Analysis of Diversification Activity
New or Amended Contracts with Affiliated Companies
Company: Duke Energy Florida LLC.
For the Year Ended December 31, 2019

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at the minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
Duke Energy One, Inc.	Agreement for Small Equipment Attachments to Lightning Assets between Duke Energy Florida, LLC and Duke Energy One, Inc. Effective Date: 01/22/2019. Price: varies with type of attachment. Duration: unitl terminated.

295

Analysis of Diversification Activity
Individual Affiliated Transactions in Excess of $500,000
Company: Duke Energy Florida LLC.
For the Year Ended December 31, 2019

Provide information regarding individual affiliated transactions in excess of $500,000. Recurring monthly affiliated transactions which exceed $500,000 per month should be reported annually in the aggregate. However, each land or property sales transaction even though similar sales recur, should be reported as a "non-recurring" item for the period in which it occurs.

Name of Affiliate (a)	Description of Transaction (b)	Dollar Amount (c)
Duke Energy Progress, Inc. (as customer)	Recurring monthly shared utility functions and services. See page 457 for description.	$ 7,221,651
Duke Energy Progress, Inc. (as service provider)	Recurring monthly shared utility functions and services. See page 457 for description.	12,316,189
Duke Energy Business Services (as customer)	Recurring monthly shared functions and services. See page 457 for description.	3,065,472
Duke Energy Business Services (as service provider)	Recurring monthly shared functions and services. See page 457 for description.	497,252,002
Duke Energy Carolinas, LLC (as customer)	Recurring monthly shared utility functions and services. See page 457 for description.	5,859,128
Duke Energy Carolinas, LLC (as service provider)	Recurring monthly shared utility functions and services. See page 457 for description.	77,517,600
Duke Energy Indiana (as customer)	Recurring monthly shared utility functions and services. See page 457 for description.	1,307,873
Duke Energy Indiana (as service provider)	Recurring monthly shared utility functions and services. See page 457 for description.	2,522,357
Duke Energy Ohio (as customer)	Recurring monthly shared utility functions and services. See page 457 for description.	864,022
Duke Energy Ohio (as service provider)	Recurring monthly shared utility functions and services. See page 457 for description.	1,379,133
Duke Energy Florida Project Finance, LLC (as customer)	Recurring monthly shared functions and services. See page 457 for description.	758,220
Duke Energy Commercial Enterprises (as service provider)	Recurring monthly shared functions and services. See page 457 for description.	543,916
Cinergy Solutions (as customer)	Recurring monthly shared functions and services. See page 457 for description.	7,304,112

Analysis of Diversification Activity
Summary of Affiliated Transfers and Cost Allocations
Company: Duke Energy Florida LLC.
For the Year Ended December 31, 2019

Grouped by affiliate, list each contract, agreement, or other business transaction exceeding a cumulative amount of $300 in any one year, entered into between the Respondent and an affiliated business or financial organization, firm, or parthership identifying parties, amounts, dates, and product, asset, or service involved.

(a) Enter name of affiliate.
(b) Give description of type of service, or name the product involved.
(c) Enter contract or agreement effective dates.
(d) Enter the letter "p" if the service or product is purchased by the Respondent: "s" if the service or product is sold by Respondent.
(e) Enter utility account number in which charges are recorded.
(f) Enter total amount paid, received, or accrued during the year for each type of service or product listed in column (c). Do not net amounts when services are both received and provided.

Name of Affiliate (a)	Type of Service and/or Name of Product (b)	Relevant Contract or Agreement and Effective Date (c)	"P" or "S" (d)	Total Charge for Year

Nonutility Property (Account 121)

Company: Duke Energy Florida, Inc.

For the Year Ended as of December 31, 2019

1. Give a brief description and state the location of nonutility property included in Account 121.
2. Designate with a double asterisk any property which is leased to another company. State name of lessee and whether lessee is an associated company.
3. Furnish particulars (details) concerning sales, purchases, or transfers of nonutility property during the year.
4. List separately all property previously devoted to public service and give date of transfer to Account 121, Nonutility Property.
5. Minor items (5% of the balance at the end of the year, for Account 121 or $100,000, whichever is less) may be grouped by (1) previously devoted to public service, or (2) other property nonutility property.

