Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

It is sad how FPL has been inundating the airwaves of late with the touting how they have such clean energy yada yada yada when they will not come out and straight out say that they have no solid carbon emissions reduction goals for the future. I am however very happy that FPL is supposedly going to run their power lines underground in my neighborhood in the City of North Port, FL come spring of 2022.

FPL and its parent company need to do more towards reducing carbon foot print, using more Solar/Wind and other sustainable sources of energy.

Thank you,

Karen Coglianese
