COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

FPL has No business raising rates when they have money to donate to charities of their choice. I am on a fixed income, and I have not say in how my payments are used? That is immoral. Why? Because FPL rates are approved or denied by a Public service commission, it is by definition a public utility. It should be a mutual company, and its profits (most current estimate of 1.6 billion) and donations to charity go back to consumers.

The FPL rate increases have been greater than my SS increases over the last five years. I resent them giving my dollars to charities of theri choice. Charity begins at home.

Details:

We are seniors living in Century Village, Boca Raton. We understand FPL rates will increase its rates over four years, 18%. Salaries for many working folks and social security for retirement folks certainly will not increase anywhere near what FPL is requesting for its rate increase. We plead with you, especially, after this corona virus, to consider all the people out of work and seniors. Please do not allow such a great hike in FPL utility bills for electric usage by its customers. Thank you.
