Subject: FPL's Rate Increase request

To whom it may concern,

I am reaching out in regards to Florida Power and Lights's (FPL) request to raise rates for businesses to, "recover costs associated with two hurricane restorations and the volatility of natural gas prices during 2022" As a small busiess owner who had been in buisness for almost 16 years, I respectfully ask that you consider what this can do to businesses llike ours. We have already seen a significatant increase in our bill since FPL took over to the point where we have not used our heater all winter nor our AC on the warm days. Our coustomers have noticed and question us about it costistanly. Minimum wage may have gone up and so have other wages but as a small business owner I can not afford to raise our pay. These last two years have been the worst two years of our business and this rate increast will do nothing but hurt us more. I am sure there are other small business that are feeling the same.

They provide the inforstructure and we pay for that but because there was a couple of storms that caused damaged the customers should not be responsible for convering the reapre cost top keep FLP's revenue in line.

Thank you for your time, Please feel free to reach out if you have any addtional questions.