Description and Location		Balance at beginning of year (7)	Purchases, Sales, Retirements, Transfers, etc.	Balance at end of year
Previously Devoted to Public Service				
CR3 offsite training and simulator facilities and equipment - Crystal River, FL	(1)	17,578,496	-	434,294
CR 1&2 Land - Citrus County, FL	(2)	2,522,029	(2,522,029)	-
Bartow-Anclose Pipeline Land - Pasco/Pinellas County, FL	(3)	235,425	-	235,425
Land - Marion County, FL	(4)	135,191	-	135,191
Minor Items Previously Devoted to Public Service		184,723	-	184,723
Not Previously Devoted to Public Service				
Land - Volusia County, FL		1,581,627	-	1,581,627
Generators on Customer's Premise - Seminole County, FL	(5)	1,018,090	752,667	1,770,758
Generators on Customer's Premise - Lake County, FL		525,791	-	525,791
Underground Distribution Materials - Pinellas County, FL		499,485	-	499,485
Minor Items Not Previously Devoted to Public Service	(6)	926,429	83,691	1,010,119
Totals		25,207,285	$ (1,685,671)	$ 23,521,614

Notes

(1) Date Transferred to Acct 121: 05/2016

(2) Crystal River 1 & 2 land was inadvertently moved to Non-Utility Property Account 121 when it was retired in 2018. This land was transferred to Plant Held for Future Use in 2019 in order to correct the classification.

(3) Date Transferred to Acct 121: 06/2017

(4) Date Transferred to Acct 121: 07/2000

(5) Activity in 2019 represents generators & HVAC systems installed at customer facilities.

(6) Activity in 2019 includes the allocation of costs for Customer Relationship Management (CRM) system and generators installed at customer facilities.

(7) The reported 2019 beginning balance for certain items is different from the reported 2018 ending balance due to regrouping certain items primarily by moving them to/from the minor items lines.

Number of Electric Department Employees

Company: Duke Energy Florida, LLC
For the Year Ended December 31, 2019

1. The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.
2. If the respondent's payroll for the reporting period includes any special construction personnel, include such employees on line 3, and show the number of such special construction employees in a footnote.
3. The number of employees assignable to the electric department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the electric department from joint functions.

1. Payroll Period Ended (Date)	**12/31/2019**
2. Total Regular Full-Time Employees	**3,254**
3. Total Part-Time and Temporary Employees	**100**
4. Total Employees	**3,354**

Particulars Concerning Certain Income Deductions and Interest Charges Accounts

Company: Duke Energy Florida, Inc.
For the Year Ended December 31, 2019

Report the information specified below, in the order given, for the respective income deduction and interest charges accounts. Provide a subheading for each account and a total for the account. Additional columns may be added if deemed appropriate with respect to any account.

(a) Miscellaneous Amortization (Account 425) -- Describe the nature of items included in this account, the contra account charged, the total of amortization charges for the year, and the period of amortization.

(b) Miscellaneous Income Deductions -- Report the nature, payee, and amount of other income deductions for the year as required by Accounts 426.1, Donations; 426.2, Life Insurance; 426.3, Penalties; 426.4, Expenditures for Certain Civic, Political and related Activities; and 426.5, Other Deductions, of the Uniform System of Accounts. Amounts of less than 5% of each account total for the year (or $1,000, whichever is greater) may be grouped by classes within the above accounts.

(c) Interest on Debt to Associated Companies (Account 430) -- For each associated company to which interest on debt was incurred during the year, indicate the amount and interest rate respectively for (a) advances on notes, (b) advances on open account, (c) notes payable, (d) accounts payable, and (e) other debt, and total interest. Explain the nature of other debt on which interest was incurred during the year.

(d) Other Interest Expense (Account 431) -- Report particulars (details) including the amount and interest rate for other interest charges incurred during the year.

Item	Amount
Account 425 - Miscellaneous Amortization	
Amortization of Acquistion Adjustments for Hines Turbine,

Production Other - Variance Justification

Description 1

The original Bartow station which was placed in service from 1958-1963 consisted of three heavy oil steam generators. In June 2009, the repowering project to replace the three heavy oil steam units with four combustion turbines and four heat recovery steam generators was completed and the Bartow Combined Cycle facility was placed in service. Since 2009-2010 was the first year of operation for the new Combined Cycle station, no outage cost were included in O&M. In calendar year 2023, total forecasted outage cost is $7.9M for Bartow 4A and 4C CTs as well as the Bartow 4S steam generator. The $1.9M unfavorability is the net of the $7.9M Bartow outage unfavorable costs offset by $5.9M base routine favorable costs.

