Comments:

I understand that Florida Power and Light is looking for an 18% increase over three years. Well thats unacceptable. How could you approve it when my SS goes up maybe 2%. You guys are supposed to be looking out for the tax payer not the stock holder. Maybe you guys forget who you work for. Everytime they say there is a rate decrease they come up with another increase so everything is a wash. Thanks for your time I know my comment dont make a hill of beans but thanks anyhow

COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

I am aware of FPL's requested rate increase of \$2 billion in their base rate over the next 4 years. I understand the average FPL customer's bill would increase by 18% over the next 4 years. As a retired 70 year Floridian on a fixed income, I am already worried about the increased inflation effect on food, housing, and health costs. I hope I won't have to pay increased energy costs since my Social Security check increase was only 1.3%. I hope you will consider my position in your deliberations on the rate increase. There are many Floridians in the same situation.

Against the proposed utility rate increase requested by Florida Power & Light. We are on a fixed income and are opposed to paying higher energy costs.

Subject: Proposed Utility Rate Increase

As a full-time Florida resident, I oppose the proposed \$2 billion utility rate increase in the base rate over the next four years.

This increase would raise my bill by at least 18% over the next four years. How are residents on fixed incomes supposed to come up with the money to pay their utility bills with such a large increase?

Sincerely,

A concerned citizen and long time FPL customer

I wanted to voice my concern about proposed rate increases for FPL. I am a senior citizen on limited income and an increase that could be 18% over the next four years is excessive. Please consider people that have limited income when making these kind of base rate adjustments. Thank you.

On Fri. July 2, the value of my investment in NEE/FPL was \$396,209.52 So you can see that I profit from your GREED. But you should also see, I'm not so greedy. Yes, my holdings would increase in value, maybe an ADDITIONAL 18% over 4 years. But I would rather do without the extra "moolah" into my investment account at the expense of many Floridians who will be seriously financially hurt by the increase so your corporate officers and Board members , lobbyists, (and me) can get even richer.

Have a heart. Don't let Karma bite you you know where.

Subject: Gulf Power rate increase

Dear Sir/Mam

I am Timothy Godwin and live in northwest Florida and I heard Gulf Power is or will be asking for a rate increase. I have some issues with the request. I have seen several TV commercials from them saying that our bills are lower because they invested in renewable energy (solar) and had received some mail saying the same thing pretty much. Now I have a problem with them saying our bill should be lower and now they are asking for a rate hike. They also converted the coal plant in Pensacola to natural gas. We as consumers and customers did not ask for the conversion and I for one do not feel we as rate payers should pay for their decision to convert. Also solar is cheap and it is cheap to operate, (next to no maintenance required) then they are pocketing a good bit of money and they should be passing that savings to the customer, not asking to raise our rates. If they are serious about saving money and being good stewards, they could stop wasting probably a good bit of money on advertising. It's not like we have a choice of who we get Power from.

Thank you for your time

Sincerely
Timothy Godwin
