**Subject:** Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Politician's need to work for the people not big business. Florida has serious climate change problems and the energy sector is a significant contributor to the drivers for climate change.

I am a 30 year executive in the energy industry, Money can't be more important than the survival of our Ecosystems, we live in a biological world first. I will be voting to remove any Politician's who continue to vote and act with Lobbyists and Corporations over people and the planet. In my house that's 4 votes so the math.

Tell us what your doing and answer the questions asked. No more money without the facts. You are charging for infrastructure for eov that has Federal money and private sector resources, where are the wind farms? Roi per Square foot on a Wind farms are very good, low impact and lots of land to build on in Florida.

Do your job.

American Citizen.

Thank you,

Hermes Sanchez
