Subject: RE: Docket #: 20240032-SU

Good Afternoon, Susanne Stubbs.

We will be placing your comments below in consumer correspondence in Docket No. 20240032, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover
Commission Deputy Clerk I
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399
Phone: (850) 413-6467

PLEASE NOTE: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are considered to be public records and will be made available to the public and the media upon request. Therefore, your email message may be subject to public disclosure.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Board of Commissioners,

My name is Susanne Stubbs and I live at 352 S Gulf Blvd, Placida, on the barrier island of Don Pedro Island. I am a full-time resident. I am writing to implore you to deny the EU's application for wastewater service for our barrier islands: Palm Island, Knights Island, Don Pedro Island, and Little Gasparilla. My, and our fellow residents reasons for denial request are numerous and reasonable.

Environmental burden and function:

Having experienced Ian and it's aftermath, there is no way that the proposed sewer would have been positive; it would have been a disgusting, disastrous environmental situation for our home and island (there are still areas that still need addressed as well as we still haven't resolved with insurance carrier / rebuilt our home).

Additionally, we feel this has already been resolved based on your earlier evaluation and decision (thank you).

Costs:

The initially cost is truly unknown and monthly costs will be exorbitant and a burden.

There is no proof that this request is even necessary. It has the potential to have disastrous implications, if not maintained properly. And we are not convinced that the majority of our neighbors even renters have the capacity to run the system appropriately without negative impact on the environment.

There are numerous reasons not to move forward on this, all of which have been stated and proven in the last round of discussion and decision.

We will not be hooking up.

Respectfully,

Susanne Stubbs
