Subject: FPL Proposed Rate increase

I am directly opposed to any rate increase proposed by FPL. They advertise that they are accelerating using Sun power to generate electricity, that alone should demonstrate an operational savings to offset any increase they propose. And, the proposed rate hike outpaces inflation and they should be looking for alternatives to create operational efficiencies in their business.

Not to mention that their disclaimer is longer than their proposal. They are seeking a rate hike with no guaranteed results. This sounds like the corporate giant collecting more money for nothing in return.

Subject: OPPOSE FPL RATE INCREASE

I strongly oppose the proposed rate hike by FPL. As a new resident of Florida as of November 2020, I looked at many locations and found Florida to be affordable for a longterm retirement salary. With proposed 10% rate hike by FPL, I see lots of retirees not able to keep costs down on a low monthly income. If a rate hike is granted, I hope to see a return on investment in the State of Florida and its power grid.

OPPOSED TO A RATE HIKE

Best Regards

FPL Proposed Rate Increase- Make Your Voice Heard

Florida Power & Light (FPL) has filed a request with the Florida Public Service Commission for a 10 percent increase in their rates, over the next four years, to phase in bill adjustments starting in 2022. Several organizations, including AARP, are opposing the proposed rate hike. [Click here to learn more about the plan.](#)
