**Subject:** Minimum Base Bill with FPL

Commissioners,

I just received my FPL bill and am outraged at this new "Minimum Base Bill". I put Solar panels on my home 1 year ago this month to help myself financially in the future, help FPL to keep up with all the growth in Florida and their desire to use Solar and to Support the Climate Change movement of reducing carbon emissions.

Now you are allowing FPL to charge me money for power they don't provide me, a burden I don't put on their grid and Solar power I'm giving them to sell to their customers at a higher price than they need to purchase it from me, should I not use it by years end.

I'm efficiently generating power for my home. I have a bill to pay for my Solar panels and the additional \$17.44 per month added to my FPL bill for no apparent reason is to squash the consumer and reward the monopoly.

What are you doing to help this Earth and the people that live in your state? People can't afford housing, gas & food right now and it's your bright idea to add to their utility bills to hurt them further. People can't choose the electric company with the best price and they can't choose to go without electricity. We are hostages.

Thanks for tightening the noose around the necks of the Florida residents. Not sure why you hate us so much.