Description 2

The new Citrus Combined Cycle Station started generating cleaner-burning, highly efficient energy in two phases. The first 820-megawatt power block started running Oct. 26, 2018, and the second 820-megawatt power block came online Nov. 24, 2018. The $1.5 billion station is serving 4.5 million Floridians and has replaced generation from plant retirements, including two 1960s-era coal-fired units (Crystal Rive Units 1 and 2) and a nuclear plant. By investing in the new Citrus station, sulfur dioxide, nitrogen oxides and other emissions are expected to drop by 90 percent in comparison to the operation at Crystal River coal-fired units 1 and 2. On May 27, 2014, Duke Energy Florida, LLC filed a petition for a determination of need for the Citrus County Combined Cycle Power Plant Project (Citrus Combined Cycle Project). DEF was granted a determination of need for the Citrus Combined Cycle Project by the Florida Public Service Commission (Commission) by Order No. PSC-14-0557-FOF-EI. In that proceeding, the Commission found that the Citrus Combined Cycle Project, represented the optimal resource option to meet DEF's projected generation need. The $40.0 million in calendar year 2022 O&M is comprised of $18.5M in base routine costs and $21.5M in outage costs. The $20.8 million in calendar year 2023 O&M is comprised of $18.4M in base routine costs and $2.4M in outage costs.

1	
2	
3	Descripiton 3
4	Pursuant to Paragraph 15(a) of the 2017 Settlement authorized the Company to seek Commission approval of up to 700MW of solar projects during the term of the 2017
5	Settlement Agreement, provided that no rate adjustment for Solar projects be implemented in 2018. The cost of the solar projects subject to Paragraph 15(a) of the 2017
6	Settlement shall be reasonable and cost effective and the average cost of all projects submitted shall not exceed $1,650 per kilowatt alternating current (“kWac”).
7	Embedded in the company's 2022 test year are 15 solar stations that meet the net revenue requirements of the 2017 Settlement agreement. The 2022 $15M
8	unfavorability and 2023 $18.5M unfavorability is the base O&M related to the new solar farms.
9	
10	
11	
12	Description 4
13	On July 21, 2015, the Florida Public Service Commission approved the acquisition of the Osprey Power plant of Calpine Construction Finance Company LP by Duke Enrgy
14	Florida as the best way to meet their short term power needs. The Osprey Plant is a natural gas fired, combined cycle facility. It began operation in 2004 and produces
15	approximately 534MW on a base load basis and up to 599MW with additional peaking capacity. The 2022 $12.7M unfavorability and 2023 $14.5M unfavorability is the
16	total O&M related to the Osprey.
17	
18	
19	Description 5
20	
21	All of the generating stations in service and still active since 2010 have a 2022 & 2023 (except Bartow/Bayboro in 2023) O&M that is under the benchmark.

Description 2: Economic Development	5,539	9,874	Page 6 of 6
	$ 14 555	$ 18 866	

Description 1:
The increase over the benchmark is mainly driven by new and expanded groups focused on growth and improving the customer experience with specific drivers in the following areas: Launch of the Customer Experience department to support customer satisfaction focused initiatives such as digital strategy, digital media, web analytics, and program expansion. The Customer Experience staffing began in 2017 and was fully funded by 2020. The Large Account Management team which helps implement customer strategies and build business solutions to meet customer needs. An increase in the Outdoor lighting program administration and business development team to support growth in the lighting business.

Description 2: Economic development expenses increased in 2022 $5.5M and in 2023 $9.9M over the base period in compliance with Florida Administrative Code Rule 25-6.0426 which increased the amount of total economic development expenses allowable.

Book and Tax Treatment of Income from Reacquired Bonds

Book Treatment

When long-term debt is reacquired or redeemed without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation (primarily redemptions for sinking fund purposes), the difference between the amount paid upon reacquisition and the face value plus any un-amortized premium less any related unamortized debt expense and reacquisition costs; or less any unamortized discount, related debt expense and reacquisition costs applicable to the debt redeemed, retired and canceled, shall be included in account 189, Unamortized Loss on Reacquired Debt, or account 257, Unamortized Gain or Reacquired Debt, as appropriate. The Utility shall amortize the recorded amounts equally on a monthly basis over the remaining life of the respective security issues. The amounts so amortized shall be charged to account 428.1, Amortization of Loss on Reacquired Debt, or credited to account 429.1 Amortization of Gain on Reacquired Debt-Credit, as appropriate.

Tax Treatment

Gain or loss on the retirement of long-term debt is recognzied in the taxable year of retirement or extinguishment for federal income tax purposes.

22 Company's Policy on the Timing of Entrance into Capital Markets

23 The Company continuously monitors capital market conditions for opportunities to minimize its overall cost of capital. Each year it develops a financing plan which takes current year debt maturities,
24 capital expenditure commitments and forecasted internally generated funds to determine whether to issue short or long-term debt and the amount of each. DEF's existing short-term credit facilities
25 along with its access to the utility money pool, provide sufficient liquidity and flexibilitiy in determing the amount and timing of long-term debt issuances.

