COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

I have installed Solar Panels on my residential home and I am frugal with Air Conditioning to reduce my green house gas emissions. Without warning, FPL has added a \$25 per month fee for "Electric Service Amount" to my June 15 bill. This increases my monthly bill from \$10.78 to \$29.96 in every month that I use less than \$25 of electricity from FPL.

I understand that this "Electric Service Amount" charge stems from a settlement agreement, which will be considered for final approval in October 2022.

I am complaining about this unfair charge, and asking the Office of Public Counsel to oppose final approval in October.

It is urgent for Florida to reduce fossil fuel emissions, and I am doing my part. FPL should be embracing residential solar in its strategy to reduce fossil fuel emissions, but instead they have deployed multiple strategies to disincentivize residential solar. This is the most recent example.
