COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

In our community most residents are retired living on fixed incomes. We have wells for our irrigation systems that use electric pumps. We have separate electric meters for these well pumps. Recently, say about 3 months ago, FPL implemented a minimum monthly charge formula. Prior to the minimum monthly charge the electric bill to run the pump was around \$15 or \$16 dollars. Since the implementation of the monthly minimum charge our bill has been \$30 or \$31. It seems unreasonable to me for our well pump bill to have doubled.

I feel that the Public Service Commission should take another look at this rating fiasco and amend the monthly minimum to apply to homes and businesses. A meter that is present for only the well pump should not be subject to the minimum charge formula.

Respectfully,
Stephen Hippensteel