SECTION E - RATE SCHEDULES

PROJECTED TEST YEAR 2023 & 2022

DUKE ENERGY FLORIDA

Duke Energy Florida, LLC
Docket # 20210016-EI
Minimum Filing Requirements
Section E - Rate Schedules

Table of Contents

Schedule	*Witness*	*Title*	*Page*
E-1		Cost of Service Studies	1
E-2		Explanation of Variations From Cost of Service Study Approved in Company's Last Rate Case	4
E-3a		Cost of Service Study-Allocation of Rate Base Components to Rate Schedule	5
E-3b		Cost of Service Study-Allocation of Expense Components to Rate Schedule	6
E-4a		Cost of Service Study-Functionalization and Classification of Rate Base	7
E-4b		Cost of Service Study-Functionalization and Classification of Rate Expenses	8
E-5		Source and Amount of Revenues-at Present Rates	9
E-6a		Cost of Service Study-Unit Costs, Present Rates	11
E-6b		Cost of Service Study-Unit Costs, Proposed Rates	20
E-7		Development of Service Charges	27
E-8		Company Proposed Allocation of the Rate Increase/(Decrease) by Rate Class	34
E-9		Cost of Service-Load Data	38
E-10		Cost of Service Study- Development of Allocation Factors	40
E-11		Development of Coincident and Noncoincident Demands for Cost Study	76
E-12		Adjustment to Test Year Revenue	77
E-13a		Revenue from Sale of Electricity by Rate Schedule	79
E-13b		Revenues by Rate Schedule-Service Charges	81
E-13c		Base Revenue by Rate Schedule-Calculations	83
E-13d		Revenue by Rate Schedule-Lighting Schedule Calculation	109
E-14		Proposed Tariff Sheets and Support for Charges	125
E-14A		Unit Charge/Unit Cost Data by Rate Class	126
E-14B		Development of all RS Unit Costs and GS & GSD Energy Unit Costs	138
E-14C		Development of Time Use Billing Determinants	140
E-14D		Derivation of Revenue Impacts from Customer Migration	148
E-14E		Development of Customer Unit Costs for Non-Residential Classes	149
E-14F		Development of Lighting Facilities Charges	151
E-14G		Development of Premium Distribution Service Charge	160
E-14H		Unitized Cost of Service: Summary of Residential Unit Cost Methodology for Optional Company Offered Load Control Programs	161
E-15		Projected Billing Determinants-Derivation	162
E-16		Customers by Voltage Level	163
E-17		Load Research Data	166
E-18		Monthly Peaks	179
E-19a		Demand and Energy Losses	183
E-19b		Energy Losses	187
E-19c		Demand Losses	189

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: Provide under separate cover a cost of service study that allocates production and transmission plant using the average of the twelve monthly coincident peaks and 1/13 weighted average demand(12 CP and 1/13th AD) method. In addition, if the Company is proposing a different cost allocation method, or if a different method was adopted in its last rate case, provide cost of service studies using these methods as well. All studies filed must be at both present and proposed rates. The cost of service analysis should be done separately for each rate class. If it is not possible to separate the lighting classes, the lighting classes can be combined

Each cost study must include a schedule showing total revenues, total expenses, NOI, rate base, rate of return, rate of return index, revenue requirements at a equalized rate of return, revenue excess/deficiency, and revenue requirements index, for each rate class and for the total retail jurisdiction for the test year.

In all cost of service studies filed, the average of 12 monthly peaks method should be used for the jurisdictional separation of the production and transmission plant and expenses unless the FERC has approved another method in the utility's latest wholesale rate case. The minimum distribution system concept should not be used. The jurisdictional rate base and net operating income in the studies must equal the fully adjusted rate base in Schedule B-6 and the fully adjusted net operating income in Schedule C-4.

Costs and revenues for recovery clauses, franchise fees, and other items not recovered through base rates must be excluded from the cost of service study. Costs for service charges should be allocated consistently with the allocation of the collection of the revenues from these charges. Any other miscellaneous revenue should be allocated consistently with the allocation of the expense associated with the facilities used or services purchased.

If a historic test year is used, the twelve monthly peaks should be the hour of each month having the highest FIRM load, (i.e., exclude the load of non-firm customers in determining the peak hours).

Line No.

This information is provided in separate volumes entitled "Allocated Class Cost of Service and Rate of Return Study" as shown below.
A summary of the results of the cost of service studies using 12 CP and 25% AD production cost allocation methodology can be found on pages 2 and 3 of this schedule.

1. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 1/13th AD
   Projected Twelve Months Ended December 31, 2022

2. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 25% AD
   Projected Twelve Months Ended December 31, 2022

3. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 1/13th AD
   Projected Twelve Months Ended December 31, 2023

4. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 25% AD
   Projected Twelve Months Ended December 31, 2023

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: Explain the differences between the cost of service study approved in the Company's last rate case and that same study filed as part of Schedule E-1 in this rate case (e.g., classification of plant, allocation factor used for certain plant or expenses, etc.)

Type of Data Shown:
__X__ Projected Test Year Ended 12/31/23
__X__ Projected Test Year Ended 12/31/22

Witness: Olivier

Line No.

Duke Energy Florida's last rate case was filed in Docket No. 20090079-EI.

Duke Energy Florida has made the following changes in methodology in this cost of service study:

1. Production-related plant is allocated using a 12 CP and 25% methodology; 75% of production plant is allocated on demand and 25% is allocated on energy.

2. The curtailable rate class and the interruptible rate class are shown as separate rate classes in the cost of service studies, but are sought to be combined as one rate group as was proposed in the prior proceeding.

This information is provided in the separate volume entitled "Allocated Class Cost of Service and Rate of Return Study":

1. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 1/13th AD
   Projected Twelve Months Ended December 31, 2022

2. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 25% AD
   Projected Twelve Months Ended December 31, 2022

3. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 1/13th AD
   Projected Twelve Months Ended December 31, 2023

4. Class Cost of Service Study by Jurisdiction, Retail Rate Class and Function
   Production Capacity Allocation Method: 12CP and 25% AD
   Projected Twelve Months Ended December 31, 2023

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: Provide a schedule by rate class which identifies the source and amount of all revenue included in the Cost of Service Study. The base rate revenue from retail sales of electricity must equal that shown on MFR Schedule E-13a and E-13d. The revenue from service charges must equal that shown on MFR Schedule E-13b. The total revenue for the retail system must equal that shown on MFR Schedule C-4.

Recap Schedules:

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO. xxxxxxxx-EI

EXPLANATION: For each cost of service study filed by the Company, calculate the unit costs for demand, energy and customer for each rate schedule at present rates, based on the revenue requirements from sales of electricity only, excluding other operating revenues. The demand unit costs must be separated into production, transmission and distribution. Unit costs under present rates must be calculated at both the system and class rates of return. Unit costs must be provided separately for each existing rate class, except for the lighting classes. If the company is proposing to combine two or more classes, it must also provide unit costs for the classes combined. Customer unit costs for the lighting class must include only customer-related costs excluding costs for fixtures and poles. The lighting fixtures and poles must be shown on a separate line. Billing units must match Schedules E-13c.

Recap Schedules:

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO. xxxxxxxx-EI

EXPLANATION: For each cost of service study filed by the company, calculate the unit costs for demand, energy and customer for each rate schedule at proposed rates, based on the revenue requirements from sales of electricity only. The demand unit costs must be separated into production, transmission and distribution. Unit costs must be provided separately for each existing rate class, except for the lighting classes. If the company is proposing to combine two or more classes, it must also provide unit costs for the classes combined. Customer unit costs for the classes must include only customer-related costs excluding costs for fixtures and poles (i.e., exclude cost for fixtures and poles). The lighting facilities must be shown on a separate line. The unit costs must include no fuel, conservation, oil backout or related expenses. Billing units must match Schedules E-13c.

Type of Data Shown:

Recap Schedules: E-13b

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: 20210016-EI

EXPLANATION: Provide a schedule which shows the company proposed increase/(decrease) in revenue by rate schedule and the present and company-proposed class rates of return under the proposed cost of service study. Provide justification for every class not left at the system rate of return. If the Increase / (decrease) from service charges by rate class does not equal that shown on Schedule E-13b or if the increase / (decrease) from sales of electricity does not equal that shown on Schedule E-13a, provide an explanation.

Recap Schedules:

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO. xxxxxxxx-EI

EXPLANATION: Provide a description of how coincident and non-coincident demands for the test year were developed. Include an explanation of how the demands at the meter for each class were developed and how they were expanded from the meter level to the generation level. Provide the workpapers for the actual calculations. If a methodology other than the application of ratios of classes coincident and non-coincident load to actual MWH sales is used to derive projected demand, provide justification for the use of the methodology.

