**Subject:** Objection of Palm Island Sewer Project

Good afternoon,

My RaeAnne Brenneise, my husband Paul and I reside on Knight Island at 47 Bocilla Dr. Placida FL where we have lived for the past 8 years.

I am writing you today to object to the sewer project that has been brought to our attention. We have had septic, our aerobic sewage treatment system has been monitored, treated, and has passed all necessary maintenance requirements twice yearly with absolutely no issues, which leads me this letter and why one man who does not know me, does not maintain our septic, care for our lawn nor has ever paid taxes on our PRIVATE property can suddenly be responsible for telling us what must be done to it.

As you well know our lives have all been impacted by covid for the past two years, which has led to families having their income decreased, losing health insurance and some have even lost income, the financial strain has affected all of us. The hardship this would cause many families out here is undeserved and unfair. I have never inquired about a sewer because what we have has been proven tried and true. To entertain one man's greed to while creating even more of a financial strain on hundreds of others is not even questionable in my mind. This would be a continued issue of expense, while we have already experienced what happens once an individual is able to "run the show" with our Bocilla water. Englewood water charges a base and Bocilla utilities can charge as they see fit, which without sewer is almost half of our base water. If you do approve this there is not guarantee the price of installation or monthly cost, On top of the need of having to purchase a separate generator possibly changing electrical panels and the cost itself there would be a monthly fee of approx. 178.00 for sewer only. That 178.00 is a week worth of groceries or a much needed prescription for a not needed sewer system that is being pushed by an unexperienced and unlicensed individual who sees money instead of people. People that this could hurt financially for quite a while. Only to feed the greed, because I know it would not improve my life or day to day living.

There is not enough transparency with the project, the cost or the individual. The red flags are all there. That's why today along with my Island friends and family we stand together as we beg you not to approve the project, Its time to put the almighty dollar aside and stand on the side with human decency and compassion.
