Compliance

1. The system hardware is in compliance with *Underwriters Laboratories (UL) 1741, and IEEE 1547 standards for utility interconnected inverters.*

Signed (Contractor): _____ Date: _____
Name (Print): _____ Company: _____

E. Owner Acknowledgment

The system has been installed to my satisfaction and I have been given system warranty information, and an operation manual. Also, I have been thoroughly instructed in the operation and maintenance of the system.

Signed (Owner): _____Date: _____

F. Electrical Code Inspection

Satisfies Code Requirements
Inspector Name (Print): _____
Inspector Signature: _____ Date: _____

G. Duke Energy Florida, Inc. Approval

Satisfies DEF Interconnection Requirements
DEF Representative Name (Print): _____ Phone: _____
DEF Representative Signature: _____ Date: _____

DUKE ENERGY FLORIDA, ~~INC.~~LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 2 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (>10kw, <= 100kw)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, ~~Inc.~~LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 2 system(s), more than 10 kilowatts or less than or equal to 100 kilowatts in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall pay an application fee of $240 for this Tier 2 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own~~www.progress-energy.com/florida/home/renewable-energy/interconnect.page~~.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741.

6. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

7. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

8. The Company requires that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than one million dollars ($1,000,000) to the extent permitted by law. The Customer shall provide the Company proof of continuing insurance coverage on an annual basis. For government entities, the policy coverage shall not exceed the entity's maximum liability established by law. Proof of self-insurance consistent with law shall satisfy this requirement.

9. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of greater than10kw up to 100kw.

(Continued on Next Page)

10. The Company may isolate the Customer's system from the distribution grid using the manual disconnect switch without prior notice to the Customer. To the extent practical, however, prior notice shall be given. The system will be reconnected as soon as practical once the conditions causing the disconnection cease to exist. Conditions which may require the disconnection of the Customer's system are:
    (a) Company utility system emergencies or maintenance requirements.
    (b) Hazardous conditions existing on the Company's utility system due to the operation of the Customer's generation or protective equipment as determined by the Company.
    (c) Adverse electrical effects (such as power quality problems) on the electrical equipment of the company's other electric consumers caused by the Customer's generation as determined by the Company.
    (d) Failure of the Customer to maintain the required insurance coverage.

    In the event the Company disconnects the Customer's system without prior notice, the Company will leave a door hanger notifying the customer of the disconnection including an explanation of the conditions requiring such action.
11. The Customer, to the extent permitted by law without waiving or limiting any defenses of sovereign immunity, shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer. Nothing herein shall be intended to serve as a waiver of limitation of Customer's sovereign immunity defenses as allowed by law.
12. Prior to connection and parallel operation of the Customer's generation system with the Company's electric system, the Customer shall provide 10 days notice and permit the Company, if it should so choose, to inspect the system and its component equipment and the documents necessary to insure compliance with various sections of this Agreement and to have personnel present on the in-service date of the Customer's generation system equipment and protective apparatus.
13. In no event shall any statement, representation, or lack thereof, either express or implied, by the Company, relieve the Customer of exclusive responsibility for the Customer's generation system. Specifically, any company inspection of the Customer's system shall not be construed as confirming or endorsing the Customer's system design or its operating or maintenance procedures nor as a warranty or guarantee as to the safety, reliability, or durability of the Customer's equipment. The Company's inspection, acceptance, or its failure to inspect shall not be deemed an endorsement of any of the Customer's equipment or procedures.
14. The Company will install metering equipment on the Customer's premises capable of measuring any excess kilowatt-hours produced by the Customer's system and delivered to the Company's electric system. The cost of the meter, installation, maintenance, and any costs of reading and billing associated with this meter equipment shall be borne by the Company. The value of such excess generation shall be reflected on the Customer's bill based on the Company's applicable net metering for customer-owned renewable generation tariff approved by the Florida Public Service Commission. ~~This tariff can be found at the Company's website – www.progress-energy.com/florida/home/renewable-energy/interconnect.page..~~
15. The Customer must install a manual AC load break disconnect switch at their expense which shall be mounted separate from, but adjacent to the Company's meter socket. The Customer shall ensure that such disconnect switch shall remain readily accessible to the Company and be capable of being locked in the open position with a single Company utility lock.
16. On termination of services pursuant to this Agreement, the Company shall remove any additional metering equipment related to this Agreement. At the Customer's expense, within 10 working days following the termination, the Customer shall permanently isolate the generation system and any associated equipment from the Company's electric supply system, and notify the Company that the isolation is complete.

