Re: Gulf Power Company Revised Fuel Emergency Plan (filed on February 1, 2021)

Dear Mr. Hume,

Pursuant to Rule 25-6.0185, Florida Administrative Code (F.A.C.), electric utilities that own or control electric generation facilities are required to file a long-term energy emergency plan and periodic updates with both the Florida Public Service Commission (Commission) and the Florida Reliability Coordinating Council. The utilities are required to review their plans every three calendar years and either submit a revised plan for Commission approval or provide a letter indicating the adequacy of the existing plan.

On February 1, 2021, Gulf Power Company (Gulf) filed its revised Fuel Supply Emergency Plan (Plan) (Document No. 01823-2021). Commission staff has reviewed Gulf's Plan and considers the revisions and overall procedures of the Plan to be consistent with the requirements of Rule 25-6.0185 F.A.C. Therefore, Gulf's revised Plan is hereby administratively approved. Staff requests that Gulf notify the Commission of any changes to its Fuel Supply Emergency Plan as filed.

Sincerely,

A handwritten signature in blue ink that reads "TOM BALLINGER".

Tom Ballinger, Director
Division of Engineering
