COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company

Details:

Question: what line item on an FPL bill is designated for maintenance and building out infrastructure of the electric delivery system?

I find it very peculiar that your commission would approve both a rate increase for fuel and non-fuel energy charges, but additional fees approved by commission for 'low use customers'. In the case of solar customers, who want to conserve energy, this helps FPL meet demand without 'always' having to build new generating facilities to meet increased demand. To punish customers who at 'low use' is insane. These are the people who help FPL lower overall consumption.

Also interesting is the way FPL tried to get state legislators to get rid of net-metering for solar customers.

Does't seem like the commission or legislature are working for the best interest of 'ALL' consumers in the FPL network. What will eventually happen is solar customers will go 'off grid' and lockout any fees to FPL. But then the commission and legislature will do something to squeeze money out of 'off-grid' customers.

Thanks
