Hello Rich,

Only one comment from me. Since this PA is addressing one undertaking for Section 106 purposes, there needs to be one final finding of effect for the undertaking. Stip. III.B.1.c. should refer to Project, rather than resources under consideration. The provisions under Stip. IX should allow for construction to begin in some areas, before the final finding of effect. Otherwise the changes look acceptable to me.

We are reviewing the Archaeology Testing Plans and will send comments for those in the next few days.

Thank you,
Jason

Jason Aldridge

Folks,

Attached is a revised version of the NFRC Transmission Line Programmatic Agreement (PA) with the USACE General Council (GC) comments. I have addressed the questions and comments made by the USACE GC; the other corrections simply make this a cleaner document.

Please review these changes. Most are minor clarifications to timelines or statute references. As soon as we get word back from the Advisory Council and the Tribal consultation is complete, Gulf Power would like to get this signed.

The appendices have not changed, but if anyone needs fresh copies just let me know.

Best, Rich
