**Subject:** Observation of Florida Public Service Commission

Andrew,

Everywhere FPL goes it manages to wreck the lives of under privileged communities.

The reason they do as they please is the relationships with the Governor and your Commission. I experienced this in Orlando and now hear in Okaloosa County.

"FPL and Duke Energy, the largest electric utility in Central Florida and the state's second-largest, are raising rates in part to cover the costs of expanding renewable energy."

I'm a Service Connected, Disabled Veteran. I have seen 1st hand, corruption at the highest levels of our Government and its always fueled by greed, never enough, by those living in alternate universe that are never effected by their decisions. Like Congress authorized and protected from Insider trading prosecution. In the real world they are required to submit a OG Form 450, Financial Disclosure every year, which is covered under Freedom of Information Act. I have lived in Egypt, Dubai, Qatar, Panama Canal and Bali. I have seen every level of corruption along the way. We "The Soldiers", fought for freedoms of every class of US Citizens and this situation just leaves me empty.

I love Florida State University and have attended classes and was at Doak Cambell for the start of the "Wide Right" Jinks.

Every time, I here the words Florida State the "Young Rising Star" face will pop in my head. The thought will be of the poor, suffering and stressed out families caused who can't afford their utility bills. I owned a house in Dr. Phillips, worked on Disney properties during Irma, and suffered extended electric outages. Guess who was in charge?

I'm currently reading the book, "The Holy Spirit" by John Bevere. It's a quick read but is life changing to someone's Morality.

Hopefully, the armies of the Lord will strike down the approval now at the Supreme Court level.

"Welcome to the family" The Tag Line on the FPL Website?

We are committed to serving you and Northwest Florida today while always looking over the horizon. See what to expect as an FPL customer?

1.  
U.S. Supreme Court  
FPC v. Florida Power & Light Co., 404 U.S. 453 (1972)  
Federal Power Commission v. Florida Power & Light Co. No. 70-38

2. Miami-Dade Circuit Judge David Miller issued the order last month, noting that the plaintiffs had shown that the case meets all requirements for a class action. The plaintiffs allege that Florida Power & Light was negligent and breached its contract with customers by failing to fully prepare for the storm or to "harden the system," despite collecting a surcharge for that purpose.

3. The Senate Communications, Energy and Public Utilities Committee unanimously approved both measures Tuesday, despite objections from AARP and proponents of alternative energy.

"It's not surprising because the big investor-owned utilities have traditionally gotten their way in the Florida Legislature," Susan Glickman, Florida director of the Southern Alliance for Clean Energy, told reporters after the meeting. "We don't

capture energy efficiency in the state of Florida, and we're building power plants that we don't need, and consumers will pay for that for decades."

Andrew, do you see a pattern here?

FPSC, Everything is under your watch. How will history remember your support for raising the rates on the poor using the same tactics that now are recognized by Florida Power & Light was negligent and breached its contract with customers by failing to fully prepare for the storm or to "harden the system," despite collecting a surcharge for that purpose.

I have purchase a Mixed Use Development lot in Okaloosa County that is ready to start the development. I'm ready to have (3) custom homes built on the lot value will be 1 million and above. I already own a 5 bedroom home in the County.

After reading about all the suffering your Commission has caused the poor, my decision is on hold. This situation is the reason the poor will never get ahead because of "For-Profit", Government Supported increases of rates with no accountability.

My father's advise, "Every Man, Women and children has the exact same needs on this earth". Powerful!

I doubt you'll ever see this email because it will be deleted by your email review team. The "One" above knows his instructions "to stand up for the poor and widower" while on this earth.

Respectful,

Rodney Bath