Type of Data Shown:
__X__ Projected Test Year Ended 12/31/22
__X__ Projected Test Year Ended 12/31/23

Witness: Borsch, Olivier

For purposes of preparing the Jurisdictional Separation Study, coincident monthly peak load information for individual Wholesale loads and the total Retail load is developed in MFR E-10

For purposes of preparing the Allocated Class Cost of Service and Rate of Return Studies, the Company relied on the most recent Load Research Study for the twelve month period ending March 31, 2018. This information is provided in MFR Schedule E-17. From this load research data, load factors for each class were derived for application to each class' projected annual MWH sales to derive the coincident and non-coincident class demands for the test period. These calculations are in MFR E-10.

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

Florida Public Service Commission

Company: Duke Energy Florida

Docket No.: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Type of Data Shown:

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Type of Data Shown:

__X__ Projected Test Year Ended 12/31/23

Witness: Huber

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

Florida Public Service Commission

Company: Duke Energy Florida

Docket No.: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Type of Data Shown:

__X__ Projected Test Year Ended 12/31/22

Witness: Huber

Schedule E-13c — BASE REVENUE BY RATE SCHEDULE - CALCULATIONS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO: 20210016-EI

EXPLANATION: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedules E-15.

Type of Data Shown:

__X__ Projected Test Year Ended 12/31/22

Witness: Huber

SCHEDULE-E-13d

REVENUE BY RATE SCHEDULE - LIGHTING SCHEDULE CALCULATION

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLOR DA, LLC

DOCKET NO. 20210016-EI

EXPLANATION: Calculate revenues under present and proposed rates for the test year for each lighting schedule. Show revenues from charges for all types of lighting fixtures, poles and conductors. Poles should be listed separately from fixtures.

Type of Data Shown:
__X__ Projected Test Year Ended 12/31/23
_____ Projected Test Year Ended 12/31/22

Witness: Huber

REVENUE BY RATE SCHEDULE - LIGHTING SCHEDULE CALCULATION

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLOR DA, LLC

DOCKET NO. 20210016-EI

EXPLANATION: Calculate revenues under present and proposed rates for the test year for each lighting schedule. Show revenues from charges for all types of lighting fixtures, poles and conductors. Poles should be listed separately from fixtures.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/23
__X__ Projected Test Year Ended 12/31/22

Witness: Huber

SCHEDULE-E-13d

REVENUE BY RATE SCHEDULE - LIGHTING SCHEDULE CALCULATION

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLOR DA, LLC

DOCKET NO. 20210016-EI

EXPLANATION: Calculate revenues under present and proposed rates for the test year for each lighting schedule. Show revenues from charges for all types of lighting fixtures, poles and conductors. Poles should be listed separately from fixtures.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/23
__X__ Projected Test Year Ended 12/31/22

Witness: Huber

SCHEDULE-E-13d

REVENUE BY RATE SCHEDULE - LIGHTING SCHEDULE CALCULATION

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLOR DA, LLC

DOCKET NO. 20210016-EI

EXPLANATION: Calculate revenues under present and proposed rates for the test year for each lighting schedule. Show revenues from charges for all types of lighting fixtures, poles and conductors. Poles should be listed separately from fixtures.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/23
__X__ Projected Test Year Ended 12/31/22

Witness: Huber

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: 20210016-EI

EXPLANATION: Provide proposed tariff sheets highlighting changes in legislative format from existing tariff provisions. For each charge, reference by footnote unit costs as shown on Schedules E-6b and E-7, if applicable. Indicate whether unit costs are calculated at the class or system rate of return. On separate attachment explain any differences between unit costs and proposed charges. Provide the derivation (calculation and assumptions) of all charges and credits other than those for which unit costs are calculated in these MFR schedules, including those charges and credits the company proposes to continue at the present level. Workpapers for street and outdoor lighting rates, T-O-U rates and standard energy charges shall be furnished under separate cover to staff, Commissioners Commission Clerk and upon request to other parties to this docket

Type of Data Shown:
__X__ Projected Test Year Ended 12/31/22
__X__ Projected Test Year Ended 12/31/23

Witness: Huber

This schedule includes all Tariff Sheets of those Rate Schedules and Standard Contract Forms which are proposed to be changed
Proposed changes are highlighted in legislative format.

