We are writing in opposition to the subject application of Environment Utilities LLC for central sewer on our islands. The PSC Commissioners previously ruled against EU. Nothing has changed since that ruling. We have not requested this service as our present septic systems are providing waste removal that meets our needs.

The water quality tests that were submitted by us have not changed.

This application, that you ruled against previously, has not changed our needs and should not receive approval.

EU is a for profit LLC, that has no goal other than profit for this application. We islanders would incur a dramatic installation cost and a ridiculous monthly sewer charge as demonstrated in their previous application.

There has been no change in our needs since the first application was denied. Therefore, we respectfully request that the PSC rule against EU's application.

Thank you for your previous ruling and your continued support.
