### CUSTOMER COMMENTS

It has come to my attention that Florida utility companies have only invested in solar power generation over the last 5 years. They also plan to only invest in the most costly energy source, solar power, over the next 10 years. Solar is not consistent throughout the day and will cause brownouts like Texas, California and Spain. You must ABA UDON solar energy NOW, and invest in reliable, lower cost energies - coal, natural gas and nuclear. Florida will not be able to grow its economy without cheap, reliable energy. Your job is to Deliver It!  
Thank you!