Unit Charges / Cost Data are provided in the following attachments

Attachment A - Unit Charge / Unit Cost Data by Rate Class

Attachment B - Development of All RS Unit Costs and GS and GSD Energy Unit Costs

Attachment C - Development of Time of Use Billing Determinants

Attachment D - Derivation of Revenue Impacts from Customer Migration

Attachment E - Development of Customer Unit Costs for Non-Residential Classes

Attachment F - Development of Lighting Facilities Charges

Attachment G - Development of Premium Distribution Service Charge

Attachment H - Unitized Cost of Service: Summary of Residential Unit Cost Methodology for Optiona
Company Offered Load Control Programs

Supporting Schedules: Recap Schedules:

Unitized Cost of Service: Summary of Residential Unit Cost Methodology for Optional Company Offered Load Control Programs

Type of Charge	2022	2023	Billing Determinant	Type of Costs Recovered
Customer Charge - $ per Line of Billing	12.77	12.77	Per Customer	Customer
On Peak - ¢/kWh	1.275	1.441	Per On Peak kWh	On Peak Energy
Off Peak - ¢/kWh	1.081	1.243	Per Off Peak kWh	Off Peak Energy
Super Off Peak - ¢/kWh	0.922	1.080	Per Super Off Peak kWh	Super Off Peak Energy
CP Demand Charge - $/kW	13.16	13.62	Per System Peak kW	Production & Transmission
Class Peak Demand Charge - $/kW	5.36	5.40	Per Class Peak kW, last 12 months	Primary Distribution
Customer Max Demand Charge - $/kW	1.45	1.43	Per Customer Maximum kW, last 12 months	Secondary Distribution

Note: This rate design is only applicable for customers who grant the Company the ability to control different customer owned assets outside of, or in addition to, applicable Commission-approved DSM programs.

FLORIDA PUBLIC SERVICE COMMISSION

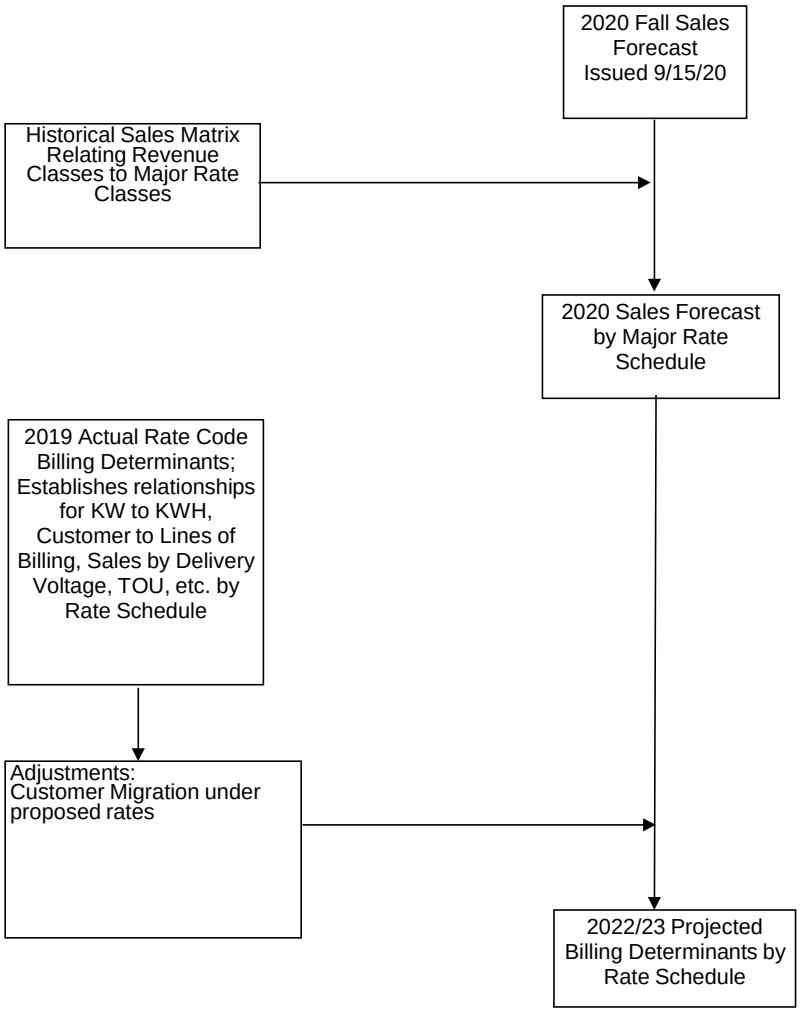
COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: Trace how the billing determinants were derived from the preliminary forecasts used for test year budget. Provide supporting assumptions and details of forecasting techniques. Reconcile the billing determinants with the forecast by customer class determinants with the forecast by customer class in the Ten-Year-Site Plan.

Type of Data Shown:
__X__ Projected Test Year Ended 12/31/22
__X__ Projected Test Year Ended 12/31/23

Witness: Borsch, Huber, Olivier



Provides Customers and MWH by Revenue Class (Residential, Commercial, Industrial, etc.).

