**Subject:** We Can't Afford Higher Rates from FPL

Chairman Gary Clark,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to find work.

I urge you to reconsider this rate increase.

**Subject:** FPL Net Metering Solar Bill Caluculation

Hi Commissioners and PSC,

My Name is Pramodh Gadipudi and I live at 285 Holly Forest Dr, St. Augustine, FL 32092.

I installed Solar on my Rooftop in April thinking that I can save some money on electricity and also help the environment with Solar.

From June 1st FPL has increased the Minimum Bill to 25 Dollars instead of 9 Dollars even if we have the net metering , Not sure their Calculation is correct. They are charging us(Solar equipped customers) after deducting whatever we have generated and making it seem like we have not used anything from FPL.

FPL delivered me 454 kWh and I Delivered them 780 Kwh, that means I did use 454Kw from the FPL. They are not thinking of this as my Usage in that Minimum Charge .

They are first Subtracting it from Delivered Power first and Billing me 25 Dollars. This is Kind of One way and Discriminatory against Solar and Non-Solar Customers.

If they Consider my Usage in Minimum Bill First that is first 240KW and after if they Deduct what ever i have delivered, that make sense for me and Also FPL

FPL is kind of Calculating one way and Charging Solar Customers . Please take this in Consideration and Help us . We paid lots of money to Solar and Also paying to FPL Now.

In these tough times, you should help the Solar customers from these Monotony and blood sucking companies.
