As a retired senior citizen on a very limited income

I can NOT afford a rate hike!

I already never have my air conditioner set below 78.

It's usually set at 79 or 80!

I burn candles at night when watching TV, despite only using energy efficient LED bulbs.

I actually spray refrigerated water on me when going to sleep so the ceiling fan can cool me off!

I rarely use my central heat on any cold days in the Winter.

I just bundle up in the house and drink hot liquids.

This is how I am forced to live because Duke Energy already has exorbitant rates!

They are also seeing record profits.

Time for the CEO to take a pay cut because I, and other low income residents of Florida, have already cut our budgets to the bone.

Enough is more than enough!
