Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mr. Timothy Monson

Dear Chairman Andrew Fay,

Generally speaking, a for profit business invests its own profits into new infrastructure, not raising prices on products to fund new endeavors. The same should be true with FPL.

I have not been happy over the years with the job that the PSC does. Most often it seems to just be a rubber stamp process. I'm asking you to actually perform your due diligence in this case.

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. Sent: Monday, June 13, 2022 9:19 PM
To: Office of Chairman Fay
Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I was alarmed to learn that Florida Power and Light's (FPL) preferred 10-year site plan proposes a new, expensive and unnecessary gas plant. The unsubstantiated justification given regarding winter weather forecast is extremely unlikely. FPL's projections will increase bills before even being relevant to meet our state's energy needs. The fact that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers offers a perverse incentive for FPL to build more than what we actually need.

New commitments to fossil fuels, including natural gas, will take Florida in the wrong direction. Floridians want more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months. We want to invest in a renewable energy future and not be tied to forever profits for fossil fuels that are destroying our planet.

I am requesting that the Commission reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Ms. Caryle Cammisa

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Chairman Andrew Fay,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Ms. Linda Williams

Dear Chairman Andrew Fay,

You are letting them get away with this for political gain and money. This is disgusting. They just increased the base charge by 200%! Where are your ethics?!?!?

Sincerely,

Mr. Michael Collins
