To whom it may concern:

An email went out in my neighborhood about the proposed rate hike from FPL. Please refer to docket #20210015-EL. I live in the Sapphire Shores/Indian Beach area of Sarasota. My power bill is already \$125 a month and we aren't even in the hot part of the year yet.

I live alone. My only source of income is Social Security. There are powerlines that go from my house to two different poles in my backyard. (very unsightly, and yet I pay the same amount as other neighborhoods where the powerlines are buried).

Every time there is a bad storm we lose power. We were told beginning January 2020 the powerlines would be buried, but FPL never started this project. Additionally, the power goes off for a few seconds in this neighborhood at least once a week. Which causes me to have to reset all my clocks.

I feel quite certain if you check the FPL profits from the year 2020, you will agree there is absolutely no need for a rate increase. The profits they currently maintain are very high, as are the salaries and bonuses of the executives.

Please do the right thing and deny the request for a rate increase to FPL for the Sarasota area.

Thank you for your consideration,

Kara Alexander