Produces Customers and MWH by Major Rate Schedule (RS, GS, GSD, CS, IS, LS)

Produces Lines of Billing, KWH Sales, Billing KW, TOU Billing Units, etc, by Rate Schedule

Supporting Schedules:

Recap Schedules:

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: Provide a schedule of the number of customers served at transmission, sub transmission, primary distribution, and secondary distribution voltages by rate schedule for the test year and prior year. (Customers served directly from a company- owned substation must be listed under the voltage level at which they are served.)

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: For each rate class that is not 100% time metered by time recording meters, provide the estimated historic value and 90% confidence interval by month from the latest load research for (1) contribution to monthly system peaks (coincident), (2) monthly noncoincident peak (class peaks) and (3) monthly customer maximum demand (billing demand for demand classes). For classes, 100% metered with time recording meters provide actual monthly values for the aforementioned demands and identify such as actual values. Also, provide the annual KWH as well as the 12 CP Load Factor, Class NCP Load Factor and the Customer Load Factor for each class.

COMPANY: DUKE ENERGY FLORIDA

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: For each rate class that is not 100% time metered by time recording meters, provide the estimated historic value and 90% confidence interval by month from the latest load research for (1) contribution to monthly system peaks (coincident), (2) monthly noncoincident peak (class peaks) and (3) monthly customer maximum demand (billing demand for demand classes). For classes, 100% metered with time recording meters provide actual monthly values for the aforementioned demands and identify such as actual values. Also, provide the annual KWH as well as the 12 CP Load Factor, Class NCP Load Factor and the Customer Load Factor for each class.

DOCKET NO.: xxxxxxxx-EI

EXPLANATION: For each rate class that is not 100% time metered by time recording meters, provide the estimated historic value and 90% confidence interval by month from the latest load research for (1) contribution to monthly system peaks (coincident), (2) monthly noncoincident peak (class peaks) and (3) monthly customer maximum demand (billing demand for demand classes). For classes, 100% metered with time recording meters provide actual monthly values for the aforementioned demands and identify such as actual values. Also, provide the annual KWH as well as the 12 CP Load Factor, Class NCP Load Factor and the Customer Load Factor for each class.

10				
11	**Methodologies**			
12				
13	Electricity is metered at the source output and at three customer delivery levels on the electric system:			
14				
15	(1) Transmission:	Losses are determined from a load flow study which separates hourly load levels from minimum (40%) to maximum (100%) in 5%		
16		intervals for summer and winter months. The losses derived from the model are divided by the total transmission load which results		
17		in a loss ratio for each interval. The loss ratios are then multiplied by the number of hours with load falling within each respective		
18		interval as determined from the EEI system load deck which identifies system load for each hour in the calendar year. The sum of the		
19		weighted factors is accumulated and divided by 8760 hours in the year to derive the transmission loss factor.		
20				
21	(2) Distribution Primary:	Losses are estimated at an additional 1% over transmission system losses based on engineering analysis and judgment.		
22				
23	(3) Distribution Secondary:	Losses are arrived at mathematically by accounting for losses to transmission and distribution primary customers and subtracting		
24		these losses from the system total losses.		
25

9	Distribution Secondary Substation	4.47%	n/a	n/a
10				
11	**Methodologies**			
12				
13	Electricity is metered at the source output and at three customer delivery levels on the electric system:			
14				
15	(1) Transmission:	Losses are determined from a load flow study which separates hourly load levels from minimum (40%) to maximum (100%) in 5%		
16		intervals for summer and winter months. The losses derived from the model are divided by the total transmission load which results		
17		in a loss ratio for each interval. The loss ratios are then multiplied by the number of hours with load falling within each respective		
18		interval as determined from the EEI system load deck which identifies system load for each hour in the calendar year. The sum of the		
19		weighted factors is accumulated and divided by 8760 hours in the year to derive the transmission loss factor.		
20				
21	(2) Distribution Primary:	Losses are estimated at an additional 1% over transmission system losses based on engineering analysis and judgment.		
22				
23	(3) Distribution Secondary:	Losses are arrived at mathematically by accounting for losses to transmission and distribution primary customers and subtracting		
24		these losses from the system total losses.		
25

DUKE ENERGY FLORIDA
COST OF SERVICE STUDY BY JURISDICTION, RETAIL RATE CLASS AND FUNCTION
PROJECTED TWELVE MONTHS ENDED DECEMBER 31, 2022
PRODUCTION CAPACITY ALLOCATION METHOD: 12 CP and 1/13 AD

DOCKET NO: xxxxxx
SCHEDULE NO. 1F
GENERAL SERVICE DEMAND BY FUNCTION
