**Re: Post second workshop comments; Docket No. 20200181**

Dear Chairman Clark, Commissioners Graham, Fay, La Rosa, and Passidomo,

As energy efficiency professionals, we ask that you modernize your outdated economic screens, like the 2-year payback screen and the Rate Impact Measure (RIM) test as part of your rulemaking process. These screens produce bad economic outcomes for Florida's families and businesses – leading to unnecessarily higher electricity bills. By updating these decades-old practices to reflect modern industry practice, the state can stimulate investment in energy efficiency and thereby capture the many economic benefits of using energy smarter. Energy efficiency programs lower electric costs for thousands of Florida families and businesses and drive innovation, economic development and jobs in local communities, and a cleaner more reliable grid.

Thank you.

Sincerely,

Ann Vanek-Dasovich
