Florida Public Service Commission

To whom it may concern,

I am writing to express my ongoing deepest disappointment that the electrical utility industrial sector continues to mismanage the electrical infrastructure throughout the State of Florida despite given unfettered access to elected and appointed government officials and agencies in the furtherance of policies and agendas in pursuing poorly thought out sourcing of energy resources and a decidedly anti-consumer stance with the rate-paying public across the board. Ongoing investigations continue undercover the long-standing practices by these captains of industry to extract ever larger fees and electrical rates to aggrandize their oversized ambitions by direct and indirect political arrangements in backrooms.

The attached documentation clearly indicates the lengths that the electrical utility industrial sector continues to pursue to ensure their monolithic position in the electricity sector in the State of Florida.

Please place these observations and articles in the appropriate docket to underscore the overwhelmingly

calculated cold-hearted manner that these captains seem to influence the very elected/appointed representatives that should, instead, be seeking to comfort their constituents day-to-day hardships to pay for the aggrandizement of these out sized economic sectors. Even retirees on extremely limited income and practically no usage are being fiscally "taken advantage of". Entirely shameful and disgraceful corporate usurious behavior by these captains of industry.

Thank you for your time in these matters and hope to hear from you soon.

Sincerely,  
Beatrice Balboa