Inspection and On-going Compliance:

17. The Company will provide the Customer with as much notice as reasonably possible, either in writing, e-mail, facsimile or by phone as to when the Company may conduct inspections and/or document review. Upon reasonable notice, the Company shall have access to the Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed by this Interconnection Agreement or, if necessary, to meet the Company's legal obligation to provide service to its Customers. At any time without notice in the event of emergency or hazardous conditions, the Company shall have access to the customers premise to operate the manual disconnect switch.

Modifications/Additions to Customer-owned Renewable Generation:

18. If the Customer-owned renewable generation system is subsequently modified in order to increase its Gross power rating, the Customer must notify the Company by submitting a new application specifying the modification at least thirty days prior to making the modification.

DUKE ENERGY FLORIDA, ~~INC.~~LLC
STANDARD INTERCONNECTION AGREEMENT
FOR TIER 3 CUSTOMER-OWNED RENEWABLE GENERATION SYSTEMS (>100kw, <= 2mw)

THIS AGREEMENT is made this _____ day of _____, _____, by and between _____ (hereinafter called the Customer), located at the address shown in the attached Application and Compliance Form, and Duke Energy Florida, ~~Inc.~~LLC, a corporation organized and existing under the laws of the State of Florida (hereinafter called the Company).

WITNESSETH:

WHEREAS, the Customer has made a request to interconnect its renewable generation Tier 3 system(s), more than 100 kilowatts or less than or equal to 2 megawatts in total, which is primarily intended to offset part or all of the customer's electricity requirements, with the Company's electric supply grid at the Customer's presently metered location.

NOW, THEREFORE, in consideration of the mutual covenants and agreements expressed herein, the Company and the Customer agree as follows:

General Responsibilities of Both Parties:

1. The Customer certifies that the system's hardware and its installation, operation and maintenance is in compliance and shall continue to comply with the applicable standards, codes and manufacturer's instructions set forth in the Application and Compliance Form attached hereto and incorporated herein, and that all other information therein provided by the Customer is true and correct. The Customer shall notify the Company in writing of any changes to its system.

2. The Customer shall pay an application fee of $750 for this Tier 3 Customer-owned renewable generation system interconnection.

3. In order to commence the process for interconnection, the Customer shall provide the Company a completed application. Applications can be downloaded from the Company's website: https://www.duke-energy.com/business/products/renewables/generate-your-own~~www.progress-energy.com/florida/home/renewable-energy/interconnect.page~~.

4. The Customer is responsible for the protection of its generation equipment, inverters, protection devices, and other system components from damage from the normal and abnormal operations that occur on the Company's utility system in delivering and restoring system power; and is responsible for insuring that the equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to insure that it is operating correctly and safely.

5. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards of IEEE 1547, IEEE 1547.1 and UL 1741. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to item 5 listed above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power. The Customer agrees to provide Local Building Code Official inspection and certification of installation. The certification shall reflect that the local code official has inspected and certified that the installation was permitted, has been approved, and has met all electrical and mechanical qualifications.

6. The Company requires that the Customer maintain general liability insurance for personal injury and property damage in the amount of not less than two million dollars ($2,000,000). The Customer shall provide the Company proof of continuing insurance coverage on an annual basis to the extent permitted by law. For government entities, the policy coverage shall not exceed the entity's maximum liability established by law. Proof of self-insurance consistent with law shall satisfy this requirement.

7. The total capacity of the Customer generation system(s) does not exceed 90% of the rating of service currently provided to the customer (based on service size, transformer rating, etc.) and has a total gross power rating of greater than100kw up to 2mw.

DUKE ENERGY FLORIDA, LLC~~INC.~~
ECONOMIC DEVELOPMENT RIDER

Service Agreement

For a New Establishment or an Existing Establishment with Expanding Load

_____
CUSTOMER NAME

_____ _____
ADDRESS TYPE OF BUSINESS

The Customer hereto agrees as follows:

1. To create _____ full - time jobs or new capital investment of $ _____ and a net increase of full - time jobs.

2. That the quantity of new or expanded load shall be _____ KW of demand with a _____ % load factor.

3. Type of business and expected hours of operation are _____ _____.

4. To initiate service under this rider on _____, _____, and terminate service under this rider on _____, _____. This shall constitute a period of 5 years.

5. In case of early termination by the Customer, or an early discontinuation by the Company for a violation of the terms and conditions of this rider, the Customer shall be required to repay Duke Energy Florida, LLC~~Inc.~~ the cumulative discounts received to date under this rider plus interest.

6. If a change in ownership occurs after the Customer contracts for service under this rider, the successor Customer may be allowed to fulfill the balance of the contract under rider ED-2~~1~~ and continue the schedule of rate reductions.

7. All terms of Rate Schedule ED-2~~1~~, Economic Development Rider, apply to this agreement and are incorporated by reference herein.

By signing below, I hereby attest that the availability of this rider is a significant factor in this Customer's location / expansion decision.
