**To:** Office of Commissioner Passidomo  
**Subject:** Reject FPL's harmful and shortsighted rate hikes

Dear Commissioner Gabriella Passidomo,

As an FPL customer, I urge you to reject the company's proposed rate increases.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

It is not in my best interest to be paying for fossil fuel plants that FPL wants to run for the next fifty years - when FPL should be committing to a rapid transition to a 100% clean energy system.

It will not serve the public to charge us over \$10 billion for purported grid "investments" (over \$900 per customer!) that will only deliver a couple of minutes of improved reliability every year.

FPL's plan ignores the most cost effective resource - energy efficiency - at every step of its plan, instead choosing to expose us to even more risks due to rising energy costs.

FPL doesn't propose a single new program or protection for its most vulnerable customers, in contrast to other utilities that are implementing new disconnection safeguards, efficiency offerings and programs to help customers access clean energy to lower bills and become more energy resilient.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FPL's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

Sincerely,  
Judy Ortner  
6201 SW 50th St Miami, FL 33155-6242

**Subject:** Reject FPL's harmful and shortsighted rate hikes

Dear Commissioner Gabriella Passidomo,

As an FPL customer, I urge you to reject the company's proposed rate increases. I find it extremely unethical. Also, though I have enough solar PV panels to power my house, and generators can automatically make it safe for FPL workers when the generator kicks on, but my panels cannot produce power from the sun when they do not receive a signal from FPL due to a power outage!!!

Also, time and money is being used to chop down beautiful old trees, erect taller and uglier power poles, instead of putting power underground where it would never have a problem in our Florida hurricanes.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

It is not in my best interest to be paying for fossil fuel plants that FPL wants to run for the next fifty years - when FPL should be committing to a rapid transition to a 100% clean energy system.

Dear Commissioner Gabriella Passidomo,

As an FPL customer, I urge you to reject the company's proposed rate increases.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

It is not in my best interest to be paying for fossil fuel plants that FPL wants to run for the next fifty years - when FPL should be committing to a rapid transition to a 100% clean energy system.

It will not serve the public to charge us over \$10 billion for purported grid "investments" (over \$900 per customer!) that will only deliver a couple of minutes of improved reliability every year.

FPL's plan ignores the most cost effective resource - energy efficiency - at every step of its plan, instead choosing to expose us to even more risks due to rising energy costs.

FPL doesn't propose a single new program or protection for its most vulnerable customers, in contrast to other utilities that are implementing new disconnection safeguards, efficiency offerings and programs to help customers access clean energy to lower bills and become more energy resilient.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FPL's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

Sincerely,

Angel Martinez

6215 W 22nd Ct Hialeah, FL 33016-6941
